GET THE LION'S SHARE

The one sure way to capture the lion's share of the refrigerator trade and profit in your vicinity, is to sell the White Frost Refrigerator.

And the selling is easy, too. Our educational advertising is a great help to you. We have been preaching the gospel of sanitary refrigeration through the leading publications so long, that White Frost Refrigerators need but little assistance to sell fast and stay sold.

No other refrigerator will give the same lasting satisfaction that the White Frost does, because no other refrigerator is constructed on the same hygienic principles. It gives complete and lasting satisfaction. Every White Frost you sell will bring other sales.

Here's Why

ECONOMY. The White Frost isn't only economical in ice saving, but it is strong and durable. There is but little to wear out about it, being made of metal. The price is low, and the satisfaction it gives is big.

CONVENIENCE. White Frost Refrigerators are round, beautiful in appearance, enameled inside and out -- and the enamel is baked on. They are simple to clean, and easily kept clean. The revolving mesh net shelves are adjustable, and can be quickly removed and replaced.

SANITATION. Being round in shape, there are no places for dirt and refuse to lodge in the White Frost Refrigerators. They never get foul or offensive. They keep the food cool, pure, sweet and wholesome. The whole inside can be taken out, scalded, cleaned and replaced in a few minutes.

The time to get in line is now. Place your orders early to ensure prompt delivery. The advertising is now appearing—the season is at hand—the demand is created—sales are half made—get White Frost Refrigerators, and close the sales and make the profits.

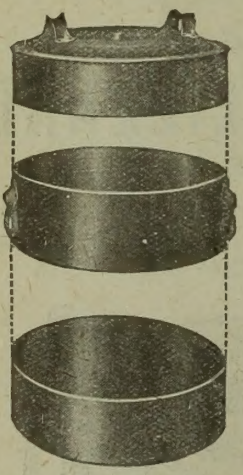
You should have a catalogue showing the hundreds of handsome designs of

"METALLIC" Ceilings and Walls



IT MEANS DOLLARS AND CENTS TO YOU

Tell your fellow-merchants of the money-saving, sanitary and durable features of "Metallic." It reduces the insurance, cuts out the ordinary plaster ceiling repair bills, and adds greatly to the appearance of a store. "Metallic" lends readily to any style of decoration desired, and, furthermore, lasts a lifetime. The first cost is all the cost there is to "Metallic" Ceilings and Walls.

If you haven't a Ceiling and Wall illustrated catalogue, write for one to-day. Send us the names of your prospects. We will assist you by mailing them full information and illustrated booklet—"Interior Decoration in Metal." Send measurements of store for complete estimate of cost.

Manufacturers of "Eastlake" Metallic Shingles—Metallic Sidings — Cornices — Lath — Skylights — Ventilators — Finials — Conductor Pipe — Eavetrough — Fire-proof Windows and Doors, Etc.

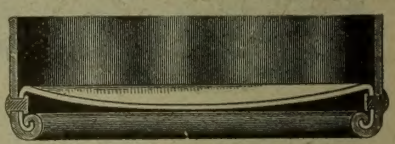
S.M.P. Factory Milk Can Trimmings

Broad Hoop Pattern Roll Rim Bottom

ARE UNEXCELLED FOR STRENGTH AND DURABILITY

The Roll Rim has no sharp turns, therefore the grain of the metal is not broken, and having a broad wearing surface on the bottom, it cannot damage floors. Ample space is left between the bottom and the hoop for the insertion of the Body of the Can. It is the neatest in appearance and strongest in construction and is supplied with Concave Bottoms. By examining the cut, anyone can readily see that this style of construction makes it the strongest bottom ever produced. They do not cost any more than an inferior bottom. If you want to keep ahead of you competitors, use our Roll Rim Milk Can Bottoms.

We also carry in stock Tinned Iron, cut to size for Milk Can Bodies which we can supply promptly



COMPLETE SETS

Comprising one broad hoop, roll-rim bottom, concave pattern; body hoop 6 inches wide, 20 gauge; top hoop 4 inches wide, 14 gauge; one cover; one pair malleable side handles with ears; one pair steel top handles.

Gallons	10	15	20	25	30	40

DOMES of SILENCE

(INVISIBLE CASTERS)

Patented in Canada

Beware of Cheap Infringements.

=

All rights will be protected.

Easily Applied—Never Wear Out

Furniture Dealers find that their Furniture sells easier when fitted with

Domes of Silence

The public are tired of the old-fashioned caster.

Many of these dealers use Domes of Silence as a selling argument in favor of their goods.

Extract from Cambridge University Press advertisement offering Bookcases for "Encyclopaedia-Britannica":

"Single tier, solid mahogany, especially designed in the Georgian tradition and carried out in selected wood of finely figured grain, joined without screws, 4 dividers, fitted with **Invisible Metal Casters** (**"Domes of Silence"**), a most attractive piece of furniture."

A Chair or Table in your Store fitted with "Domes of Silence" will make sales to almost everyone you exhibit it to.

Samson
Ready Roofing

Better than shingles for new or old roofs, and always pliable. Not affected by heat or cold--water-proof, storm-proof, wind-proof. Easy to lay and good for many years of satisfactory service.

Dealers who handle this line are keeping busy with Repeat Orders. No difficulty whatever in selling, once properly introduced. The quality is there or the Samson name and guarantee would not be used. We make sure of that before we put it on the market.

Samson Roofing not only carries value for every cent of price, but it shows it in every roll.

Tobin Simplex Guns

Recommend the Tobin Gun to your customers. We back it up with a guarantee which says that every Tobin Gun must be satisfactory in every respect, or the purchase money is refunded.

The Tobin Gun is manufactured in Canada, and consequently sells for a lower price than imported guns of an inferior quality. The dealer who is ready to answer inquiries concerning the Tobin gun and supply them to his trade, will reap the benefit of our advertising. Tobin Guns possess new and exclusive features in the hammerless type. They are simple in construction, and the ease with which they can be taken apart for examination or cleaning makes them fine sellers.

Accurate shooting—superior materials—finished workmanship—these are points on which the Tobin Gun sells.

We want a representative dealer to handle our guns in every town.

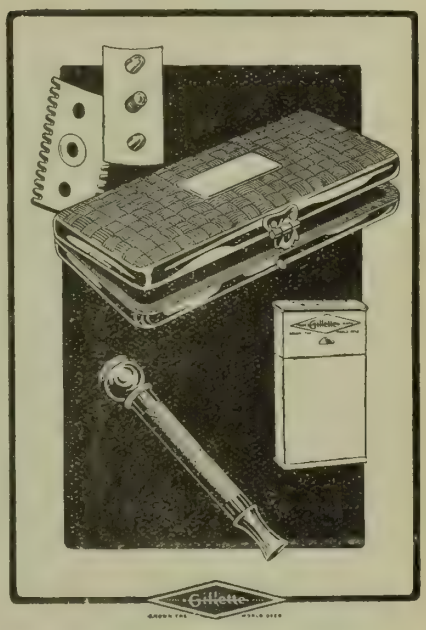
The GILLETTE Deserves Real Salesmanship



And Pays Well For It.

The **GILLETTE** Safety Razor is a specialty—a proposition mighty different from a staple like a keg of nails. It deserves a different type of salesmanship—and pays well for it.

Your nail sales are limited, absolutely, to the quantity your customers **have to buy.** When they need ten pounds they come to you and buy ten pounds, though you may never have displayed a nail or tried to sell one. Salesmanship is unnecessary, and the best of it could scarcely increase your sales.

But your **GILLETTE** sales are practically limited only by the quality of your salesmanship. You may sell hundreds, dozens, or none at all, according to the way you handle them.

Nearly every man in your neighborhood is a possible **GILLETTE** buyer. He has read our advertisements, and probably talked with enthusiastic users, and is convinced. He **wants** a **GILLETTE.**

But he **can** get along in the old way, without it, and if he is an average human he probably will, until you add **your salesmanship** to our advertising (or some other dealer does.)

A **GILLETTE** Depot Sign on your store front—a snappy **GILLETTE** window display—a tempting lay-out, on counter or in silent salesmen, of the handsome Pocket Editions, Standard Sets and Combinations—a tactful suggestion to the customer who is leaving—a **skillful** demonstration of the fine points of the **GILLETTE**—this type of real selling ability will bring in an amount of **extra business** that will surprise you.

THERE ARE NO DULL SEASONS WITH THE **GILLETTE.** IT IS ALWAYS IN DEMAND.

The Gillette Safety Razor Co. of Canada, Limited

Office and Factory: 63 St. Alexander Street, MONTREAL

Give a Receipt and Get Protection

For example:

A customer comes into your store in a hurry, makes a fifty-cent purchase, hands you a bill and gets $1.50 change, sticks it in his pocket and hurries out.

Half an hour later customer returns and says he gave you a $5.00 bill and got only $1.50 change.

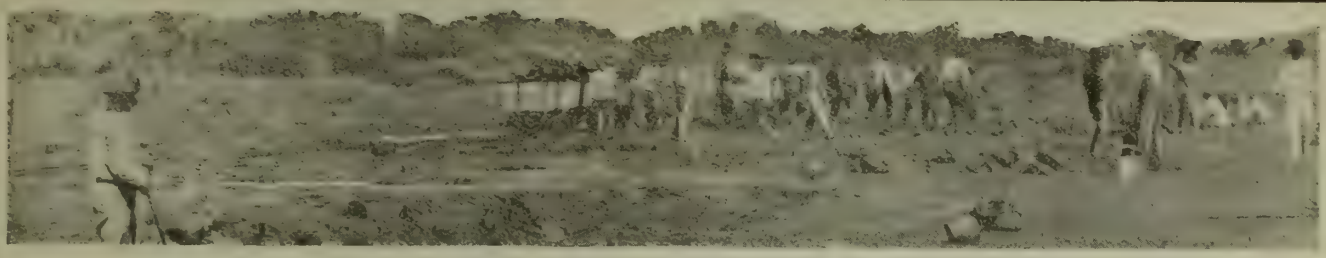
What are you going to do about it? Argue and lose a customer? Or "give up," feeling sure you have LOST $3.00.

A National Cash Register positively prevents errors of this kind—protects both you and the customer against such disputes. Does more than that—it insures absolute accuracy in every transaction. Records all cash sales, credit sales, money received on account, money paid out.

Pays for itself with the money it saves you.

National Cash Registers cost less now than ever before. Let us send you our booklet and new price list.

National Cash Register Co.



F. E. MUTTON, Manager for Canada

285 Yonge St. - - Toronto

Successful Merchants Put a Receipt in Every Parcel.

National Cash Registers afford the quickest and best means of recording sales, and of automatically issuing a printed receipt that cannot be altered, numbered, dated, with clerk's initials—making a duplicate record, which is locked inside the machine for the proprietor's use.

Trinidad Lake is never failing source of asphalt-supply for Genasco Roofing.

Sell roofing that stays waterproof

Prudent buyers know that a roof is only as good as its waterproofing, so they want to know what the waterproofing of their roofing is made of before they buy it.

If their dealer can't tell them (as in the case of mysterious "composition" roofings) he is likely to lose sales to the dealer who can.

You can always satisfy your customers about the waterproofing of

Genasco

the Trinidad-Lake-Asphalt Roofing

Trinidad Lake asphalt is Nature's **everlasting** waterproofer, and the greatest weather-resister known.

It doesn't take long to convince customers that this **natural** asphalt makes Genasco lastingly water-proof, sun-proof, wind-proof, heat-proof and cold-proof—we are telling them why, year in and year out, through the leading magazines and agricultural papers of the country.

Genasco makes ready sales, satisfied customers, and profitable business for you.

The Kant-leak Kleet helps sales of Genasco by its ease in applying. Keeps lap-joints watertight without cement. Prevents nail-leaks, and gives the roof a fine finish. Ask your jobber for Genasco with Kant-leak Kleets packed in the roll

A REMARKABLE TEST OF MAGNOLIA

BY THE UNITED STATES GOVERNMENT USING WATER AS A LUBRICANT

The "No. 2 Magnolia" mentioned in "TABLE E" contained the same proportions of tin, antimony and lead as the genuine "No. 1 Magnolia," but did not contain graphite, nor was it treated by our special foundry process: however it was made of virgin materials mixed in the ordinary way, and would class as a high grade babbitt.

TABLE E. Giving results of combined ahead and reverse for friction test of Magnolia and "A" White Brass for each change of weight for 100 lbs. per square inch to 600 lbs. per square inch of projected area of bearing surface by increasing weight 100 lbs. per square inch at each change—**Lubricant: Water.**

"A White Brass" could be tested up to only 200 lbs. per square inch, as the machine would not turn beyond that weight. The Testing Machine turned easily up to 600 lbs. per square inch with the genuine Magnolia No. 1.

It was not thought necessary to test the No. 2 metal beyond 200 lbs. per square inch. This Water Test shows the true intrinsic value of Magnolia Metal as compared with other metals: It also demonstrates that a metal may show relatively the same analysis as Magnolia and yet fall far short of giving equal results; it also shows the destructive effect of frictional heat on even a very hard metal like White Brass.

It will be observed that the genuine Magnolia Metal (No. 1) proved to be twelve times superior anti-frictionally to white brass and three times superior to the No. 2 or ordinary grade of babbitt.

You get what you want when you want it—

Depend on us for prompt shipments of any of the many specialties we make. For we carry stocks at both our factories that are big enough always to take care of your orders QUICK. And that ought to count with you.

ACORN GALVANIZED SHEETS

You should ask at once about the new proposition we are ready to make you on "Acorn Quality" Plain Galvanized Sheets. We can now make you a better offer on these top-notch goods than you can get on import orders of the usual kind. And you know, probably, that you can bank on the quality of "Acorn Quality." Every sheet is dead flat; soft, easy working, and so rolled and galvanized as to meet the difficult conditions of the British Government Specifications. Write us for particulars NOW—before it slips your mind.

The Metal Shingle & Siding Co., Ltd. Preston, Ontario

THE METAL THAT KEEPS THE FACTORY BUSY

I'll speak to it
Tho' HELL itself should gape
And bia me hold my peace.
—HAMLET

THE FACTORY THAT MAKES THE METAL

ONE CAN IMAGINE the determination of HAMLET to speak to the GHOST when he expressed himself in language which to-day would be considered more EXPRESSIVE than POLITE. Our determination is just as firm to speak to you, MR. HARDWAREMAN, but as we are polite we will not use the language of HAMLET, but state most emphatically HARRIS HEAVY PRESSURE is the best for all machinery bearings.

We Know It, And You Ought To

Many people were sceptical (until they had tried H.H.P.) as to the possibility of any one BABBITT METAL having all the qualities, such as

EASY FLOW, MALLEABILITY, ANTI-FRICTIONAL, TOUGHNESS and DURABILITY

Positively HARRIS HEAVY PRESSURE BABBITT METAL possesses all these qualities. The hundreds of new orders received last year testify to the truth of our claim

The KEYSTONE of our SUCCESS has been THE BEST POSSIBLE QUALITY.

HARRIS HEAVY PRESSURE is our most popular seller. It is the copper-coated cake. Not only is it copper-coated, but there is a large precentage of copper used in its manufacture.

FILES OF QUALITY

As Perfect as Will and Skill Can Make Them

For dealers who pride themselves on handling only the best, there are no better files than the Delta Lines.

The Carpenter's Special Shown

has more talking points than any other Carpenter's File made. With weight enough to make it lasting and more teeth to the inch than any other make, it will do the work of any $3\frac{1}{2}$ and $5\frac{1}{2}$ inch slim file, and obviate the necessity of carrying the full set. It is a general file with all the qualities of slim, extra slim, special tapers, etc., all in one.

This is merely one of the remarkable File Series that is offered by the Delta Works, a line that decreases the necessary stock on your shelves immensely.

Delta Files are an economy for the dealer.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

BATTERY ZINCS.

DEPARTMENT OF RAILWAYS AND CANALS.

Ontario-St. Lawrence Canals.
Galops Canal.

Sealed tenders addressed to the undersigned and endorsed "Tender for improving Upper Entrance to Lock No. 28," will be received at this office until 16 o'clock on Friday, April 7th.

Plans, Specification, and Form of Contract to be entered into can be seen on and after March 18th, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Resident Engineer of the Ontario—St. Lawrence Canals, Cornwall, at which places Form of Tender may be obtained.

Parties tendering will be required to accept the fair wages schedule prepared or to be prepared by the Department of Labour, which schedule will form part of the contract.

Contractors are requested to bear in mind that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted bank cheque for the sum of $6,000.00 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work at the rates stated in the offer submitted.

The cheque thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfilment of the contract to be entered into.

The lowst or any tender not necessarily accepted.

By order,
L. K. JONES,
Secretary.

PERFECTION AT LAST

The simplest and most efficient gasoline lamp in the world constructed upon new and scientific principles. A lamp that we guarantee and that guarantees itself through its very simplicity, ease af operation and utility. Absolutely nothing that can wear out or get out of order that cannot be removed and replaced without the use of tools, other than Nature has given, IN FIVE SECONDS.

A glance at the illustration will convince the most skeptical that we have at last solved the problem of a perfect

GASOLINE LAMP

Those who are using hollow wire gasoline lighting systems know to a certainty that the only place they ever have trouble is in the lamps. The tank, pump and wire tubing will last a lifetime.

There is only one wearing part—the generator. A simple twist of the wrist removes it and replaces it with a new one. An extra generator given with each lamp.

Unique Windows in Hardware Store

W. H. Thorne & Co. Have Splendid Facilities for Display—Handsome Setting for Showing Quality Goods—Windows Resembling Those of High Class Jewelers —Layout of New Silverware Department.

In the annual spring number of Hardware and Metal there appeared an article on the great hardware establishment of W. H. Thorne & Co., at St. John, N.B., and several illustrations were given of the store interior, to show the methods of displaying goods, and the varied lines stocked. There also appeared illustrations of two windows in which builders' hardware was shown.

This week, Hardware and Metal shows W. H. Thorne & Co.'s paint and varnish window, in the paint department, and also two windows for displaying clocks, silverware and cut glass, which are absolutely unique in the hardware trade.

Windows Suit the Goods.

The general style of these windows, suggests high quality. They are large and roomy, and are well set off by the fine plate glass fronts. The feature, however, is the background. This is not a mere glass partition as is usually the case in a hardware store window, but is so constructed as to give an impression of permanency and goodness.

The upper part is of glass, which is divided into long narrow lights, giving an appearance in keeping with the general effect. The bottom part is beautifully worked out. It is of hardwood finished in such a way as to bring out the grain, which may be distinguished even in the half tone reproduction. Narrow panels are separated by very neat and artistic half columns, which are surmounted by carved capitals. On the whole, it would be difficult to plan any background which would be better calculated to give the idea of "class" which is conveyed by this arrangement.

One would naturally expect a very select class of goods to be exhibited in these windows, and certainly there is no reason to be disappointed, for Messrs. Thorne & Co. have used the space to show an unusually fine lot of specialties, which emphasize the splendid setting in which they are placed.

Cut Glass and Lighting Goods.

On this page is an illustration of the window in which cut glass and lighting goods are shown. It will be seen that this store carries a great variety of articles in cut glass. In fact, there are but few jewelery stores which could surpass this display.

In passing, it might be remarked that this class of goods really must be well displayed, in order to attract the public. People who buy cut glass, are in the habit of making their purchases where they are confident that they will secure genuine goods. There are many cheap imitations on the market, and, those who demand quality in the goods they buy must be drawn into the store by some special means. There is nothing like a solid and substantial appearance, to give the impression of quality, and a window display such as that made by W. H. Thorne & Co. undoubtedly lends this impression. There may be some hardwaremen who have tried to sell cut glass, without much success, and it is very likely that their failure may have been due to poor display. To get the quality trade, it is necessary to talk and look quality—to "put on a front."

The reading lamps and candle sticks shown in the window, are also of the high quality type, and are very up-to-date in style. They serve to add variety to the window and to enhance the high grade effect produced by the collection of cut glass articles.

It will be noticed that small price tickets are attached to each article, and no doubt the price is plainly marked, in each case. This would ad greatly to the selling value of the window.

Towards the left hand side of the window is a large card displaying prices which have been printed with an ordinary rubber stamping outfit. This strikes a somewhat discordant note, and a neatly lettered card would have been much better and more in keeping with the balance of the window.

A Window of Clocks.

In these days, most hardwaremen carry a line of alarm clocks, and some branch out a little into ornamental parlor clocks, but W. H. Thorne & Co.'s display shows an exceedingly complete stock for a hardware store. The line carried varies from the cheap alarm clocks to quite a pretentious array of time-pieces for the mantel. They make a very interesting display.

This window is nicely set off by a collection of bronze statues interspersed among the clocks. These statues constitute another line which is foreign to the majority of hardware stores, but they should make a profitable speciality line, even in comparatively small places. In recent years, the tendency has been for hardwaremen to encroach more and more upon the kind of business which was formerly confined to the jewelers. The window display illustrated on this page should furnish some good ideas to dealers who are reaching out in this direction.

Layout of Specialty Department.

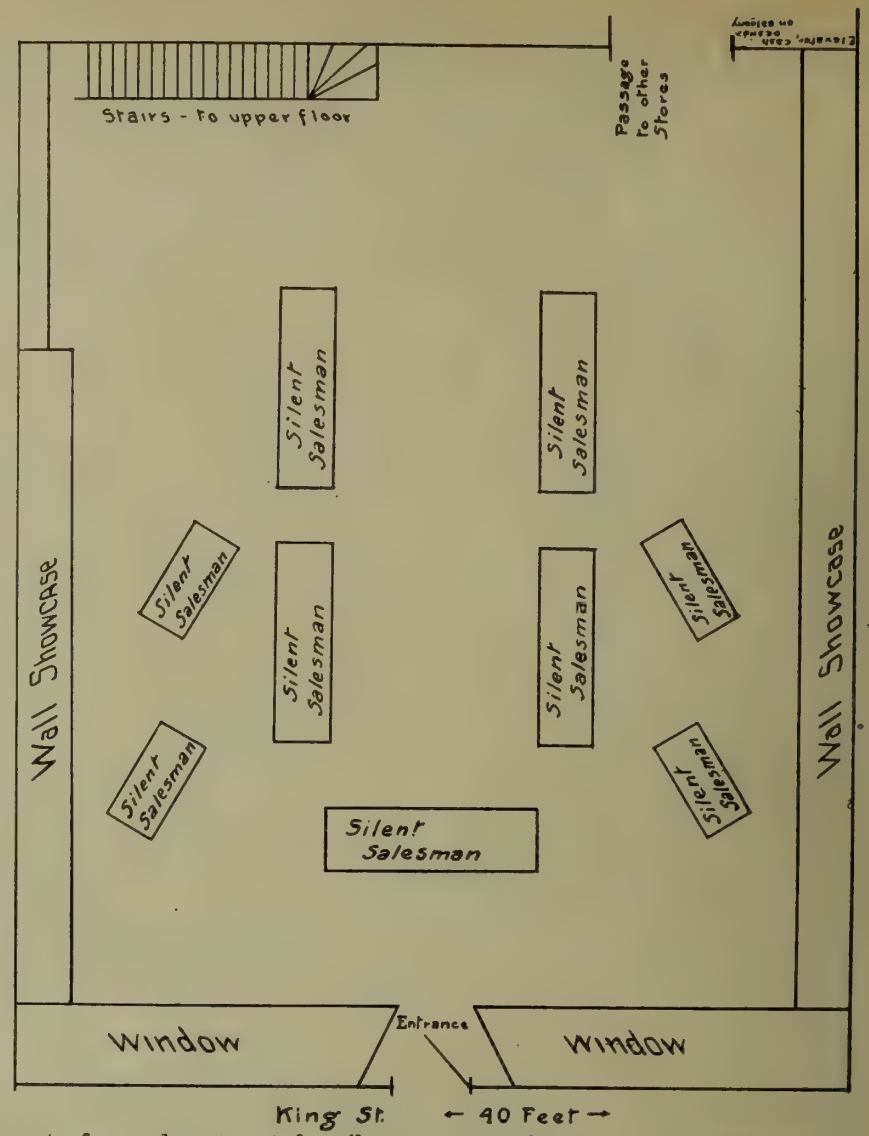
The silverware, cut glass and fancy hardware department of W. H. Thorne & Co. is located in a new addition which they recently made to their establishment, and it is equipped in the most modern way.

The accompanying sketch gives a good idea of how this department is laid out,

A Show Window That Speaks "Quality." How W. H. Thorne & Co. Display Cut Glass and high-grade Lighting Fixtures.

and it will be noticed that there is not a counter in the department. The space is taken up with silent salesmen and wall show cases, which give the best of facilities for displaying goods. The illustration on page 130 of Hardware and Metal's Special Spring Number will show how well this plan works out.

SPOKE AT NEW ENGLAND CONVENTION.



The recent convention of the New England Hardware Dealers' Association held in Boston, Mass., Mar. 21, 22, 23, is of interest to the Canadian trade for the reason that several hardwaremen from this side of the border were present. F. C. Lariviere, of Montreal, delivered one of the principal addresses that had been arranged for the convention. Mr. Lariviere expressed himself to Hardware and Metal as pleased with the trip and stated that the members of the New England Association had proven themselves splendid hosts.

Cost of Doing Business.

Mr. Lariviere, who was one of the invited speakers, confined his address to the "Cost of Doing Business and How to Figure it Out." Most people, he said, have the idea that the cost of doing business consists only in the salaries of employes, insurance, light, heat, taxes, telephone, stamps, telegrams. They frequently omit their own salaries, the value of rent of their own premises and their horses and delivery waggons. The retailer is often met who does not consider in his cost column the interest on capital, bad debts, donations of all kinds, losses accruing from stolen goods, deterioration of stock, wear and tear in office and shop and of fixtures and furniture. Then there is the loss of profit on goods returned, cash discounts allowed to customers for anticipated payments and so on. All these added together generally brought up the cost of doing business in a small store to 25 per cent. on the volume of the sales which is equivalent to 33 1-3 per cent. on the cost. In the case of a large business the figures are 22 per cent. of the sales, equivalent to from 25 to 27 per cent. on the cost.

Fallacy of Adding Percentage.

The next point brought out by Mr. Lariviere was what he termed the false principle of pricing goods for selling purposes on a percentage basis added to the cost. This would not apply equally to all classes of hardware goods, as for instance the same percentage, representing the cost of doing business, would not bear the same proportion when added to the cost of nails and the cost of shelf goods. Mr. Lariviere considered that one must depend upon his own experience and judgment for the most successful methods.

Layout of new department for silverware, cut glass and fancy hardware. W. H. Thorne & Co.'s store, St. John, N. B.

Simplicity and Directness are Most Essential Qualities

These Two Points Should be Borne in Mind When Preparing a Letter Head—Give Full Information and Eschew the Use of Cuts—Criticisms of Some Headings Gleaned at Random.

That a retail firm is judged by the manner of store it keeps, is a fact pretty generally accepted. The same applies, in a more or less degree, to letter heads. A neat, business-like letter head bespeaks brisk and thoroughly up-to-date business methods. People who have dealings with a certain hardwareman, for instance, but who do not come personally in contact with him, are very prone to form impressions from his letters—their phraseology, the paper used and the style of letter head. It is advisable then for a merchant to have a heading for his letters which can be deemed creditable.

The object aimed at some years ago was to have an elaborate, showy heading. Printers labored to outdo their competitors, and their own past efforts, in the production of ornate and unusual effects. But this has been done away with of late years, to the great advantage of both the printer and the customer. The motif of the printer to-day is to achieve simplicity, to create work which will accomplish the desired object in the simplest manner. A neat, plain, direct letter head has received the stamp of public approval to-day and it is sincerely to be hoped that the fashion will never cast back to the showy styles which once prevailed.

A letter head is intended primarily to convey information. It should give the name of the firm, the location, the nature of the business and, if the business done is largely local, the telephone number. People will often have occasion to call up the store or office immediately on receipt of a letter and the presence of the telephone number on the letter head will be a great convenience for them.

It is not advisable to use pictures or cuts of any kind, in a majority of cases. In the first place, a picture is generally too cumbersome and will take up too much space. In the second place, the cut is very liable to show up badly in the printing, unless an exceptionally good grade of paper is used. The printing of a letter head in a color other than black has some advantages. It makes the lettering stand out more. It is doubtful, however, if the slight advantage gained is worth the added expense.

Lithographed headings are frequently used but it is again doubtful if this is a wise plan for the average retail dealer to adopt. A printed heading—if well printed—will look just about as good. The retailer will not have occasion to order a very large stock of letter paper and the cost of the lithographing would be spread over too small a supply to make it a profitable undertaking. If a large supply were being ordered, the expenditure would probably be justified.

Some Criticisms.

A number of letter heads of Canadian hardwaremen are reproduced herewith. They were gleaned at random and represent fairly well the various styles generally adopted. On the whole, the headings are good—speaking from a comparative standpoint. A number of the most common faults are to be found, however, and some of these will be noted.

H. W. Marshall has used two cuts, both of which are unusually large. If determined to have cuts, make them as small as possible. The arrangement of the reading matter is excellent.

Aiken Bros. have made the mistake of boxing in the hardware and harness announcements, one on each side of the name, in antiquated borders. Plain rule borders are still used but the fancy variety has long since been relegated to the realm of things forgotten. It is hardly necessary to have "hardware and harness" under the signature when conspicuous notice is given elsewhere to the fact that these lines are carried.

R. E. Little has an arrangement which possesses the advantage of simplicity but which lacks explicitness. Neither the location of their store, nor their telephone number are given. This criticism applies to nearly every letter head in the collection. The ornament following the name is out of keeping with the script type used.

St. Mary's Hardware Ltd. have not given complete information. The printer has made the mistake here in using three distinct styles of lettering. The effect is not at all pleasing. This is a mistake which is altogether too common and for which there is no excuse, as the printer can easily follow one style throughout. More than two styles should never be used.

The Ross Hardware Co. have achieved an original letter head and there are no points about it which could be directly criticized. On the whole, it is quite creditable; and one particularly good point is the fullness of the information.

McDowell & Russell have made use of the prefix "office of" before the firm name. This was customary years ago but has long since been discarded. The name does not stand out quite as clearly as it might.

To sum it up, the safest way to go about preparing a letter head is to aim at simplicity and directness. Give full information as to your business and location in as brief a form as possible.

MERCHANTS WHO NEVER TAKE STOCK.

It is a fact that there are a good many merchants who never take stock. Perhaps they are more numerous than most of our readers would imagine, and they are divided into two classes.

The first class of merchants never take stock because they never need to. That may seem a rather peculiar statement to make, but it is true. These merchants are so systematic in their methods, that they know to a dollar, how much stock they have on hand, every day in the year. Their records show them all the goods that are taken into stock, and are sold out of stock, day by day, and it is easy for them to tell you the quantity of any particular article that they have on hand. They do not take stock annually or semi-annually, but, as a matter of fact, they do so every time they make a sale, or accept a consignment into stock. They have an accurate and perpetual record of goods on hand.

The other class, is, unfortunately, far more numerous. These merchants, through lazy, slipshod business methods, are content to have some rough idea of the amount of goods they have on hand. They are not interested in an exact account, and it is too much trouble to secure one, anyway.

One such merchant was a visitor in Hardware and Metal's office, a few days ago. His store, in a Bruce Peninsula village, was burned to the ground a few weeks ago, and he was in Toronto, trying to have his fire loss adjusted by the insurance companies. He had for years been paying heavy premiums on a policy which he thought would about cover his stock. He didn't know, exactly, because he hadn't taken stock for five years. But he didn't think it was necessary, because he knew his stock closely enough to suit himself, and he thought he didn't have sufficient help to take stock and carry on his business at the same time.

The result of his negotiations may be imagined. In the absence of any stock records, the insurance companies refused payment of the policies in full, but offered to compromise at a discount of about 25 p.c., and this may mean that he will not be able to open his business again.

The incident has a double moral. In the first place, it teaches the necessity of system, in conducting a business; in the second place, it has a warning for merchants who take out fire insurance policies without knowing their exact terms, and the real extent to which the insurance protects them. It serves to emphasize the point which has been previously made in these columns that, being as yet unable to organize a Mutual Fire Insurance Co., the Ontario Retail Hardware and Stove Dealers' Association should make some arrangement, whereby its members would have the benefit of expert advice in questions relating to fire insurance.

HARDWARE LEADS THE WAY.

In the current Saturday supplement of the Toronto Globe, a picture of Porcupine City, the centre of the new El Dorado of Northern Ontario, is shown. Right in the forefront is a hardware store, the largest building apparently on the main street of this mining metropolis. The picture illustrates aptly the importance of the hardware store in all new towns and settlements.

When a new town is started—and in this age of rapid expansion, they spring up nearly every day in some part of Canada—one of the first institutions found there is a hardware store. This is, in many respects, quite to be expected. Necessity determines the order in which the institutions of civilization are to follow in the wake of the prospector. The men, who blaze the trail into a strange country and began a new settlement, feel right from the start the need for the goods which hardwaremen sell—nails and tools for the construction of "shanties," picks and spades to aid in prospecting, and all of the implements of utility which a rude life renders absolutely indispensable. Consequently, the hardware store is generally the first "trading post" found in new settlements and the position of importance, that it attains in this way, is maintained after the town has gradually grown and developed.

It follows, therefore, that the hardware trade is developing with great rapidity in this country. Every day brings word of new stores started, particularly in the west. No branch of mercantile industry is so closely linked with the growth and development of this new and thriving country.

FIGHTING THE TYPHOID FLY.

For a number of years past, medical authorities have been arousing public sentiment against that nuisance of summer time, the house fly. Many of our most influential magazines and newspapers have taken part in the campaign which has been educating the people to a true appreciation of the menace which these all too common house flies constitute to the public health.

It has been proven beyond the shadow of a doubt, that house flies, which breed and multiply in filth of all kinds, are most industrious in carrying the germs of disease, and endangering the lives of all those with whom they come in contact. Indeed, this fact has been developed to such an extent, that the house fly has now been almost universally named the "typhoid fly."

Whether or not the typhoid fly can be exterminated, is difficult to say, but, at any rate, no means have yet been discovered of doing so. There is, however, a reliable method of excluding them from both public and private buildings, and that is, by the use of wire screens.

Medical authorities and newspapers are strongly advising the use of screens on all windows and outside doors. There is scarcely anybody, now, who does not recognize the danger of the typhoid fly, and know the best means of fighting it. The demand for screen doors and windows will be greater this year than ever before, and, if the hardwareman advertises judicously he can greatly increase it even over what it would naturally be, in view of the widespread fear of the typhoid fly. Think of how much wire screen the hardwareman could sell, if even half the residents of his town, determined to absolutely exclude the typhoid fly from their homes, this year.

THE METAL SITUATION.

There is an all around healthy tone to the metal market. Business is opening up splendidly and metal men are looking forward to the best year, perhaps, in the history of the country. Everything points at the present time to continued prosperity in the future. As one man put it: "Everything is bright and there is not a cloud in the sky."

One of the most satisfactory features is the steadiness in all metals. Prices are remaining firm and this is conducive of active conditions. Buyers and sellers alike feel greater confidence when a price level is steadily maintained, as the speculative element is thereby eliminated from all dealings. Metal quotations have not changed for some time now, except in tin. The tin situation has been somewhat erratic but the fluctuations in the price have not disturbed the steady volume of trade carried on in this country. At the present time, tin is on the rise again and it is becoming more apparent every day that the syndicate is still master of the situation.

INCREASING SPORTING GOODS SALES.

A great impetus is always given to the sale of sporting goods, by the organization of local leagues. In a town where there are several factories, a Manufacturers' Baseball League will do wonders in increasing the sale of baseball supplies, not only to those who take part in the league contests, but also to the juvenile element, whose desire for a good class of mitts and bats, is inflamed by the factory games.

Sunday school leagues are also productive of activity in the buying of baseball accessories, and, the greater the number of real contests which take place and the more varied the interests which are involved, by so much the greater is the demand for baseball goods.

The love of baseball seems to be hereditary, on this continent. It is an easy sentiment to play upon, and, in towns where there are no local leagues, it should not be difficult to organize them.

It will pay the hardwareman to give his attention to this matter. If he himself is a lover of sport, he can himself initiate the scheme. If not, he is sure to have a clerk who is a baseball enthusiast, and will be able to start the ball rolling.

Other games, such as lacrosse, tennis, football and lawn bowling, could be encouraged in the same or a similar manner. There is money in it for the hardwareman, and good fun for everybody concerned.

TALKS WITH TRAVELERS SHOULD BE PRIVATE.

There are many dealers who are in the habit of meeting traveling salesmen, right on the floor of their establishment, where there is no privacy whatever. This is presumably done, through the notion that it is easier to get rid of a traveler in this way, than if he were given a regular hearing privately.

This idea is a mistake, as the traveler, being handicapped in this way, will naturally take up more of the merchant's time, in presenting his proposition than if he were given a good hearing. Moreover, it is embarassing to discuss wholesale prices and discounts in the presence of clerks and even customers—and even more embarassing to tell a dealer how much profit he can make on a certain line, while a customer is making a purchase, two or three feet away.

For these reasons, it is a growing custom in the trade, to have a small private room, sometimes separate even from the book-keeping department, where the merchant meets the traveling salesmen, and discusses their proposition with them. Free from interruptions, the interview may be completed in much less time than under any other circumstances, and it will be just as easy for the dealer to intimate when the interview is at an end. The scheme gives both parties a better chance, and it is well worth a trial by everyone who can arrange such a room.

POINTED EDITORIALS.

Every clerk should be an outside salesman. He can boost his own stock that way, as well as bring business to the store.

* * *

The ad-writer is essentially a salesman—not an essayist. Remembering this will help him to produce more effective copy.

* * *

There are no flies on that New Brunswick hardware clerk, who sold a screen door at the regular price, when the thermometer registered 40 below.

* * *

Why not plan a "house-cleaning window?" There will be a ready sale soon for the variety of articles needed at that, the most stirring period in household history.

* * *

The time, the place and the determination must come together to make a success of outside salesmanship in builders' hardware. Now is the time. Anywhere is the place. But how many dealers will bring forward the necessary determination?

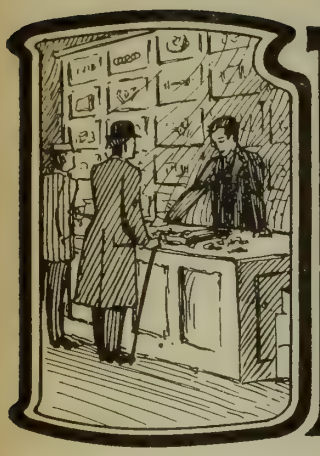
* * *

During Lent people often forego certain pleasures or indulgences. Here is a resolution for the free-and-easy hardware dealer to take: I will shake off the slothful indifference which keeps me inside these bright spring days when I might be out after all this business that is going.

* * *

Is your letterhead business-like and up-to-date? And does it give the necessary information with reference to your business? The character of a store is shown to a great extent in the style of letterhead used; at least, people with whom you correspond will judge you from that basis.

* * *



Putting up goods in packages will mean that many lines will go up on the shelves which have hitherto been hidden from sight in drawers and bins and under counters. It's a pity that pails and spades and blankets and such like goods cannot be put up in packages, to prevent some dealers from hanging them on their ceilings.

* * *

The one time general impression that to go into the plumbing business was tantamount to having a fortune left you, will soon be dissipated in the mind of the hardwareman who has a plumbing department and allows it to run itself. Keen business management and a good knowledge of contract figuring are needed there, as elsewhere—only rather more so.

* * *

The parcels post legislation in the United States has been quietly laid away, and nothing more will be heard of it, for some time, at least. The promoters of the measure have tacitly acknowledged defeat by accepting the situation without a word. It begins to look as though any agitation to that end can be effectually checkmated by giving the scheme full publicity; that it can succeed only when the guardianship of commercial interests becomes lax and negligent.

PAGE FOR HARDWARE CLERKS

How To Go About Selling Vacuum Cleaners

Results Announced of the Third "What Would You Say?" Contest—Replies Submitted Were of a Very High Order—A Gradual Improvement in Both Quality and Quantity of Replies.

THE WINNERS.

First Prize.—Aubrey F. Cunningham, Dundalk.
Second Prize.—Herbert N. Brown, Meaford.

The interest taken in the clerks' contests, conducted by Hardware and Metal, is constantly on the increase. Replies are received from all parts of the country in such number that it is clearly apparent that hardware clerks as a body are keenly alive to the possibility thus presented of improving their knowledge and their understanding of salesmanship methods.

The last problem submitted was somewhat more difficult than either of the first two. It gave greater scope for ingenuity and necessitated a large measure of technical knowledge. All replies received, however, were singularly commendable, combining tactfulness with a good store of practical pointers. Adroitness was displayed in approaching the subject and most of the contestants put forth a wealth of clinching arguments.

A noteworthy feature in connection with our "What would you say?" series is that the general run of replies are showing a marked degree of improvement with each problem. In other words, the contestants have gone more deeply into the question of salesmanship, have imbibed useful ideas from others and have generally improved themselves in this respect. We believe that the contests are having a distinct educative value. Testimony to this effect is found in many of the letters sent in to this office. "Have been following your contests right along," writes one young clerk, "and am getting a lot of benefit. Enclosed find my first contribution." And a bright contribution it was although it did not win a prize. "Your contests are a great idea," writes another clerk. "Your page for clerks will be of great help to us," declares still another. And so on, without number.

What the Problem Was.

Stated briefly, the last problem was as follows: A lady (wife of a prominent professional man) who wishes to buy a number of articles for housecleaning, enters a hardware store. She mentions, among other things, a carpet beater. The problem was, how to go about selling her a vacuum cleaner.

It will readily be seen that, to sell a vacuum cleaner to a customer who had intended to buy a carpet beater, would require a very skilful presentation of facts. The salesman would have to display keen perception in sizing up the situation and would need to bring a forcible line of argument to bear.

In considering the replies sent in, the judges went on the following basis:

Sizing up Situation - - - - -	25
Talking Points - - - - - -	50
Language - - - - - - - -	25

First prize was awarded to Aubrey F. Cunningham, Dundalk, whose reply was in many respects a model one. Mr. Cunningham was the winner of first prize in the saw contest also. In the present instance, he had the hardest of opposition and at least three of the other replies were seriously considered.

Mr. Cunningham covered the ground very fully and introduced a wide variety of arguments. The language that he employed was polished, to a fault. In fact it was too polished and read more like an essay than a business talk. Fault might also be found with the length of the reply. A less rhetorical effort would doubtless have proven more effective. Still, Mr. Cunningham gave a convincing talk and showed considerable tact and ingenuity in approaching the subject.

Second Prize Winner.

To Herbert N. Brown, clerk in D. B. Brown's hardware store, Meaford, went second prize honors. Mr. Brown gave a convincing reply which covered the ground concisely. He began with an appeal that would undoubtedly tell strongly and followed up with an array of reasons that strengthened his case appreciably.

Very close in merit was a reply submitted by Clayton Walker, with Wells & Wells, Dresden, Ont. Mr. Walker had a splendid line of talking points, and the method he adopted of opening the subject was original. His diction, however, was hardly up to the standard set by the prize winners and, on that point, he lost ground. As it was, his effort was marked just one point less than the winner of the second prize.

Some Original Points.

Another strong contestant was Harry Armstrong, with H. H. Otton & Sons, Barrie. One of his best points was a statement of the detrimental effect on the health that beating carpets entails.

W. J. Illsey, with the J. H. Ashdown Hardware Co., Winnipeg, submitted a reply in dialogue form, which possessed the valuable qualities of originality and brevity. The different points were rather skimpily touched upon, however. Mr. Illsey introduced a good concluding argument in the shape of an offer to demonstrate the cleaner at the customer's home at 8 o'clock that evening, when her husband would be home. By way of explanation, he appended to his reply: "This after hour work may not appeal to many clerks, but in selling vacuum cleaners this method will always be found a most telling one and seldom fails to make sales. When a lady customer is convinced the men almost always give their consent."

Prize Winning Reply.

The reply of Aubrey F. Cunningham was as follows:

This one, Mrs. Blackstone, remains impact until the handle is broken, and in its line is a model for strength; but, still it remains a carpet beater and represents, to one's mind, all of its distasteful attributes. We, indeed, should feel grateful to the man who invented the vacuum cleaner, the great value of which, by the way, if you have a moment to spare, I will demonstrate to you. (Lifting it out of the window, I place it on a not-too-heavy rug, which we keep for demonstration purposes). Among the thousands of inventions, during

modern times, to alleviate household duties, we find the vacuum cleaner both deserving and receiving the highest praise from the most exacting of the buying public. Its functions are manifold, ensuring a puritan cleanliness to the home, better health to the family, and long life to housefurnishings. It removes, without raising the slightest dust, all dirt and dust from carpets and rugs, as they lie upon the floor, bedding, upholstered furniture, curtains, clothing and in fact anything, which at any time requires sweeping or brushing. It also absorbs all germs or bacteria, those little corpuscles of disease, which cannot be destroyed by the use of broom or brush. Then again, Mrs. Blackstone, think of the saving derived, from the use of this cleaner, on those articles which are subject to the wear and tear of beating and to the exposure of inclement weather, not forgetting either, that by thoroughness in cleaning, timely work, and ease of operation, it has solved the hired help problem. Weighing only a few pounds, one can easily carry it from one floor to another. I feel sure, Mrs. Blackstone, that you already realize how nearly indispensable the good vacuum cleaner is to the well managed home. Recognizing the invariable demand of our customers for the best, we made an exhaustive study into the numerous good qualities of many high-grade machines, and as a result we have here the "———" a machine not only guaranteed by the manufacturers, but behind which we are prepared to stake our business reputation. Every part is warranted against defective workmanship or material. The tank, which is made of non-corrosive steel, can be emptied with ease. From the body out, the parts are securely fastened by slip joints, requiring only a moment to attach or detach. The rotundity of this hose is insured by coiled, spring steel wire and covering the wire is a heavy rubber lining, thus allowing a free and unobstructed passage for the dirt. To demonstrate the power of this cleaner, I will sprinkle some flour under this rug and now if you will move the nozzle, while I operate the handle, you will notice that the flour has actually been drawn through the rug and lodged in the tank. The depreciation on one good carpet in your home, Mrs. Blackstone, after being subjected to a beating, would form quite an item in the price of this machine. With a "——— Cleaner" you can forget the unfavorable weather of a late spring, and commence your house-cleaning to-day. We guarantee you perfect satisfaction or a refund of your money. Shall I send it complete with all attachments? Thank you. It will be there this morning.

Second Prize Winner.

The reply which was judged to be next best was as follows:

Mrs. B—— before you go out may I show you our new vacuum cleaners? You know it will soon be the dreaded spring season when so much mud and dirt is tracked into the house, and if you only knew how much hard work and worry that this machine would save, I feel sure that you would have one.

The simplicity, cheapness and usefulness of the vacuum cleaner are its chief advantages. A child can manipulate one. The machine is no toy but is made entirely of malleable iron and steel and is therefore most durable; it is easily carried because it is light and well balanced; slip joints are used on all connections, making them instantly detachable and interchangeable; and the double tank device makes the process of gathering the dust and then emptying it much more simple. Before now you will have learned that brooms and carpet sweepers only stir up the dust to let it settle in other parts of the room; while they drive the finer and heavier dust down into the fibre of the carpet where it readily breeds such vermin as the voracious "buffalo moth." By means of the vacuum cleaner every particle of dust and germs is sucked up, leaving the carpets, floors, curtains, sofas, etc., perfectly clean and sanitary and looking like new. The machine costs only $25.00 and it practically pays for itself the first season in the time that it saves. For instance, in a fair sized house it requires at east two weeks to take up the carpets, clean and relay them. With the vacuum cleaner this work can easily be done in two days with less labor, less dirt, less inconveniences to the family and with far better results.

So you see, lady, that our vacuum cleaner is all that we claim, it would pay you to have one. May I send one up for you?

Herbert N. Brown.

CLERK ADMITTED TO PARTNERSHIP.

As an instance of the future to which hardware clerks may look forward, Hardware and Metal this week extends congratulations to a reader of this page who has been promoted by his employers, to a partnership in the firm.

J. A. Aitchison, who for the past three years has occupied the position of chief salesman with the Adamson Hardware Co., Orangeville, has been rewarded for his ability and loyalty by being received into the business.

SUGGESTIONS FROM CLERKS INVITED.

Almost every hardware clerk has some idea of how the store should be run. He can see many of the weak points in the management of the store in which he is working, and he can also recognize the strong points—the ideas which tend to efficiency and economy.

Hardware and Metal is anxious that its clerks' page should become a regular clearing house for ideas along this line. Readers are therefore invited to write the editor, suggesting how to devise economies in store management; how to use window display space to best advantage; how to improve upon methods of stock arrangement and advertising. In fact, how to improve trade conditions in any way.

This department will be interesting to dealers and clerks all over the country, and will help the readers of the Page for Hardware Clerks to become acquainted with each other. So see what you can do, boys, to make this department a success.

THINKS CLERKS' PAGE EXCELLENT IDEA.

Robert McJannett, one of the prize winners in Hardware and Metal's "What Would You Say?" competitions, writes as follows:

"I find your journal very interesting—much more so than the similar trade papers published in the Old Country. I think your Clerks' Page is an excellent idea, and that it cannot fail to help all the clerks who study it."

CLERKS SHOULD LOOK AHEAD.

There is a demand for retail hardware salesmen to-day that should prove encouraging to the young clerks who are still on the bottom rungs of the ladder they have begun to climb. The want columns in the daily papers prove that fact to those who are not already aware of it. Not only are the retail proprietors looking for good clerks, but there are opportunities awaiting them with jobbers, manufacturers, specialty houses, and there are openings for owning a business, both in the east and the west.

The clerk, therefore, if he likes the business should keep his eye clearly set upon the future. His day is coming and his present concern should be to do his best in his present sphere. He is still tugging away in the iron shop at heavy work, or fills the orders the head clerk has received over the counter. The same head clerk can easily remember when he was doing the identical work the junior is now toiling at. And so it goes. The road may look steep and hard, but if the clerk refrains from thinking about that fact he will be over the rough spots before he is aware of it. The hardware business should appeal to those who are numbered among its clerks. The future is bright, and as Canada grows, as she is bound to do, the openings should be better and more numerous.

NEW PATENTS ISSUED.

Among the Canadian patents recently issued, as reported by Fetherstonhaugh & Co., 5 Elgin St., Ottawa, are:

131,591. R. A. Bowen, Colfax, Wash., pipe wrenches. Chas. E. Russum.

131,634. Jno. H. Ferguson, Dayton, Ohio, wrenches.

131,658. L. W. Koser, Galt, Ont., construction of metal shingles or metal tiles.

131,665. A. L. Melchert, Santa Anna, Ca., pipe wrenches.

News and Methods of Canadian Hardwaremen

Novel Tool Sale in Toronto—Smiths Falls Dealer Getting Order for Plating—Important Business Changes.

RED TAG TOOL SALE.

Toronto.—May Bros., the West Toronto hardwaremen, have two fine windows this week. One of them which is attracting a great deal of attention is a window of tools, to each of which is fastened a red tag bearing the words: "Regular price $——, Red Tag Tool Sale Price $——." The price reduction averages about ten per cent., but the window is so attractively gotten up that the display should count for at least as much as the reduction in price.

The other window is devoted to paints and varnishes, and it is well calculated to interest householders in improving their property this spring.

PROMOTING SALES OF POULTRY NETTING.

Peterboro.—This spring trade has not been so busy in traps as in former years on account of the low prices prevailing for muskrat and similar furs, though from report muskrat are far more plentiful.

The Peterboro Hardware Co. have a "Brighten Up" window of spring cleaning necessities, step-ladders, brooms, brushes, flaxoap, etc. The Kingan hardware Co. has a window of gardening tools and poultry netting, the poultry netting being pushed by means of a pen of prize fowl being exhibited, enclosed in a poultry netting run in the window. The exhibit causes crowds to gather in front of the window, and incidentally sales of that commodity. A card was written explaining the breed and list of prizes won by the fowl. In their trap window a live black squirrel has been the means of drawing attention to the trapping season.

A good building season is promised this year.

BOOMING SPORTING GOODS.

Kingston. — The sporting goods men are looking forward to a good season this year. Last year with the organizing of two new baseball leagues, Sunday school and mercantile, they were almost sold out of sporting goods. These leagues will be in full swing again this year, and with the many teams in the city and senior and junior city leagues the dealers should have a good season.

HARDWARE BUSINESS CHANGES HANDS.

Owen Sound, Ont.—T. I. Thompson, Limited, have purchased the business of Morran and Sons, hardware merchants of 875 Second avenue east. Mr. John Thompson, of Port Elgin, Ont., has been appointed manager of this new store. The business was bought for 65c on the dollar.

Extensive changes and improvements are in progress at the Imperial Cement Co.'s plant here, by which it is expected the output will be considerably increased, and at the same time the cost of manufacture reduced. Mr. T. I. Thomson, president of the T. I. Thomson Hardware Limited, and manager af the plant confidently expects that the change will increase the mill's output by about 250 barrels a day, when the work of refitting is finished.

PUTTING CUSTOMERS AT EASE.

"You are cordially invited to look through this store at your leisure. All goods are marked in plain figures. Only one price."

This invitation neatly written on a medium sized card, faces everyone who enters Emerson & Fisher's retail hardware store, at St. John, N.B., and should have the effect of placing them at ease at once. Many people go into a store for the purpose of buying some little article and would often like to linger and see the exhibition of goods of various kinds, but hesitate to do so for fear they might be considered bores. Very often a person looking around sees something he fancies and purchases it, something he had not thought of buying, but which appeals to him as a good thing, and he gets it. A card like that mentioned above has the effect of inducing people to stop and look around to see if there is not something else that he wants.

RUNNING CASH BUSINESS.

Maple Creek, Sask.—The Maple Creek Hardware Store has changed hands. The new proprietors are conducting a brisk advertising campaign and have announced through the local press that: "The business will continue being run on cash basis, and the prices will be so attractive that a few visits to our store will convince you that dealing with a cash store means money saved on every you purchase."

WILL REBUILD STORE.

Barrie, Ont.—Further particulars of the explosion and fire in J. R, Hambly's hardware store, show that almost the entire stock was destroyed. V. S. Hambly, a nephew of the proprietor, was in the basement when the explosion occurred, the flames burning the young man severely.

The alarm was sent in to the fire hall but "somebody blundered" and the reels were late in arriving. It was probably 20 minutes after the alarm sounded that the brigade arrived. Then some delay was occasioned in getting the water turned on, and by the time the first stream poured into the building, smoke was pouring out from the upper windows. Shortly after, the plate glass windows fell in. Then the fire got into the ammunition and the exploding cartridges scattered the spectators in all directions.

For over two hours in the intense cold the firemen fought the stubborn blaze. At times it looked as if the flames were breaking through the roof.

The loss is placed at between $13,000 and $14,000 with $9,000 insurance. The building was damaged to the extent of $2,000, which is covered fully by insurance.

Mr. Hambly is not daunted by the reverse, but has already started in to repair and restore the building. His intention is to make it one of the finest hardware stores in the country. A modern front will be put in, metal ceilings and new interior fixtures will be installed.

DEVELOPING BUSINESS IN PLATING.

Smith's Falls, Ont.—R. Hawkins is adding a new department to his hardware business here. He is announcing, through the press, that he has been appointed agent for the Westport Manufacturing and Plating Co., and he is receiving orders for the replating of all kinds of silverware, and the replating and polishing of all kinds of ornaments, trinkets, and brass work.

Mr. Hawkins is exhibiting samples of the work which his firm are doing in the line, and the department promises to develop into a popular and profitable feature of his store.

DEMONSTRATING GAS RANGES.

St. John, N. B.—T. E. Taylor of the McClary Manufacturing Co., London, Ont., is in St. John demonstrating the McClary gas ranges for the St. John Railway Co., which supplies gas to the city. Afternoon receptions are held and visitors are served with foods prepared on the gas ranges. It is expected the demonstration will result in largely increased sales of gas ranges as the company has recently made a reduction in the price of gas to $1 per thousand.

BANQUET THEIR HOCKEY TEAM.

The management of The Imperial Varnish & Color Co., Toronto, gave a banquet in honor of their "hockey team" in the parlors of Birrell & Fox, 726 Queen St. East, Thursday evening, March 23, to which the entire staff of employes were invited.

At the conclusion of the supper Mr. J. M. Sparrow, president of the company, took the chair and an excellent program was rendered; the principal artists being Miss Ingle, elocutionist; Misses Maddock and Bond, pianists, and Mr. E. Newton, vocal soloist.

Following the program, the chairman called on Mr. Monypenny, vice-president, for a few remarks, which was followed by a short speech from Mr. J. D. Robinson. On behalf of the team Mr. G. C. McEwen moved a hearty vote of thanks to the management for their generosity and spontaneity in giving the evening's entertainment. Mr. Mihell made a similar motion on behalf of the employes.

The evening was a decided success and the harmony and good feeling between the company and their employes was evident to all present. The program was closed with the National Anthem.

Smith & Burton, Watson, Sask., are reported to have received a car of hardware goods. Business seems to be booming in the West.

HARDWARE TRADE GOSSIP

Ontario.

James G. Stewart & Co., hardware dealers, Wingham, have sold out.

T. B. Lee, manufacturers' agent, Toronto, has gone on a trip to the Old Country.

Archie Teetzel, wholesale hardware merchant, of Vancouver, was in London the other day stocking up.

A provincial charter has been granted to Mulhall Hardware Ltd., Ottawa. The capital stock is fixed at $80,000.

The Bond Hardware Co., Guelph, had night and day gangs working all last week, putting hardware floors in their store.

J. S. Weichel, Elmira, has undergone an operation at St. Joseph's hospital, Guelph. He is reported to be getting along nicely.

W. W. Near, Toronto, of the Page Hersey Iron & Tube Co., is on a trip to Europe. He will return about the middle of May.

A. E. Carter, who was convicted of concealing goods from his employer, a Belleville hardwareman, was sentenced to three months in the common jail.

James Pilling, who has been employed at the McKinnon Dash and Metal Works, St. Catharines, has taken a position at Ottawa. He was given a rousing send off by friends.

Fred Wanless, the east end hardware man, of London, is planning an extension to the back of his store, to be used as a storeroom. This week he is displaying sap buckets and maple sugar making equipment.

John A. Thompson, Port Elgin, after a trip through the West, has decided to enter into business in Owen Sound and has bought a hardware stock there. Mr. and Mrs. Thompson will leave shortly for their new home.

Wilson Bros., Moorefield, have sold their hardware stock to their father, Geo. Wilson, who takes charge as soon as the stock-taking is completed. The late proprietors will go into business in Vancouver.

Charles R. Bloxam, who has twice previously visited Canada on behalf of Hobbies (Lim.), Dereham, Norfolk, is starting on his third tour through the Dominion on behalf of that company on April 8. He will commence his trip at St. John's, Newfoundland, and visit the principal towns as far west as Winnipeg.

A two-storey addition is to be made to the McClary shops at Adelaide St., London, this summer, though the exact amount to be expended on the work has not been announced. The extension is to the mounting shop, where the staff is rather cramped for room at present. A number of extra hands may also be taken on.

Patterson & Hilborn, hardwaremen, Drayton, have moved into the store just vacated by H. Irvine & Son, and are now doing business in their new quarters. The store is both wider and longer than the old one and consequently is much more suitable. They have bought the property and are reported to be contemplating changes.

Maritime Provinces.

W. B. Darton, traveling representative of the Marlin Arms Co., of New Haven, Conn., is on a special business widening trip through the Maritime Provinces and Eastern Quebec.

James S. Neill & Sons Ltd., Fredericton, are closing their branch store, known as Tweedale & Co., their object being to concentrate the business at their main store. The stock in the branch store is being sold out at reduced prices.

Western Provinces.

Driscoll & Vrie have started a hardware business at Milestone, Sask.

J. J. Cumming, has started a hardware business at Drumheller, Alta.

The Wilkie Hardware Company's building, Wilkie, Sask., is being enlarged.

Crossley & Johnston, hardware dealers, Oxbow, Sask., have suffered loss by fire.

Mr. Harris, of Valley City, is going to build a hardware store in Whitla, Alta.

Joseph Sive, hardware and harness dealer, Makinak, Man., has sold to J. Polvin.

Hill Bros., Fillmore, Sask., are moving further west this month. They have sold out their stock there.

Weir & Tuck, dealers in hardware specialties, Regina, have dissolved. Mr. Weir will continue the business.

Donald & Thompson, hardware dealers and tinsmiths, Lumsden, Sask., have received a carload of hardware and are enlarging their stock.

F. K. McKay has taken over C. J. Bray's hardware business at Gleichen, Alta. The business will be conducted under the name "McKay Hardware Co."

Harry Cooney, Killarney, Man., has gone to Winnipeg, having accepted a position with Miller, Morse & Co. He will go west to Edmonton, which will be his headquarters for the time being.

Geo. Martin, Killarney, Man., who has been looking for a location for a hardware store in the west, has returned home. He has decided to locate at Zelma on the G.T.P., and leaves shortly for that place.

M. Rogers and M. Jackett, hardware and lumbermen of Southey, Sask., were in Blackie, Alta., looking over the prospects for a location. They were very enthusiastic over the prospects there.

Commencing on the first of the month, the hardware business conducted under the firm name of Neelands & Co., at Salmon Arm, was taken over by S. J. McDiarmid, who has been associated with R. H. Neelands in the concern for the past eighteen months.

The loss sustained by Crossley and Johnson in the destruction by fire of their hardware store at Oxbow, was $18,000, partially covered by insurance. Building operations will commence at once and a store more up-to-date will supplant the one destroyed.

In the publicity edition of the Cardston, Alta., Star, the following appears: "The Alberta Hardware and Lumber Company, Limited, was established in Cardston eleven years ago. The President has been most active in building up the town as well as the affairs of the company. This company is more particularly noted for the large contracts for public and private institutions, one of them being the Raymond College, a handsome and attractive brick building, and several others, the Cardston Court House, and the Cardston Milling Co.'s mills."

Hardware Letter Box

Book on Window Dressing.

G. L. Elmes, Farnham, Que.—"Do you issue a book on window dressing and sign writing?"

Yes, we have a book entitled, "Hardware Window Dressing," dealing with these subjects. Price $2.50.—Editor.

Gilfillan Regulators.

Subscriber.—"Where can we buy the Gilfillan Regulators for natural gas?"

Consult Brantford Gas Co., Brantford. —Editor.

Carpenters' Boring Machines.

M. St. Louis & Son, Crysler, Ont.—"Will you kindly let us know the makers or agents of carpenters' boring machines, with all steel pieces, in place of cast metal pieces?"

Your jobber will no doubt be able to supply this.—Editor.

Chair Varnish.

Maritime Paint & Varnish Co., Halifax.—"Can you supply us with the name of the manufacturers of "Crystallac" chair varnish?"

Can any reader furnish this information?—Editor.

Aluminum Sheets.

G. N. Bourque, East Sherbrooke, Que. —"Can you tell us where we could buy aluminum in sheets?"

Northern Aluminum Co., Toronto; Parke & Leith, Toronto; A. C. Leslie & Co., Montreal; M. & L. Samuel, Benjamin & Co., Toronto.—Editor.

Aluminum Ware.

R. Bradfield & Co., Morrisburg.—"Will you kindly give us the address of manufacturers of aluminum ware in Canada? Are the works of the Northern Aluminum Co. in Canada?"

1. This line is not made in Canada at present. 2. Yes, at Shawinigan Falls, Que.—Editor.

Hand Power Hoists.

D. Cinnamon, Lindsay.—"Will you kindly give me the address of a firm who makes hand power hoists or elevators? I saw this article advertised in Hardware and Metal last year, but I do not just remember the firm's address."

Otis-Fensom Elevator Co., Toronto.—Editor.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 50.

MARKETS IN BRIEF.

Montreal.

Linseed Oil.—Easier in price.
Turpentine.—Price advanced.
Tin Sheets.—Stocks reported light.

Toronto.

Turpentine—2c. increase.
Linseed Oil—5c. decrease.
Rosin—Large advances.
Tin—Advance of 1c.

MONTREAL.

Montreal, March 31st.—The situation in regard to tin sheets is beginning to be interesting, according to one of the local authorities. This is the particular season when the demand for tin sheets is brisk. There are a number of activities that require tin sheets now but the stocks are becoming short, in fact to such an extent that the attention of the trade has been drawn toward it. It is felt that stocks may not be replenished until the opening of navigation which is likely to be later than usual this year. During the past week the tin market has been fluctuating and at the same time it has been seeking a higher level and shows a considerable advance over the quotations of last week.

It has been reported that the St. Lawrence Bridge Company is in the United States market for 60,000 tons of structural steel for the Quebec bridge. It is understood that the Carnegie Steel Company will furnish all the material. Canadian railways are still placing orders for equipment including $100,000 worth of frogs and switches for delivery at Winnipeg. Altogether the amount of business in steel originating from Canadian activities is already an appreciable figure this year.

Pig Iron.—This market is quiet in the United States but on this side of the line considerable activity is reported. Enquiries from foundries are numerous and the consumption of pig iron is considerable. One report from a New York source, says the Dominion Iron and Steel Co. is in the market for 6,000 tons of American basic for early shipment. The purchases of American pig for Canadian shipment by both steel companies and agricultural implement manufacturers has been quite considerable lately, as well as for billet and structural steel. The Canadian furnaces are reported quite active and foundries are out for considerable supplies. Prices for future pig iron on dock, Montreal, are already quoted as follows: No. 1, Summerlee, $20.00; select Summerlee, $19.50; soft Summerlee, $19.00; No. 3, Cleveland and Clarence, $16.75 to $17.00.

Copper.—The copper market does not show much change in the local market. In the primary market it has been undergoing some changes, having shown strength a week ago only to weaken again under accumulated stocks.

Tin.—As stated above tin while fluctuating lately has at the same time sought a higher level and is much firmer than it was. In Montreal there are indications of a shortage of tin sheets, and as the demand is at this season, the trade are directing their attention toward it, as it is felt that stocks will not be replenished before the opening of navigation. The market is strong just at the time of writing and is worthy of attention under such circumstances.

Spelter.—This market shows a little firmer, but there is not a very marked change.

Lead.—Like spelter, lead has a better tone and is a little more active. The situation locally is not much changed.

Scrap.—The market is still quiet with demand rather light.

Prices are normal, thus: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron No. 1, $14.50; No. 1 wrought iron, $12.50; malleable No. 1, $9; miscellaneous steel, $5.00; stove plates, $12.50.

TORONTO.

Toronto, March 30. — Business in metals is opening up very well. So far, the volume of trading has been in excess of the amount of business done up to this period last year. As there is nothing at present in sight to suggest that this active condition will not continue, it is safe to assume that a prosperous year is ahead. Local metal men express every confidence in the future.

There have been no developments during the past week, except in the case of tin. A slight advance was recorded in the price of tin, but other metals are remaining firm. This all around steadiness is having a good effect on business generally, and is causing greater confidence to be felt. Steadiness in prices is bound to result in an even run of business, and metal men locally will be well pleased if present conditions are maintained.

Tin.—The condition is somewhat similar to the state of affairs prior to the recent break in price. The syndicate is slowly, but very surely, forcing the price back to the high notch from which it so recently receded. Locally another cent has been added to the price, making it 44 cents.

Commenting on the situation at London, the American Metal Market has the following: "The syndicate representatives, who were a short time ago apparently doing all they could to knock the tin market down, evidently with the object of starting a fresh upward movement from a lower level, seem to have carried out their program successfully. After declining £16 to the 16th inst., the market has since advanced £12 and gives the appearance of going higher, but it is a one-man market; the syndicate's actions will decide the course of the market."

Antimony.—The antimony market has again relapsed into dullness. An improved tone was noted last week, but the improvement did not last long. In this respect, local conditions reflect the situation on the world's markets, where antimony has become somewhat of a drug. The price remains at 9½ cents.

Copper.—In contrast to conditions on the other side of the line, copper is showing considerable activity here. There is a good demand and fullest confidence is shown. The price has ben steady.

Plates and Sheets.—The only thing that distinguishes the situation as regards plates and sheets, is the scarcity of local stocks. At the first of the year a number of local houses were nearly "cleared out." So small was the supply in fact that some anxiety was felt. The condition has not improved to any appreciable extent since, and, in the meantime, the demand has grown apace. Prices are unchanged.

Pig Iron. — The improvement noted last week in the demand for pig iron is still in evidence and enquiries in large number are being received. Prices remain firm as follows: Canadian Foundry No. 1 is $19.50 and No. 2, 50 cents a ton less. Old country iron is quoted at $20 for Middlesboro No. 3; and $20.75 for Clarence No. 3; Summerlee No. 2 is $22.50, and Cleveland No. 1, $20.50. Jarrow and Glengarnock Scotch irons are at $20.50 and $22.50 respectively.

Lead.—The demand is not heavy, the orders received being for the most part of the hand-to-mouth variety. Stocks are rather light, but holders are talking confidently and holding for higher prices.

Spelter.—Buying is still restricted in bulk, although the business being done is deemed satisfactory for this season of the year.

Old Materials.—The situation is unchanged. Quotations to-day are: Heavy copper and wire, 10½c.; heavy red brass, 9¾c.; heavy lead, 3c.; light copper and bottoms, 9¾c.; tea lead, 2½c.; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7, stove plate, $13.

MILK CAN MADE POOR SAVINGS BANK.

Milk cans are all right in their place, but an employe of the Ironclad Mfg. Co., at Brooklyn, N.Y., has discovered that they do not make good as savings banks. During a recent financial scare, he withdrew from the bank, his lifetime savings, amounting to $8,000, and placed the money in a damaged old milk can which, he had noticed had stood in the same corner of the factory for years.

The other day he went to make another deposit in the milk can, and what was his consternation to learn that it was gone from its accustomed place, and the $8,000 with it.

HARDWARE MARKETS

MONTREAL.

Montreal, March 31st.—Had it not been for the increase in the western business it is likely the trade during the past month would have shown a smaller figure than that for the same month last year. In the east the spring has been late in breaking and even yet the weather has not struck its stride. The month in 1910 was balmy, in fact, it seemed to have interchanged positions in the calendar with April. At any rate, the idea is expressed that the increase over the same month last year is not very appreciable. There was a falling off in the east but the west came forward with heavy orders and considerable business has been done in this direction. The demand covers all the spring lines with a noticeable increase in builders' goods. In the shipping rooms the new activity is shown in a great variety of lines. Bolts, screws, house and garden utensils are prominent, tarred paper and other paper of that kind has received a new impetus, picks are going out, together with other lines. The wholesale hardware trade are busy just now. It is hoped that the retailer is finding the same conditions.

Contractors' Supplies—As far as this section of the country is concerned the improvement in this market has not been very considerable. There is quite a little activity in building circles, but the real spring demand is not yet apparent. For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upwards. Trade in these lines at present is improving.

Household Utensils—In this department business is good. It is just about the same as was felt last week, but the tone is confident and practically every order includes a fair share of articles under this heading. This is the time of the year when household articles of the utensil form are in good demand, and it will be felt for quite a few weeks yet. Some of the prices quoted are:—Food choppers, from $9 to $15 a doz.; ice cream freezers, 1-qt., $1.50, 2-qt. $1.65, 3-qt. $2.05, 4-qt. $2.50, 6-qt. $3.15, 8-qt. $4; coffee percolators, $1.75 to $3.50; washing machines, from $3.50 up; wringers, Royal Canadian, $47.75 per doz.; Universal, $37.75 per doz.; Safety, $56.25, less 20 per cent. per doz.; Mrs. Potts' irons, plain, 82½c per set; nickel-plated, 87½c per set; common sad irons, 4 to 7 lbs., $5 per cwt.

Carpenters' Tools — Retailers are stocking up for this business or are replacing stocks that have been heavily drawn upon. The feeling is that there is still a good business to be done and the orders coming in are indicative of that opinion. The following discounts are about the average: Steel squares, 50 per cent.; auger bits, 47½ to 70, according to quality; augers, short and long-eye, 65; chisels, 75, 10 and 5; draw knives, 75 and 10; handsaws, Canadian make, 35; boxwood rules, $1.15 and upward, a doz.; nail hammers, $2.75 and upward a doz.

Spring Lines—There is a good steady demand for spring lines. Hose is bringing in a regular trade; sprinklers, too, are selling, and other lines are just as active. Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote hose clamps, ½ to ¾-in., 25c a doz.; hose couplings, ½ to ¾-in., $1 a dozen.; hose sprinklers, ring pattern, $5.75 a doz.; revolving pattern, 12-in., $13 a doz.; 24-in., $34 a doz.; and 36-in., at $39 a doz.; hose nozzles, Gem, $3.50 a doz.; reels, 75c each and upwards; garden wheelbarrows, $27 a doz. The discount offered is 50 and 50 p.c.

Heavy Hardware—In heavy hardware there is a pronounced demand. Bolts and nuts are moving especially well. Discounts are: On carriage bolts, ⅜ and less, 70 per cent.; coach screws, 75 per cent.; stove bolts, 80 and 7½ per cent.

Sporting Goods—There is a steady trade in this department. Orders for spring and summer goods are coming in freely, and the sum total of trade is quite satisfactory.

TORONTO.

Toronto, March 30.—Conditions have been quite satisfactory, despite the very unfavorable weather that has prevailed during the past fortnight. There has been a fairly steady demand in all lines, particularly in household goods, spring lines and builders' hardware. Sporting goods are also coming to the front rapidly.

It is generally considered that the trade up to date has been well ahead of last year and that the prospects for the future are of the brightest. Travelers report that the dealers are full of confidence and are preparing for a busy spring and summer trade.

Collections are good. No complaints have been heard on this score and there seems to be enough currency on hand to meet payments readily.

Seasonable Lines.—There is an active demand for spring goods. Garden hose, sprinklers, mowers, rakes, shears, spades axes, wire fencing, and all similar lines are moving well. Refrigerators are in fair demand and the same can be said of wheelbarrows, cream separators, ice cream freezers and vacuum cleaners. More orders have been received for vacuum cleaners than ever before. Many of the orders now received are for immediate delivery.

Household Goods.—There is marked activity in all strictly "house" goods. Graniteware and tinware are moving smartly and stove accessories are in demand. Meat choppers, coffee percolators, kettles, pots, pans, clothes wringers, etc., are selling well.

Builders' Hardware.—The development of business in this department during the last fortnight has been one of the features of the local hardware market. In anticipation of a heavy building season, dealers are stocking up early in all that pertains to the building trade. There has been, also, a consistent and heavy call for tools of all descriptions, evidencing activity in the trades.

Heavy Hardware.—The demand for bolts, nuts, screws, wire, etc., has been seasonably good. Present quotations are:—Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Stoves and Heating Goods.—There is quite a remarkable activity in the stove line, for this time of year. Ranges are in fair demand and quite a few furnaces are still being sold. One local house shipped out a carload of furnaces to-day. The big demand, however, is for gas stoves. Business in this line is reaching its highest point and large orders are being received.

A marked feature is the active demand from the west for stoves of all kinds. So large are the orders, in fact, that some manufacturers at least are finding difficulty in meeting them.

The plate and sheet industry is marked by somewhat of a shortage. Orders are not promptly filled by the English manufacturers and local handlers are somewhat embarrassed in consequence.

Sporting Goods.—Trap shooters' supplies are particularly busy at the present time. With the arrival of comparatively mild weather, shooting at the traps has been begun in earnest and there is now a call for the necessities incidental to that sport. Other lines are also going well. Baseball goods are to the fore and fishing tackle is in demand.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

NEW SAMPLE BOARD.

The Yale & Towne Manufacturing Co., of New York and Stamford, are just introducing to the trade in an attractive folder a rather novel sample board containing four of their leading night latches, of various types and grades. The board is designed to attach to the shelving of a hardware store and is furnished in two ways (with and without an assortment for stock). The latches are mounted complete with cylinders showing through on the opposite side, and brass hooks are applied on the cylinder side, for hanging the keys. Brass tags are provided, giving the list number of each latch.

NEW COMPANIES.

The General Machinery Co., head office Toronto, capital $40,000, have been incorporated to manufacture engines, boilers, tools, etc.

McFarlane-Douglas Co. have been incorporated, to carry on the business of manufacturing of sheet metals and builders' supplies; head office, Ottawa; capital stock, $300,000.

The Western Hardware Market Situation

Spring Trade Opening Well—Farmers' Supplies in Active Demand—Contractors Placing Large Orders.

Winnipeg, March 28.—The general tone of the market is brisk. The spring trade is opening up exceptionally well and prospects for a splendid year are considered assured. The demand runs particularly to farmers' supplies. The fine weather which has prevailed of late has been a great help in this respect. The farmers are already planning to get started on their spring work and are laying in the necessary supplies. Builders' hardware is already in good demand. Helped to an early start by the fine weather, the contractors are already hard at it and are placing orders for tools, nails and general supplies.

The only marked change in prices is in horseshoes. An all around advance of 25 cents has been declared. The demand has been heavy.

Rope is still very weak. The fixing of a lower quotation has been delayed, contrary to expectations, but in the meantime all handlers are asking a lower figure.

It is reported that there is a poor quality of solder on the market at the present time. The price is weakening.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts 77½.

Bar Iron—Bar Iron $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $13.

Blocks—Steel, 45; wood 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c pre lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.83; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware— Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; grainte, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron — Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 26, $4.20; 28, $4.60; 30 gauge or 10½oz., $4.80; Queen's Head, 28, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—¼ in., $3.50; ⅜ in., $3.80; ½ in., $4.25; ¾ in., $5.50; 1 in., $7.90; 1¼ in., $10.75; 1½ in., $12.70; 2 in., $17.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger $4.65; snowshoes, No. 0 to No. 1, $5.15, $5.00; No. 16, $5.25.

No. 2 and larger, $4.65; steel, No. 0 to 1, $5; No. 2 and larger, $4.75; featherweight, $6.15.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers — Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼ in., $2.55; ⅜ in., $2.85; ½-in., $3.45; ¾-in., $4.25; 1 in., $6.10; 1¼ in., $8.30; 1½ in., $10; 2 in., $13.30; 2½ in., $21.80; 3 in., $28.60; 3½ in., $35.60; 4 in., $40.80; 4½ in., $46.80.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9.50; dash, $9.75.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope—Sisal, 9c; pure manila, 10½; British manila, 9¼; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.25; broken lots, $8.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base $25.75 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate — 1. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 33 1-3.

Wire—Barbed Wire, 100 lbs., $2.95; plain twist, $3.25; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15,

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

There is a splendid trade being done in paints and oils. Lubricating oils are active and the output of mixed paints is exceptionally heavy. Turpentine continues to soar and is now quoted around $1.40. A weakening tendency has been shown in linseed oil.

Petroleum and Gasolene—Silver Star, in bbls., per gal., 15c; Sunlight, 18½c; Family Safety, 22½c; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c; White Rose, in bulk, 22½c; National Light, in bulk, 21c; Engine Gasolene, 24c; White Lily, 26c; Royal, 24c.

A "MADE IN CANADA" EXHIBIT.

An echo of the recent hardware convention held in Peterboro has reached Montreal in the form of the special "Made in Canada" exhibit of hardware supplies shown by the Taylor-Forbes Co., as manufactured at their works in Guelph, Ont. One of the incidental lessons brought out at the convention was that numbers of retail hardware men throughout the Dominion have not had the opportunity of knowing the wide range of hardware goods that are of Canadian manufacture. Likewise, they are not thoroughly acquainted with the standard of the Canadian-made goods in comparison with those that are the output of foreign houses. An explanation of this condition of affairs is partially offered by the fact that travelers are unable to carry a complete line of samples, and while catalogues fulfill a certain duty, they fail to convey a definite idea such as is given by a display of the goods themselves.

Ontario hardware retailers having benefited by this exhibit, one of the most complete that has ever been shown in Canada by an individual manufacturer of these particular goods, the display was transformed to the Montreal branch of the Taylor-Forbes Co. Ltd., 246 Craig St. west. Invitations were issued to the jobbing and retail trade in this section, and nearly all availed themselves of the opportunity of examining this exhibit of Canadian-made goods.

The whole idea was carried out simply for the purpose of giving information to the trade in regard to the goods which Taylor-Forbes are manufacturing and creating more confidence in the qaulity of the articles produced in Canada.

Owing to the removal of T. Allan Smith from Elora, the management of the Elora Bell Telephone Co., has been transferred to A. Hobbs, hardware merchant of that place.

Some New Hardware Lines Described

Novel Wire Cloth Display Rack—A New Ice Breaker—Repeating .22 Rifle With Large Magazine Capacity.

A SOLDERING PASTE.

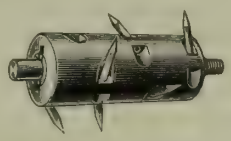
"Fluxite" is the name of a soldering paste which is being introduced to the Canadian trade by the Auto-Controller and Switch Co., of Bemondsey, London, S.E. It is said that this flux will solder even dirty metals without cleaning and without corrosion, and that it does lead jointing with only a blow lamp, and without solder. It is also claimed that brass unions and taps are tinned without first being cleaned where "Fluxite" is used.

WIRE CLOTH DISPLAY RACKS.

A very convenient method of displaying wire cloth, is by means of the Bowser Wire Cloth Display Racks, one style of which is illustrated herewith. These racks save space in the store, and make

it very easy to handle the ordinarily clumsy rolls of wire cloth. Both sides of the rack are available for display purposes, so that a great many different widths may be stored in small space.

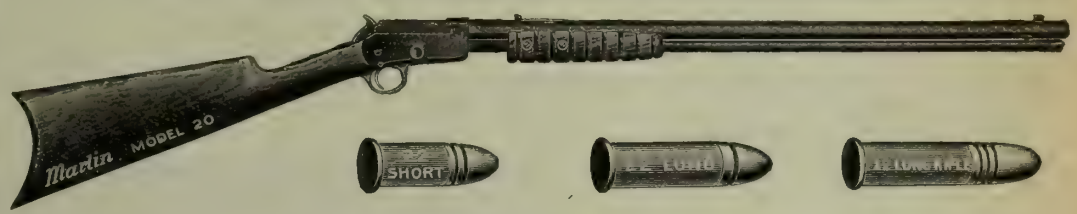
These racks are manufactured by R. M. Bowser & Son, Renfrew, Pa.



RAPID ICE BREAKER.

North Bros. Mfg. Co., of Philadelphia, Pa., have recently placed on the market, under the above name, a small sized ice breaker intended for hotels, restaurants,

bars, and ice cream makers, where it is desired to break ice by hand quickly, with only a small outlay for the machine



The opening for ice, is 8 x 6 inches, and the capacity is said to be over one half ton per hour for hand use. The cylinder is 3 inches in diameter and has

eight picks so arranged that one after the other sticks the ice. The manufacturers claim that the construction insures that little of fine or shaved ice is cut, all the ice being broken into pieces the size of walnuts.

NEW MARLIN .22 REPEATER.

The Marlin Firearms Co., New Haven, Conn., are now producing their new Model 20, Full Magazine Rifle. This rifle gives 25 shots at one loading with short cartridges, 20 shots with long

cartridges, or 18 with long-rifle cartridges. This is a considerable capacity for a pump action repeater. It has solid top, side-ejecting construction, and shoots short, long and long-rifle cartridges, handling them without any change in adjustment.

BURGLAR-PROOF SAFE INVENTED.

Vancouver, B.C.—Walter Thomas, of this city, has invented what he believes is an abolutely burglar proof safe. The device is simple and unique. A perfect sphere and a perfect circle are the novel features of this safe, which can be made any size. The safe is made of thickened metal which is heavier at and around the door. It revolves by simple mechanism and when closed the door of the safe is turned downward into the pedestal. A burglar would therefore be confronted with the task of working on an apparently solid globe of metal with no door in sight. In this turned and and lowered position, the safe presents a simple metallic sphere which is heavily weighted at its under surface making it impossible to revolve the sphere from the outside. In the interior is placed a box for valuables hung centrally on trunions and weighted at its under side so that it will not revolve with the sphere, but will remain in its normal position with its floors and compartments practically horizontal. It is planned to make the parts of the safe in the United Kingdom and assemble and finish them in Vancouver. A manufacturing company has been organized under the name of the Dreadnought Armorclad Safe Company.

MONKEY JACKS.

Trewhella Bros., of 6 Alma St., Smethwick, Birmingham, Eng., have issued a 1911 catalogue dealing with their Australian monkey jacks. Full particulars are given of the general utility and efficiency of these jacks, thus enabling prospective buyers to select the model most suitable to meet their requirements. It is announced that the company have recently enlarged their plant so as to take care of their increased business.

THE CARRIAGE TRADE.

Many hardwaremen, particularly in the West, handle carriages with much success. The line is a logical one for the trade to handle, in many respects. When the farmer comes into town, he has almost invariably some goods to purchase at the hardware store; he thus calls there pretty regularly. If he is in need of a new carriage or a wagon, and the hardwareman carries a line, the farmer has frequent opportunities to look over the stock and to discuss the matter with the dealer. The chances are that he will buy his carriage supplies there anyway. Why then should he not purchase his carriage at the same place?

Geo. Hancock, of Port Hope, handles a large stock of carriages and has been well satisfied with the results. He sells a large number each year, and has found the department a profitable one.

Mr. Hancock carries out the "outside salesmanship" idea in the sale of carriages. He does not wait for the farming trade to come to his store; he goes out and meets the farmer, makes friends and thereby establishes a connection which ultimately leads to trade relations. His trade is increasing so rapidly that he is talking of erecting a warehouse just for carriages this year.

DEATH OF OLD EMPLOYE.

The death occurred on Saturday, March 25, of Alexander Anderson, head shipper at the Toronto offices of the McClary Mfg. Co. He had been with the company for about twenty years, twelve of which had been spent in the Toronto branch. The deceased was 59 years of age and leaves five children. The funeral took place on Tuesday in Hamilton.

Tendencies in the Builders' Hardware Trade

Public Being Educated to Prefer Better Class of Hardware—Period Styles Much in Vogue—How Clerks Can Direct the Tastes of Purchasers.

There is a noticeable tendency to-day toward a higher standard in some lines of builders' hardware.

In fact, many homes are now planned according to particular designs. This is especially true of the better class of houses, some being after the old English idea, others the Mission, the Colonial, and so on. It is nothing more than what might be expected that, as the country becomes more prosperous, the men who enjoy its prosperity should desire to provide for themselves dwelling places in keeping with their means. And architects are not unwilling to bring forth their suggestions to prospective home builders, to cater to their tastes and likewise to their pockets. Having decided, therefore, on some particular design for a house, the owner must follow it out in detail, principally because he has adopted that style and also because his critical friends will not fail to notice just how faithful he has been to it in the very details.

Giving Attention to Appearances.

It may be said by the hardware dealer in the average smaller city or town that expensive houses are decidely the exceptions, all of which is no doubt true, but the plan adopted in selling to the wealthy builder is just the same, in a general sense, as in dealing with the man of less means. Houses are built with permanency of occupation in view, in the most of cases, and because one naturally takes a pride in the appearance of his house he is open to persuasion in regard to the fittings he will use in its adornment. Service is always the first consideration in these matters, but, for reasons already referred to, appearance is receiving more and more attention.

Hardware dealers are aware of this fact, and apparently they have not been tardy in taking advantage of it. The firm of Lariviere Incorporee, one of the prominent retail hardware houses in Montreal, are one of those who specialize in builders' hardware and have an office or showrooms particularly for this purpose. Their main store uptown is devoted to general hardware, and the branch downtown is really a store in itself, but is given over to builders' hardware and auxiliary lines such as bathroom fixtures, etc. Here are kept the samples of the various lines that are included under builders' hardware. The idea is to be able to actually show the many styles in stock, and to let a man see and decide for himself, if he so desires, what style he thinks most suitable for his residence.

Advantages of a Varied Stock.

"If you do not tell a man or show him what you have, how is he going to know about it?" The builders' display enables the dealer to show a prospective purchaser the different lines he can buy, and therein lies its value. If some special design is being adopted and tenders have been called for the contract, the securing of it is largely a matter of price. But when a man is undecided, and is looking for ideas, then is the opportunity presented of selling some of the better goods. The different styles are laid before him, and the reasons why he should use this or that are presented to him. It is in these cases that real salesmanship of builders' hardware is demanded.

Indoor fittings, escutcheons, handles, locks, knockers, bells, drawing room fittings, etc., there is a good opportunity offered of selling goods of better quality than the buyer probably intended in the beginning. The larger stores carry goods not only of Canadian and United States

A Cabinet Hardware Section in the Store of the Star Hardware Co., Toledo.

manufacture, but also those made in Europe. The retailer of less pretentions may not be in a position to go into this department as extensively as this, but the samples he shows can be augmented by catalogues. It is deemed advisable, however, to secure a well selected stock in accordance with the individual's means and the demands of the community he is in, and to have samples and catalogues of other prominent lines. The higher class of goods referred to may be dearer, but it can be pointed out that the trend is in that direction to-day, that a residence is given a better appearance and a certain individuality and altogether more satisfaction is secured. In instances where houses are being constructed for selling or renting purposes they are given increased value by the tone of the finishings.

Trend is Towards Better Goods.

There is no doubt as to what is the tendency in this direction, and it is only in recent years that it has become so pronounced. Public buildings are also being equipped with finishings of a superior class. In fact the buildings as a whole, in their modernness show numerous improvements, and the way is open here, too, for hardware furnishings involving new ideas and a higher standard.

The getting of business is one of the problems of builders' hardware. The general plan of keeping in touch with the civic building permit department, architects, contractors and others who are likely to know of new residences and buildings, requires watchfulness and resource. It is hardly necessary to say that in the larger stores this work is in the hands of men who attend to practically nothing else, and in the towns where the leading stores are smaller than those of cities, certain clerks are deputed to look after this feature of the business. Much depends upon the reputation of the house, the propositions it has to offer, the personality of those who are going after new business and the initiative and care shown in the work. No set principle can be set down with the idea "do this, and success is yours." There are too many conditions entering into this feature of the hardware trade. But the point referred to at the outset, the aiming at selling according to the tendency of the day, can be materialized, and the equipping of a department to this end will prove of great assistance.

PAINTS IN CORNER WINDOW.

In the big hardware establishment of W. H. Thorne & Co., at St. John, N.B., a prominent corner window is devoted to the display of paints and varnishes.

While the illustration on this page scarcely does justice to the display, still the products of several well-known manufacturers will be readily recognized. The most interesting part of the display is the framed show card, illustrating a full dozen residences in colors. This will be of considerable service to house owners who are anxious to paint their homes in colors which will be attractive and harmonious.

In displaying paints, it is perhaps difficult to get away from a few orderly piles of paint cans. These can be made to produce a neat effect, in a window, but, while they attract much attention, they are not exactly convincing. The paint window, to sell the maximum amount of goods, should show how to use the paints, and the results of using them. It must be admitted that this will be a rather difficult problem, but it will be solved, in time, by ingenious window dressers.

Paint Window of W. H. Thorne & Co., St. John, N.B.

A FLAXSEED CAMPAIGN BEGINS IN CANADA.

An extensive campaign is to be waged in this country to extend the growing of flaxseed. It is reported that E. H. Smith, of Duluth and Z. E. Martin, president of the Martin-Senour Co., paid a visit to Winnipeg recently in this connection. They secured assurances of co-operation from four agricultural schools in Western Canada. Help was also promised by Canadian banks to finance the purchases of first-class flaxseed by farmers for seeding purposes.

Speaking of the big campaign that is being inaugurated on both sides of the line, the Paint, Oil and Drug Review says :

"About 600,000 bushels of flaxseed will be sent to the Northwestern states of the United States and the Western provinces of Canada by the leading linseed oil manufacturers. Mr. Smith is directing the campaign to find out how much seed is needed by farmers and where it would be shipped. Farmers and elevator men both in the United States and Canada having knowledge of seeding requirements and knowing whether good seed is needed in their immediate localities, are requested by linseed crushers to write to Mr. Smith, who is flaxseed manager for the American Linseed company in Duluth.

"A development which will help farmers to procure seed is the decision of the leading oil manufacturers to extend financial assistance, if needed, to banks which give credit to farmers who may need credit in order to buy first-class flaxseed. The oil manufacturers feel that the bankers know the farmers personally and can attend to their needs more satisfactorily than several corporations with officers 1,000 miles distant."

The situation undoubtedly calls for concerted action, as the supply of linseed has shown signs of falling behind the demand.

DEATH OF FORMER CITY TRAVELER.

The death occurred on Monday of this week of C. T. Chipchase, who had been for many years connected with Caverhill, Learmont & Co., of Montreal. For years he was a city traveler in Montreal, and had many friends among the local retail trade. In latter years he had filled an important position in charge of one of the departments. The funeral took place on Wednesday afternoon.

It is all right to keep busy but it is all wrong to keep so busy that you have no time for courtesy and cheerfulness. It is a large part of a man's business to be agreeable to others.

Start Paint Campaign Early in the Spring

Demand Can be Stirred Up Easily—People Feel an Impulse to Brighten Up Their Homes in Sprintime — Circulars Can be Made Very Effective—Some Pointers on Window Displays.

More paint is sold in the spring than at any other time of the year. This is quite natural. In the springtime, people feel an impulse to brighten up their homes. Kipling in his inimitable jungle books, has called spring tke "time of new songs," it might just as aptly be phrased the season of new colors.. Nature then puts forth her most resplendent colors and, with everything out of doors so bright, the need of paint on woodwork, both inside and out, is accentuated.

If the hardwareman takes advantage of the situation by featuring his paint stock and keeping it continually in the public eye, he will find the demand fully in accord with the efforts put forth.

Early Advertising Advisable.

First and foremost, it is necessary to do a certain amount of advertising. The early advertiser enjoys some of the advantages gained by the early bird ; he attracts the attention of the public first and brings his line of paints into prominence. The advertising campaign should not be started later than the last week in March, unless the weather conditions are such that the idea of outside painting would appear incongruous. During the present season, paint ads were started quite early. Two or three weeks ago it was possible to skim through a bundle of exchange newspapers and find at least one ad., referring to paints, in every one of them. Most of them were educative readers, urging property owners to consider the idea of brightening up their homes and telling of some of the advantages to be gained.

The same line of argument can be well presented in a circular and this plan is often carried out. To issue a neat little folder to prospective customers is not an expensive undertaking ; and yet it is possible to make this form of advertising very effective. There is a great deal to be said on the score of paint. It not only serves to beautify the home but it is the greatest of economic measures. A coat of paint will help to keep the woodwork from rotting and the oftener it is applied, the longer the house will stand without repairs. It has, in addition, healthful advantages. All these points can be explained and demonstrated in the pages of a circular.

It is a wise plan to have the circulars follow in the wake of a newspaper advertising campaign ; they arrive in the home, then, well heralded. If the man of the house has been reading his newspaper regularly—and practically all men do nowadays—he will have seen the ads. for So-and-So's paints. He will probably have been impressed with some point made ; sufficiently impressed, at any rate, to read the ad. over. When the circular arrives, he recognizes the name and is sufficiently interested to read it through. If care has been taken in the get up of the booklet, if the reading matter is pointedly written and the illustrations attractive, that man will become a convert to the doctrine of paint. If he is a property owner, he will get out his pencil and figure on the cost of having his house painted. If he is a tenant, he will decide to call on his landlord and "lodge a kick" for a redecoration of the house.

An effective circular was put out by a Canadian hardware firm, which was designed particularly for the attention of landlords and contained some right-from-the-shoulder arguments. The first point made was as follows :

> It is a penny wise pound foolish policy to let your house deteriorate until it is hard to find tenants for it. People do not care to live in houses which look old and weatherbeaten ; certainly, they are not prepared to pay a good rental for houses which lack attractiveness. By spending a small sum on paint, you can command a higher rental and make money on your investment. False economy in the matter of paint may keep your property unoccupied. A small outlay now will insure steady tenancy in the future.

An argument along that line is pretty sure to strike home. It touches the self interest of the landlord—his most vulnerable point. Furthermore, the argument is quite sound and reasonable. Nothing is so likely to drive prospective tenants away as a weatherbeaten exterior. It not only offends the eye but it suggests draft, dampness and discomforts within.

Other points made were along the line of durability. It was pointed out that paint is a preservative, that it protects the woodwork and checks the advance of that final conqueror of all things, decay. Altogether, this booklet contained a most convincing line of talk. It was mailed to all property owners in the city and proved an important factor in a record sale of paint.

A Follow-up System.

Orders for paint from individual customers only come once in a certain number of years. It is therefore advisable to use a "follow up system." Many owners refuse to paint on the plea that their property does not require it yet. The dealer should keep track of their names and approach them again the next spring. Another year's exposure to the elements will have wrought some damage and it should not be difficult to secure orders in a large number of cases. Each year this process should be repeated and no names should be taken off the list, until an order has been placed. Paint will have to be purchased finally by the most unwilling of property owners, for the ravages of time are not to be gainsaid.

Intermittent work on the part of the paint dealer will not have the desired result. It will either leave the prospect in an undecided state or pave the way for some other dealer to make a sale. Continuous efforts alone will bring the best results.

The Window Display.

One of the most effective measures to be adopted at the present time is the arrangement of paint displays in store windows. A store window is one of the surest mediums of publicity. A certain number of people are bound to pass every day and a very large percentage of all who pass will glance at the window and mentally appraise it. If, in point of interest, it attains a certain rank in their appraisement, they will stop and glance it over.

To be effective in the truest sense of the word, a window display should, in addition to attractiveness and originality, possess a certain amount of selling power.

APPOINTED TORONTO MANAGER.

J. H. Conover has just been appointed manager of the Toronto branch of the Martin-Senour Co., whose warehouse has been located at 215 Victoria St.

Mr. Conover has been connected with the Martin-Senour Co. ever since they started their Canadian factory, and his promotion to the Toronto managership speaks well for the success he has attained.

J. H. CONOVER,
Newly Appointed Manager Toronto Branch, Martin-Senour Co.

Mr. Conover has a wide connection in the Western Ontario trade, having, himself, for many years, been proprietor of a hardware store at Leamington. He is thoroughly posted on the paint business as applied to the hardware trade, and, in his new position, he should repeat the success he gained on the road.

SEPARATING PAINT BUSINESS.

The incorporation is announced in the Ontario Gazette of the Robertson Paint and Varnish Co.; head office, Toronto ; capital stock, $100,000.

It was learned on enquiry that the Jas. Robertson Co. have separated their paint department from the rest of the business and have incorporated it under this name. The two branches of the business will be operated separately.

As a result of the acquirement of the property on which the present Toronto plant of the Jas. Robertson Co. is situated, for railway purposes, it has been found necessary to secure new locations. The plumbing end of the business will be located at Spadina Ave. and Sullivan Street, where a large building is to be erected. A new paint factory will be built but the site has not yet been decided upon.

M-L Pure Paints Floorglaze Elastilite Varnish

Justify every claim you can make for them, every effort made to push their sale—because they are trade-winners and trade-holders in every sense. We help you sell them by effective, persistent advertising—and you make good, steady, easily-earned profits.

Write for our attractive proposition to live dealers who want to "ginger up" their paint trade. Address place nearest you.

PAINT AND OIL MARKETS

MONTREAL.

Montreal, March 31.—There is a steady movement in paints with apparently but little effect from the prices that have been ruling in this market. The demand is covering more lines than ever and it is evident that the spring business has commenced in earnest. There is a good enquiry for marine paints and although it is evident that purchases were held back they are now heavy. Floor paints are also in good demand and altogether a good business is expected.

The market in linseed oil is a little easier, thanks to increased supplies, and the price is down slightly. Turpentine, however, is higher and it is not expected that there will be any relief until the new crop is received about the first of May. In the other lines there is a general good trade passing, all combining a satisfactory condition.

Linseed Oil.—The high prices have receded slightly of late under more liberal supplies. This is a welcome bit of news to the trade who have been waiting for some signs of a break. To manufacturers it is also welcome as in a number of cases they were not looking for linseed oil orders from the trade for the reason that they had no more than was sufficient for their own requirements. The situation is not entirely relieved yet, but the tension has been broken. The prices now quoted are $1.10 to $1.12 a gal. raw and $1.15 boiled.

Turpentine.—It has remained for turpentine to do some real soaring during the past two weeks. The scarcity is reported rather extreme and it is reported that the feeling among manufacturers is leaning toward suspending operations in which turpentine forms a large element until the new crop arrives in May. The intelligence to the effect that the supplies in the south are short are apparently well founded, and there is not much likelihood that there will be any relief until the new crop arrives. The price is reported this week to be at from $1.37 to $1.40 per gal. Even at the new price the offerings are light. Those who through business foresight or just plain chance bought up turpentine stocks can already show a good margin of profit if they were to let go with quotations at their present level.

Prepared Paints.—The demand for prepared paints is good in spite of market conditions. Marine paints are moving freely now. Work in this spring department has been held back possibly on account of the weather but also no doubt in the hope that prices would break. Now orders are coming in very freely. Floor paints are also moving well. Apparently the retail trade are making up by salesmanship the opposition that higher prices may present.

Paris Green.—There is a steady demand for this article the trade apparently desiring to get their orders in early. Prices are unchanged as follows: In barrels, about 600 lbs.. 17c per lb.; arsenic kegs, 250 lbs., 17½c.; 50 lb. and 100 lb. drums, 18½c.; 25 lb. and 100 lb. drums, 18¾c.; 1 lb. packets, 100 lbs. in case, 20¼c. per lbs.; 1 lb. packets. 50 lbs. in case, 20¾c per lb.; ½ lb. packets, 100 lbs. in case, 22½c per lb.; 1 lb. tins, 100 lbs. in case, 21½c per lb.

Arsenate of Lead.—There is an improved demand for lead arsenate, the poison that is more or less of a rival of Paris green. It is finding new customers and the trade is growing in extent. Prices are: In bbls., about 800 lbs., 9c.; in half bbls. about 400 lbs., 9½c; in 25 lb., wooden kegs, 10c; 5 lb. bottles, 12c; in 2 lbs. bottles 13c; in one lb. bottles, 14c.

White Lead.—Business has been heavy in white lead and also white zinc lately. Quotations are as follows: Lots of one ton, $5.85; contracts of five tons and over, $5.70; shipments less than one ton, $6 f.o.b. Montreal.

Putty.—While there is no particular change in this market the outlook is bright and orders are coming in encouragingly. Prices f.o.b. Montreal are: Bulk, bbls., $2.20; bulk cwts., $2.45; bladder, bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.55; 25's, cased, $2.70; 12½'s, cased, $2.90.

TORONTO.

Toronto, March 30.—The turpentine situation is still marked by a steady advance and to-day the price quoted is $1.40 per gallon in 1 barrel lots. This advance does not correspond to the increase at Savannah, but local jobbers do not feel justified in putting the price up any higher at this juncture.

There is not as good a demand for paints and oils at the present time as had been hoped for. The unfavorable condition of the weather has had much to do with this and the uncertainty of the situation as regards turpentine has affected the trade in that commodity very seriously. In fact, there is practically nothing being sold in turpentine just at the present. The price of linseed oil has weakened and the demand is better than it has been for some time.

Local jobbing houses are very busy preparing and sending out April 1 shipments. The volume of these orders, the great bulk of which were placed some time ago, is quite satisfactory.

Linseed Oil.—There has been a tendency in linseed oil prices to weaken for some time back. This culminated in a material cut to-day of 5 cents. Where $1.20 for raw and $1.23 for boiled were the ruling quotations before, $1.15 and $1.18 respectively are now asked. The probabilities point to more favorable conditions on the oil market. It is supposed that seed from South America will make it possible to produce cheaper oil in May. At the present time, however, the market is pretty bare of oil and crop possibilities are being anxiously discussed.

Turpentine.—The price here has remained at $1.40 per gallon, which point it reached on Friday last. Some houses quote $1.42, but this is above the general quotation. It is claimed that the price asked is not as high as might be fixed, insomuch as it costs a fraction over $1.33 to lay it down in Toronto. So little is being sold, however, that it really does not matter just what the price happens to be.

The situation at Savannah is, if anything, worse than at last writing. The supply there is wellnigh exhausted. It is said that there are only about 900 barrels in stock at the present time, whereas last year at this time there were over 9,000. To further complicate the matter, the weather probabilities seem to indicate that the new turpentine will be later reaching the market than usual. On top of that there is at this time a demand for prompt delivery and as a result the receipts of turpentine each day are less than the amount shipped out. In view of these facts, correspondents at Savannah are freely predicting further advances. Some think the price there will advance from five to eight cents shortly. It is doubtful if the local price would respond fully to any further advances.

Wood Turpentine.—There is some demand now shown for wood turpentine, chiefly as a result of the high climbing proclivities of the spirits. The price quoted locally is $1.

Rosin.—The price of rosin sympathetically advances with that of turpentine. Rosins are now about double the price they were a year ago and indications are that further advances will take place during the next few weeks.

White Lead.—There is a very satisfactory demand for white lead and indications point to an early development along this line, commencing early in the month. The price remains the same and the rumors of advances, once so rife, seem to have died down.

Putty.—There is a fairly seasonable amount of trading being carried on. Prices are stationary. Standard putty is quoted at: Bulk in casks, $2.20; in 100-lb. drums, $2.55; in 25-lb. drums, $2.65; bladder in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb drums, $2.80; in 25-lb. drums, $2.90; bladder in barrels, $3.00.

Varnishes and Japans.—There is a steady tone to the market for varnishes and Japans of all kinds. The cold weather has checked the trade to some extent but it is nevertheless coming along quite well. Although there is still some "advance" talk heard, matters in that connection seem to have quieted down.

Petroleum.—Prices are given this week as follows:—Canadian prime water white 12½c.; United States water white, 14c.; Pratt's Astral, 16c. The market is strong with a good demand in evidence.

KEEPING A WANT BOOK.

Methods of hardware shelving and boxing vary with almost every hardware man, but there is one point that should be carefully watched. There is a tendency to allow the boxes or drawers on the shelves to run low, and the first knowledge of the true state of affairs is when it looms up empty some day when a good customer wants a particular hinge or lock. It is therefore important that some one should have the duty of looking after this matter to prevent disappointing customers. One hardwareman, discussing this subject, stated that he has a want book, and makes it the duty of every clerk to see that whenever any article is getting low in stock that it be immediately entered in this book.

A paint and oil salesman of Toronto, Donald K. McDonald, was reported to have committed suicide at Niagara Falls. He turned up in a few days, however.

B-H "ENGLISH" PAINT

70% PURE WHITE LEAD – 30% PURE WHITE ZINC
100% PURE PAINT

Gives the Dealer a Good Margin of Profit

You might very reasonably expect that such a high grade paint—70% pure white lead, 30% pure white zinc—would be "away up" in price.

It would be if we were not corroders of white lead.

We have our own white lead plant; we are the only paint makers in Canada that corrode their own white lead. We turn over the pure white lead (Brandram's BB. Genuine) from our Lead Department to our Paint Department at factory cost.

We have also our linseed oil refining plant and our dry color plant. This makes us sure of obtaining well matured Linseed Oil, and strong, permanent colors at lowest cost.

You can maintain "top of the market" selling price on B-H **"English" Paint,** because you are selling the highest grade paint in the field. You are largely independent of competition, because no other dealer in your town can offer a paint up to the standard of 70% pure white lead—30% pure white zinc—100% pure paint.

B-H **"English" Paint** is a good seller—big sales and good profits. High quality means pleased customers—and pleased customers more money in the cash drawer.

B-H "English" Paint will be sold in your town. If the agency is still open you have the opportunity of securing it. **Write to-day for 1911 price list and details of selling plans. Address our nearest office.**

Make a Good House-cleaning Display of

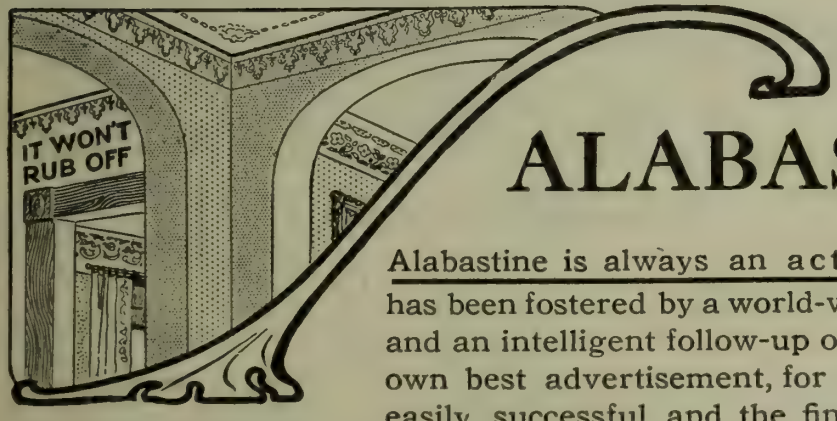
BOECKH'S BRUSHES and BROOMS

during the month of April (usually the first two weeks in the month are the most opportune—but of course depending largely on weather conditions) and increased sales are certain to result.

Do not fail to include all kinds of brushes in the "labor lightener" class.

WE WILL SUPPLY FREE TO THOSE REQUIRING SAME:

Window Display Cards : : Electros for Advertising Purposes : : Circulars for Distribution to Consumers



Drop us a Card if in need of any of the above.

THE BOECKH BROS. COMPANY, LTD.,

Head Office
80 York Street.

TORONTO, CANADA.

Factories
158 to 168 Adelaide Street West.

INCREASE YOUR ALABASTINE SALES

Alabastine is always an active stock. The Demand has been fostered by a world-wide campaign of advertising and an intelligent follow-up of circulars. Alabastine is its own best advertisement, for even with home labor it is easily successful and the finish is clean and beautiful.

HERE'S OUR NEWEST IDEA

We will suggest up-to-date, artistic, color treatment for the homes of your prospective customers, sending them colored sketches showing what the tinted walls will look like, thus aiding you to make the sale. After they have purchased the Alabastine we supply them with stencils free, making artistic effects and pleased customers certain. If you have not our Information Blanks and Free Stencil Circulars, write to-day for a supply.

Amatite ROOFING

"NEEDS NO PAINTING"

AMATITE means more to the man who needs a roofing than just merely something to put on the top of a building.

It means a thoroughly satisfactory and reliable roof covering, without future *expense for painting*—because the *real mineral surface* makes painting unnecessary.

Frequently the cost of painting a roofing amounts to almost enough to buy a new Amatite Roof.

Amatite can be laid right over shingles, tin or other ready roofings. The directions hold good for laying Amatite anywhere and over anything, and are as simple as A B C.

For further information, booklet, samples, etc., address nearest office.

Everjet Elastic Paint A very tough, durable paint at a low price. One color only—a lustrous black Use it for machinery, heating apparatus, smokestacks, roofs, fences, water tanks, etc.

Creonoid Lice Destroyer and Cow Spray Cows give more milk if sprayed with Creonoid to keep away the flies which make them restless. The poultry output will be increased if the henhouse is made obnoxious to insect pests by disinfection with Creonoid.

HE WANTS TO KNOW

Why shouldn't any customer want to know something from you about the paint you sell? He wants to know something about its reputation—if it has been tried—thoroughly tested—if it is guaranteed.

What will you say?

If you have

RAMSAY'S PAINTS

you will say these paints have been made in Canada for seventy years. The makers are the oldest in the paint trade. These paints are known all over Canada. The traveling salesmen cover the territory from the Atlantic to the Pacific. You see the paints advertised wherever you go. Naturally that means a reputation behind the goods, and in front of them as well. The firm fully guarantees and you are protected.

There is money for the dealer in every line of Ramsay Paints. They are real money makers.

Write us.

A. RAMSAY & SON CO.

Established 1842

The Paint Makers

MONTREAL

Does Your Store Look Like a Successful Paint Agency?

Your success and profits in paint and varnish selling are just what you make them. We know of small stores in unpromising looking localities that are making a lot of money from their paint and varnish departments, and we know of others much more favorably situated who are failing to make good.

It's altogether a matter of how intelligently you make use of modern selling methods.

In selecting the make of paint and varnish for your stock, just remember that reputation has built more successes than low prices. Consider the Sherwin-Williams reputation and then consider that they are the largest paint and varnish makers in the world. That means wide reputation for uniform good quality, and successful selling methods—a strong, trade-building combination for the Agent.

A keen, live merchant who appreciates the value of good advertising and the trade-building force of well-known merchandise, cannot fail to be impressed with the possibilities of the Sherwin-Williams Agency. It means the opportunity you are looking for.

We consider good store advertising one of the first essentials of successful paint and varnish selling. It's your obligation to your business to see that your customers are favorably impressed.

We have always studied selling problems from the dealers' standpoint. In forty years' experience with thousands of merchants, working under widely varying conditions, we have devoted special care to the preparation of store advertising which would compel favorable attention and impress customers that the Sherwin-Williams Agency was the proper place to buy reliable paints and varnishes.

The few photos shown herewith represent very fairly the success with which this co-operation has been carried out. They show very clearly what can be accomplished by live S-W Agents who make the most of our help and suggestions in handling and displaying their paint and varnish departments.

These stores are all making fine profits from their Sherwin-Williams Agency. You can do the same if you will enlist our co-operation, provided your territory is still available.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS

CANADIAN HEAD OFFICES AND FACTORIES: MONTREAL
BRANCH OFFICES AND WAREHOUSES: TORONTO, WINNIPEG AND VANCOUVER

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer

Rates—2c. per word first insertion; 1c. per word subsequent insertion; 5c. additional each insertion when Box number is required

MISCELLANEOUS

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson-Crain, Ltd., Toronto and Ottawa. (tf)

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

DOUBLE YOUR FLOOR SPACE—By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

Get the Good Paint that Gets the Good Profit

Go in for **profit**, Mr. Dealer, just as hard as you please — profit is necessary — but be sure you do not sacrifice **quality** for the sake of a little extra gain, or you may ruin your reputation. Keep your reputation above reproach by selling a **good paint** and you will get the good profit that good paint always brings.

MARTIN-SENOUR PAINT

100 PER CENT PURE

is the good paint that will get the good profit for you, and your reputation and your business will grow better with every can that you sell.

Moral:—Get the Sales Agency — then give the Good Paint a Good Push and Get the Good Profit. Martin-Senour Paint will be a big winner for you.

Write today — say you want the agency — and we will tell you how to get it and help you to get the Good Profit.

All Architects Know

DOUGALL VARNISHES

Specifications call for DOUGALL Varnishes because in the matter of quality their equal does not exist. They cost a little more than ordinary varnishes, it is true, but your customers appreciate quality and when they discover the spreading power and lasting qualities of DOUGALL Varnishes they will insist on that brand. Then you get the benefit of repeat orders.

Found Your Business on Satisfaction

WRITE FOR OUR BOOKLET "QUALITY AND ECONOMY IN VARNISH AND VARNISHING"

Business common-sense

Mr. Dealer—It's just plain business sense to sell the brand that means most profit and reputation to you.

Reputation means increased business.

That's one strong reason why you should handle Minerva Products.

MINERVA Paints and Varnishes

are made from the purest and best materials obtainable and backed by 76 years of paint experience.

The largest railroads and steamship Companies and the largest decorators are constant users of Minerva Products.

Make Minerva Paints YOUR leader—every sale means a satisfied customer.

The Minerva proposition is attractive.

Write to-day for information and dealer's price list.

Build up a trade on **the repeat order** basis by recommending

"International" Varnish Products

A majority of Hardware Dealers *are* doing that.

Don't take it on our say-so, but *investigate* for yourself—

And you will find out that a *big percentage* of Canadian Hardware Merchants *feature* "International" Products.

There are *more than a few reasons* why they should. Take

ELASTICA

for instance—the floor finish that's practically imperishable The only truly elastic finish on the market—the finish that wears like nickel steel.

Elastica does not mar, scratch, white or spot. It dries dust free in four to six hours and hardens over night.

Elastica Nos. 1 and 2 are used for Exterior and Interior work respectively.

Let us know your varnish and finish requirements and we'll give you solid reasons why you should always specify International Products.

All International Products are sold in full Imperial Measure Cans.

Earned $39.50 in 3 days

The above statement indicates what a representative of the MacLean Publications earned in three days, from March 7th to March 10th.

He hustled, indeed he did! But it was worth his while.

We want men of this calibre to act as circulation representatives, to take the exclusive charge of all our business in their respective localities.

We want men and boys who are live, hustlers, straightforward, and of good character.

If you have the ability to deliver the goods, to get results, to make good on a proposition like this, write us at once.

The MacLean Publishing Co., Ltd.
143-149 University Avenue, Toronto.

Paint and Varnish Removers.

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	**"Taxite"**
International Varnish Co, Ltd., Toronto, Canada	**"Klensa"**
Pratt & Lambert, Ino., Bridgeburg, Ontario, Canada	**"Expedite"**
British American Paint Co., Victoria, B.C.	**"Bapoo"**
Mount Royal Color and Varnish Co., Montreal, Canada	**"Scrape-off"**
James Robertson Co., Ltd., Toronto, Canada	**"Robertson's Paint and Varnish Remover"**
Sanderson Pearoy Co., Ltd., Toronto, Canada	**"Devolite"**
Stewart & Wood, Toronto, Canada	**"Solvo"**
Martin-Senour Company, Ltd., Montreal, Canada	**"Martin-Senour Paint and Varnish Remover"**

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

Chadeloid Chemical Company

100 William Street
NEW YORK, N.Y

When you think of Metal Ceiling, think of "Galt."

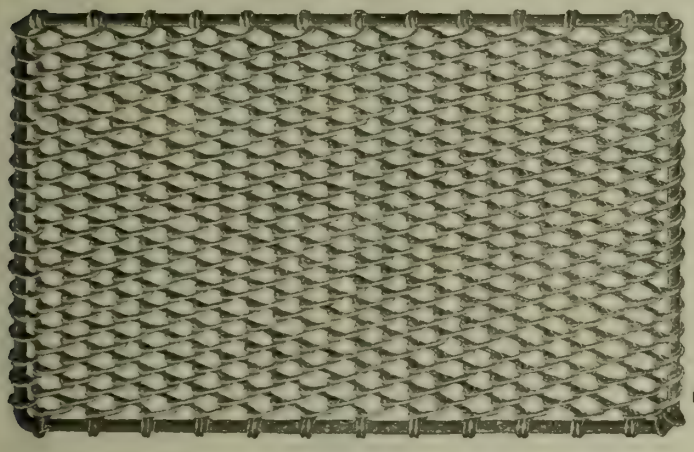
Dealer, House-owner and Architect all favor "Galt" Art Metal Ceiling

Ernest R. Beckwith, C.E., architect on this job, says of the goods supplied:—

"Besides being one of the prettiest ceilings I have ever seen, it was exceedingly easy to erect. In fact, most of the work was done by unskilled labor owing to the regular tinsmiths being busy.

The special material made for the stage-front was accurate in detail and satisfactory in every way."

If you want to please your customer and his architect; if you want to build up a business in Metal Ceiling and if you want to make the most money from your metal ceiling work, send your orders and enquiries to



The Galt Art Metal Co., Limied, Galt, Ont.

Slushy Spring Weather

MEANS A GREAT BIG DEMAND FOR

GREENING'S WIRE DOOR MATS

That is, when they are properly **pushed**. Try a window display. Send a bright clerk out to canvass the town, and watch your sales mount up. The demand is **big,** but inclined to to be **dormant**. The hustling businessman infuses ginger into the **dormant door mat** demand by a little extra **pushfulness**. Cut in this ad. illustrates our Simplex Wire Door Mat, a mat that will give a lifetime of good service. Costs less than half the price of a corrugated rubber mat and will give four times the service. This is your strong argument. A better line is our Patent Improved Reversible Steel Wire Door Mat.

For other styles see your **Greening Catalogue,** page 125.

Hardware and Metal

TORONTO

IT IS PERHAPS NOT GENERALLY KNOWN

That we have an Information Department, consisting of trained and practical men, whose time is employed solely in answering enquiries from people interested in cement.

NOW IT WILL BE READILY UNDERSTOOD

that out of the mass of enquiries that come to us, there are a number that include questions as to what might be termed Allied Industries. These we now answer to the best of our ability, but we could answer them still more satisfactorily if manufacturers of materials used in conjunction with cement would co-operate to the extent of sending copies of their catalogues and other literature, to be placed on file in our office for reference.

WE SHOULD LIKE TO OBTAIN

the names and addresses, together with catalogues, and any other obtainable information, of manufacturers of and dealers in:—

(1) CONCRETE MACHINERY. (2) BUILDING BLOCKS. (3) CEMENT BRICKS. (4) TILE MOLDS. (5) FENCE POSTS. (6) REINFORCING MATERIAL. (7) WATER-PROOFING COMPOUNDS.

It is not alone for our own convenience that we make this suggestion—firms who manufacture or deal in such articles will find it to their own advantage to have this information in the hands of our Information Department, thereby enabling us to hand on to them, from time to time, enquiries for such materials as they severally make.

In sending catalogues, literature or information, please address same to "Sales Department."

Ford Auger BITS

Bore 40 p.c. Easier

than any other make and do smoother, cleaner work as well.

It makes no difference what kind of wood you work on, hard or soft, wet or dry, the Ford bores easily, with absolute accuracy and will not clog.

Ford Bits draw in on the hardest knots without any pressure, and will never turn off or follow the grain.

The Ford bores with less pressure.

and nearly twice as fast

as the average bit, and whether you push in or pull back, they bore the same number of turns to the inch.

Every Ford Bit is made of a special steel and tempered by a patented process, which makes all tools uniform. Each Bit is forged under heavy trip hammer blows, thus insuring a greater fineness and durability than in any other Bit.

The Ford is imitated, but not equalled—insist on the FORD (superior in every way).

Write for Catalog E, showing all our tools.

Why the demand for the

BISSELL SWEEPER

has increased tremendously since the introduction of other cleaning devices.

1910 the Largest Year's Business in Our History.

The merit of Bissell's "Cyco" BALL BEARING sweeper has been vastly better understood since the introduction of other cleaning devices, as the people now better appreciate the value they get for their money, when they buy a Bissell Sweeper. No cleaning device, no matter how powerful the suction, can gather up miscellaneous litter that the Bissell sweeper picks up with ease and dispatch.

The Bissell weighs but 5½ pounds, hence a child can transfer it from room to room. Contrast this with the labor of changing from room to room, and up and down stairs, a cleaning apparatus that weighs from 25 to 65 pounds.

The public now understand that no matter what other cleaning device may be installed, the use of the Bissell sweeper cannot be dispensed with, as it is the daily, if not hourly, necessity in every home.

Cleans quickly and thoroughly without noise, dust or effort.

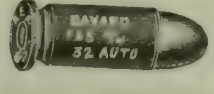
The "BAYARD" Baby Automatic Pistol, Calibre .32 (7.65 m/m)



The Little Giant---A Midget High Power Automatic

The .32 cal. (7 65 mm) "BAYARD" Pistol has been designed to meet the demand for a POCKET pistol COMBINING EASINESS OF MANIPULATION AND SIMPLICITY OF CONSTRUCTION WITH MAXIMUM EFFICIENCY.

Its size is that of a .25 cal. pistol, although it shoots THE POWERFUL .32 CAL. CARTRIDGE.

The "BAYARD" pistol possesses consequently THE ADVANTAGE of having a size REDUCED TO THAT OF THE .25 CAL. PISTOLS and a CAL. OF .32, GENERALLY CONSIDERED EFFECTIVE and heretofore found only in pistols of greater bulk. These features make the "BAYARD PISTOL" the IDEAL POCKET ARM.

"BAYARD" AMMUNITION

The .32 cal (7.65 mm "BAYARD" Cartridges adapted to Automatic Pistols of this calibre have no equal on the market as to quality, regularity of charges, penetration, etc. We are specialists in the manufacturing of this class of ammunition and guarantee against misfire, hangfire, etc.

FENN'S
Adjustable Post Hole Auger

holds undisputed pride of place as the fastest digging tool on the market, and for this reason alone is a splendid line to handle and recommend.

Moreover, it is simple in construction, stands abuse well, and has no castings to break or rivets to work loose. Blades are of highest grade steel bolted directly to standards, and the "Fenn" can be adjusted to dig different sized holes. Digs a full size hole clean to the bottom, and works equally well in any soil. Better send along for prices and fuller description of this splendid tool.

It is a line that sells readily and profitably. Write us to-day. Descriptive booklet forwarded free to enquirers.

The IRONCLAD *Alarm*

"It Rings to Beat the Band."

IF we placed our IRONCLAD movement in an ordinary alarm case, the chances are it would *turn turtle* within a year. And if it lived to tell the tale, it would be to *tell a tale*—for it would get so *clogged* with dust, it could not tell the *truth.*

But it's CLAD in heavy IRON armor and it can't *keel over.*—It's stocky, sturdy, steady.—If it's *cleaned* every other year, there's *no telling* how long it'll last.

Packed 12 in a box with advertising matter. Dealers' names printed free on dials in lots of 24. Height 5 inches. Dial 2¾ inches. Weight 2¼ lbs. Rings 35 seconds; can be shut off at will.

Stocked by 28 Canadian Wholesalers.

The Carborundum Company, Niagara Falls, N.Y.

Have You Seen These

New "Yankee" Tools?

No. 1530 Hand Drill for holes up to 3-16 in.

Takes round shank drills. Has the famous Automatic Double Ratchet movement the same as our other "Yankee" geared Drills, so helpful in many ways especially at close quarters where only part turn of crank can be obtained. The wood Handle has magazine for drill points. A fine tool for metal workers, amateur mechanics, etc.

No. 130 Quick Return

Same tool as the No. 30 but with a Spring inserted in the Handle to drive the spindle back quickly, ready for the next push. A great advantage for overhead work or where only one hand can be used. Takes all the Attachments used in the No. 30.

No. 75 Push Brace

Bores holes up to ⅜ inches in hard woods and ⅝ inches in white pine, quicker and easier than a Bit Brace. Drives and draws screws—takes all the small tools and works in close quarters where a Bit Brace cannot be used. Bearing down on the Handle drives it with that quick and easy motion of the "Yankee" Spiral Driver.

They are catching the Mechanics.
Better let your Jobber quote at once.

MONTREAL WINNIPEG JOHANNESBURG, S.A.

Keen Buyers

of Horse Clipping Machines

BUY THE BEST MACHINES. IT'S MERELY A MATTER OF BUSINESS—NOT SENTIMENT

It really makes no difference to the hardware dealer where the machine was made. He is in business to sell ***good*** goods—goods that satisfy customers and bring more business. The merit of a machine lies in what it will do—how long it will last—and how much it costs.

ON THE STRENGTH OF ITS MERITS

Stewart Horse Clipping Machines

are being used by horse-owners and sold by dealers in every civilized country on the globe.

One concern pilfered the idea on our Stewart No. 1. Of course, it was rather a clumsy adaption, but it was visible acknowledgment of Stewart superiority. The "counterfeit" machine resembles the Stewart in appearance—but the similarity ends right there. They couldn't steal the manufacturing process, because it may be imitated, but it is ***not*** equaled. Again, the Stewart has gears made of cut steel made file hard—not mere cast steel.

We fit the Stewart No. 1 with plenty of high grade flexible shaft and equip it with the famous Stewart tension one-nut clipping knife. We guarantee it to please the user better than any other machine made, or it can be returned to us at our expense and money will be refunded.

Send for details of our plan which helps dealers sell more horse clipping machines and which includes individual advertising.

CHICAGO FLEXIBLE SHAFT CO., 250 La Salle Avenue, CHICAGO

Trade Brought To You

Our General advertisements bring trade to the dealer handling our line. Appropriate announcements are shown in over five hundred publications, monthly, weekly and daily, all impressing the reading and buying public with the fact that

"1847 ROGERS BROS."

is the original and standard brand of Silver Plated Ware.

Our general advertising helps us greatly, but it can do so only when it helps the dealers who sell at retail.

Our wares reach the public through the individual dealer, therefore we try to aid him in making his sales of

"1847 ROGERS BROS."
WARE

as large as possible.

We are extensive and persistent general advertisers of Plated Silverware, and the individual dealer gets the benefit of it.

MERIDEN BRITANNIA CO., LIMITED
HAMILTON, ONTARIO

Do The People

Pass Your Store

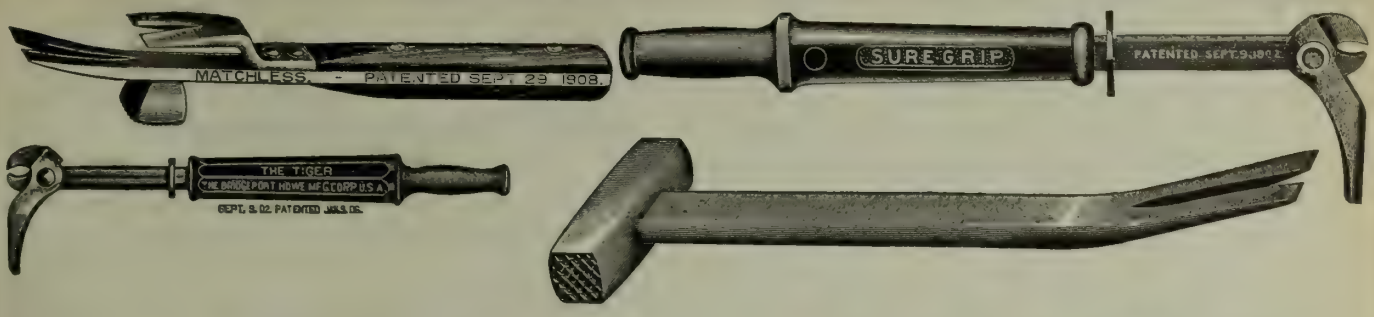
or do they stop before your window and look in, as they did before the holidays?

Dealers who have displayed one of our pictures of "The 1847 Girl" report that it has arrested the attention of many, and has then led to the inspection of the wares in the window and in the store. "The Girl" is of course particularly effective with a display of

1847 ROGERS BROS. MERIDEN B. CO. COMPANY **X S TRIPLE**

but she attracts so much interest that everything in the window comes in for a share of attention.

TALK QUALITY—The kind of silver that looks well on the show case, but will not stand daily service, is not a good kind to buy, nor a good kind to sell. Silverware must do more than appeal to the eye. "1847 ROGERS BROS. X.S. TRIPLE" has for sixty-one years been known as



"SILVER PLATE THAT WEARS"

and is the highest grade of silverplate made.

We are extensive and persistent general advertisers, and the individual dealer who handles our ware reaps the benefit of it.

GREENFIELD, MASS., U.S.A.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

We Want to Show You

all there is to show about

WONDER-SHINE

We have demonstrated to the majority of the Hardware Dealers of Canada that **WONDER-SHINE** is a money-maker.

Are you from Missouri?

Do you want to be shown?

Mr. Hardware Dealer—here's the reason why there is money in it for you.

We have shown the consumer.

People at first doubted our claims—we offered a rock-bottom guarantee covering all we said about **WONDER-SHINE.**

We have advertised and are advertising from Coast to Coast.

The demand is increasing every day because **WONDER-SHINE** does all we claim for it—**cleans silverware in half the time—cleans it better and has absolutely no injurious effects.** Send us a trial order—keep a display box in your window and one on the counter—give yourself and **WONDER-SHINE** a fair chance.

Case contains three dozen display boxes.

The "AUTOMATIC" Hand Power Vacuum Cleaner

The Machine with the "Double Tank," Light, Powerful, Easy-Running, "Blows" and "Sucks."

The Automatic Hand Power Vacuum Cleaner has a valve and piston pump action. The movement of the lever handle backward and forward forces the air up through the hose nozzle, bringing with it all the loose dirt, dust, etc. The double tank device for separating the dust from the air catches 95 per cent. of the dust in the bottom of the tank without screens, baffles or water; the remaining 5 per cent. is screened through a canvas-covered cylinder. The frame is made of malleable iron and steel, and is very rigid. The hose 12 feet long, made of rubber and interlined with spring steel wire which prevents collapsing and kinking. Hose is 1 inch in diameter; tube for attaching tools 4 feet long, made of brass tubing nickel-plated; nozzle or mouthpiece is of aluminum and has an opening of 7 x ¼ inches. The machine is light, compact and easy to carry, slip joints are used on all connections, making them instantly detachable and interchangeable. May be operated by one or two persons. Fully guaranteed or money refunded.

Not an Enterprise for the "Quitter"

"If there is one enterprise on earth," says John. Wanamaker, "that a 'quitter' should leave severely alone, it is advertising. To make a success of advertising one must be prepared to stick like a barnacle on a boat's bottom.

"He must know before he begins it that he must spend money—lots of it.

"Somebody must tell him that he cannot hope to reap results commensurate with his expenditure early in the game.

"Advertising does not jerk; it pulls. It begins very gently at first, but the pull is steady. It increases day by day and year by year, until it exerts an irresistible power."

MADE IN CANADA

A GOOD GUN WILL SELL

The dealer who handles the best and most modern gun is sure to receive the trade of the better class of sportsmen — men who pay for the best and demand it.

The Tobin Simplex Gun is backed by its manufacturers with a money-back guarantee, and, being made in Canada, costs less than an imported weapon.

The Tobin Simplex is the lightest strong gun made. Its frame and action parts are made of steel drop forgings, and the hammers, sears, springs and locking bolts are of tempered spring steel. The stock is made of selected fine grain walnut.

Fine New Store at Port Arthur

Fallis-Foote Co.'s Establishment Thoroughly Modern — Specialize on Carpenters' Tools—Splendid Oval-shaped Show Window, With Vestibule — Geo. F. Foote a Prominent Alderman of the City.

A fine new hardware store which is splendidly equipped in every particular, is that of The Fallis-Foote Co., of Port Arthur, Ont.

Burned out about a year ago, this firm displayed characteristic enterprise in acquiring their present three-storey premises in the new Merrick Block, which was only completed in June, 1910.

The store is 25 feet wide, by 120 feet deep and, as every modern device for storing and displaying goods, has been adopted, the store really gives the impression of being even larger. Neatness and order are apparent throughout.

Feature of the Equipment.

The building is steam heated, and is equipped with fire hose, on all three floors. The display windows are especially fine, being oval in shape with a vestibule 14 feet in depth, from the street line to the door. Many travelers who have seen the windows, state that they are the finest west of Toronto.

As shown in the illustration, there are three handsome silent salesmen, for the display of cutlery, silverware, hammered brass articles and other specialties. By looking closely at the illustrations, it will be seen that price cards are attached to the various articles shown in the silent salesmen, thus adding to their selling value.

The shelving is all of oak, the cabinet shelving, which was made by Campbell & Cameron, of Toronto, being oak-faced, balance of the shelving was made locally.

Fallis-Foote Co. have a full battery of Bowser Oil Tanks for handling all their oils. Traveling ladders have been installed, so that even the highest shelves are instantly available. These ladders have proven so satisfactory that the firm contemplate adding to their equipment in this line.

For lighting the store, Tungsten lamps are used altogether, as will be noticed in the illustration. Mr. Foote states that they have been found superior to the carbon lamps, both for light and expense. No trouble is experienced with their breaking, as the style of fixtures used does not necessitate handling them. Mr. Foote thinks that somewhat better results could be secured if the lights were lowered a little.

A steel ceiling of up-to-date design completes the very modern equipment of the store, and adds to its attractive appearance.

A Specialty of Carpenters' Tools.

From the illustration, it will be readily inferred that carpenters' tools constitute an important specialty with The Fallis-Foote Co. They have secured a large share of the trade in this line, by closely studying the carpenters' needs and keeping up a stock accordingly. Their tools are attractively displayed in the front of the store, and mechanics are assured of prompt attention and a good assortment from which to make their selections.

Interior Fallis-Foote Co.'s Fine Store at Port Arthur, Showing Builders' Hardware Dept.

Stoves and ranges are an important line with this firm, and even at the present time they are selling, on an average, one range a day. All their sales are of the better type of ranges. To promote their stove business, The Fallis-Foote Co. advertise extensively, and they find that it pays them to do so.

Brass Goods are Profitable.

Last fall this firm stocked up with quite an extensive line of hammered brass goods, some of which are to be seen in the foreground of the illustration on the previous page. These goods proved to be splendid sellers, and gave such satisfaction that still heavier orders have already been placed for the coming season.

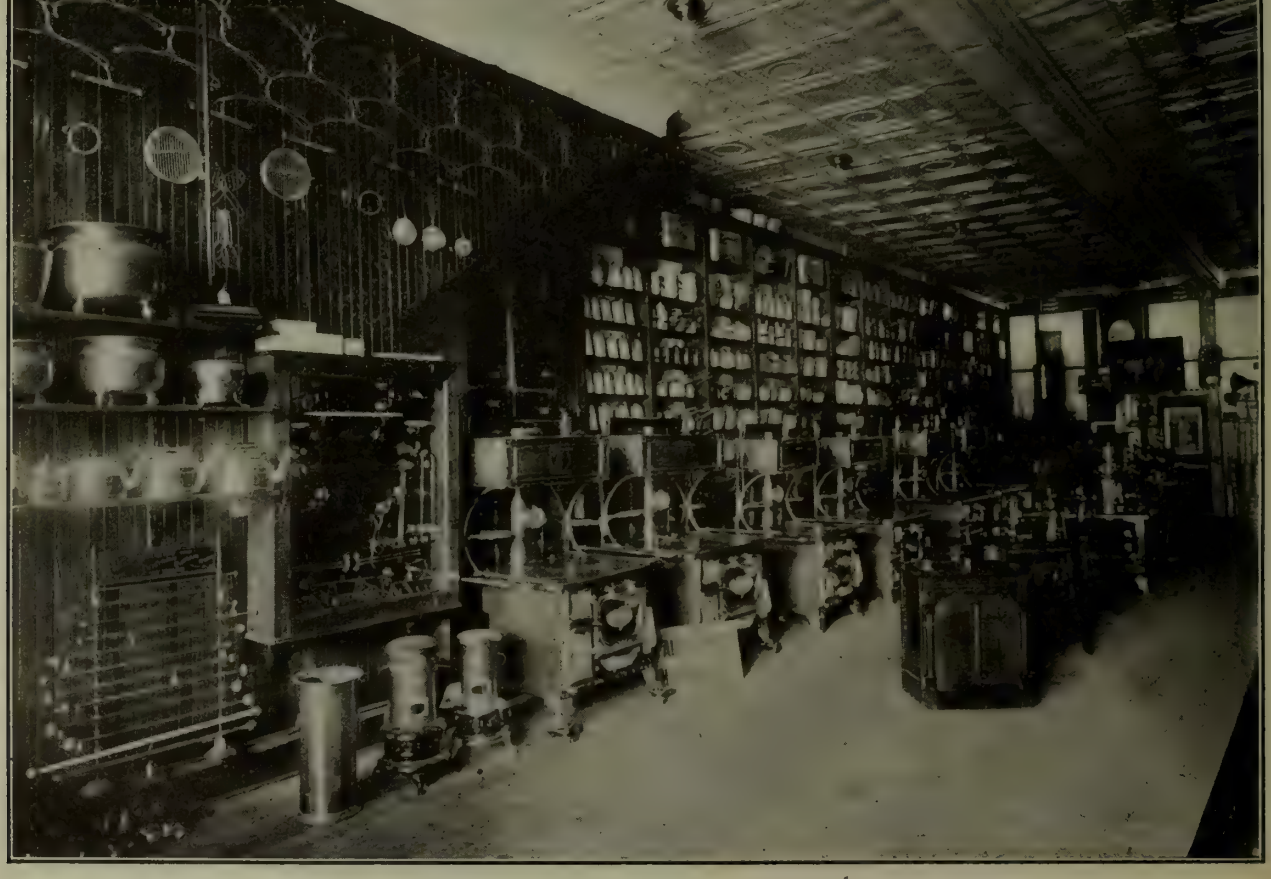
Paints and oils have proven to be a good branch of this firm's business, as have also tin and graniteware, a large stock of which they carry at all times.

Mr. Foote an Alderman.

Geo. F. Foote, of the Fallis-Foote Co., was literally forced into Port Arthur civic politics. A keen business man, Mr. Foote realizes the true relationship of business to the management of a city. Without seeking any official position he bowed to the wishes of the citizens who wished him to lend his services in looking after the interests of the city, and accepted civic office as alderman, this year.

Mr. Foote's optimism is one of the outstanding features of his success. If you should ask him how business is, he would always smile, and cheerily reply, "Business is fine." He is a business man and a "booster" and that is why he is making as great a success in the Council Hall as he has in his hardware store.

ALD. GEO. F. FOOTE,
Of the Fallis-Foote Co., Port Arthur.



FREE TRIP TO LONDON.

London.—The retail merchants of this city have banded together in a novel campaign to boost London as a shopping centre for Western Ontario. A number of them have organized the London Retailers' Association, and have arranged for a "Trade-in-London" week, from April 3rd to 8th.

The scheme was outlined in large advertisements appearing in the London newspapers which circulate largely in the towns within a 65-mile radius of London. The ads. have a very conspicuous head-line in red—"Free Trip To London." It then goes on to explain that the London Retailers' Association have arranged to refund railway fares on all purchases of $20 or more, within a distance of 65 miles from London, during the Trade-in-London week.

About eighty retailers, in all, are behind the plan, and visitors to London are asked to get receipts for every purchase they make at these stores. When the total of these purchases amounts to $20 or over, the receipts and return railway stub are to be taken to the refund clerk in the Home Bank, and he will refund in cash, the full amount of the railroad fare, round trip. If the visitor resides more than sixty-five miles from London the fare for 65 miles will be refunded.

This plan is much on the same line as the "Shopping Weeks," which are much in vogue in Britain, just now. It has been well organized and should result in making some permanent customers for the London merchants. The hardware dealers who are interested are: Purdom Hardware Co., J. G. Steele & Co., A. Westman, and J. E. Young & Co.

PAGE FOR HARDWARE CLERKS

HOW ABOUT A RETAIL CLERKS' CLUB?

"Birds of a feather, flock together" is an old saying, which is partially true. But, applying the saying to every-day life, there are lots of people with interests largely in common, who do not "flock together" as they should.

There are, for instance, the retail clerks, who, in almost every town, could make up a pretty good-sized association if they were to get together. They could find many ties in common, to bind them together, and, in addition to the social advantages accruing, they could discuss matters of business and exchange ideas which would be of great service to them.

Ever hear a bunch of travelers talking in a hotel rotunda or on a train? Their discussions are almost always on the subject of salesmanship. In short, they while away their leisure hours by talking shop, and, in the exchange of ideas which takes place, they unconsciously educate themselves to better perform their work.

If retail clerks had this same opportunity of spending an odd hour or so together, once in awhile, the selling knowledge they could give each other would do much to brighten them up and improve their selling methods. Such an opportunity would be presented by organizing clubs for retail clerks in every good-sized town. There would be no trouble in maintaining interest in the club, for, even aside from the benefits which would be derived from meeting together to discuss matters of retail salesmanship, the mere privilege of becoming closely acquainted with a lot of good fellows, couldn't help broadening the vision of every member.

This suggestion should appeal to readers of The Page for Hardware Clerks, and we hope to hear, before long, that at least some of them are starting the ball rolling in their town.

LEARNING THE GOODS.

Taylor Bros., of Carleton Place, have a good scheme for teaching their clerks the merits of different lines which they carry in stock.

When Frank Taylor orders a line of goods from a traveling salesman, he invites the salesman to bring over to the store, a complete assortment of samples of the goods he has ordered. There is a separate room in Taylor Bros.' store, where Mr. Taylor negotiates with the travelers, and, after the deal is completed, it is utilized as a sample room in which to display some of the goods which have been ordered.

The clerks are assembled in the room and the salesman proceeds to instruct them in the several talking points of his line, demonstrating his arguments by exhibiting the samples and showing just how they are to be used.

This is a great scheme for passing the traveler's enthusiasm on to the retail salesman. Each clerk is loaded up with information and selling talk, at first hand, and is in a position to speak more confidently to his customers about the goods in question. It is a good thing for Taylor Bros., because it cannot help increasing their sales, and it is a good thing for the traveler, because it gives him a chance to land a good repeat order, the next time he works Carleton Place.

BUCKSHOT CARTRIDGE IN FURNACE.

A clerk in a Sydney, C.B. hardware store had a disagreeable and painful experience the other day. He had swept up a quantity of paper and other stuff and threw a shovelful into the furnace. There happened to be a 12-gauge buckshot cartrige among the sweepings and, of course, it exploded. The whole charge of shot poured through the furnace door filling the young man's legs with shot, from ankle to hip.

HAVE CONFIDENCE IN YOUR GOODS.

Salesmanship has been defined as "the ability to make other people feel as you do, about the goods you have for sale."

Obviously, under this definition, a salesman must believe in his goods before he can become a success in his work. And the surest way to believe in the goods he sells, is to study them so as to know them.

Did you ever stop to think how much knowledge can be acquired by a hardware clerk right in the store? In the tool department alone, there is so much to be learned about the numerous articles in stock—how they are made and how they are used—that an inquiring and ambitious clerk can keep himself busy for a long time mastering its details. Every fact he learn about these tools, not only increases his confidence in them, but also makes him a better salesman and a better hardwareman.

Learn all you can about the goods in your store; believe in them, and then you will have gone a long way towards acquiring that knack of salesmanship—the ability to make other people feel as you do, about the goods you have for sale.

"NO COMPLAINTS."

The other day the writer went into a shoe store to buy a pair of patent leather shoes. After trying on three or four styles, he finally picked out a pair which looked all right, and fitted pretty well. They made a good impression.

"What price are these shoes?" he asked the clerk who was waiting upon him.

"Three dollars and a half," said the clerk.

"That seems a low price for a shoe of this kind. Is the leather good, or is it likely to crack?"

"Oh, that's a good shoe. We haven't had many complaints about it. In fact, it is quite a while since we have had any complaints about that shoe."

This was about enough to satisfy the writer that he didn't want that particular shoe. The fact that some complaints may have been made against it in the past, convinced him that it must be made of inferior material, and he didn't buy it. But it may have been a good shoe at that.

There is a moral in this little story for hardware clerks, as well as for those who sell boots and shoes. The "no complaints" argument cannot hold water, and should be avoided. It is purely negative, and, to say the least, is unconvincing.

So, when a customer comes in to buy a plane or a chisel, do not expect to sell him that article by telling him you have not had any complaints about it. Rather explain to him the good material from which it is made; the neat and correct design which renders it easy to handle, and results in its performing its work properly. A host of other good, positive and clinching pointers may be brought forward. It is easy to tell of some customers in town who are using the tool with good success. But as for the "no complaints" business—don't think of using it.

IRON AND STEEL BOUNTIES TO LAPSE.

In the course of his budget speech, delivered this week, Finance Minister Fielding announced that it was not the intention of the Government to continue the bounties on steel rods, which are due to expire on July first of this year.

This action was not altogether unexpected, and it has not created any great flurry in the trade. As a matter of fact, it was forecasted in a speech delivered by Mr. Fielding about a year ago, and, while the steel companies have no doubt been struggling to have the bounties extended, it is understood that they have been quietly preparing for the changed conditions for some months past.

Wire rods are on the free list, so that, without the bounty, Canadian steel manufacturers, in disposing of this product, would be brought into direct competition with foreign producers, on even terms. It will therefore be the policy of the Canadian steel companies to go into the manufacture of the various rolled shapes, which are subject to adequate protection. The leading Eastern interest already has mills in course of construction for the manufacture of these goods. It is expected that the larger output from the increased capacity of the plant will offset any loss from the cessation of the bounties.

The last five-year term for bounties on pig iron and crude steel, came to an end a little more than three months ago, and, when the bounties on steel rods are allowed to lapse in July, the Canadian iron and steel industry will be standing altogether on its own legs.

BUYING VERSUS SELLING.

It was, at one time an accepted axiom in the retail trade, that "goods well bought are half sold," and, by "well bought" was generally meant "bought at a low price."

The dealer who kept his store in almost filthy condition, and was both inattentive and discourteous to customers, being seemingly disinterested in whether he sold anything or not, would haggle for an hour with a traveling salesman over a few cents in the price of an article. If he gained his point and had the price reduced, he considered that he was making money in the most approved way. Oftentimes, a traveler would succeed in unloading on him some undesirable stock, by making him what looked like an attractive price proposition.

But methods of retailing have changed vastly from the conditions of those early days. While good buying is still recognized as an important requisite in retailing, the selling end is coming more and more into its own, and, indeed, has already taken the most prominent position, in the most modern stores. The good salesman is even more indispensable to the house than the good buyer, and generally commands a better salary.

Furthermore, the definition of "good buying" has undergone a very considerable evolution. The ideal buyer, now-a-days, is the one who can supply his house with a stock, which, at the beginning of the season, is complete and well assorted, but, at the end of the season, is so depleted as to necessitate the minimum quantity being carried over. In other words, the good buyer must stock the goods that will sell best, and net the usual margin of profit.

It is obvious that this does not necessarily mean buying the lowest priced articles. The public have been and are being so thoroughly educated to the advantages of buying quality goods, that the "cheap Jack" store is a back number.

The new, and, it will be agreed, improved conditions, require an intimate relationship between the buying and selling ends of the business. They must work in such harmony that the incoming stock will nicely balance the goods that are sold. The running of a successful retail business is not a case of buying versus selling, but of buying plus selling.

GOLF SUPPLIES ARE WORTH HANDLING.

How many hardwaremen handle golf supplies? If a census were taken, it would be found that only a small percentage of dealers who could with profit handle golfing goods are actually doing so. There is no apparent reason why they should refrain from handling this line. Some claim that the goods are too expensive and turn over too slowly to be profitable; but facts do not bear out the contention. Golf supplies cost money to stock in the first place, but the profit is correspondingly large. It would be entirely the dealer's fault if his stock sold slowly.

The golfer is, of all sportsmen, the most enthusiastic and dauntless. He will turn out in early spring before the snow has entirely melted away, and it takes a whole lot of the rigors of winter to force him to quit in the fall. Furthermore, golf is a game which necessitates almost continual replenishment of supplies. Balls are lost daily and sticks break with a regularity which would strain the loyalty of anyone but a golfer, who will stick to the game through any reverse. Consequently, there should be a more or less steady trade right through the spring, summer and fall months.

The carrying of golf supplies would entail still another advantage. Ladies are rapidly taking up the game and consequently have occasion to buy the necessary supplies. Anything that will bring the ladies into the store is bound to be a great benefit to the hardwareman. The time was when men looked after hardware purchases almost entirely. With the widening of the scope of the business to cover many new and varied lines, women are becoming customers. But there is still much to be desired in that respect and anything tending to make the ladies more regular visitors will help to improve trade in other departments.

SPECIALTIES BECOMING REGULAR LINES.

It is significant of the trend of things in the hardware trade, that such lines as silverware, brass goods and cut glass, are becoming important adjuncts to so many

hardware stores, where they were formerly insignificant side lines.

In times gone by, all these goods were considered as the exclusive possession of the jewelry store. Perhaps this supremacy was not seriously challenged by the hardwareman for the simple reason that the appearance of the latter's store was not such as to encourage the buying of high-class specialties in it, while the jeweler went right after the quality trade.

The change which has been working out during the past few years, could not escape the notice of Hardware and Metal readers, who have been kept in close touch with the methods adopted by the most progressive merchants. The window displays and store interiors which have ben illustrated in this paper have been evidence of the rapid advance of high class specialties in the hardware store. Moreover, it can scarcely be considered a mere coincidence that the general appearance of hardware stores has made corresponding advances.

Many hardware merchants who have been experimenting with silverware and other similar goods, have stated to Hardware and Metal that they were exceedingly well pleased with the results. Almost invariably, they state, that it is their intention to stock more heavily in goods of this kind next season.

It is not too early in the year for our readers who have not previously thought of trying these goods, to give the matter serious thought.. Some dealers are already placing their orders for next season's trade.

COLLECTIONS AND MONEY SCARCITY.

A Toronto hardwareman voiced the complaint the other day that he had found collections very bad of late. His customers were apparently short of cash and consequently it has been unusually difficult to get back accounts collected. The store of this merchant was situated in a factory section and it is probable that the season had something to do with the tightness in the money situation. He was confident that the opening of spring would improve matters, as it would bring longer work hours and lower household expenses, but he regretted very much having allowed so many accounts to collect on his books. He confessed that he had not done much in the collecting line since Christmas.

The dealer who is careless in looking after collections is bound to reach the stage where he will find it hard to gather in what is owing him. The longer an account runs, the harder it is to collect. It is surprising how soon bad debts can grow to such proportions that they seriously threaten the stability of the business. Merchants who attend strictly to collections all the year around are not likely to feel the pinch of money "tightness" at any time.

STOVE TRADE GROWTH EVIDENCED.

The rapid expansion of the stove industry in Canada is forcibly shown in the decision recently reached by a large manufacturing firm to stop making some six or eight of their least popular lines and concentrate on several of the "best sellers. This course was rendered necessary by the proportions to which the demand had grown for two or three of the most popular makes. The factory had fallen behind on orders and, in order to catch up, the plant had been given over entirely to those lines.

It is explained that the demand at the present time centres largely in the West. The constant influx of new settlers is resulting in a rapid expansion of the stove trade. The western market is well worth the most zealous guardianship. From the standpoint of the retailer, the West presents a field of unlimited scope and greatest possibilities.

POINTED EDITORIALS.

Hard work, as someone has said, is the mother of success. Luck is just a third or fourth cousin.

• • •

An unusual state of affairs developed on the oil market this week. Turpentine did not advance.

• • •

Two large hardware stores were burned out last week. Have you looked into your insurance papers carefully of late?

• • •

When the home dealer puts up a sturdy defence, mail order buying soon dwindles down to insignificant proportions.

• • •

Tin is back again at 46 cents. The operations of the London syndicate since the recent rather sharp decline have been more covert but quite successful in bringing the price up to the former high level.

• • •

New Liskeard firm are running a newspaper ad. in the form of a small newspaper. They report some difficulty in keeping the columns newsy. Popular opinion to the contrary, running a newspaper is not one of the easiest things in the world.

• • •

Many dealers, like our old friend Uriah Heep, make pretence at being " 'umble" and always speak of themselves as "little fellows" in the trade. This habit is not dangerous in itself, but too many are at the same time willing to conduct their business on the assumption that it is small; with the result that it always remains so.

• • •

An extract from the Bowmanville (Ont.) News reads: "Toronto man canvassed Newmarket and sold 100 bargain mops at $1 apiece. The same mops were on sale in Newmarket hardware stores at 90c." This incident throws an interesting side light on the possibilities of outside salesmanship. It also bears rather strongly on the question of advertising. Newmarket people certainly did not know those mops were sold in town or they would not have succumbed to the arguments of the plausible hawker.

• • •

What is the life of a newspaper ad.? On Oct. 29, 1910, the Gurney Foundry Co. inserted a want ad. in a MacLean trade newspaper and received many prompt replies. One reply, however, was sent in on March 29, five months later. This demonstrates that the influence of an advertisement does not cease as soon as the following issue of the paper is out. It is striking evidence of the fact that the power of an ad. continues for indefinite periods, creating interest and stimulating business at the most unusual times, and in the most unexpected quarters.

Hardware Firm Adopt Unique Advertising Method

The George Taylor Hardware Co., New Liskeard, Devote Newspaper Space to the Publication of a Weekly Budget of Store News—Good Results are Reported—Can Interest be Maintained?

An original form of advertising has been started by the George Taylor Hardware Co., New Liskeard, Ontario. Instead of using a display ad., this firm devote their space in the local papers to the publication of hardware news, set up in the form of a little newspaper. As will be seen by the accompanying reproduction of one week's budget of news, the idea has been carried out with considerable attention to detail. The reading matter is designed to both instruct and amuse the reader, and consequently, is calculated to arouse an active interest.

The idea has proven very successful up to the present. The public have become interested in the ad. and the firm have received tangible evidences that people are reading "Taylor's News" with regularity. The idea was first "tried out" in the Cobalt Daily Nugget, where the company have a store, and it proved to be a success there. The introduction of brief scraps of local news among the strictly business items, got the people of Cobalt into the habit of reading the ad. from beginning to end. Encouraged by the success achieved in Cobalt, the company started to advertise in the same way in both the New Liskeard weekly papers. "Taylors News" still appears in the Wednesday and Saturday editions of the Cobalt Nugget.

Best Results Secured.

In answer to a query as to the results obtained from this novel method of advertising, William A. Taylor, president of the company, writes to Hardware and Metal, as follows:

"We have had a great many sales from it and believe that it has done more for us than any other advertising we have ever done, both in sales and in giving prominence to our firm."

Mr. Taylor goes on, however, to state that they cannot vouch for the lasting qualities of this form of advertising. The question arises as to whether the public will continue to read the weekly budget after the newness of the style is gone. "It will depend on ourselves keeping it real newsy," he writes. "We have tried to interest the whole staff by getting each one to contribute an item; also to take a note of every interesting happening around the store, so that same can be written up."

With the active assistance of each member of the staff, it should not be difficult to keep interest up. A breezy budget each week will mean keeping the attention of the public and, as long as this is done, good results will be obtained. If interest is allowed to flag, however, people soon get out of the habit of reading it; and therein lies the great difficulty in making a success of this form of advertising.

Such numbers of "Taylor's News" as have come to hand have shown a breezy quality which gives promise of permanency to the feature if the same standard can be maintained. The advertisement reproduced is the first of the series now running in the New Liskeard papers.

Successful Elsewhere.

This method has been adopted with considerable success by merchants in other lines of business. Hamilton, Ont., people will not soon forget the eccentric but extremely resultful advertising campaign carried on in that city by the firm of Trudell and Tobey, clothiers. Personal sketches of a humorous kind and extravagant comments on local happenings, backed up by grotesque cartoons, formed part of the advertising matter adopted by this firm. People read, laughed and talked about it. Trudell and Tobey were in the limelight for a long time, with the inevitable result that business shaped its course in their direction.

Originality counts in advertising, as in everything else. An ad. that tells its message differently than other ads. is bound to arrest the attention of the reader. That ad. will be read through and through by a large percentage of all persons who peruse the paper in which it appears. What is more, the readers will feel an interest in, and look for, the same advertisement in following issues.

TAYLOR'S NEWS

OF HARDWARE DOINGS

[Vol. 1—No. 1] LISKEARD, MARCH 16TH, 1911. [PRICE, YOUR ATTENTION]

LISKEARD SPIKES

We intend to keep the public, through these columns, interested in our Hardware. We carry the largest and best assorted stock in the District and can assure our patrons prompt and efficient service

The goods advertised will be guaranteed exactly as stated, and we will in no way try to deceive.

We have just received our spring shipment of Martin-Senour 100 per cent pure paint and have now the full line of colors.

—

CANARIES

Last spring we had a visit from the bird man. We expect him again this spring. If you cannot be in town, send in your order to pick out a good singer, or a parrot, a pair of Love birds, or paroquettes

—

Tickle your sole by walking on Senour's floor paint.

—

Mr. Wm. Taylor will be located at the store from now on.

—

Our hockey team are trying to arrange a game with some of the town teams, but I guess we must have some rep, as there appears to be nothing doing

—

Mr Albert Taylor is looking after our interests, calling on customers between Latchford and Cochrane. At present he is on a trip into Gowganda.

We are clearing out the following priced papers to make room for new goods. How about that room now at these prices?

Regular 6c. paper at 3½c.
Regular 10c. paper at 6c.
Regular 15c. paper at 8c.
Regular 25c. paper at 15c.

They are real bargains.

—

Mr. Chapman, our tin artist, who is greatly interested in aeroplanes, had the misfortune to fall out of his the other day, but beyond a few scratches and bruises, is feeling not too bad again.

Tom says that the air currents were affected by the political atmosphere which was disturbed by all the hot air on reciprocity. He blames this anyway for his downfall.

—

CRUSHED OYSTER SHELLS

Eddie, by way of finishing his argument in disposing of oyster shell, the other day, said: "Why, feed this to the hens and they will lay two eggs each per day. "That is not in it with gum," said the customer. "Gum?" said Eddie. "Yes. You get hens to chew gum and they become so contented they lay all the time." Eddie is now wondering if the man really ment it.

—

Are you going to build? Be sure and get our prices. We will save you money.

—

If you want your home distinctive use Martin Senour Paint 100 per cent pure.

—

Bric. is pretty sore this morning. Haileybury team did not show up for the hockey match. What he was going to do to them cannot be mentioned here. Even Mr. Pearson, our bookkeeper was offended.

—

The eggs are more plentiful than ever this spring. It must be our crushed oyster shell.

—

COBALT RIVETS

Our shipping department are sure busy these days. Now that we have to get orders away, no matter how large, on the same day as received, it takes some hustling, but our facilities for handling the big orders are so good and we are so handy for outgoing shipments that we can still handle some more.

—

Take no chance on the roads from now, but put in your supply now

—

Our window dresser promised us big things for the 17th of March. Every son of Erin's Isle, and others, are therefore requested to see them.

—

Our galvanized boxes for storing furs during the summer months are much preferrable to moth bags. We make all kinds and sizes at small cost, and your furs are insured against moths, etc.

First edition of "Taylor's News" in New Liskeard Herald.

Opinions of Our Spring Number

Readers and Advertisers Well Pleased With the Big Number —Some Specimen Letters Reproduced.

We are in receipt of copy of spring number of Hardware and Metal, and can only say that we are very much pleased with the appearance of same in as much as we do not see that many improvements can be made. If anything should attract a hardware dealers' attention we think the magazine as you have gotten it up should.

THE WOODSTOCK WAGON & MFG. CO., LIMITED.
A. H. Wynick. Sec'y-Treas.

We have delayed extending our congratulations on your annual spring number issued March 25th, until we have had an opportunity of carefully looking over it.

Last year we thought you had gone the limit in producing a spring number, but this year you have surpassed yourselves. Everything from the paper to the print is all that could be desired.

We are to-day, in receipt of a letter from one of our B-H. "English" paint agents, who states that he is so taken with our ad., which you reproduced on the back cover, that he has cut it out, framed it, and hung it in his store.

Here's wishing you continued success.

BRANDRAM-HENDERSON, LTD.
J. Irwin, Asst. Manager.

We are to-day in receipt of your favor of the 27th inst., and copy of your annual spring number reached us yesterday.

We, of course, have not yet had time to look the number over carefully, and it is out of the question to suggest changes or improvements off-hand.

Typographically and pictorially the 1911 spring number is certainly a superb production.

I am going to Chicago early next week and shall take this number along with me to show some of my friends in the trade there as an evidence of what a Canadian trade publishing house can do. I think my business friends on the other side will be a little interested in your front cover as well as in the number generally.

Regarding our advertisement we are very much obliged to you for the attention you have given this copy. The advertisement suits us first rate and tells the story in the way we wish to have it done.

Dennis Wire & Iron Works,
per E. R. Dennis.

We are in receipt of copy of your spring number, which we think is very satisfactory in every respect.

One thing that strikes us particularly is the quality of the paper, which we think is an improvement on the paper usually used in your weekly edition.

We must say in conclusion that the manner in which you have worked our advertisement is very satisfactory, and we take this opportunity of thanking you for the trouble you have taken in the matter.

ALLAN HILLS EDGE TOOL COMPANY, LIMITED,
Allan Hills, President.

We are in receipt of our copy of your annual spring number, upon which we wish to congratulate you, not only upon its appearance, but upon the character of his contents.

THE GUTTA PERCHA & RUBBER MFG. CO., TORONTO, LIMITED,
F. Crosby,
Manager Advertising Dept.

We are in receipt of Spring Number Hardware and Metal, which is certainly a credit to your firm.

JAMES & REID,
Per Geo. S. James.

We are in receipt of your spring number of Hardware and Metal, and we take the liberty of congratulating you on this very excellent number. It is certainly a credit to the hardware trade of Canada and to yourselves in particular to be able to produce such a journal as this and we trust that you will be amply rewarded for the enterprise you have exhibited in getting up such a representative journal.

MECHANICS' SUPPLY CO.,
Per. W. H. Wiggs.

We acknowledge receipt of your letter of the 29th instant, and note that you expressed to us the plates which were used in our ad. which appeared in the annual spring number.

We take this opportunity to express our entire satisfaction of the manner in which our advertisemeot was executed, and also the general appearance of this special number. In the writer's judgment this issue is far ahead of any that he has ever seen, particularly so as related to the quality of the reading matter.

THE MARTIN-SENOUR CO., LTD.
W. H. Gerkes, Manager.

We are in receipt of your annual spring number of Hardware and Metal. Our ad. is very satisfactory in every respect and journal one of the finest we have ever seen.

WHITE MOP WRINGER CO.

We acknowledge receipt of copies of our ad. in the annual spring number, which we have mailed to several of our distributors. We can state that we are well pleased with our ad. and more than pleased with the way that the spring number is made up.

BENJAMIN MOORE & CO., LTD.,
F. C. Surbeck, Man. Dir. and Treas

We acknowledge with pleasure your letter of the 27th ultimo.

The annual spring number came to hand in excellent form and it is another testimony of the manner in which you issue the special numbers. It is really so good that we have no suggestions to make and you know the old quotation:—"For who can paint the lily."

Congratulating you sincerely.

THE CANADA PAINT CO., LTD.,
Per. William H. Evans.

PROMINENT TOOL MANUFACTURER DEAD.

Geo. A. Barnes, Secretary of the Whitman & Barnes Manufacturing Co., whose Canadian plant is situated at St. Catharines, Ont., died at Akron, Ohio, on March 22nd.

Mr. Barnes began his long service with the Whitman & Barnes Co. at their Syracuse factory, in 1876. In 1879, he was transferred to the Canton, Ohio, works of the Company, remaining there as manager, until 1895, when he removed to Akron, Ohio. Here, he resided until his death, except during the years 1902-1904, when he was located at the Chicago offices of the company.

At the time of his death, Mr. Barnes was secretary of the company, a director and member of the executive board. He is survived by a widow and one son, H. L. Barnes, who is superintendent of the Whitman & Barnes Mfg. Company's Chicago works.

ANNUAL MEETING HELD.

The Annual Meeting of the Toronto Silver Plate Company was held at the Company's offices, 570 King St. West, Toronto, on Thursday, March 30th.

A very successful year's business was reported and a dividend of 6% was declared.

The old Board of Directors were re-elected as follows:—W. H. Beatty, J. Creighton, J. Clowes Davison, E. G. Gooderham, L. E. Gooderham, S. W. Gooderham, J. Gordon Macdonald, W. H. Partridge, James Webster.

At a subsequent meeting of the Directors, E. G. Gooderham was re-elected President, and W. H. Partridge, Vice-President.

The Company report having a large accumulation of important orders already booked for the present year.

In addition to being manufacturers of Plated Ware of all kinds of an absolutely guaranteed quality, they are Silversmiths, this latter branch of their business having become a very important one.

APPOINTED CANADIAN MANAGER.

F. L. W. Saunderson has been appointed the Canadian Manager of the Magnolia Metal Co., with factory and offices located in Montreal.

Mr. Saunderson graduated at McGill University in the Class of 1891, taking a course in Electrical Engineering. He afterwards took a special practical Electrical course with the Thompson-Houston Electric Co., at Lynn, Mass., and for the past fifteen years has been identified with the mill supply business in Canada, so that he enters upon his new duties well equipped to insure that the prominent interests entrusted to him will be well cared for and advanced.

CHANGE OF ADDRESS.

Louis Newmark, watch manufacturer, Montreal, has removed his offices and stock rooms from the Ottawa Building, to the Carsley Building, 149 Notre Dame Street.

Keeping Tinshop Costs

System of a Large Sheet Metal Firm—Necessity of Knowing What Work Costs—Time Sheets for Productive and Non-Productive Labor.

It is a much-discussed question whether a tinshop pays as an adjunct to a hardware store. There are so many details to be considered in figuring this out that many hardwaremen who conduct a tinsmithing department, frankly admit that they do not know whether it is paying them or not. Practically all will say, however, that the tinshop helps to bring them business that they would not otherwise secure, and so, whether or not it actually pays, of itself, it is, indirectly at least, a profitable department.

This conclusion is not very satisfactory to a business man. In order to conduct his establishment to the best advantage, he considers it necessary to know just what each department of his business is doing for him, at all times. The solution of tinshop costs is an important matter with him.

Methods of a Manufacturing Firm.

The Metal Shingle & Siding Co., of Preston, run a "Cornice Department" in connection with their business. In this department all the special sheet metal work is performed and, in addition to galvanized or copper cornices, the lines regularly made include fireproof windows, skylights, finials and all kinds of fancy sheet metal work.

Considerable difficulty was experienced in working out a suitable cost accounting system for this department. Many contracts taken by the firm included the erection of cornices, skylights or fireproof windows, and, in arriving at the final cost, such items had to be considered as the value of goods damaged in transit or in erection, and repairs made necessary by misfits. Such contracts required a special system to include all these contingencies, but as most of the jobs going through the cornice department included only the manufacture of goods, and not the erection, the system which was almost entirely used, was that described in this article. While conditions in the sheet metal department of a manufacturing firm are necessarily somewhat different from those prevailing in the tinshop connected with a hardware store, there are, nevertheless, some features of this system which could be profitably adopted in a good many tinshops.

System Described in Detail.

When an order for special sheet metal work reaches the office it is numbered and entered in the usual way, and sent out to the office of the superintendent. From this order, which the superintendent files, he makes out a shop order (Fig. 1). He enters the date, the order number, the department for whom the shop order is intended, the goods required, instructions as to delivery and the customer's name. This shop order, together with the necessary details, then goes to the foreman of Department D (Cornice Shop), who puts the work in hand.

Gathering Material Required.

The Cornice Foreman secures all his supplies from the stock-keeper. In order to save time and lessen the clerical work, he furnishes the department in quantities that are likely to last for some time. For instance, 75 sheets of crimped galvanized iron and 500 lbs. of solder would be handed out at one time. When any other stock is required, such as rivets, nails or hardware of one kind or another, the foreman of Department D. issues a requisition card (Fig. 2) to the stock-keeper, and he delivers the goods.

If it happens that the goods are not in stock, the stock-keeper sends on the requisition to the superintendent who approves it and passes it to the Purchasing Department, who see that the goods are ordered.

Date Feb-13-11 **Shop Order** Order No. E 1625

Quantity — Raw Stock: (Cornice foreman enters what was used here)

Cut to Size

Department: D — Goods Required: Cornice 41 ft. long etc.

Date Completed — Deliver to Shippers

Cost Material	4	25
Cost Labor 15 hrs.	3	00
Expenses	3	00
Total	10	25
Crating		75
Freight		60
	11	60

For Bogart Cobalt

Fig. 1.

In this way the stock-keeper has a record of everything that goes to Department D, and, as the Shop Orders all go through his hands, when the work is completed, he credits the Cornice Department with all the goods that are used on each job, and the department is credited, by the office, with the amount

of the invoices that are issued for all cornice work.

Once a month, the stock-keeper takes stock in the Cornice Department, and, by debiting what goes in, crediting the stock on hand with the total value of the invoices, the firm are able to get a pretty good general idea of what the department is doing for them.

Time Sheets.

Each workman in the department is required to fill out a Time Sheet, showing how he employs his time. A sample of this Time Sheet is shown in Fig. 3. It will be noticed that the employe is required to check off on the sheet, just what kind of work he has been doing, this enabling the Cost Accounting Department to estimate accurately, the cost of each operation in completing the work.

When the job is finished and the goods delivered to the shippers, the shop order (Fig. 1) is sent to the office. The Cost Accountant collects all the Time Sheets put in under the Order No. F. 1625, and finds that the total amount of productive service put in on this job was 15 hours or the cost of bare labor is $3.00.

Non-productive Labor.

Now, there is always a certain amount of non-productive labor to be reckoned with. This would include cleaning up, hauling in charcoal, delivering goods to shippers, and such work which goes to make up the overhead expense of the department. In the Cornice Department, it has been found that the overhead expenses are practically covered by adding 100 per cent. of the productive labor costs. In this case it amounts to $3.00, so that with the cost of material, which has been computed at $4.25, the total shop cost is $10.25. This order is also charged with crating .75 and freight .60, making a total cost on the job of $11.60. By subtracting this from the amount of the invoice, the profit on this particular order is accurately estimated.

SEND IN TINSHOP PROBLEMS.

Hardware and Metal has made arrangements with W. J. Finnigan, one of the most prominent sheet metal draughtsmen in Canada, to contribute a number of articles on "Patterns for the Tinshop." Some of these articles are already prepared, and they are illustrated with carefully drafted diagrams which will easily enable any tinsmith to make his patterns by following the description.

In order to make this feature specially valuable, Hardware and Metal invites its readers, anywhere, to send in problems in tinshop patterns which they have encountered in their work. These will be discussed in the order in which they are received by Mr. Finnigan, and he will present diagrams showing just how the required patterns should be drawn. All these problems should be addressed to the Editor.

In next week's issue of Hardware and Metal, there will appear an article by Mr. Finnigan, showing how to draft the "Pattern for 'T' Joint Pipes of the Same Diameter."

HARDWARE TRADE GOSSIP

Ontario.

Thos. P. Bowden has bought out the saddlery business of John Coedy, Oshawa.

The tender of Ingram & Davey to furnish hardware supplies for the light, heat and power department, St. Thomas, was accepted. The firm's figures were $1,008.74, the lowest received.

Aikenhead Hardware, Ltd., Temperance Street, Toronto, is always right up with the season in the matter of window displays. This week they are showing lawn rollers in one window.

Brewster & Co., St. Thomas, held a large sale on Saturday, which marked the opening of a 25c department. Among the articles sold at a reduction were band saws, knives, tools, roller skates, etc..

The Port Arthur News gave considerable space in a recent issue to sketches of the business men of that place. Among the hardware firms mentioned were the Fallis-Foote Hardware Co. and the Dunn Hardware Co.

Hon. Frank Cochrane was a visitor in Sudbury during the week. While there he attended meetings of the Wahnapitae Power Co. and The Cochrane Hardware, Limited. He spent Tuesday at the Wahnapitae Power Plant.

The Big Four Amateur Hockey League championship, Port Arthur, was won by the Wills & Emmerson hardware team. The champions lined up: Goal, Odmark; point, Berlette; cover, Clark; right, Wills; centre, Dowling; left, Williams. They won five games and lost one.

A Montreal paint manufacturer received word this week that a Western Ontario dealer was so pleased with the advertisement of this particular line of paint in the spring special number of Hardware and Metal, that he had cut it out and framed it and was hanging it in the front of his store.

In order to accommodate their rapidly expanding business, H. Wolfhard, one of Berlin's leading hardwaremen, has moved to more modern and spacious quarters at 17 King Street, west. The new store will include space on two floors. The firm go largely into plumbing and tinsmithing as well.

David Jamieson, who has been employed for some time by Bernhardt & Gies, Preston, is leaving them to start in the plumbing business on his own account in Berlin. Before leaving, he was presented with a gold-headed umbrella and an address. The presentation was made by Miss Harris and the address was read by W. A. Spalding.

J. R. Hambly, Barrie, whose store was burned out recently, was in Toronto this week. Mr. Hambly is already located in a temporary store and is holding sales to clear out his old stock. The work or remodeling the old store is already under way and he expects to get in by the first of June. When the alterations are completed, the store will be one of the finest in the province.

Wm. Richardson has decided to remain in business at Underwood, instead of leaving, as was at first expected, on account of having to give up his former store premises. He is going in for a bigger store than ever, and, to this end, he has purchased the hardware and repair stock of Brill Bros., which he will add to his general stock. Mr. Brill will continue with Mr. Richardson and have charge of the repairing.

Quebec.

W. A. Fish, tinsmith, of Richmond, Que., is giving up business.

While patrolling St. Denis Street at 2 o'clock Wednesday morning, Constable Savard routed two burglars out of the hardware store of Loiselle & Co. The two ran away and the policeman fired, bringing one of them down. Nothing had been secured from the store.

Maritime Provinces.

Richard M. Irwin, who for the past two years has been manager of the retail store of McLean & Holt, St. John, N.B., has severed his connection with that firm and taken charge of the stove department of Emerson & Fisher. His fellow employes presented him with a fine fountain pen.

Western Provinces.

C. S. Noble, hardware dealer, Noble, Alta., has sold out.

Wednesday half holidays begin next week in Vernon, B.C.

Mair & Burton, of Minnedosa, Man., have disssolved partnership.

Hill & Morey, hardware merchants, Langdon, Alta., have dissolved.

Wright & Johnson have started a tinsmithing business in Winnipeg.

Ellis & Fossum are establishing a hardware business at Sovereign, Sask.

J. & J. Field, of Bradwardine, Man., have sold out their hardware business.

Mr. McLean, Winnipeg, will open a hardware store, shortly, at Simpson, Man.

P. N. Whithing has bought the hardware business of G. S. Smaill, Lang, Sask.

Smith & McLaren, of Yellow Grass, Sask., have been succeeded by McLaren & Son.

It is reported that J. A. Sutherland, of Crossfield, Alta., has sold his hardware business.

Knudson Bros., tinsmiths, Norwood, Man., have been succeeded by the Norwood Heating Co.

The hardware business of the late R. Hamilton, Emerson, Man., is being closed out by the estate.

E. P. Paudin, Dauphin, Man., is starting in the tinsmithing, heating and plumbing business at Regina.

The Togo Supply Co., dealers in hardware and implements, Togo, Sask., have been succeeded by Law Bros.

T. McAvity & Sons, Ltd., wholesale and retail hardware merchants, St. John, N.B., have opened a branch at Winnipeg.

The Regina Trading Co., Regina, Sask., have disposed of their tinsmithing department, to the Greater Regina Sheet Metal Works.

M. Johnson, of Alyesbury, is going to establish a hardware store at Talmage, Sask. He intends to begin the erection of a building at once.

Spackman & Rowe, Ponoka, Alta., have sold their hardware and furniture business to L. B. Courtwright. The partnership of Spackman & Rowe has been dissolved.

A fire broke out in the hardware store of Denmark & Burton, Langenbury, Sask., early on the morning of April 4. It is estimated that there will be a total loss of $30,000. Adjoining buildings were badly scorched.

The cause of the fire in the hardware store of Armstrong, Smyth & Dowswell, Regina, is, as yet, unknown, although it is thought that defective wiring may have started the blaze. The loss is estimated at $35,000.

Dickey & Anger, Gowen, Sask., have acquired the upper flat of the store in which they are carrying on their hardware business and carpenters are busy remodeling this portion of the property into a tinshop and store room.

Camrose, Alta., is being made headquarters by a large number of commercial men. Mr. Richardson, of the Somerville Hardware Co., is covering his territory from that point and Jas. Carver, of the Calgary Saddlery Co., is doing the same.

E. Crossley, of the hardware firm of Crossley & Johnston, Oxbow, Sask., who recently were burned out, has returned from Winnipeg. He says that the insurance companys have acted very fairly. The firm are now holding a big salvage sale in the basement of the Greer block.

The hardware and harness business, conducted by Dostaler and Lessard, Vegreville, Alta., has been taken over by M. Bertrand, recently of Edmonton. Mr. Bertrand intends increasing the scope of the business by the addition of a harness repair shop, the erection of which will commence as soon as the weather permits. M. Dostaler will remove to Edmonton.

Contractors Blanchard and English have a force of carpenters at work on the hardware and implement block of A. Fulton, Enderby, B.C. The building will be 55 by 120, giving 11,000 feet of floor space. It will be finished with metallic sheeting and with large plate-glass front. Mr. Fulton hopes to have his machinery under cover in the new block by April 15.

A wholesale company, capitalized at $50,000, has been formed at Lethbridge, to carry on business in large mill and mine machinery, contractors' supplies and hardware. E. T. Powers will be manager and W. R. Cunningham, formerly C. P. R. superintendent, will be secretary-treasurer. New offices are being built on Crabb Street, and a warehouse will be secured in the hardware section.

News and Methods of Canadian Hardwaremen

St. Thomas Firm Conduct Successful Spring Opening—Tenders Invited on Hardware by London Aldermen—Kingston Council Helping Gas Stove Business—Coal Oil War at Lucknow.

A SUCCESSFUL SPRING OPENING.

St. Thomas.—The annual spring opening at Ingram & Davey's hardware store is estimated to have been the most successful yet held. It was held on Saturday, April 1, and probably five thousand people passed through the store during the day. Souvenirs were handed out to all of them.

The store had been decorated to fit the occasion, and the orchestra of Tony Cortese, Jr., London, had been secured for the afternoon and evening. The feature of the opening was a series of demonstrations. W. H. Davey, demonstrator of "Lacqueret," was a busy man, as he handed out no less than 1,200 carnations to the lady visitors, and a drawing book and paper house to every child. Mr. Worsell and Mr. Towe demonstrated Minerva paints for the Pinchin-Johnson Co. Neponset Paroid composition roofing was shown by Mr. McKay. F. H. Cristler was on hand to show Detroit Jewel gas stoves, and handed out yard-sticks to each visitor as a souvenir. H. C. Woodside, Canadian manager of the Pittsburg Perfect fence, gave short addresses on the advantages of his line.

Ingram & Davey gave away on their own account about 1,500 stickpins, in the form of a very pretty coronation pin, (G.R.) surmounted by a crown.

WILL INVITE TENDERS.

London, Ont.—Engineer Wright holds the opinion that a change ought to be made in the system of purchasing the hardware supplies for his department, and in a communication to the board of works Thursday night he pointed out that there was a good deal of dissatisfaction among the city hardwaremen on account of it. He recommended that in future tenders be invited for whatever is required, and that any miscellaneous articles required in addition be purchased from the successful tenderer, provided he will sign an agreement to give the city the usual discount.

The members of the board of works discussed the proposal favorably and it will doubtless be adopted.

George White & Sons, Limited, have decided to erect a $20,000 addition to their present large plant on Cabell Avenue. This will be for use as a foundry. The company was recently granted fixed assessment by the city.

ADVERTISING GAS STOVES.

Kingston, April 14.—Gas stoves are being extensively advertised for the local merchants, in a little booklet, which has just been issued by the chairman of the civic light, heat and power committee, Ald. R. F. Elliott, of the firm of Elliott Bros., hardware and tinsmiths. "Cook with gas" is the advice given the people of Kingston. An advertisement in the local newspapers is also booming the gas, and as a result of the printer's ink, the local merchants have sold quite a few new stoves.

The gas department of the city is flourishing since Ald. Toye gave the city dollar gas, and the present committee, under Ald. Elliott, wants to increase the output still further this year. The people have to be told of the benefits to be derived from the using of the gas, so the matter is advertised.

Elliott Bros. were awarded a contract this week to tear down an old building at the corner of Brock and King Sts., where the new Bank of Commerce will be erected.

A COAL OIL WAR.

Lucknow, Ont.—Grocers and hardware men of Lucknow are engaged in a price-cutting war over coal oil. For many years the two hardware stores by which the village is served did practically all the trade in this line, and oil sold at 20 and 25 cents per gallon for Canadian and American, respectively. Recently, however, the grocers "cut in" on the trade; a new co-operative delivery system, with which the hardware men are not associated, resulted in a diversion of trade in the grocers' favor, and Canadian oil is now quoted by them at 12 cents per gallon, American at 14.

WILL ENLARGE STORE.

Toronto.—F. H. Moses, Broadview Ave., is intending to make an addition to his hardware store this spring. His plans include the extension of the store at the rear some 30 feet, and the changing of the present store front. He intends to deepen the window and case it in at the back. This, he believes, is the only method to get fullest satisfaction. When there is nothing to cut off the window from the store, the glass readily steams up. To counteract this, an upper skylight has to be opened, and this allows dust to enter in clouds and causes draughts in the store.

Mr. Moses is also planning to install new fixtures.

STORE WAS GUTTED.

Portage la Prairie, Man.—Fire broke out at 4 o'clock Friday afternoon, in the hardware store of J. O. Cadham. It started in the basement, but it followed the elevator shaft and stairway to the ground floor, and then to the store-room and tinsmith shop on the first floor. Shortly after the fire started, there was a sharp explosion, and it was feared that the flames had reached a small supply of shot-gun ammunition. Mr. Cadham and his clerks, however, had removed all the combustibles in time.

The loss on the store is covered by insurance, but the stock was only partially insured. During the previous week at least $6,000 worth of goods had been taken in, on which no insurance had been placed.

HARDWARE STORE BURNED OUT.

Regina—Following an explosion in the hardware store of Armstrong, Smyth & Dowswell, Scarth Street, a fire broke out, which did serious damage to the store and endangered surrounding buildings. The fire brigade fought the flames for two hours, from 1 o'clock in the morning until 3, and finally got the blaze under control. It was feared that other buildings would suffer, but Armstrong, Smyth & Dowswell had taken every precaution to prevent spreading. A fire wall had been constructed 80 feet back from the front, equipped with automatic fire doors. Back of this wall, on the third floor, was stored the ammunition and woodenware. Fortunately, the fire started in the front and was checked by the fire wall, otherwise the building would have been destroyed.

The building was a comparatively new structure, built by the firm, and especially designed by them for the hardware business. It was undoubtedly one of the finest and best equipped hardware stores in the country. The firm moved in last February.

The building cost $26,000, and it was insured to the extent of $20,000. At the time of the fire the firm carried a $35,000 stock, and on this another $20,000 of insurance was carried.

NOTICE TO SUBSCRIBERS.

A man who signs himself as W. Keppel White, is taking collections, renewal and new subscriptions, for the MacLean publications in the Maritime Provinces, without any authority. The assistance of any subscriber in locating this man will be appreciated.

METAL WORK AND ETCHING.

Under this title a very instructive little cloth-bound book has just been issued by the Popular Mechanics Co., Chicago. It contains eighty-eight pages, written in simple, non-technical language, and it furnishes diagrams and instructions for making, in metal, such articles as book ends, desk sets, stationery racks and letter holders. In each case, a good illustration is given of the completed article, so that but little difficulty should be experienced in carrying out the instructions satisfactorily. The text and illustrations are up-to-date, and have been revised by the Editor of Popular Mechanics.

The book may be obtained from the Technical Book Department of The MacLean Publishing Co., Montreal, Toronto and Winnipeg.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 52.

Montreal.

Linseed Oil.—Price easier.
Tin.—Advanced 1c per lb.

Toronto.

Tin.—Advanced 2 cents.
Linseed Oil.—Showing a weakening tendency.
Imported Pig Iron.—50c reduction.

MONTREAL.

Montreal, April 7.—The stronger feeling in regard to tin, mentioned last week, is more manifest at the time of going to press for this number. In the primary market a higher price has been quoted and locally tin ingots are advanced one cent per lb., being now 45½ cents a pound. The situation is regarded as quite firm although the tim market is manipulated. Tin plates are also firm.

The iron market shows rather more activity and some fair sized lots of English iron will arrive by first incoming vessels. Owing to the accumulation of stocks in English ironmasters' hands prices quoted are comparatively low. Receipts of Scotch iron will be rather small.

Dealers in other metals report business slightly quieter this week, but attribute this feeling to the weather, which has not been seasonable. With real spring conditions it is felt that the total trade will be good.

New record outputs in nearly every department were made by Nova Scotia Steel & Coal Co. for the first quarter of 1911. If the present record is maintained the output for the present year will far exceed the records made last year.

Pig Iron.—The reports from Canadian furnaces show that business conditions continue satisfactory. There is little change to report from last week. Foundries are demanding considerable pig iron and it is noted that there have been recent reports of Canadian orders for steel going across the line and also that this action has been reciprocated. Prices for future pig iron on dock, Montreal, are quoted as follows: No. 1 Summerlee, $20; select Summerlee, $19.50; soft Summerlee, $19; No. 3 Cleveland and Clarence, $16.75 to $17.

Tin.—This market has become stronger since last week, the primary quotations going up considerably, and locally the price of tin has been advanced. The condition in regard to tin plates and sheets continues firm as referred to last week. The price quoted here is 45½ cents.

Copper.—There is not much to report in regard to copper. Demand is good, the market being fairly active. The United States situation has improved and the primary market shows an advance.

Spelter.—This metal has not changed much in so far as the market conditions are concerned. It continues quiet with practically no change.

Lead.—Lead has been dull for some time and has been losing rather than gaining ground. Local conditions are reported without any material change.

Scrap.—Old materials are quiet and show practically no change.

Prices are normal, thus: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron No. 1, $14.50; No. 1 wrought iron, $12.50; malleable No. 1, $9; miscellaneous steel, $5; stove plates, $12.50.

TORONTO.

Toronto, April 5.—There is a good volume of business being done locally. Orders are coming in freely and for large bulk. Now that the opening of spring is at hand, the factories are running longer hours and with a fuller complement of hands and the demand for metals consequently is showing an increase.

Little discussion was provoked here by the announcement of the intention of the Dominion Government not to renew the iron and steel bounties. It is not thought that the decision will have any effect on the local netal market adverse or otherwise.

Prices have remained firm in most metals. Tin went up a couple of cents and now stands at 46, just one cent short of the high water mark reached a month or so ago. Some lines of old country pig iron are selling 50 cents cheaper, as a result of the easier freight rates, brought about by the opening of navigation.

Tin.—This metal went back to 46 cents this week and looks good for further advances. It is anticipated locally that tin will yet reach the 50-cent mark. There is, at present, a healthy demand and it does not appear likely that any price developments will check the trading in this metal.

The advances on the London market have come as the result of a visible shrinkage in the supply from the east. A decrease of 578 tons was shown in the last month and this, in the face of continued heavy American consumption, had a natural tendency to put the price up.

Antimony.—The market in antimony is so absolutely dull that all interest has been lost in it here. There is, at best, but a small demand at any time and the syndicate operations have not helped any. It is still asserted that the syndicate holds control, but nothing suffices to budge the price above the 9½c. mark. It is asserted locally that this is a fair price for antimony; the quotation of 8 cents, which prevailed before the syndicate was formed, was considered to be too low.

Copper.—The demand continues strong and healthy. The price continues steady and reports from the supply markets are to the effect that the demand is keeping pace with the supplies, so that the danger of over-stocking does not seem so pronounced as last year.

Plates and Sheets.—The chief feature of interest here is the difficulty that Canadian firms are having in getting orders for Canada plates filled. One firm received about a month ago, a shipment which had been ordered in July, 1910. The supply received,, however, only partially covered the order and word has now been received that the rest has been shipped. Difficulty is also being found in getting orders filled in the United States, as the tinplate mills there are busy.

Pig Iron.—There is now a good demand and enquiries in large number are being received. A reduction of 50 cents is quoted this week in old country iron as a result of lower freight rates. Prices now stand as follows: Canadian Foundry No. 1 is $19.50 and No. 2, 50 cents a ton less. Old country iron is quoted at $19.50 for Middlesboro No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22.00, and Cleveland No. 1, $20.50. Jarrow and Glengarnock Scotch irons are at $20.00 and $22.00 respectively.

Other Metals.—No change is noted in the lead and spelter markets. Small orders are being received in sufficient number to make business satisfactory for this time of year.

Old Materials.—The situation is unchanged. Quotations to-day are: Heavy copper and wire, 10c.; heavy red brass, 9¾c.; heavy lead, 3c.; light copper and bottoms, 9¾c.; tea lead, 2½c.; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7, stove plate, $13.

BUSINESS QUIET IN U. S.

Cleveland, O., April 6.—The Iron Trade Review to-day says:—There has been no noticeable decline in mill operations during the week, although consumers are buying cautiously and the railroads are confining purchases to cover urgent needs. The market as a whole, is extremely quiet, and, while orders are being received in sufficient volume to keep the mills running at practically the same rate as a month ago, business is being handled in a quiet manner and there is little excitement. Prices on finished materials have been well maintained although developments during the first two days of this week strongly indicate that concessions have been made on open-hearth sheet bars and on sheets for early shipment. Quotations an several grades of scrap have been reduced and heavy melting steel has sold as low as $13.25, delivered, Pittsburg, as compared with $15, in February. The past week has been one of the quiestest in several months as far as the pig iron market is concerned. Notwithstanding that consumers have comparatively little iron on hand, they are showing little interest in the situation.

The one encouraging feature of the situation is that stocks in consumers' hands are low, and furnace interests look for increased buying for second-quarter delivery about April 15.

The Ontario Gazette contains notice of the increase in the capital stock of the National Iron Works, from $200,000 to $1,000,000, by the issue of eight thousand shares of new stock of $100 each.

HARDWARE MARKETS

MONTREAL.

Montreal, April 7.—The wholesale houses are busy sending out goods that were ordered during previous months. Activity is so marked that those who may perchance receive their goods a few days later than they had expected would forgive the oversight if they realized the amount of goods that is to be sent out. New orders are not coming as freely as they might and blame centres upon the weather man who has by no means relaxed his winter tendencies. This idea of winter lingering in the lap of spring is anything but poetical in this part of the country and when one is reminded that we have now had but little less than a half year of cold weather, spring is doubly welcomed. Ontario and the eastern provinces have been held back in those operations which go to brighten the hardware trade. But the trade is optimistic and are really not murmuring. Generally speaking, they have about as much as they can attend to, though they are always looking for more.

Contractors' Supplies.—There are quite a number of orders going out that are largely contractors' supplies. Pullies, picks, shovels, and the general heavy goods required in railway construction are in quite good demand. The West is taking quite a percentage of this class of hardware. For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5 75 and upwards.

Household Utensils.—There is a healthy trade passing in this department. There are not many orders that do not include some lines of household utensils. Some of the prices quoted are:—Food choppers, from $9 to $15 a doz.; ice cream freezers, 1-qt., $1.50, 2-qt. $1.65, 3-qt. $2.05, 4-qt. $2.50, 6-qt $3.15, 8-qt. $4; coffee percolators, $1.75 to $3.50; washing machines, from $3.50 up; wringers, Royal Canadian, $47.75 per doz.; Universal, $37.75 per doz.; Safety, $56.25, less 20 per cent. per doz.; Mrs. Potts' irons, plain, 82½c per set; nickel-plated, 87½c per set; common sad irons, 4 to 7 lbs., $5 per cwt.

Carpenters' Tools.—There is an improvement in the demand for carpenters' tools. Quite a number of the orders now being filled in this line were received some time ago but there are too, those which are eleventh hour ideas and they are quite numerous. The real demand from the retailer's standpoint has not yet begun, but it will soon be felt in earnest. The following discounts are about the average: Steel squares, 50 per cent.; auger bits, 47½ to 70, according to quality; augers, short and long-eye, 65; chisels, 75, 10 and 5; draw knives, 75 and 10; handsaws, Canadian make, 35; boxwood rules, $1 15 and upward, a doz.; nail hammers, $2.75 and upward a doz.

Spring lines.—All kinds of spring and summer goods are moving freely. Wire netting, screening, lawn mowers, refrigerators, hammocks, garden hose and a host of other articles are being called for and are already being sent out. This department is well up to the average and the opinion is expressed that business will be better.

Heavy Hardware—Bolts, hinges, nuts, screws, etc., are going out freely and this department is busy. Quotations are the same as last week.

Building Paper.—There is a noticeable demand for all kinds of paper used in buildings. Orders are being filled and new ones received. Business in this department is good.

Sporting Goods.—Orders in this field have been practically all delivered and the new ones that are coming in are receiving prompt attention. This business has been good of late and gratifying reports are received.

TORONTO.

Toronto, April 5.—The very unfavorable weather is not tending to help along business in the hardware line. For the past month weather conditions have been quite bad and dealers have not been ordering as readily as might have been expected at this season of the year. March, 1910, was better in point of sales than the past month but it must be considered that almost ideal conditions prevailed then. It is hoped that the situation will be reversed and that the volume of business during April will exceed that for the same month last year.

At the present there are signs of improvement and as soon as real spring weather arrives, business will start in earnest.

Seasonable Lines.—There has been a fairly active movement to all spring lines. Garden hose, spades, axes, wire fencing, sprinklers, mowers, rakes, shears, etc., are selling well. There is also a growing demand for larger articles such as refrigerators.

Household Goods.—Graniteware and tinware lines are selling well. There is, of course, more or less demand for such goods at all seasons of the year, but in spring, the call becomes more pronounced. In house-cleaning articles, business is brisk and there is a growing demand for vacuum cleaners. Up to the present, sales of vacuum cleaners have not been overly heavy, but the demand now shows that the public is becoming educated to use them. Ice cream freezers are moving fairly well. Meat choppers, pots, pans, clothes wringers, washing machines and kettles are among the lines now selling.

Builders' Hardware.—There has been a good demand in this department. Fair or foul weather, the contractors have been starting to work and consequently there has been an active call for tools and contractors' supplies. The demand has been helped along considerably by the fact that all trades are now active and factories are running full handed.

Heavy Hardware.—The demand for bolts, nuts, screws, wire, etc., has been seasonably good. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Stoves and Heating Goods.—The stove trade is proving very good, particularly in gas ranges. There has been a heavy call and large shipments are now the order. The western Canada trade has developed very rapidly of late and is now serving to keep the manufacturers busy.

Sporting Goods.—The occasional bright days, and the fact that the newspapers are talking summer sports, have helped to offset the generally bad weather in fostering an interest in sport. Consequently, there has been a fairly active demand for all kinds of sporting goods. Guns, ammunition, baseball and cricket supplies, lacrosse sticks and tennis supplies are moving well and there are evidences that the coming week will see a big increase in the volume of business being done.

RUMOR OF A NAIL MERGER.

An unconfirmed report from St. John, N.B., sent out by the publicity department of that city, reads as follows:

"The very interesting statement is made that a syndicate, headed by Sir Henry Pellatt, has made a substantial offer for the property of the Maritime Nail Company at St. John. It is stated that this is part of a plan to take over the independent nail works located at St. John, Toronto, the head of the Lakes and Vancouver, and form a combination which would be able to serve the territory east and west with a great saving in freight. The statement, however, is not yet confirmed."

A TYPOGRAPHICAL ERROR.

The Magnolia Metal Company point out an error that was made in their April advertisement by the misplacement of a decimal, which has an important bearing upon the figures shown in the table under heading of "Coefficient of Friction"—"A" White Brass—in the test by the United States Government, using water as a lubricant. The figures under this heading should read as follows:—

Magnolia No. 1	0.00159375
Magnolia No. 3	0.0049479
"A" White Brass	0.0198916
Magnolia No. 1	0.00080208
Magnolia No. 1	0.00129166
Magnolia No. 1	0.0024727
Magnolia No. 1	0.00275

TAKING A TRIP ABROAD.

Edward Gurney, president of the Gurney Foundry Co., Toronto, has left this week, on a tour of Europe. He will be absent about six months.

The Western Hardware Market Situation

Spring Buying is in Full Swing—Big Demand for Builders' and Contractors' Supplies—Manufacturers Being Hard Pressed for Deliveries.

Winnipeg, April 6.—As spring advances the activity in the hardware trade is becoming more pronounced. The spring ordering is now at its zenth, and a much wider range of goods are in demand than it is possible for us to quote here. Building operations are now under way, and great progress is anticipated in this work everywhere throughout the West. As a consequence, retailers are of the opinion that it is almost impossible to overstock in builders' hardware and contractors' supplies. It really is impossible to overstock in many builders' hardware lines, as the stock is not to be had. and manufacturers are already being pressed for goods which are not yet turned out.

The ordering in harvest tools, shovels, picks and crow-bars is very heavy this week.

We are unable to make any change in the wire quotations yet, as every one is waiting for navigation to open, when new prices will surely be made. Horse shoes have been advanced owing to the stiffness in the steel market, and the price quoted here is held firm. There is no change in the price of rope, which was recently reduced, but it is not anticipated that further reductions will be made

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts 77½.

Bar Iron—Bar Iron $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $13.

Blocks—Steel, 45; wood 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c pre lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.83; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware— Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; grainte, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron — Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 26, $4.20; 28, $4.60; 30 gauge or 10¾oz., $4.80; Queen's Head, 28, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—¼ in., $3.50; ⅜ in., $3.80; ½ in., $4.25; ¾ in., $5.50; 1 in., $7.90; 1¼ in., $10.75; 1½ in., $12.70; 2 in., $17.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $5.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers — Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼ in., $2.55; ⅜ in., $2.85; ½-in., $3.45; ¾-in., $4.25; 1 in., $6.10; 1¼ in., $8.30; 1½ in., $10; 2 in., $13.30; 2½ in., $21.80; 3 in., $28.60; 3½ in., $35.60; 4 in., $40.80; 4½ in., $46.80.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9.50; dash, $9.75.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope.—Sisal, 8¼c; pure manila, 10¾c; British manila, 8½; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.25; broken lots, $8.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base $25.75 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate — 1. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28. full box, $10.25; ½ box $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 33 1-3.

Wire—Barbed Wire, 100 lbs., $2.95; plain twist, $3.25; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15,

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

There is a very brisk movement in the mixed paints this week, and this characterizes the general paint trade. Varnishes, and shellacs are close seconds, and a good, steady trade is going on, which will increase as the building operations advance. Putty is very quiet just now, but will open up steadily as the season advances. Putty, bulk, in barrels, is quoted at $2.75 to-day. White lead is steady, quotations being $5.75 to $6.50.

Turpentine has made another advance of 5 cents and this practically means that there is very little genuine turpentine on the market. There is plenty of adulterated stuff on the market, and there are also many commendable substitutes that are giving satisfaction. Both jobbers and dealers alike, however, will be glad to get hold of some pure turpentine should the occasion only present itself, as they are of the opinion that there is nothing like the pure stuff. The quotation to-day $1.40.

Linseed oil is holding firm, but unchanged on the local market. The price to-day is $1.25 for raw, and $1.28 for boiled. Local houses do not expect further advances at present, as there has recently been a slight weakness in the seed market.

WHAT CLERKS ARE DOING.

John Giles and Don Campbell, formerly of Fredericton, N.B., have decided to establish a general hardware business on the line of the C.P.R., near Golden, a town about forty miles west of Calgary.

Clarence McCutcheon, of the Bond Hardware Co., Guelph, left on Monday for Hamilton, where he has secured a position in the hardware department of the Stanley Mills Co.

Arthur McKenty, Norwood, has accepted a position with the Peterboro Hardware Co. He has been for some years in the employ of J. W. Rork.

Will Bentham, hardware clerk, Flesherton, Ont., has moved to West Toronto.

Mr. Myers, Toronto, has taken a position in Port Arthur as accountant for the Barnes Hardware Co. He was organist and choirmaster at St. Matthias Church, Toronto.

Large Profits to be Made in Carriage Paint

This is the Best Season of the Year for the Sale of This Specialty—How One Ontario Dealer Doubled His Business in Carriage Paint—Some Unique Methods —The Uses and Abuses of Circularization.

Saturday is generally the busiest of all days in the hardware store. Nevertheless, one Saturday morning last spring a clerk, in an Eastern Ontario store deserted his post at about nine o'clock and repaired to the local market. He remained away the greater part of the morning and then returned to the store, to be greeted, not by a curt announcement of his summary dismissal—as he would seem to have deserved—but by a bland smile of approbation from the proprietor.

The clerk's absence from duty in the store and the proporietor's quite apparent approval of same, were the result of a plan that had been formulated to push paint sales by a little outside work. On reaching the market, the clerk had gone from end to end and had made note of the condition of each vehicle there. If a wagon or buggy looked as though it needed paint very badly, the clerk made enquiries and found out the name of the owner. At the same time, he gave to each and every one on the market a neat booklet on the subject of carriage paint. When he returned to the store, he had a fairly complete list of the farmers in that section, who had vehicles, which were in need of paint. The merchant lost no time in following up the information thus obtained. He wrote a letter to each man on the list, giving a few forceful arguments and quoting prices. As a "clincher," he announced that on the following Saturday he was holding a carriage paint sale. All paints for carriages would be sold at a slight reduction in price, provided that a certain quantity was taken. In order to get the town people interested, he advertised the sale in the local papers.

When Saturday came, he had both windows of the store arranged to suit the occasion. In one window was a neatly laid out stock of carriage paints, brushes, etc. In the other a number of household articles were displayed including a table and a chair or two. Each article had been half painted and the other half left in its original condition, thus showing in practical and striking manner, the splendid results that could be obtained by the use of paint. At the back was part of a picket fence, which was also bright with a new coating. Everything in the window had been done with carriage paint, as a sign, prominently displayed, attested. Another sign in the window read: "If you have any paint left over after doing your carriage, it can be used to good purpose."

The writer learned of the methods employed by this merchant from the manufacturer who supplied the paint. The latter has been led to make enquiries by the unusually large amount of carriage paint that was being ordered. The merchant had more than doubled his sales of the previous year.

A Profitable Line.

Carriage paint is the most profitable of specialties to handle. It is one of the largest sellers and it carries a bigger profit than most lines. In the spring time, particularly, there is always a good demand, and this demand can be increased if the dealer takes any steps whatever to stir up business.

Carry Quality Goods.

The most important point in connection with carriage paint, is the wisdom of handling the best quality. In no other line will poor quality assert itself so quickly. Vehicles are subjected to constant exposure and the most trying of tests. They become coated with mud and must frequently be scraped and washed. Carriage paint, as a result, must possess an unusual degree of durability. If, when his wagon has been washed for the first time after being painted, the farmer finds that the gloss has been dulled and the appearance of newness already obliterated, he feels that he has been "done" by the dealer who sold him that poor quality paint. Cheap carriage paint will soon be detected. And the dealer will reap the blame in full measure.

The first consideration then is to carry a good line of paint. The second is to see that enough of it is sold.

There are many methods adopted to bring this line to the front. In the first place, the dealer should see to it that his own delivery wagon is kept spick and span. It becomes then a constant advertisement. One ingenious merchant conceived the idea of painting one side only of his delivery wagon, leaving the other side and two of the wheels in tarnished, muddy condition. The vehicle was driven around for several days in this "'arf-and-arf" condition and attracted much attention.

One of the most effectual methods, of course, is to arrange suitable window displays.

The Sending of Circulars.

Much good can be done by sending lists of prospective customers to the manufacturer, for the latter to send literature to. This practice, however, hgs been much abused.

Dealers often send lists that are absolutely out of proportion to the amount of business that can be done in that district. Some actually send in the voters' list for their riding and expect the manufacturer to circularize the whole countryside. In a list of such proportions, there are probably ten per cent. who have moved away, died or changed their address. At least fifty per cent. are people who do not own property of any kind, and of the remaining forty per cent., a good half are not likely to invest in paint. To be useful, lists of names should be carefully selected. Only men that can reasonably be called prospects, should be included.

"Last year a certain dealer bought about $25 worth of paint from us," said a Toronto paint manufacturer, "and sent in a list of people that he wanted us to send color cards to. It looked exceptionally large, so we did a little reckoning and found that the postage alone would cost $30, without figuring on the cost of the inclosures.

"Here is another case," he continued. "We received a list not so long ago which contained not less than nine men of the name of Jones. Well, we sent out the circulars and afterwards found that five of them lived in one house—the father and his four sons. That family should be absolutely steeped in paint literature."

Promiscuous circularization of this kind is far from effective. It is not very likely to produce results and the cost of the circulars and postage is a severe drain on the manufacturer. At the same time, when properly directed, this method is extremely useful in building up a good business. Pick out a number who are likely to buy paint and have literature sent to them and results will follow. But reasonable care should be taken in making out the lists.

Now is the Time.

In connection with the sale of carriage paint, no time should be lost in getting after the business. This is the time of year when the buggy and wagons are taken out from their winter retirement and put into active use again. If the owner starts to use his vehicle now without fresh paint, he is more than likely to continue doing so all through the summer. He is more liable to invest in paint before taking his buggy out for the first time and consequently this is the best opportunity that the dealer will have to make sales.

TO LECTURE ON FLAX.

The Board of Trade of Medicine Hat has decided to assist the linseed oil mill, which is being opened there, in securing raw material. Much difficulty is being experienced by the crushers in getting supplies as not enough flaxseed is grown. The crops of late years, particularly 1910, have not been sufficient to supply the demand and, as a result, the price of oil has gone up.

At the present time, a movement is on foot to create more interest among farmers in flaxseed growing and a campaign is being waged through the western provinces and American States. The Medicine Hat Board of Trade has decided to assist in the work and has arranged with the Provincial Government to send a practical flaxseed grower to deliver a series of addresses to farmers on the question of flax culture.

TO PRESERVE WOOD.

W. E, Clark, general manager of the Carbon Oil Works, Winnipeg and Toronto, recently waited on the Winnipeg Boarh of Control with a proposition from his company to start a plant in that city for the treatment of wood with a new preservative method.

PAINT WINDOW THAT DRAWS ATTENTION.

A really new idea in displaying paints, has been featured by Gordon Colville, in a window dressed by him for W. G. Colville Co., of Fort William.

A representation of an airship, is the pivot of the whole display. This has been accomplished by covering an umbrella frame with white cheese cloth, to represent the gas bag, while the cords which run down from the ends of the steel ribs support a galf gallon can of mixed paint, in lieu of a basket.

Pasted on the white cheese cloth, between the ribs, are covers of paint cards, advertising the line of paints carried by W. G. Colville Co. A Teddy Bear seated contentedly on the paint can, with a small paint brush in his paw, completes the balloon, which is kept revolving by a current of air from an electric fan situated in the corner of the window. The fan may be faintly distinguished in the accompanying cut, behind the parachute, and a little to the right. When the balloon revolves

the wooden paint paddles, which are attattached to the tips of the umbrella ribs, swing out wide, and add quite a spectacular feature to the display.

Directly under the balloon, is an iron of white lead, and beside it on one side, is a large bottle of linseed oil and, on the other, a similar bottle of pure turpentine, thus bringing to mind, the principal ingredients of mixed paints.

In the fore ground of the window, are several pattie pans filled with various dry colors. A small V-shaped ticket inserted in these pans gives the name of each color. The background is made up of cans in varying sizes, of the line of mixed paints carried by W. G. Colville Co. This window is one which is bound to attract attention and it should result in a good run of paint sales.

THE MAKING OF LAMPBLACK.

Ten million pounds of lampblack is an enormous quantity, when it is considered how bulky this article is. Yet, that figure represents the annual output of the Wilckes, Martin, Wilckes Co.'s large plant, at Camden, N.J., said to be one of the largest manufacturing establishments of its kind in the world.

The growth of this concern has been remarkable, as it was only in 1901 that the business was established. At that time, the Messrs. Wilckes, in conjunction with Mr. Wegelin, who was connected with a large European lamp-black business, established over forty years, determined to enter upon this line of business in the United States. After investigating many sites for their factary, they finally decided upon Camden, N.J., on account of its excellent water and rail facilities.

From the first, the business was successful, due largely, to the experience of its principals, which obviated the necessity of experimenting. In 1904, Mr. Wegelin, owing to the death of his father, returned to Germany, to look after his interests there, and L. Martin, of Germantown, who had also been connected with the manufacture of lampblack for many years, succeeded Mr. Wegelin in the business.

In 1905, the entire plant had to be duplicated to meet the increasing demand for its products, and, in 1910, another extension was required, the result being the erection of what is probably among largest single lampblack houses in the world.

The fact that, in eight years the output of the Wilckes, Martin, Wilckes Co. has increased from three million to ten million pounds, speaks volumes for the energetic management of the firm.

NEW PATENTS ISSUED.

The following is a list of patents, granted by the Canadian Patent Office, relating to Hardware & Metal, (March 21, '11), and furnished by Fetherstonhaugh & Co., 5 Elgin St., Ottawa, Canada.

131,706. Geo. H. Knight, St. Johnsbury, Vt. Door Hangers. Geo. H. Knight and S. Lang.

131,723. A. L. Weis, Montor, Mich. Frames for Glass Doors. The Weis Mfg. Co.

TO MANUFACTURE NEW EXPLOSIVE.

Wallaceburg, Ont.—Machinery for the manufacture of Carlite, the new explosive, is now on the way and will it is expected reach here in a few days. The Dominion Carlite Co. will at once commence the building of a factory. Those interested in the enterprise are: D. A. Gordon, M.P., H. Weise and J. M. Hess of Wallaceburg; and H. P. Bostaph, Windsor; Count von Oppersdorff, Berlin, Germany, and Reinold de Toll, London, England, the owners of the European patents.

Several tests of the explosive have taken place. Its chief quality, according to the claims of the company, is that, while powerful, it is perfectly safe. It cannot explode through pressure, shock, self-combustion or fire, but only through means of a blasting cap and fuse. It will work just as well, it is claimed, in or out of water, and rust and heat have no influence on it.

GOOD WORK OF B. C. ASSOCIATION

Vancouver, April 7.—The benefits of organization are being felt to a greater degree by the hardwaremen of Vancouver since the appointment of R. D. Dinning as secretary. Mr. Dinning being secretary of the Retail Grocers' Association, has trade matters pretty well in hand and knows the little odd points on which the dealers must come together, that they may get their full measure of business with as few losses as possible.

At the last meeting of the directors, he brought up the point of grocery stores in the suburbs putting in a few kegs of nails and such hardware as the ordinary man might use at this season of the year. This stock is small and carried only as a sideline, yet the grocers get wholesale prices. Since this is not their source of trade, they can cut prices, which militates against the regular hardware dealer. It is proposed to have representatives of the wholesalers meet with the directors at the next meeting and discuss this matter.

The subject of using mechanic lien forms on al ocassions was also considered. There is an unusually large amount of building going on, and while there are many contractors whose credit is unimpeachable, there are others not strictly in the first class. To secure protection, it is felt that the only way to do is to file the lien every time on good, bad and indifferent. To secure co-operative action the Lumber Manufacturers' Association and dealrs in builders' supplies will be conferred with.

Another point of interest discussed was that of members dealing with each other. It is common when a dealer is out of a certain article for which there is a call for him to send to another retailer and get the accommodation. Just what arrangement dealers will work under will be decided, whether the full retail price will be charged, or cost price plus ten per cent., or some equable common basis. As long as it is known what the arrangement is, and that it is uniform, it is felt that there will be general satisfaction.

Our selling plan will interest you if you want to do a bigger and more profitable paint business.

Wouldn't You Like to Know How We Help Our Dealers Sell

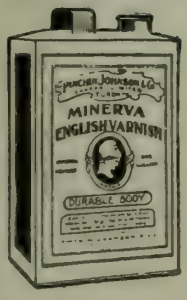
M (MAPLE LEAF) **L** **Pure Paints**

Two coats of M-L equal three coats of the best of other brands. Made in 47 different colors and tints for every use of paint, inside or out.

M (MAPLE LEAF) **L** **Floorglaze**

sells best of all wood-finishes because it has so many points of superiority. Best-advertised and easiest-selling brand in Canada.

M (MAPLE LEAF) **L** **Elastilite Varnish**



No varnish like it. Good for good jobs—not bad for the other kind. Flows free, brushes easily, dries well. Just what you want for people who want varnish in a hurry.

Established in England in 1834. 377-387 Carlaw Ave., Toronto, Ont.

PAINT AND OIL MARKETS

MONTREAL.

Montreal, April 6.—Although the reports from the paint trade are fairly encouraging there are those who admit that there is much room for improvement. The weather has been extremely backward and this the first week in April has been almost mid-winter like, especially in the amount of snow that has fallen. However, the break must be near at hand now and this objection will soon be forgotten. Again, prices seem to have been holding some buyers off the market with the feeling that they would not hold for any length of time. Linseed oil has recently receded and may go down a little lower, but a manufacturer states that the difference will not be material and there will be nothing to be gained by delaying for prices. Turpentine is certainly holding its own and will likely continue so. "Purchasers will be lucky," said one authority, "if prices do not go up."

Linseed Oil.—This market has been weakening of late and is not only lower in first hands, but the prices to the retailer show a reduction. This has stimulated trade a little, but as far as prepared paints are concerned there will not be sufficient difference to warrant a delay in forwarding orders. Linseed oil is now quoted at $1.05 to $1.07 per gal. raw, and from $1.10 to $1.12 per gal. boiled.

Paris Green.—Manufacturers report a good demand for Paris green, orders now coming rather freely. Prices are unchanged as follows: In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17¼c.; 50 lb. and 100 lb. drums, 18¼c.; 25 lb. and 100 lb. drums, 18¾c; 1 lb. packets, 100 lbs. in case, 20¼c per lb.; 1 lb. packets, 50 lbs. in case, 20¾c per lb.; ½ lb. packets, 100 lbs. in case, 22¼c per lb.; 1 lb. tins, 100 lbs. in case, 21¼c per lb.

Arsenate of Lead.—The demand for arsenate of lead is reported good in spite of the fact that it is opposed in the trade by Paris green. Present quotations are: In bbls., about 800 lbs., 9c.; in half bbls., about 400 lbs., 9½c.; in 25 lb., wooden kegs, 10c; 5 lb. bottles, 12c; in 2 lbs. bottles 13c; in one lb. bottles, 14c.

Turpentine.—This market has been steady at a high price and those who deal heavily in this article are not holding out any hopes of a material reduction for some time at least. The primary market has been steady of late with the quotations unchanged and locally, while same quote prices unchanged from last week, there are some who shade those prices a little. Local quotations range from $1.31 to $1.40 a gal.

Prepared Paints.—Orders for marine paints are coming in freely and are making up to a certain extent for the business in this line that was held back. Reports say that floor paints are in good demand, and that in all lines of prepared paints orders are coming in quite freely in spite of the weather and the market conditions.

White Lead.—There is a good steady business in white lead and white zinc is also coming in for a large share of trade. The prices for white lead are as follows: lots of one ton, $5.85, contracts of five tons and over. $5.70; shipments less than one ton, $6 f.o.b. Montreal.

Putty.—This market is unchanged in prices, but putty is in good demand, and orders are coming in satisfactorily. Prices f.o.b. Montreal are: Bulk, bbls., $2.20; bulk cwts., $2.45; bladder, bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.55; 25's cased, $2.70; 12½'s, cased, $2.90.

TORONTO.

Toronto, April 6.—There is a decidedly active tone locally. The spring demand is now making itself felt and orders are literally pouring in. The jobbers and manufacturers are plunged into the work of spring shipments and are finding it difficult to keep pace. Orders are pretty well assorted at the present.

The market has seen no price changes this week. There has been, in fact, an unwonted calm. Turpentine has remained stationary, the steady advance in price having been checkd for the first time in many weeks. Linseed oil stands at the same figure, but some talk is heard of future reductions. In both of these lines, the demand has grown considerably, although turpentine orders are still mostly of the hand-to-mouth variety.

Linseed Oil—The tendency toward weakness in linseed oil is more marked, but, up to time of writing, no change has been made from last week's quotations. Raw sells at $1.15, and boiled at $1.18. It is said that local stocks are pretty nearly exhausted and that the jobbers will have to buy within a very few days. They are looking for a slightly declined price, but, in any event, new stocks will hardly arrive here before May. The demand has picked up very fast of late, and the advent of more favorable weather would spell a great rush of business.

Turpentine—The prevailing price is $1.40 for spirits of turpentine. Earlier in the week an advance to $1.45 was contemplated, owing to the high cost of laying the stock down in Toronto, but the change was not made. As to the future price, opinions differ. Some predict lower prices shortly, but one jobber asserts that still higher quotations will be received. The price at Savannah has declined a few cents during the last two or three days. Locally, stocks are sadly depleted, and purchases will have to be made shortly. New stocks will hardly be obtainable, however, sooner than three weeks.

At Savannah, things are very quiet. It is reported that practically no sales are being made, but the supplies are not increasing.

Wood Turpentine—The lower price of wood turpentine is creating some sales. The price quoted here is $1.

Rosin—No further advances are noted in rosins. The increases in the price of turpentine have been followed in rosin, and now that spirits are remaining steady, rosin is also stationary.

Putty—The demand at the present time is so well assorted that even considerable putty is being sold. Prices are standing at the same figures: Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.55; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same: Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead—The demand here is good. Large orders have been placed during the past two weeks, and the constant enquiries received indicate that the need is growing. The price remains stationary, and, with linseed oil tending downward, it would not appear probable that a change will be made for a while at least.

Varnishes and Japans—The spring rush is on in all lines of varnishes, japans, veneers, shellacs and polishes. Despite the handicap of bad weather—and certainly the weather has been bad—sales have been large. Buyers and sellers, alike, are too busy to talk price nowadays, and consequently nothing further has been heard on the score of advances.

Petroleum—Prices are given this week as follows: Canadian prime water white, 12½c; United States water white, 14c; Pratt's Astral, 16c. The market is strong with a good demand in evidence.

HARDWARE LEAGUE BANQUET.

Montreal.—The third annual banquet of the Wholesale Hardware Hockey League was held Saturday evening at Kastel's, about one hundred and fifteen being in attendance. Herbert B. Seybold acted as chairman, and among the speakers were: F. Max Hill, Robert Starke, R. B. Coulson, M. Brainard, F. C. Lariviere, A. McFarlane, who responded to the toast "Our Guests;" R. F. Warren, Maurice P. Shea, C. M. Strange, Geo. E. Chaffee, J. F. Smith, Harry Roper, Thomson Robertson, J. F. Arrowsmith, Frank Calder, the Herald; M. Gordon, the Gazette, and M. Ilroy, the Star.

Geo. C. Davis, of Frothingham & Workman, presented the trophy to the champion Canadian Fairbanks team. Graham Drinkwater accepted it on behalf of the champions. Charles Smallpiece, of the Taylor-Forbes Co., presented the individual members of the team with cups. The players thus honored were: Rene Desourdy, M. Davidson, F. Aspinall, D. Bethune, Jack Marnell, W. Bennett and Albert Prailny.

H. J. Fuller, president of the Canadian Fairbanks Co., offered a suitable cup for the next few years. A. A. Bittues, manager of the Gillette Safety Razor Co., offered a perpetual trophy to be held by the champions from year to year. A. McFarlane, manufacturers' agent, will donate individual souvenirs next year, and Alf. Brittain will present the team finishing second with a prize.

The following gentlemen very kindly entertained the banqueters; Messrs. Earle, John Asselin, John Letham, J. T. Smith, Fred Gibb, J. Sauviat. The officers of the league presented the president, Herbert B. Seybold, with a gold watch fob as a token of esteem.

China-Lac

The Perfect Varnish Stain---Extensively Advertised Yields the Dealer a Profit of over 58%

China-Lac is a Perfect Varnish Stain

Not made from heavy pigments that obscure the grain of the wood and give an appearance of a solid varnish paint. Not made from dyes that fade out in a week. But made from the most permanent light gravity, chemical pigments it is possible to obtain.

Made from Pigments

Pigments, made in our own dry color works, in the most scientific manner by our chemists, on formula brought direct from Great Britain.
Pigments that give lasting, non-fading effects.
Pigments that allow the grain of the wood to show up through the Varnish.

The Varnish

The Varnish used in China-Lac is specially made for that purpose. It was not hastily decided on but tested out by time and wear.
The combination of these pigments and varnish made a varnish stain that covers the wood with a rich lustrous coating, imitating most expensive hard woods.

The Colors

Made in sixteen beautiful colors. Eight to imitate natural woods.

The Store Advertising

Given with China-Lac comprises an attractive Window Trim, beautifully lithographed in three colors, red, black and white. This goes across the upper portion of window, and down each side, showing on the two upper corners the little Chinese boy with lantern. The two side panels have a lithographed bamboo frame and a large Black Dragon running up behind the panel.

Large Display Card for the Counter

This is a very handsome card, size 10x18, showing the 16 colors, in which China-Lac is manufactured; it makes a most beautiful appearance and is bound to command attention.

Eight-Page Booklet

This booklet gives full information about China-Lac, telling about the different colors, also what China-Lac can be used for, and gives other useful information regarding interior decorations.
The cover of this booklet is lithographed in green background, buff lettering.

Small Counter Cards

Lithographed green lettering on a buff background; they have small color strips, showing the 16 colors in which China-Lac is manufactured.

GET THE BIG BUSINESS WITH RUBEROID ROOFING

TRADE MARK REGISTERED — Pronounce It RUE-BER-OID

Perhaps you have always looked upon Ready Roofing as a line suitable only for such cheap and temporary buildings as sheds or poultry houses. While this may be true of most ready roofings, it is by no means true of RUBEROID.

Moderate in price — quick and easy to lay—RUBEROID is weather-proof, unaffected by acids, fumes or gases, or by extremes of heat or cold, and strongly fire-resisting. RUBEROID has proved in its **twenty years of actual service** that it will neither rot, warp, rust, crack, peel off nor get hard or brittle, but will give perfect satisfaction. That is longer than any other ready roofing has been in existence, for RUBEROID is the original.

Colored RUBEROID, in Red, Brown and Green, the color *impregnated* right into the roofing, makes among the handsomest as well as the most durable of roofs.

With RUBEROID in stock you can go after the highest class of roofing trade—and get it.

Write for full information, samples, prices and discounts.

Congo Roofing

Guaranteed Until 1921

The owner of any building covered with Congo Roofing is not only satisfied with his purchase, but has the satisfaction of **knowing** that it is **guaranteed** for 10 years.

That's real protection.

Every roof of 2-ply and 3-ply Congo is guaranteed in this way.

In every roll of Congo is a **genuine legally binding Surety Bond** issued by the National Surety Company, of New York.

This year we will guarantee thousands of roofs all over the country **to last till 1921** on this basis.

Of course, we are not going to lose—we are offering a sure thing, as Congo will last **more** than 10 years.

One thing the guarantee forces upon us; it makes us extremely careful in manufacturing.

We make doubly sure that every roll is perfect. We use the best material that money can buy.

Another detail is the nailing. To avoid any trouble from this source, we provide free of charge, **galvanized** iron caps, which are rust proof, and will last as long as the roofing.

In every way we protect ourselves against the possibility of a complaint.

Send for a copy of our Guarantee Bond, and a Sample of Congo Roofing. The guarantee will show you what a real legal roofing guarantee looks like.

CONGOLEUM

We should like to send you a sample of Congoleum. It is fitted for floors and wainscotting in homes, stores, offices, etc. It is a perfect imitation of oak. Its surface has a high polish. Unusually durable. The price is very low. Write for samples and further information.

WROUGHT IRON WASHERS

Canadian, 50 per cent.

HE WANTS TO KNOW

Why shouldn't any customer want to know something from you about the paint you sell? He wants to know something about its reputation—if it has been tried—thoroughly tested—if it is guaranteed.

What will you say?

If you have

RAMSAY'S PAINTS

you will say these paints have been made in Canada for seventy years. The makers are the oldest in the paint trade. These paints are known all over Canada. The traveling salesmen cover the territory from the Atlantic to the Pacific. You see the paints advertised wherever you go. Naturally that means a reputation behind the goods, and in front of them as well. The firm fully guarantees and you are protected.

There is money for the dealer in every line of Ramsay Paints. They are real money makers.

Write us.

A. RAMSAY & SON CO.

Established 1842

The Paint Makers

MONTREAL

SHEET ZINC

Genuine "V.M." Sheets

At the price of Ordinary grades.

From Stock or For Import.

A. C. LESLIE & CO., LIMITED

MONTREAL

Made not only to **sell,** but to **excel!**

New Era Paint

is an honest paint you can handle with good profit. It lasts longer, holds its color better and covers more surface than any other prepared paint.

Write for details and prices.

A Little Brushy Talk

MR. DEALER:

When you sell a customer BRUSHES branded "BRYAN" you know he's yours, he'll come back—satisfied.

That is where you establish you name, by carrying good goods, and still retain your usual profits.

Our 1911 catalogue on BRUSHES manufactured by "BRYAN" and other leading manufacturers is now ready.

Drop us a postal, and say, BRUSH CATALOGUE, it's yours for asking.

WE WANT YOUR BUSINESS

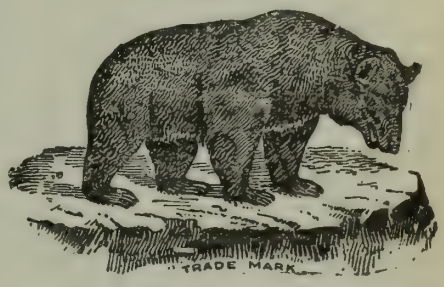
WE LEAD THE WORLD

The ever-increasing demand for



BEAR BRAND LAMP BLACKS

has necessitated this increase in our manufacturing facilities, as shown in the figures below:

	CAPACITY
1902 - - -	3,000,000 pounds
1905 - - -	6,000,000 "
1911 - - -	10,000,000 "

Our growth is entirely due to the consistent high quality and absolute uniformity and purity of our products, together with the courteous treatment always extended to our customers.

If you are not using OUR BLACKS, write us and we will submit samples and prices which will save you money and secure your orders.

WILCKES MARTIN WILCKES CO.

The Largest Makers of Fine Lamp Blacks in the World.

Sell Varnish With Enthusiasm

WHEN you tell a customer you carry Pratt & Lambert Varnishes you stand straight and look him squarely in the eye. You have the Quality varnishes on your shelves and the "House" back of you. You're partners—you and the "House." Pratt & Lambert don't simply **sell you** a bill of goods, but they help you sell to your customers, by consistent co-operation, and the most thorough and complete advertising in the trade.

It pays to do business with a house that backs you up. If I were you, I would write and ask for prices and terms.

PATTERN DRAWING

SHEET METAL WORKERS — Our Home-Study Course on Pattern Drawing teaches you the method of drawing patterns for anything required in sheet metal, whether in a small tinsmith shop or a large cornice and skylight factory. This course is adapted especially for home study, and is clearly worded and illustrated. It takes you behind the scenes and shows you that what has appeared mysterious is simplicity itself. The complete course, comprising 40 blue prints, 60 sheets of instructions and necessary drawing instruments, sent to any address in Canada on receipt of $20.00. Club rates, 3 to 5 members, $17.50 each; 5 members and over, $15.00 each. Address, THE SHEET METAL SCHOOL, Box 410, Galt, Ontario. (13tf)

MISCELLANEOUS

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

YOU DON'T buy a National Cash Register—it pays for itself. Saves money. Prevents mistakes. We can prove it. National Cash Register Co., 285 Yonge Street, Toronto.

When writing advertisers kindly mention having seen the advertisement in this paper

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

DOUGALL'S

TRANSPARENT WOOD FINISHES

Have very special values, and ones which should not be lost sight of by you, Mr. Dealer. Although they cost a little more per gallon, the fact that they cover a great deal more surface to the gallon than any other varnish on the market, makes them cheaper in the long run.

If you are running a store along the lines of "Satisfaction to your customers," then DOUGALL VARNISHES are a necessity to you. They are a profitable line to handle, and will help the reputation of your store.

Let us send you our booklet "Quality and Economy in Varnish and Varnishing"—a postcard will bring it free by return mail.

Satinette
(White Enamel)

should be on every dealer's shelves if for no other reason than that it is one of the famous International Varnish Products.

But—it has plenty of intrinsically superior qualities to recommend it besides that.

Satinette is suited for decorative work of every description—Gloss interior and Flat Interior for interior work and Gloss Exterior for exterior work.

Satinette is known all over the world as the white Enamel that stays white—it cannot become yellow.

Architects, painters and decorators always think of Satinette now when they think of enamel.

Satinette is the most perfect and durable white enamel ever made.

It has great covering capacity and **CANNOT TURN YELLOW.**

Like all International Products, Satinette is sold only in full Imperial Measure Cans.

QUALITY—There is a finish on the "BUCO" which makes it look like a good tool, but there is a better quality in it than any surface could reveal.

If you could see INTO the Teeth—the vital parts—you would see a highly refined steel, tempered to perfection in oil by experts, resulting in a spring tooth of a quality such as is quite unusual in garden tools. This degree of perfection is not superfluous but means greater snap in work and longer life at it. The extra price does not count where extra quality is known.

The "BUCO" Garden Cultivator.

Handle 4½ft. Long

The "CUMA" CULTIVATOR

Total Length 18in.

A most effective little tool made for flower beds and fine work. Same quality as the "Buco." Sells at sight and "does the work" afterwards.

Montreal - Toronto

Winnipeg

IT IS PERHAPS NOT GENERALLY KNOWN

That we have an Information Department, consisting of trained and practical men, whose time is employed solely in answering enquiries from people interested in cement.

NOW IT WILL BE READILY UNDERSTOOD

that out of the mass of enquiries that come to us, there are a number that include questions as to what might be termed Allied Industries. These we now answer to the best of our ability, but we could answer them still more satisfactorily if manufacturers of materials used in conjunction with cement would co-operate to the extent of sending copies of their catalogues and other literature, to be placed on file in our office for reference.

WE SHOULD LIKE TO OBTAIN

the names and addresses, together with catalogues, and any other obtainable information, of manufacturers of and dealers in:—

(1) CONCRETE MACHINERY. (2) BUILDING BLOCKS. (3) CEMENT BRICKS. (4) TILE MOLDS. (5) FENCE POSTS. (6) REINFORCING MATERIAL. (7) WATER-PROOFING COMPOUNDS.

It is not alone for our own convenience that we make this suggestion—firms who manufacture or deal in such articles will find it to their own advantage to have this information in the hands of our Information Department, thereby enabling us to hand on to them, from time to time, enquiries for such materials as they severally make.

In sending catalogues, literature or information, please address same to "Sales Department."

SPRAYS AN ACRE IN 20 MINUTES.

The **H. P. Spramotor** will spray an acre of Potatoes in only 20 minutes. No other method known can do that work in even twice the time.

The picture above shows the **H. P. Spramotor** spraying Potatoes. There are three nozzles to a row, and four rows. Two spray from the sides, and one from the top. They are adjustable to height and width up to 40-inch rows. The nozzles will not clog, or get out of order. Have a 12-gallon air tank, with 100 pounds pressure guaranteed with 12 nozzles open. Automatic and hand controlled. The **Spramotor** has agitator clean-out pressure relief into tank, and nozzle protector, all under control of the driver, from seat. The **Spramotor** is made for 1 or 2 horses. Fitted for Orchard, Vineyard and Grain Crops. Can be operated by hand. **The Spramotor saves** enough money in time and labor to **pay for itself** in 1 year on 20 acres of potatoes. Don't be content with moderate results when you can increase per crop three or four times.

Simonds Straight Cut Hack Saw Frame

This frame is so entirely different from and so superior to all other Hack Saw Frames that if you sell it you will have something exclusive. It is a great favorite with Machinists wherever introduced. Dealers handling Simonds Hack Saw Blades have the privilege of ordering the Straight Cut Frame for stock. Simonds Hack Saw Blades can be obtained on very short notice from any of our offices. We want to quote you on the quantity you sell in a year.

THE

Cane Pony Washboard

is so handy in taking care of the doilies and all my delicate laces. I don't know how we'd do without it, for they can't be put into the regular wash.

The demand for Cane's Woodenware results from the complete way in which wash-day needs are covered. It is always a profitable line, because every sale means an enthusiastic friend.

Cane's Wash-day Woodenware

includes every requirement from tubs that nest beautifully to clothes pins and clothes racks. WRITE FOR CATALOG AND PRICE LIST.

THE WILLIAM CANE & SONS CO., Limited
NEWMARKET ONTARIO

THE CONNOR BALL-BEARING WASHER

With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled. And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.

Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

Made in Ladies' and Gents' Sizes in Nickel, Oxydised, Blue Steel and Silver; also with Metal Dials (Gilt or Silvered).

THE TORPEDO WATCH

Guaranteed for 7 years. Sold at popular prices.

A profitable line to handle. a quick seller and one which gives you a good margin of profit.

You sell the watch and after that we take care of it. Each watch carries its own guarantee and we will make good any watch that does not give satisfaction. You take no chances.

We would like to send you our price list and particulars of our free showcase offer. Drop a line to

LOUIS NEWMARK

149 Notre Dame St. West. MONTREAL

It Interests every Fruit Grower by its clean positive action.

"Kansas" Pruning Knife

(Improved)

You do a kindness in recommending this knife to your customers as it does its work more cleanly and conveniently than other pruning tools and is a greater labor saver.

Any limb up to 1¼ inches in diameter can be cut by simply placing the hook over it and pulling the handle; for twigs the string is sufficient. Will last twice as long as its best predecessor and will do five times the work.

Manufacturers of the Best Known Clippers in the World

BOWN'S NEWMARKET Clipper is made solely by US. This clipper has enjoyed the highest reputation throughout the world for over thirty years. It brings repeat orders wherever sold.

THE GRAND CLIPPER (ball bearing) is the only genuine ball bearing clipper produced to-day, fitted with black ebonized handle and nickel plated. A strong seller.

THE HANDICAP is a lower-priced clipper, but its quality is high. It is a centre-adjustment clipper of very simple construction and is in great demand in all the colonies. It is the standard in Canada. Let us send you a catalogue. These are three of our most popular lines.

NO. 17 POWER CLIPPER STANDS ALONE. The phenomenal success of this power clipper is undoubtedly due to the excellence of the patent clipping head; its wonderful cutting qualities; its anti-frictional design and its perfect balance, and at the same time it runs lightly and easily. Weighs only 35 lbs. packed; size, 26 x 11 x 8 inches.

Talking to the Point

CLASSIFIED WANT ADS get right down to the point at issue. If you want something, say so in a few well-chosen words. Readers like that sort of straight-from-the-shoulder-talk, and that is the reason why condensed ads are so productive of the best kind of results.

CLASSIFIED WANT ADS are always noticed. They are read by wide-awake, intelligent grocers, who are on the look out for favorable opportunities to fill their requirements.

TRY A CONDENSED AD IN THIS PAPER

Marvellous POLIVIT
PATENT

The Lightning Silver Cleaner

POLIVIT must not be confounded with ordinary aluminum that is used with an alkaline solution and sold as Silver-Shine, etc. Polivit is a metaloid plate, consisting of a combination of alloys, that has the remarkable property, when used in hot water with the addition of common washing soda, of removing tarnish from silver and electro-plate, as well as giving it a beautiful lustre. It has been patented in England and abroad and has been tested and demonstrated as the best silver cleaner on the English market. It won the gold medal at the Exhibition in London in 1909 in competition with aluminum imitation cleaners, polishes and powders of all kinds. It is used by the largest hotels, leading clubs, and best families in England. Stock Polivit and anticipate a large demand.

The Newest and Best Safety Razor
Henry Boker's "Janus"

Triple Silver-Plated Holder and Twelve Double-Edged Blades

These Blades Can Be Stropped, Which Makes Them Last Indefinitely.

The "Janus" is the most wonderful little instrument ever devised for taking the beard off the face. A single movement releases or inserts the blade. The holder is in one piece. There are no parts to adjust—nothing to learn. It is simplest in construction, easiest to clean. Once the blade is inserted in the holder it is absolutely rigid. There is no vibration. No shaving instrument ever devised approaches it in any particular. The steel used in "Janus" blades is made by Boker's process, which is known the world over as the very best. We guarantee this Safety Razor to shave to perfection.

"The Razor of To-day"

The Mechanics of the Gillette

ARE YOU POSTED ON THEM?

The new GILLETTE advertisements now running in the newspapers and magazines lay particular stress on the mechanical features of "The Razor of To-Day." Our aim is to show your customers exactly why GILLETTE blades are keenest—why they cut most smoothly, without gashing the face—and just how to use them to the best advantage.

The superior temper, rigidity of edge, adjustability and economy of the GILLETTE are explained in word and picture in a way that is striking and easily understood.

Men in your town and all around in the adjacent districts are reading these advertisements. They are getting interested in the GILLETTE as a razor that has distinct advantages from a mechanical point of view. They want to be shown—to have a chance to examine the razor themselves and verify the statements made in the advertisements.

Are you and your clerks ready to show them and make sales? If you have to confess that you cannot explain any feature that may come up—if you cannot correctly illustrate the "Angle Stroke"—don't kick at losing sales.

Get Posted—and see that your clerks do the same. Read the GILLETTE advertisements—the cards we are sending you—the "Science of Shaving." Write us if there are any points not perfectly clear to you.

You'll not be wasting your time. Nobody ever did waste time on the GILLETTE—

IT PAYS GOOD WAGES.

COMMUNITY SILVER.

32-Piece Mahogany Chest outfitted with SHERATON

Think Over This Metal Ceiling Matter

how we bring trade right into your store.

Our big advertising campaign for 1911 will bring us many inquiries from people who would buy from you if you had the Preston Steel Ceiling agency. Such inquiries we promptly turn over to our local representative.

■

Thus, you see, we do not rest content when we have advertised our goods to your community. We see to it that possible buyers---and everybody who owns a house or store is a possible buyer---are brought right into contact with the dealer.

■

And we give our dealers every possible help when the sale is a prospect.

■

You are the logical distributor of metal ceilings in your locality. The profit is good, and we make the selling easy. Get ready NOW for the business.

Offer Your Trade Choice of Over Eleven Hundred NEW Designs

how we make sure no one can outclass you.

We keep our assortment of designs right up to date. We now have over 1,100 patterns, every one a quick seller.

■

And, at our big factories at Preston and Montreal, we carry a stock ready to ship that is big enough to assure prompt filling of every order. Thus our dealers never suffer from delays on our part.

■

Thus we add to the value our advertising help gives you. For you can be sure of satisfying your customer once we have landed him for you. He will get what he wants when he wants it.

■

You will get an attractive proposition on prices and terms, if you will write us and ask questions. You will then see why you certainly should include Preston Steel Ceilings in your regular selling. Ask NOW.

HUNT, HELM, FERRIS & CO.

(Manufacturers of Hardware Specialties for 25 Years)

Harvard, Illinois

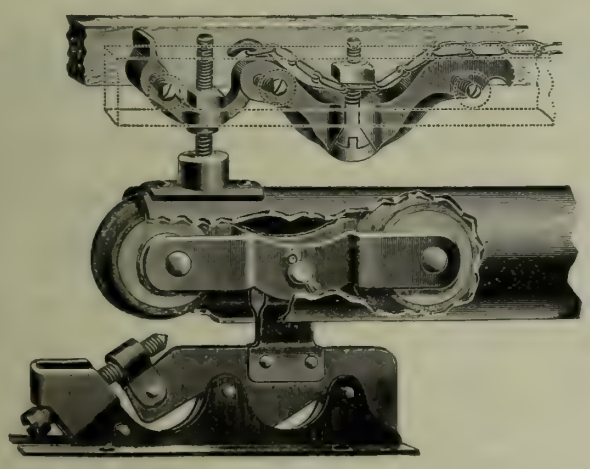
Fig 386

The Cannon Ball Barn Door Hanger

Steel wheel, roller bearing, noiseless, tandem, flexible, bird-proof, waterproof, completely enclosed. The Track comes in 3-ft. sections, crated. 96 feet of track is packed in a crate. Can be put under the counter, making it convenient for stock. The Track Brackets are packed separately. Note that Cannon Ball Hangers run inside of the track, not outside.

"The Cannon Ball Beats Them All."

The Cannon Ball House Door Hanger



has two specially-formed rollers, which have steel bushings, covered with sole leather, making an indestructible wheel with wide tread and noiseless, being fitted with long roller bearings.

The Hangers are packed a full set or ½-set in a wooden box, neatly labeled. Ten full or ½-sets in a crate.

Cannon Ball House Door Track is made in lengths up to 12 feet, and is fitted with an Adjustable Wood Header, by means of which the Track is adjusted at the door opening with the use of a screw driver only.

"The Cannon Ball Beats Them ALL."

Fig. 404

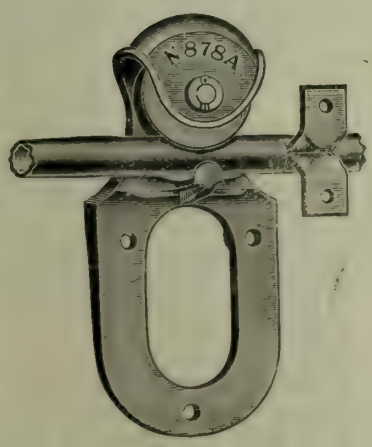
The 20th Century Barn Door Hanger

is finished in aluminum. The frame and hood of the hanger are one malleable piece, thus making the hanger strong enough for the largest doors.

The wheels have wide grooves and run on hardened steel roller bearings, reducing the friction to a minimum.

A lip projecting about 1 in. below the wheel makes it impossible for the hanger to jump the track.

20th Century Barn Door Track is put up in 2-ft. sections only, 100 ft. in a crate, making it convenient to stock right under the counter.



"The 20th Century Has No Equal."

IT IS PERHAPS NOT GENERALLY KNOWN

That we have an Information Department, consisting of trained and practical men, whose time is employed solely in answering enquiries from people interested in cement.

NOW IT WILL BE READILY UNDERSTOOD

that out of the mass of enquiries that come to us, there are a number that include questions as to what might be termed Allied Industries. These we now answer to the best of our ability, but we could answer them still more satisfactorily if manufacturers of materials used in conjunction with cement would co-operate to the extent of sending copies of their catalogues and other literature, to be placed on file in our office for reference.

WE SHOULD LIKE TO OBTAIN

the names and addresses, together with catalogues, and any other obtainable information, of manufacturers of and dealers in:—

(1) CONCRETE MACHINERY. (2) BUILDING BLOCKS. (3) CEMENT BRICKS. (4) TILE MOLDS. (5) FENCE POSTS. (6) REINFORCING MATERIAL. (7) WATER-PROOFING COMPOUNDS.

It is not alone for our own convenience that we make this suggestion—firms who manufacture or deal in such articles will find it to their own advantage to have this information in the hands of our Information Department, thereby enabling us to hand on to them, from time to time, enquiries for such materials as they severally make.

In sending catalogues, literature or information, please address same to "Sales Department."

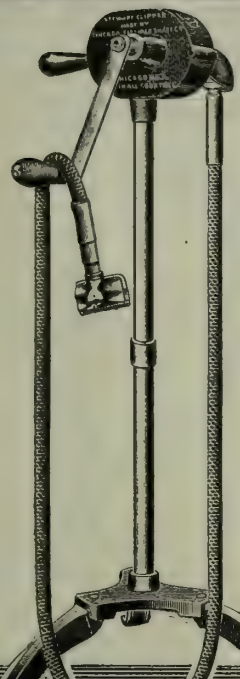
Here's the Machine

---that competitors are copying



The superiority of our Stewart No. 1 over all clipping machines on earth caused one manufacturer to pilfer the idea. It was a steal—but, without a perfect result. The shape of the "counterfeit" resembles the Stewart; so does some of the mechanism. But the real principle of construction—the process that put the Stewart in the lead—they only guessed at. Don't sell "guesswork" machines. Sell the original machine—the machine that's backed with a **quarter-century guarantee.**

Why the Stewart?

We don't ask "shrewed buyers" to buy our machine because it was made in a certain country. We have more respect for their common sense. We just want horse-owners and dealers to know why the Stewart machine is the **best** machine.

CHICAGO FLEXIBLE SHAFT CO.

Write at once for our big free catalogue

STEWART

---the Stewart No. 1

Horse Clipping Machine

The Stewart No. 1 has gears made from cut steel, hardened file hard, working parts enclosed in an oil bath and is equipped with plenty of best quality flexible shaft and the world famed Stewart one-nut tension knife.

We help the dealer

We are willing to give individual advertising to dealers who believe in square dealing and who want to sell more horse clipping machines. Write ***at once*** for particulars of our co-operation policy with hardware men.

It's to your interest as well as ours to sell the **Stewart,** because it's to the best interest of the **user** to **own** and operate one.

250 La Salle Avenue

A REMARKABLE TEST OF MAGNOLIA

BY THE UNITED STATES GOVERNMENT USING WATER AS A LUBRICANT

The "No. 2 Magnolia" mentioned in "TABLE E" contained the same proportions of tin, antimony and lead as the genuine "No. 1 Magnolia," but did not contain graphite, nor was it treated by our special foundry process: however it was made of virgin materials mixed in the ordinary way, and would class as a high grade babbitt.

TABLE E. Giving results of combined ahead and reverse for friction test of Magnolia and "A" White Brass for each change of weight for 100 lbs. per square inch to 600 lbs. per square inch of projected area of bearing surface by increasing weight 100 lbs. per square inch at each change—**Lubricant: Water.**

METALS.	Weight applied in lbs. per square inch.	Revolutions: Time in minutes.	Revolutions: Total.	Revolutions: Per minute.	Velocity or rubbing surface in feet per minute.	TEMPERATURE. "	600	60	58.870	490.58	513.74	68.5	71.0	68.25	– 0.25	78.0	140.0	97.08	19.08	76.5	124.0	92.60	16.16	0.00275	

"A White Brass" could be tested up to only 200 lbs. per square inch, as the machine would not turn beyond that weight. The Testing Machine turned easily up to 600 lbs. per square inch with the genuine Magnolia No. 1.

It was not thought necessary to test the No. 2 metal beyond 200 lbs. per square inch. This Water Test shows the true intrinsic value of Magnolia Metal as compared with other metals: It also demonstrates that a metal may show relatively the same analysis as Magnolia and yet fall far short of giving equal results; it also shows the destructive effect of frictional heat on even a very hard metal like White Brass.

It will be observed that the genuine Magnolia Metal (No. 1) proved to be twelve times superior anti-frictionally to white brass and three times superior to the No. 2 or ordinary grade of babbitt.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

GURNEY-OXFORD Remember the 1st Week in May GURNEY-OXFORD

A LETTER TO CANADIAN STOVE MEN

Toronto,
April 17th, 1911.

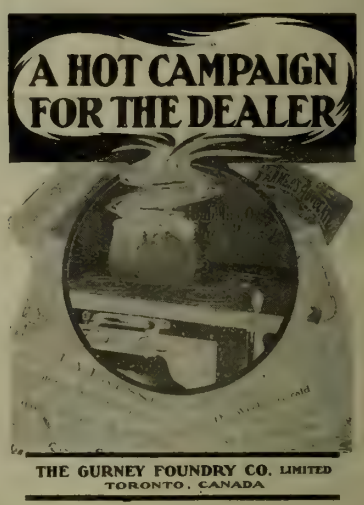
Dear Sir:

Just a year ago we issued a book, outlining what we would do for the trade during 1910 to help sales. You may remember that book. It was called "A hot campaign for the dealer."

That co-operation made sales—we know that, because we filled the orders. It made most sales where we had live, intelligent co-operation from our local man, but it helped all along the line.

Our new proposition—our co-operation for 1911—will come to you about the first of May. We'll make no definite promises further than to say we expect an even bigger increase this year than last. Our line, too, is even better and more complete than it was last year.

Are you telling the same sort of stove story as the other fellow? Or, this year of 1911, will you be there with different, better, more effective methods?—because we'll have them, May 1st. And we can enable you to **clearly show** that the Gurney-Oxford Economizer will save household expense for your customers.



Better find out this year, May 1st.

Yours very truly,

THE GURNEY FOUNDRY CO., Limited.

Busy Season in Sporting Goods is Now Beginning

Dealers Should Give This Department a Good Place in the Store—Some Effective Window Displays — Novel Methods Adopted to Attract the Trade of Athletic Devotees.

After long delays and several futile starts, spring seems to have come to stay. The arrival of bright days and spring sunshine is always the forerunner of an active revival of sport and it behooves the hardwareman to see that his sporting goods department is in readiness to meet the coming demand.

Already small boys congregate on corner lots; the newspapers are devoting columns to the doings of baseball teams in the south and the lacrosse prospects; and in every healthy man's mind the old time desire to witness, and participate in sports is again awakening. There's something in the spring atmosphere that arouses the latent love of sport. But, as the ardor of the amateur cools off some as the ennervating heat of summer arrives, it is the spring that the most business in sporting goods is done. The present opportunity is, therefore, too good to be neglected.

The first step is to arrange the stock in neat and ship-shape form and in as conspicuous a part of the store as can be allowed for the purpose. It is wise to keep all sporting goods in one place and not scatter them in a dozen different spots as is done in many stores. Much time and labor will be saved and the effect is better.

Last spring a Winnipeg hardware dealer decided to make a strong bid for sales in this line and it occurred to him that it would be wise to make a separate department of sporting goods. At the back of the store on one side was the space, to which the paint stock had been relegated during the winter. As soon as spring time had arrived, he had promoted his paint stock to the front and thus had a certain amount of room left in the rear. He decided to turn this corner into a sporting goods department, and went about it by moving the counter out and putting in a railing which extended almost to the other side of the store. In the space thus provided, a complete stock of sporting goods was displayed. The cases along the wall were devoted to the display of rifles, fishing tackle, golf supplies, etc. A number of tables were provided to show baseball, cricket, lacrosse and tennis supplies. Cricket bats, lacrosse sticks, baseball bats, paddles and fishing poles were kept in suitable racks along the sides. Hammocks and punching bags were suspended from the ceiling.

Entrance to this compact little department was obtained between two posts which ran up to the ceiling and were loaded with small goods, such as baseball gloves, deckers and masks.

The segregation of the department is wise from many standpoints. In the first place, the young man or boy, who drops in to make a purchase, likes to take his time and look the stock over and he feels more at liberty to do so if he finds himself in a part of the store given over entirely to sporting goods. In the second place, he is more likely to see other things that he needs. For instance, if a boy comes in to buy a baseball, he is likely to try on a "decker" or two and test the heft of the bats. As the sport-lover seldom has the heart to "pass up" an article which pleases him, and which he needs, it is not difficult to sell him other goods besides that which he came in to buy in the first place.

Sporting Goods Window.

The present is the time of the year when sporting goods windows are most effective. They serve to arouse to full activity the awakening enthusiasm of the sport-lover. One bright spring day, a man in the thirties was ambling aimlessly along the main street of his home town, the very picture of lassitude and ennui. "Don't know what's the matter with me," he confided to a friend. "I feel as though I needed something but I don't know just what it is." "Spring tonic?" suggested the friend. "No, I've found out what it is," was the sudden response, as the man stopped in front of a hardware store, and gazed at a display of fishing tackle in the window. "I want to go fishing." He dived into the store and purchased a fisherman's outfit right there and then.

Sporting goods offer to the window dresser wide scope for originality. There is a splendid variety of articles to work upon. One of the most effective windows seen in some time was a display of sporting goods of all kinds, grouped around an imitation baseball, about the size of a football, which was suspended from the ceiling on a rope. A clever mechanical device had been put into use and the baseball swung back and forth, like the pendulum of a clock. Anything in motion is bound to attract the crowds and certainly this window came in for its full share of attention.

Some Novel Expedients.

Dealers in sporting goods have been known to resort to novel methods of attracting trade. In a certain western Ontario town a few years ago the lacrosse fever took hold of the inhabitants so badly that the country was scoured for good players to strengthen the ranks of the "home brews." The outside players thus secured soon became the lions of the town. An enterprising local hardwareman thought that he perceived an opportunity to boost the sales of his sporting goods department and he employed the particular bright and shining star of the team to act as salesman for him. The player was away during part of each afternoon at practices and on match days did not report at the store at all. Nevertheless, the merchant paid him a good salary and reaped full benefit from it, because, during the hours that the great player was in the store, he drew unprecedented crowds. The store soon had an almost complete monopoly of the sporting goods trade of the town and, in addition got a large measure of advertising

Send Out Circulars.

A sensible measure to adopt at the present time is to send out circulars to all men in the district interested in sports. Lists can be secured by approaching the secretaries of the different athletic and sports organizations in town.

A little canavassing work will also also help considerably. When a club is organized, it is well to have the officers seen at once. Otherwise, orders for season's supplies may be placed with some other firm. The officers of an athletic club seldom take the trouble to go around to all stores and get prices from each one. They are very likely to buy at the most convenient place and get it over with.

Advertising Sporting Goods.

That it pays to advertise sporting goods is shown by the publicity given this department by T. McAvity & Sons, St. John, N.B.

In the daily papers of April 8, a full page was given up to an advertisement of anglers' supplies. In the editorial, or leading "talk," the following convincing arguments are made:

"Soon you'll hear the call of the babbling brook and want to be on your favorite stream and get in touch with the speckled beauties.

"A fisherman's luck depends largely upon his equipment and we wish to remind you that we sell everything in tackle to make the fisher happy and successful. We carry in stock the most desirable and up-to-date articles in fishing tackle and offer for the season of 1911 a finer and larger line than ever before."

In the body of the ad. is found a complete list of all that a disciple of Izaak Walton would require—fishing baskets, reels, landing net frames, rods of all sizes and varieties, flies, trout casts, lines, artificial bait and boxes. Nearly all the articles are illustrated, described and priced.

Terse Pointers.

Put in a stock of golfing supplies and advertise it.

In an American hardware store an original sporting goods window was arranged, by showing a board marked off as a diamond, on which miniature figures were placed as though engaged in a game.

More motor cycles have been sold during the past year than in any two previous years.

The National Sporting Goods Dealers' Association recently held its annual meeting at the Hardware Club, New York City, President Stake in the chair. The following officers were elected for the ensuing year: President, T. W. Stake, Schoverling, Daly & Gales, New York; vice-president, Charles Z. Tryon, E. K. Tryon Company, Philadelphia; treasurer, Charles J. Schmelzer, Schmelzer Arms Company, Kansas City; secretary, Alf. Blackburn, H. & D. Folsom Arms Company, New York. Directors chosen for the coming year are as follows: T. W. Stake, Charles Z. Tryon, Charles J. Schmelzer, Charles Antoine, Justus Von Lengerke, P. R. Robinson and J. B. Read.

Personal Touch That Means Succes

Practical Man Points Out the Power of the Dealer in Modern Business Building—Means and Methods for Selling Goods Above Actual Demand — Quality Talks More Than Price.

By J. E. Brown.

Address Delivered Before Edmonton Retail Merchants' Association.

When one has decided to build, he first considers what it is to be used for and what end it will serve, and then considers the material and the cost.

Just so with business. What are you going into business for? What kind of a business do you want, and what end is it to serve? After you have decided this point, then you can lay your plans and if you are wise you will select material in the shape of principles, character and merchandise to build with.

Ability to Learn Required.

If you have the ability to learn the detail and principles of your trade then you have the first requisite. But ability is a worthless asset if you lack patience, initiative, energy, and adaptability. These five qualities combined make proficiency and this is the quality that spells success. I mean these are the five essentials that form the foundation to build on.

The materials that go into the superstructure are absolute honesty with the public, reasonable value given in exchange for the price, the personel of the firm and employes to be above reproach, so that every statement will carry the convictions of truth and fairness, a cool head that will not be turned by the blush of success and a resolute spirit that will stand firm when the clouds of adversity rise and threaten and the disposition that "He who serves best rules most."

Must Resist Temptation.

You must be a man who can resist the thousands of temptations to take undue advantage of the public's confidence and often ignorance.

You must also have the faculty of saying no to the numerous insidious schemes presented for the sole purpose of separating you from a part of your hard earned cash.

And yet, when one is catering to the public, he must be courteous, suave and polite enough to radiate an atmosphere of agreeableness that will intoxicate all who come into contact with us, remembering always that the dear public is a very numerous personage with a lot of needs, notions and eccentricities and that you, as a man in public business, will be called on for favors as well as wares.

Strive for Simple System.

We hear a great deal about methods in business. There are new systems coming up every day, many of them emanating from professional systematizers who invent new ones as fast as the old ones are sold and exploded. Beware of them and select after careful acquaintance with the needs of your business, the simplest system that will give you the detailed information necessary to the conduct and development of the business. I am a crank about system and approve of it, as no business is running safely that cannot be analyzed and checked to secure any information that may be wanted; but get at it the shortest way and discard all the rubbish of red tape.

It is the personal contact that builds for or against the store. Too many merchants think if they only had the money they could do all they wanted. My dear sirs, this is only a means, but not the necessity. You might have money enough to buy the best corner in town, and erect the best building that experience and money could build and then send the shrewdest buyers out and glean the markets of the world for just the goods needed and then employ the best decorators to arrange them to tempt the customer and then have the cleverest advertisers write the most alluring description of the goods and invite the public in and they come by thousands and fill your store and your bosom swells with satisfaction and your hopes reach out for more.

But, gentlemen, that might be your biggest day. Not because your goods, prices or accommodations did not suit the public. Oh, no, it is a much more serious thing—the clerks behind the counter did not know their business or your business and the public failed to get the service they want—the personal contact was not satisfactory.

The information, help, service and satisfaction were lacking, not because the store did not have it, but entirely because the sales persons failed.

Too many merchants try to "stand in" with the public, but never think of "standing in" with the help. One is just as commendable an aspiration as the other. The first often costs more than you can afford and only brings friends while you pay or play, while the other only costs you the price of what good clerks earn and their self respect.

You employ help to do work you have not the time to do, or to do work better than you can do it and in most cases you ought to get help for both reasons.

The man who is so narrow that he hires help to do only the things of little importance will always have a small business.

There is one type of men who ought never go into business, and that is the man who is afraid to let the man under him know what he knows. Nobody knows enough and the man who knows less is more useless.

The proprietor, overseer or department head who is not broad enough to teach help under him all he knows, is hindering his own prosperity, the business and the help under him. He belongs to the old school, who said "a little learning is a dangerous thing."

Teach your employes how goods are made, their uses, who makes them, their cost and the profit necessary to sell the to have a successful business. Once they know this your interests are safe.

Some one is saying now that you do not dare tell some clerks such things, and if you have help of this kind, do not be foolish enough to keep them when there are good people to be found.

There are many more things I would like to say about store help, but it would be better to say it direct to them instead of the employer.

Place Quality Above Price.

Too many merchants put too much stress on the price, thinking that it is the attracting power for a store.

There never was a greater delusion and misconception. Price never created a desire for goods and a sale never was made without the desire for the article.

I admit that after the desire is there price concessions help to remove an obstruction to obtaining it, or make it easier for one having a desire for the goods, to gratify it. But I repeat, price never creates a need or a desire for goods, except perhaps with the millionaire spender who occasionally buys goods for their exorbitant value. This, however, only proves that a cut price is not good business.

Advertising in the Busy Season

Difficulty in Discriminating Where So Many Lines Present Themselves — Some Suggestions for Advertising Seasonable Goods — Well Designed Housecleaning Goods Ad. Reproduced.

There is no need for the hardware dealer to perplex himself a great deal over a theme for his newspaper advertisement during the next few weeks. Surely there is no lack of possibilities, when the housecleaning season is just on, when the ground is getting nicely loosened for gardening, and when the streams are commencing to attract all those who love to fish. Indeed, the great difficulty will be to discriminate—to decide what lines must be especially pushed by means of advertising, and what ones may safely be passed over until a little later.

A glance through a number of newspapers from various parts of the country, shows that hardwaremen, as a rule, are fully alive to the opportunities that are theirs just at the present time. In almost every ad., spring goods are being boosted, and even the most apathetic and unprogressive dealers seem, at last to have discarded their Christmas and New Year's advertisements.

What Some Dealers Advertise.

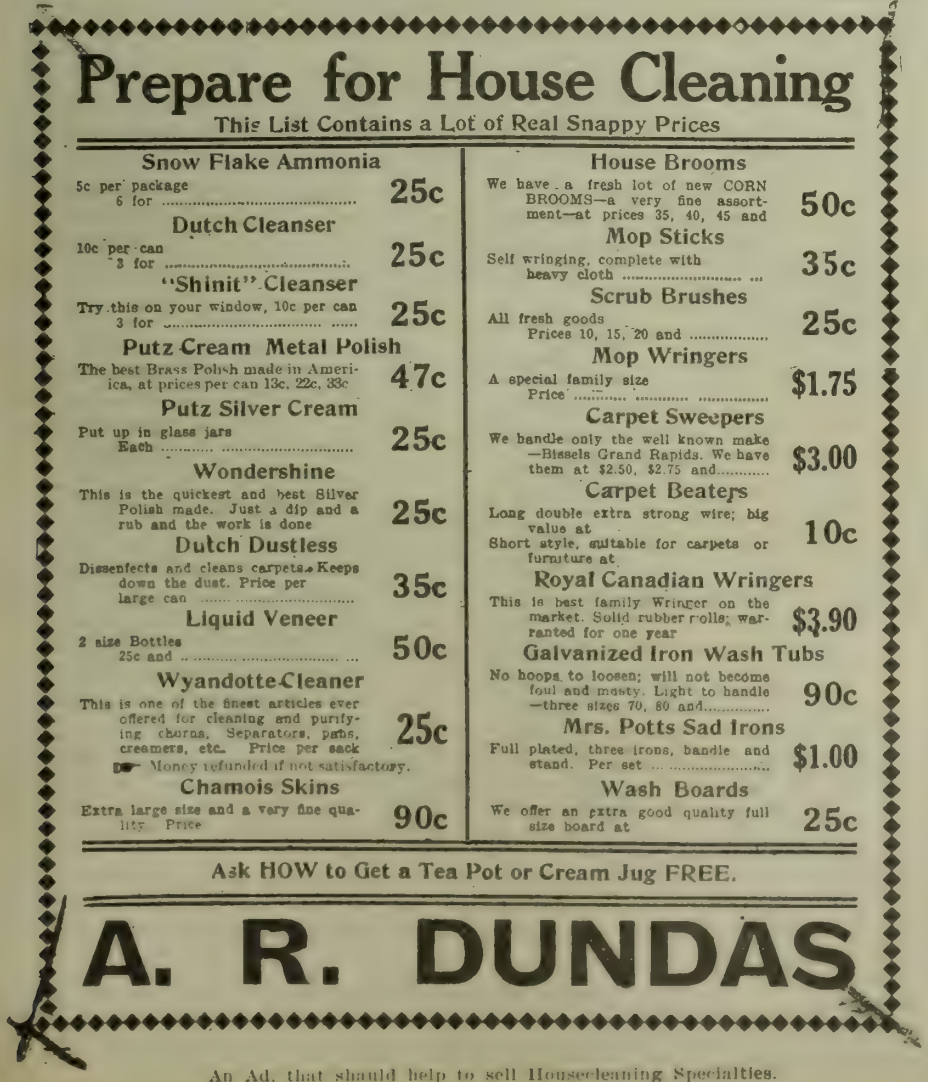
Hardwaremen on the Atlantic and Pacific coasts, as well as in some of the important lake ports, are devoting their space to an appeal to vessel owners. This is the time when ships are being overhauled for the season of navigation, and, what with the brushes, paints, oakum, cleaning preparations, nails and spikes required, the accruing business to hardwaremen is considerable—if they make the right kind of bid for it.

A good many ads. feature poultry netting though Hardware and Metal has not seen any which really exhaust the possibilities of this line. The name "poultry netting," is, to a considerable extent, a misnomer, as this netting can be used for a multitude of different purposes. It cannot be beaten for tacking along the sides of a veranda or porch, to support climbing vines. It is splendid for dividing off any part of the yard for a particular purpose, such as a playground, and, as the netting may be covered with sweet peas or morning glories, the effect is very good. Numerous other uses will present themselves, upon giving the matter a little thought, and poultry netting will be found a fruitful source of advertising ideas.

Carpenters' tools and garden tools are coming in for a good share of attention, probably more than any other line. The chief fault with the ads. we have seen is that they simply give a list of the tools for sale, without saying anything about them—giving the prospective customer the information he would live to have about an article he thinks of buying.

Washing machines, spray pumps, and, of course, paints, are occupying a lot of space in the papers, and some result-bringing ads. are being produced. In these, the trace of the manufacturer's co-operation is evident. One Kingston dealer is appealing to the frugal residents of his city who will shortly bring out their last season's straw hats. He is advertising a preparation which will make them look like new.

House Cleaning Goods.



A well-designed advertisement which is calculated to interest the women folk, who are or soon will be deep in their housecleaning, was inserted by A. R. Dundas, of Cobourg, in his local papers. Although a great number of lines are advertised, the ad. is so well divided into panels, as to be very readable. On a comparatively small space, Mr. Dundas has brought to the readers' attention a great assortment of popular cleansing preparations and implements. The ad. is saved from being a mere catalogue or list of goods, by the brief bits of information which are included in each panel. The idea of giving prices on each article, is a good one, and, by the way out of all the ads. Hardware and Metal has noticed this week, only two—that of A. R. Dundas and Stanley Mills & Co., quoted any prices. This price-quoting in an advertisement, is as effective as price cards in a window display, and it should not be neglected.

Stanley Mills & Co., of Hamilton, are doing some notable advertising of paints and housecleaning goods. On two or three occasions recently, they have taken almost a full page in the Hamilton dailies, and inserted strong well-illustrated price-quoting copy.

From the Buyer's Standpoint.

One difficulty which seems to stand in the way of the average retailer producing good copy, is the fact that he does not allow himself to look at his proposition from the standpoint of his customers. With most hardwaremen the store is all in all to them and they are likely to think that other people are as much interested in it as they are. For this reason, their advertisements are more likely to dwell upon the word "we" than upon the more effective "you". They write about themselves instead of talking to their customers about their needs.

Here's a good pointer to make use of the next time you write an advertisement: make it talk just as you would like to be talked to, if you were the buyer instead of the seller. If you are advertising lawn mowers, your copy must be such as would interest and convince you if you yourself were thinking of buying a lawn mower.

An Ad. that should help to sell Housecleaning Specialties.

PAINT BUYING IS MORE ACTIVE.

Up to a week or ten days ago, paint manufacturers had reason to complain about the paucity and smallness of the orders they had received from the trade. The principal cause of this unseasonable slackness was the high price of linseed oil which, in the opinion of many dealers, was destined to seriously affect painting operations this season. There was also a feeling, among a section of the trade, that linseed oil was likely to decline, and they withheld their orders on that account.

This week conditions show a decided change. Dealers who were slow in placing their orders, have rushed into the market, and are now demanding immediate shipment. They have learned that their fears of an inactive painting season, were groundless, and the more cautious ones have been caught at the very opening of the rush season with depleted stocks.

It is well understood that the few days preceding Good Friday, are among the busiest in the year, for household paints. This is the first holiday of the season, and many are the householders who spend at least a portion of the holiday, in painting their porch floors, fences or interior walls. Few of them ever think of anticipating their requirements, with the result that there has been a rush for materials during the past week.

The fact that a good proportion of the orders received of late have been of the sorting-up variety seems to show that, while many dealers have been caught short of stock, there is still a disposition to hold off in placing large specifications, in the hope that prices will yet decline. It would seem, however, that such action is not the part of wisdom, as linseed oil shows added strength this week, and there is very little chance of even a slight decline in prices.

CONDITIONS CHANGED IN BICYCLE TRADE

It is pointed out that the present offers a splendid opportunity in the mother country, for hardwaremen to take up the bicycle trade. The reason advanced is that the automobile industry has attained to such proportions of late years that the establishments formerly given over to the cycle trade are now devoted almost entirely to the motor business. "In fact," writes Vulcan, in the Ironmonger, "the motor salesman is quietly dropping this department and, in consequence, a wide field is open for others. There is as large a demand for the ordinary cycle as ever, but the manufacturers are finding their distributing channels gradually dwindling." The inference drawn is that hardwaremen should annex this remunerative trade, before some other class take it up.

These conditions, as existing in the mother country, are reflected with more or less accuracy in Canada. The bicycle is still largely in use here, but the trade has been upset by the advent of the automobile. Shops formerly maintained for the sale and repairing of bicycles have been changed into motor salesrooms and garages. Bicycle traders have turned to the bigger game, and the bicycle has become a side line. Undoubtedly, there is a better opportunity now than ever before, for hardwaremen to handle a stock of bicycles.

FIRE SAFEGUARDS NEEDED.

During the past fortnight, no fewer than five fires have been reported in which hardware stores have suffered to a serious extent. In no case has the cause of the fire been satisfactorily explained; twice, the blaze started from explosions but how they occurred is more or less shrouded in mystery.

Store fires are occurring with such alarming regularity that it is only too apparent that there is a need for more practical safeguards in the West. In this connection an exchange says: "Most of the buildings in western towns are of frame construction, and when fire gets a fair start the ordinary small fighting equipment cannot save the building affected, or those closely adjacent. It is possible that brick or cement buildings, wherever they could be erected at reasonable cost, would more than pay for the additional expense in increased security from fire."

This reason does not apply in at least two of the recent cases where hardware stores have suffered. The buildings were new and thoroughly up-to-date, being equipped with fire walls and all possible precautionary devices. It is evident, however, that more care should be taken in the construction of new buildings. Hardwaremen who contemplate starting up in a new town would do well to seriously consider the problem of adequate protection from fire before building.

SHUTTING OUT THE PEDDLER.

Retail dealers in hardware, groceries and dry goods will not be bothered in Welland, Ontario, by the opposition of the hawker. The council of that place has shown its appreciation of the position of the home dealer by passing a by-law fixing a heavy license fee on transient traders. The fee will vary from $300 to $600, according to the nature of the stock carried. It is, therefore, practically prohibitive, as no peddler could afford to pay such a large sum for the privilege of hawking his wares.

The action of the Welland council is commendable from every standpoint. It protects the home dealer from the unfair competition of the transient trader, who drifts into town, sells a lot of questionable goods and then flits, taking his profits with him. It likewise protects the public. The peddler in many cases sells goods of inferior quality and foists his stuff on people who are not in a position to judge the quality of what they are buying.

THE HOOKWORMS ORGANIZE.

The order of the Happy Hardware Hookworm was duly organized at the meeting of the American National Hardware Association. W. B. Creed, of New Albany, Ind., was elected Grand Chief Crawler of the World and

R. H. Myers, of St. Louis, was chosen as Grand National Bookworm (secretary-treasurer.) A constitution and by-laws were outlined and many new members were admitted. Despite the fact that energy is the one quality above all others that members are not to exhibit, quite a little of it was shown in the way that the organization was perfected. An official button has been chosen, ornamented with a picture of a worm and the letters H.H. It's a long worm that has no turn and this one has several.

At all future American conventions, the social side of the proceedings will be in the hands of the Happy Hardware Hookworms. They will arrange the banquets, trips, etc., and see that the visitors have a good time. Consequently the members of the H. H. H., despite their name and the principles which they have espoused, promise to do a good work.

ENCOURAGE CLERKS TO STUDY.

It is surprising what good results can be secured from a store staff, where the proprietor takes a personal interest in his clerks, and encourages them to learn the goods, and to study selling methods.

Business, in these days, is becoming much more scientific than ever before. In fact there are those who speak of "The Science of Business," and, if business is a science or a near science, it may be at least partially learned by study.

This fact should be borne in mind by every hardware dealer who has clerks under him. He should consider himself not only an employer but also an organizer. His duty is not completed with the giving of the weekly envelope, but includes the teaching of his staff, or, at least, encouraging them to learn.

There are several good books now available on hardware store management, hardware window display, and hardware advertising, and there is Hardware and Metal, which, from week to week, publishes articles on every phase of hardware store problems.

We have recently added a special feature, with the idea of interesting clerks—a page for hardware clerks. This page will be largely devoted to hints on selling, and business conduct which cannot help improving the efficiency of clerks who become habitual readers of the page. Dealers who have the interests of their clerks at heart, and wish to improve their business in general, should encourage their clerks to study Hardware and Metal, and good books on hardware methods.

POINTED EDITORIALS.

Hardwaremen are getting a good big share of the trade in housecleaning necessities, this year.

* * *

The sporting goods department at this season of the year is one of the most important branches of the hardware store.

* * *

It is gratifying to note that so many hardware dealers are carrying on an aggressive spring advertising campaign in their local papers.

* * *

The report sent out from Savannah this week shows the turpentine sales column filled out with the letters N. D.—Nothing Doing. Not a sale was made last week.

* * *

The sale of Easter lilies and flowers of all kinds is very heavy around Easter week. Have you placed your stock of brass fern bowls and flower pots in good view?

Begin now, if you intend to handle sporting goods. The season is just opening, trade is sure to be heavy and the first business is just as important as that of mid-season.

* * *

Those dealers who held off their paint orders in the expectation that prices would go lower, are now urging the manufacturers to hurry along their belated specifications.

* * *

The carrying of sand bags and "knuckle dusters" is to be forbidden by law in Ontario. The measure will probably be opposed by the Brotherhood of Porch-Climbers, as an infringement of their ancient privilege.

* * *

The ardent fisherman, and his number is legion, can always be counted upon to "bite" when a tempting bargain in tackle or fishing accoutrements is offered. The best "bait" to use is a well dressed window of sporting goods and anglers' supplies.

* * *

To offset mail order competition, Pow & Wilcox, of Tillsonburg, are issuing a catalogue for distribution throughout the surrounding district. By thus "carrying the war into Africa," they hope to eliminate any tendency to buy away from home.

* * *

During the past two weeks, no less than five handsome hardware stores in the West have been practically wiped out through the agency of fire. While in some of the cases it was apparent that precautions against fire had been taken, there is no evading the general truth that sufficient safeguards are not provided in some parts.

* * *

The tendency nowadays to put up goods in the most convenient form is shown by the great development of the tinplate industry. It is estimated that there are in Wales alone 400 tinplate mills which produced last year 700,000 tons of tinplates, valued at £9,500,000. The consumption of steel in these mills amounted to 850,000 tons.

* * *

Some merchants have a system of bookkeeping and store management as circuitous and unproductive as the methods in Dickens' Circumlocution Office. Others have no system at all. There is, however, in this matter, as in practically everything else, a happy medium, which, once attained, spells a full measure of success in business.

* * *

A "magic carpet" has been invented in France, which possesses more practical qualities than the carpet of Arabian Nights fame, which could transport anyone who traveled on it from one continent to another in the winking of an eyelash. This carpet is fitted with an underwork of electric wires through which a current is sent, thereby heating the room. It is estimated that this new method will heat a room for something like a cent an hour. Still, we are inclined to believe that the day of the stove, the furnace and the hot water and steam system is not yet at an end. The heating engineer will remain a valued member of society, despite magic carpets or any other new-fangled methods of heating.

Our Page for Hardware Clerks

A Short Talk to Clerks

How Courtesy Can Help a Clerk to Make Friends and Close Sales — Many Clerks are Too Abrupt—Courtesy Counts on Telephone, Too.

By an Ex-Clerk.

Courtesy, they say, costs nothing, but it is a great asset; and when I say it is a great asset that is awfully true.

You might be thinking in your minds, listening to me, "Well, perhaps some of this stuff he is telling us is true—perhaps all of it is—but I don't think he knows it all." And right here I will grant you that I will never know it all, and I don't mind saying that neither will you!

But just let's stop and think a minute! Let's get down to cold facts. How smart are you? How clever? I will tell you how smart you are. Do you get $10 a week? Then you are just $10 a week smart. You are not worth $11 or you would be getting it. And don't ever forget this point.

How smart am I? Well, I am just exactly as smart as the company pay me, and not a cent smarter. We have to stare in the face sometimes our own weaknesses.

Courtesy means an awful lot in the retail store. Mrs. Blank comes in, she may have a headache, she may feel tired, she may have been out to an afternoon tea, but that is none of our business. She says: "I want a pound of coffee." You, Mr. Clerk, will reach to the shelf, get the coffee, hand it to her; "35c. Thanks!" That is not courtesy! Courtesy means taking your customer in charge from the moment she enters the store, saying to her, "Good afternoon, Mrs. Blank," with a smile, with a bow, the right way to do it, making some pleasant remark.

Don't forget another point; you don't know what is in her mind, and she doesn't know what is in yours, nor does she care. If you are discourteous, abrupt, or short in your talk or remarks, she will remember it. If you are courteous she may not—because she expects it; she looks for it; she is spending her money in your store, and there are lots of other stores to which she can go.

Make a Study of Human Nature.

As a rule every clerk knows to a certain extent the disposition of the customer to whom he is talking over the phone, and should act accordingly. Surely you can study human nature to some extent; study dispositions, and always be courteous. Have an inventive mind, be initiative! Because you are doing—what? You are laying the foundation for your whole future. Don't you think your employer does not notice these things? He does!

And then look at the effect one discourteous clerk may have on other clerks. It is contagious. All bad things are contagious, because they are easy to take on. It is like a drop of sour milk in a can of sweet milk; it ruins the whole can.

And don't overlook another point: The same customer who walked out dissatisfied is contagious to her friends and relatives, and it all hurts, and will always cost the house loss of customers, which means loss of trade.

A clerk to be always courteous wants to feel courteous, and to feel that way he wants the proper amount of rest; he wants to take proper care of his health. He should have at least eight hours' sleep. No clerk can feel the part, and look the part, and stay out late night after night. He is robbing himself of the chance of advancement, and robbing his system of the rest it requires at the end of a day's work. Give your system lots of rest, and you will have a clear eye and a pleasing appearance. Further, you will feel more like taking care of your personal appearance.

Ruined His Chances.

I know of a case where a man from a wholesale house called on a retail store with the intention of looking for a bright assistant in his business. He walked in the store. One of the clerks—and not a junior at that—stepped up to him, and looking at him said: "Well?" The man's reception kind of startled him, and for the want of sometning else to say, he inquired if the proprietor was in, and the reply was "Naw!"

Well, this fellow didn't have a look-in for that job. Wholesale houses don't want that kind of people. But I can tell you one thing you can remember. I happen to know of the young man who did get the job, and the last I heard he had risen to the position of manager of one of the departments.

Why, you hear every day public complaints of discourteous conductors on street cars, conductors on railway trains which creates a feeling of animosity against the firm or corporation. And the same thing goes on in many retail stores even if it be on a smaller scale.

Clerks are Too Abrupt.

I wish you men could realize the difficulty merchants have, as they outline it to me, in securing the proper kind of employes to take care of their business. As a merchant stated not long ago, when I was outlining to him the work we were endeavoring to do with retail clerks. He said, "Never was there a better cause. It is not like it used to be in the old days. Many of the clerks we get nowadays are too abrupt—in fact, are prone to be 'fresh.' They think the slangy, up-to-date method (as they call it) that makes them laugh in the poolrooms, sounds the same to others as it does to them. It doesn't! It grates on one's ears; it drives away trade."

Your business is to be courteous at all times, and not only keep trade, but bring it to the store.

And as a last reminder: It is not always what you say, boys. It is how you say it.

TALK BUSINESS.

Don't take up all the valuable time during which you are waiting on customers in talking about the weather. Make use of your time. Introduce some REAL business into your talk. It will be more to your advantage to say "We have just received another case of Blank's porch floor paint," than to talk on meteorological reports.

Your customer has already heard all about the weather in other stores and it will be a relief to her nerves to have someone introduce something else.

DID YOU EARN IT

When the proprietor hands you your pay envelope on Saturday night, stop and consider. Have you earned the amount it contains? Has the amount of money which you have received, been a good investment for your employer? Have the returns been satisfactory? Think well over this matter and the chances are you will go back next week with plans to increase your usefulness to your employer. It is the man who pays a big dividend that gets the big salary.

The Handling of Hardware Side Lines

A Splendid Opportunity is Presented to Handle Rubber Goods —Some of the Lines Which Might be Taken Up With Advantage—The Public Shows a Desire for Novelties.

The wisdom of handling "side lines" has been so often and so effectively demonstrated, that it is not necessary to say anything further on that point. It might be well, however, to say something about one particular side line which has so far been almost entirely left alone. And yet it presents splendid opportunities for trade and profit.

Mechanical and household rubber goods are handled in very few hardware stores. For that matter, they are not exploited to any extent in any branch of the retail business. Druggists sell such goods as hot-water bottles, air pillows, waterproof sheeting, etc., but there are a great variety of articles not pertaining in any way to surgery or the practice of medicine, that might very logically and, what is more, very profitably be handled by the hardwareman.

There are, for instance, rubber mats for halls and doorsteps, bath mats, folding baths, door stops, anti-slam devices, and driving aprons. In addition, there are a great number of articles used by athletes, such as rubber covers for tennis racquets, anti-vibration covers for the handles of baseball and cricket bats, rubber finger protectors, etc. A strong point in favor of handling this class of goods is that they are almost invariably small and can be stocked without difficulty. On the other hand, there is certain to be a paying demand and a liberal profit could fairly be asked.

At the present time, it is difficult to find such goods on sale in a small city or town; in many places, impossible. No trade has made a determined effort to mark this line as its own, and what retailing has been done, has been more or less of the passive kind. There is then a splendid opportunity for the hardwareman, particularly if he is located in a small place, to take up such goods determinedly and actively.

Are Not Perishable.

There is an impression that rubber goods are perishable, but this idea should be discarded. The Ironmonger cites a case where a well-known British rubber-manufacturing firm received an unsolicited testimonial recently from Sweden. The inditer of the testimonial had purchased a door-mat for office use from this firm forty years ago. Although the mat had been trodden upon by many hundreds of thousands of feet during that interval, it had only just worn out.

As to Retail Methods.

To make a profit on rubber goods, it would be necessary, in the first place, to let people know that they were in stock. The most effectual method of doing this would be to make up a window display exclusively of the new line. People will stop and look at a window which in any manner departs from the beaten path. This is found to be particularly the case where the originality lies in the stock itself. Interest will centre around a display of new goods, more quickly perhaps than in anything else. No difficulty would be experienced in attracting attention to the display of a variety of rubber goods.

Carry Slate Roofing.

A side line, which is a little out of the usual, has more advantages than the mere profit made on the sales. It serves to bring the firm in contact with a new class of people. In that way, a splendid opportunity is afforded to get acquainted with people who can in time be made regular customers of the store.

A side line that possesses the quality of being rather unique is carried by Turnbull & Cutcliffe, Brantford. Last fall they went into the slate roofing business, and, although it was their initial attempt in that line, they did a splendid business.

This trade had the double advantage of bringing them more closely in touch with the builders and contractors and was a great help in increasing sales of builders' hardware, tools, etc.

Some Unusual Side Lines.

S. Nichol, an enterprising hardwareman of Fergus, Ontario, carries a good assorted stock of jewelry and has worked up a large trade. He finds that the jewelry stock has increased his sales in the cutlery department, in addition to the straight profits made. At the same time, he is under no additional expense, as he shows the two lines together. Many other cases might be cited where side lines are profitably handled.

Public taste is very fickle and almost insatiable on the score of "something new." An article that possesses the quality of being distinctly original is bound to enjoy a measure of success that will be very broad, even if it will not be permanent. To handle a new article when it is enjoying popular favor is to reap a considerable profit. The wide-awake dealer must, therefore, keep in touch with the vagaries of public demand. In the hardware trade, as in all other branches of retail business, there are things continually coming to the fore which should be taken up. At the same time, there are articles which could be made quite as popular and salable, if the retailers only realized their real worth and possibilities. It is quite true that most of the articles which have proven the most popular, have been made so by clever retail handling. The dealer always has it in his power to create a demand for any line of goods.

To Offset Mail Order Competition

Tillsonburg Hardware Firm are "Carrying the War Into Africa" by Issuing a Catalogue to Residents of That Section—The results Have Been Splendid up to Date.

The retail dealer to-day finds in the catalogue house, the most formidable opposition that he has to encounter. Time was when the merchant had to contend against hard times, the price cutting of his competitors and the difficulties which arose from inadequate transportation facilities. But with the expansion that Canada has shown of late, hard times no longer threaten the prosperity of the country every few years; the losses of the past have shown the folly of price slashing; and with the rapid advance of the country, the transportation difficulties of earlier days have been appreciably lessened. To offset these newly acquired advantages, however, the retail dealer is faced with the catalogue house problem. It has become the one serious difficulty against which he has to strive.

In reality, the opposition of the mail order house is not difficult to meet. The home dealer can keep the trade of his district to himself if he displays only a fraction of the energy that the catalogue house does in going after the business of that section.

The secret of it all is to emulate, to some degree, the methods of the opposition. The merchant who keeps a neat and attractive store and a well assorted stock will not feel to any great extent the pinch of opposition from the big city stores. If he advertises regularly and effectively and in other ways adopts measures to draw business, the number of catalogue buyers in his section will be reduced to a minimum. But where the home dealers are negligent to the extent of keeping unattractive stores and indifferent to the necessity of reaching the people, in that section there will be plenty of catalogue buyers.

Aggressive Methods Adopted.

Pow & Wilcox, hardware dealers of Tillsonburg, Ont., do not believe in merely meeting the enemy with ordinary means. They have, literally, "carried the war into Africa," and are now adopting measures to secure business, similar to the methods of the catalogue houses. A fortnight ago, Pow & Wilcox issued a 48-page catalogue, copies of which were sent to all the residents of that locality. It was announced in the local paper that: "The catalogue is designed to counteract the effect of the catalogues sent out by the big departmental stores and to turn the direction of local buyers to their own home store, where just as good bargains can be secured and where satisfaction is guaranteed or money refunded."

To sum it up, they acted on the advice of that homely old philosopher, David Harum, "Do unto others as they would do unto you, and do it fust." Pow & Wilcox have not waited for the mail order houses to inundate the district around Tillsonburg with literature. They have sent their catalogues

into every home and they have done it "fust."

A Complete Catalogue.

A copy of the catalogue has been received at the office of Hardware and Metal. It is printed in booklet size on pink paper and, as mentioned before, contains forty-eight pages. Each page is devoted to the advertising of some hardware line and every article is illustrated. In fact, the outstanding feature is the number of illustrations contained.

Scattered through the catalogue are little scraps of advice, which tend to show the wisdom of shopping at home. One criticism might be voiced, however. In the first page or two had been devoted to a statement of the reasons why dealing at home pays, much good would have resulted.

Splendid Results Obtained.

This is the first catalogue that Pow & Wilcox have issued but splendid returns have been noted. W. G. Pow, in the course of a letter to Hardware and Metal says: "These catalogues have only been out about a week and are now bringing in good results; we have had enquiries for these catalogues and have been asked for quotations as far away as Smith's Falls and Tomstown. We firmly believe this will be the means of keeping our farmer friends buying at home and, if the results are what we expect, we will get out a larger catalogue each year and cover more ground."

It is not to be expected that every hardware dealer can adopt this advanced method of combating the catalogue house. The expense would be too great. To a certain degree, however, every dealer has it in his power to fight the mail order opposition with the same weapons that the enemy uses—advertising, energy and prompt service.

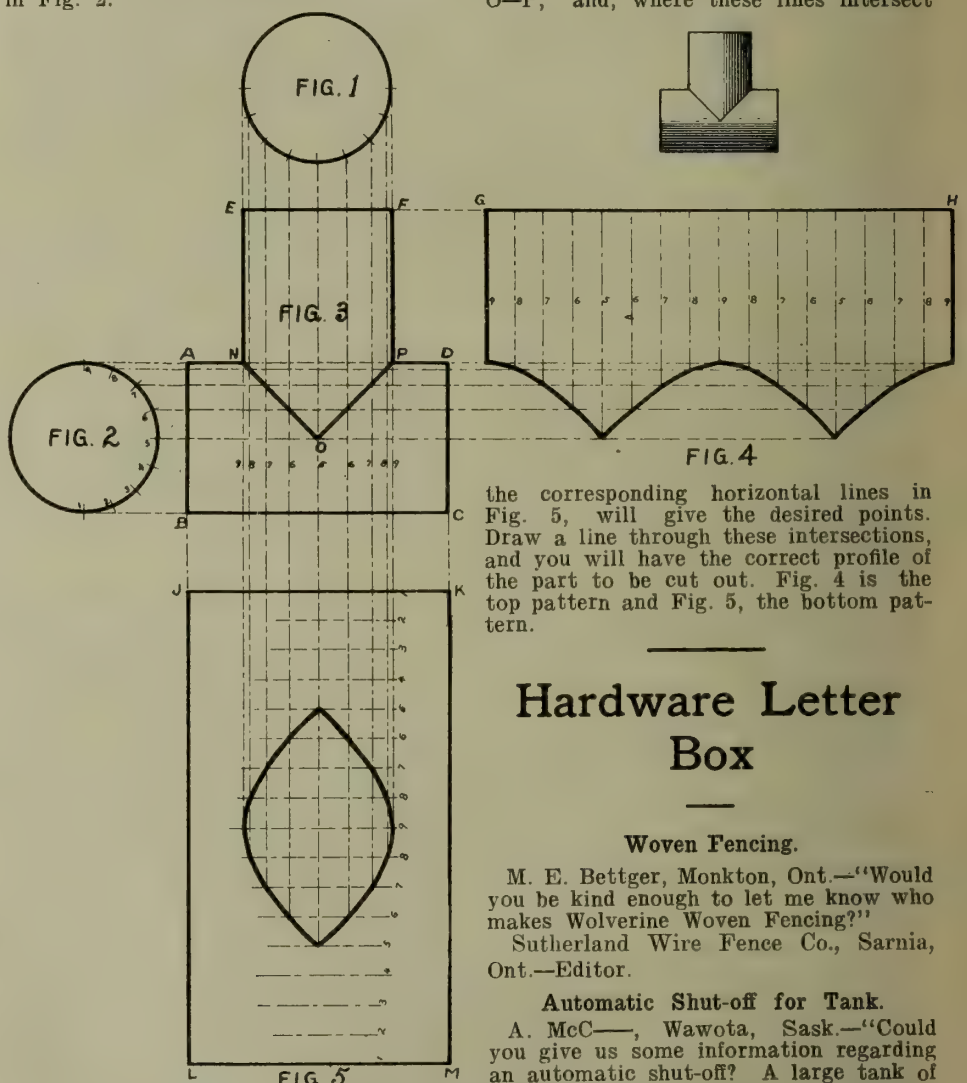
FORTHCOMING ARTICLES ON PATTERNS.

The next article in Mr. Finnigan's practical series on "Patterns for the Tinshop," will show how to make patterns for a Y pipe, which will be followed by an article on making the patterns of a base for a chimney top, the base being square and the pipe round.

These articles are especially written with a view to assisting tinsmith's in solving every-day problems in their trade. To make them even more practical and helpful, Hardware and Metal invites subscribers to send in to the editor any problem on tinshop patterns, which they would like to have solved. These will be dealt with by Mr. Finnigan, in the order in which they reach this office.

TO BUILD WESTERN FACTORY.

The Martin-Senour Co. are negotiating for the erection of a paint factory at St. Boniface, Manitoba. They have purchased a site on Montcalm St. and the plans for the building have been prepared. As soon as the St. Boniface council grant permission for a spur line across Montcalm St. to the bank of the Seine River, the work of construction will be started.



The plans call for a building 60 by 70 ft. in size and four storeys high. It is estimated that it will cost $50,000.

Making Patterns for the Tin Shop

Problem: How to Make Pattern for a T Joint—Pipes of the Same Diameter.

By Wm. J. Finnigan.

The first step to be taken in solving this problem, is to describe a circle of the required diameter, as shown in Fig. 2. Extend the outside lines of this circle horizontally over to A—D, and B—C. Then draw an elevation of the joint, as in Fig. 3, and describe the circle as shown in Fig. 1, within the lines extended from N—E and P—F. Care should be taken that the diameter of the circle in Fig. 1 is the same as in Fig. 2.

Pattern for T Joint—Pipes Being the Same Diameter.

Divide the inside half of the circle in Fig. 2, into eight equal parts. It is not absolutely necessary to have eight parts, but this is a convenient number, and is the same as shown in Fig. 2.

Extend the lines A, B and D—C, down to L and M in Fig. 5. Set off the same equal spaces as you have in Fig. 2, No. 9 coming directly in the centre, and the numbers running both ways down to No. 1. Draw these lines horizontally, as shown.

Extend the line E—F over to G—H in Fig. 4, and set off the same equal spaces that you have in Fig. 5. Notice that the two outside lines are marked No. 9, and the numbers run down to No. 5, and up again to No. 9, which is the centre line.

Extend the lines from No 5 to No. 9 shown in Fig. 2, horizontally over to Fig. 4, and, where these lines intersect with the perpendicular lines, will give the desired points. Draw a line through these points, and you will have a profile of the top pattern.

Extend down through Fig. 5, all the lines which intersect lines N—O and O—P, and, where these lines intersect the corresponding horizontal lines in Fig. 5, will give the desired points. Draw a line through these intersections, and you will have the correct profile of the part to be cut out. Fig. 4 is the top pattern and Fig. 5, the bottom pattern.

Hardware Letter Box

Woven Fencing.

M. E. Bettger, Monkton, Ont.—"Would you be kind enough to let me know who makes Wolverine Woven Fencing?"

Sutherland Wire Fence Co., Sarnia, Ont.—Editor.

Automatic Shut-off for Tank.

A. McC——, Wawota, Sask.—"Could you give us some information regarding an automatic shut-off? A large tank of water supplies a trough in a pasture. How can it be arranged so that, when the trough is full, the tap can be automatically closed?

This is generally accomplished by means of a float valve, which, however, would require to be level with the trough. Further information on this subject may be obtained from J. H. Ashdown Hardware Co., and Darling Bros., Winnipeg, or Metal Shingle and Siding Co., Preston, Ont.—Editor.

Small Lever Power Punch.

Watson Smith, Shubenacadie, N.S. — "Please let me know through your letter box, where I can buy a new or second-hand small lever power punch, for use in a tinshop."

Brown-Boggs Co., Hamilton; H. W. Petrie, Toronto.

Beating Mail Order Competition on Stoves

Wm. Holland, of Culloden, Has no Trouble Clinching Sales on Arguments of Quality and Durability — Encourages Making Enquiries at Different Places—Points to Stoves he Sold Which Have Made Good.

It is not often that a hardware dealer actually welcomes the mail order catalogues in his midst, and it is still more seldom that a merchant practically encourages his customers to look around and see where they can get the best value for their money. Most dealers prefer to make a sale right off the bat—before anyone else has had a chance at their prospects.

W. Holland, of Culloden, Ont., is an exception to the rule. He says that he always likes to see a customer looking around and inquiring for prices. It means that he must, at least, be very much interested in the article in question, and is pretty sure to buy, some place. The one who has the best proposition to offer him and puts it up in the best way will get the order, be he hardware dealer, or mail order man.

Selling a Parlor Heater.

Suppose a customer drops into Mr. Holland's store and inquires for the price of a coal parlor heater with oven. The stove which Mr. Holland features, in this line, retails at $44, and he quotes his customer this price.

The customer raises his eyebrows in surprise, and says that the same stove is shown in Eaton's catalogue at $27.50.

"What does Eaton's stove weigh?" Mr. Holland will ask.

"The catalogue says it weighs 350 lbs." is the reply.

"Then let me show you that the coal stove I am offering you is as cheap and of much better quality, weight for weight, than the one which is advertised in the catalogue at $27.50."

A Weight for Weight Comparison.

"Here are the figures. The catalogue stove, weighing 350 lbs., at $27.50, costs 7.9, or practically 8 cents per pound. My stove which I offer to you at $44, weighs 555 lbs., or almost exactly the same price per pound. I need scarcely tell you the advantages of the heavier stove. To begin with, it holds the heat much longer, and will therefore warm a room more uniformly than a light stove, without keeping it going at full capacity all the time."

"But the principal advantage is in durability. My stove, I believe, will outlast two of these cheap stoves by many years. Over twenty years ago, I installed one of these identical stoves in the parsonage, and for all I can see, it is still as good as new, and has only cost twenty-five cents for repairs. Can you imagine that cheap catalogue stove making as good a record?

"You must consider that there have been many different occupants in the parsonage during those twenty years, and, while all have used the stove, none of them had any particular interest in taking special care of it, as the parsonage was built and furnished by the congregation.

"Now, if you will purchase this stove from me, I will set it up in your house, start it going and guarantee it to work satisfactorily."

The Argument is Good.

Mr. Holland states that when customers mention mail order prices, he does not experience much difficulty in closing a deal on these lines—quality and durability. His line of argument looks good, and no doubt many readers of Hardware and Metal will be able to adopt it to their own advantage when they meet mail order competition on stoves.

STOVE MANUFACTURERS BUSY.

Canadian stove manufacturers are unusually busy at the present time, thus giving evidence of the activity that marks the retail trade. It is stated that the demand from the west has grown to such proportions that the factories are already feeling the effects of a pressure of orders. One stove manufacturing firm have been so pressed with orders for certain of their more popular lines that they have been compelled to temporarily cease turning out some six or eight less known makes. The plant is to concentrate on the lines mostly in demand until the orders in hand are caught up with. Work on the other makes will then be continued.

The demand at present centres largely on ranges and gas stoves. The gas stove trade is rapidly reaching its busiest point. Spring always brings a heavy demand, as the gas stove is now being used in practically all homes where gas is available, during the summer months.

Occupy New Offices.

On April 1, Burrows, Stewart & Milne took possession of their new building on James Street east, Winnipeg. The building is of mill construction, 50 by 100 ft. in size. The plans provide for six storeys, but for the present, three have been erected. In the construction of the building, several new ideas were carried out, which render it practically fire and water proof. The floors are raised three inches in the centre and there is a drain around the walls to allow water to run off in case of fire. Layers of builders' fireproof paper are laid under the floors and the walls are five inches thicker than is necessary under the building laws of the city. Lionel Haney is in charge.

Liquid Fuel Stove.

Gustave Paul Wolfe of Bloomville, O., has obtained a patent on a liquid fuel stove or heater, which is described as follows: "A stove or heater, comprising a cylindrical body having two series of openings arranged in the lower portian, one above the other, a cover for the upper end of the body, said cover having inlets therein, a cylindrical liner arranged in the body in spaced relation thereto and provided at its lower end with a flange engaging the inner face of the body between the two series of openings, a fuel pipe in the lower portion of the body, a burner seated on and connected with the fuel pipe, a chimney on the burner, the body and chimney being provided with oppositely arranged doors, and a water cup held in the body adjacent to the chimney.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Sporting Goods Catalogue.

Caverhill, Learmont & Co., Montreal, have issued their new sporting goods catalogue. The fire arms and ammunition department is a feature of the number being particularly comprehensive. Special paper has been used to advantage to bring out the details of the cuts.

Household Specialties.

Goodwin & Co., Birmingham, Eng., have sent out an illustrated circular descriptive of their latest lines in household goods. The goods which are described and illustrated in this circular, are all useful in the household, and are varied in character. Staples and novelties, in such articles as pudding steamers, tea kettles, and sauce pans, are among the goods described. The Canadian agent for Goodwin & Co., is James A. Henderson, Board of Trade Building, Montreal.

Revised American Statesmen.

F. W. Haskell, president of the Carborundum Company, has issued the third volume of his Revised American Statesmen Series. This time, he deals with Captain John Smith, who, it appears, has gained a reputation for untruthfulness, by means of the wonderful accounts he has left of his exploits. Mr. Haskell puts in a plea for John Smith's memory, stating that, impossible as his achievements may seem, they may, nevertheless, be true, and instancing the way Carborundum has fulfilled the claims of its makers, as a case in point. The booklet is very amusing, and is cleverly written. It will be sent free to any dealer who writes the Carborundum Co. for a copy.

Sporting Goods.

A. E. Bregent, 192 St. Catherine St., Montreal, have issued their spring and summer catalogue of sporting goods. All the accessories of the popular summer games and sports are described.

Discount Sheet on Wire Hardware.

The Wire Goods Co., of Worcester, Mass., are sending out their Discount Sheet No. 31, applying to their Catalogue No. 6 and Supplement of April, 1910.

News and Methods of Canadian Hardwaremen

St. John Firm Departmentalize Their Store — Montreal Dealers Displaying Seasonable Goods— Hardwaremen Holding Fire Sales.

HARDWARE STORE DEPARTMENTALIZED.

St. John, N.B.—Emerson & Fisher, Germain St., have remodelled and departmentalized their hardware store, and now have one of the most up-to-date establishments in Canada. A feature of the renovation, which is particularly striking to the visitor to the store, is the elaborate wall fixtures, especially on the left side on entering. These fixtures, as well as the other alterations in the store, were designed by Fred Melick, who has supervised the remodelling of large stores in other cities, but is now engaged permanently by this energetic firm. The wall fixtures spoken of are very unique in their design. The wall was first sheathed and then covered with a heavy English plush. Special brackets were made for the wall, for the purpose of classifying the goods of different manufacture. Suitable wall cases complete these fixtures, which contain samples of carpenters' tools, bathroom wall fixtures, Yale and Towne door fixtures, brushes, etc. This firm has also a new department of sporting goods, neatly and attractively displayed. On the other side of this spacious store, the goods, consisting of aluminum-ware, heavy nickel and copper goods, silverware, mantel clocks, Japanese and English ware, are similarly departmentalized. These and various other improvements in the retail store of this firm make it one of the most attractive and convenient establishments of its kind.

OLD BUSINESS IS SOLD.

Markdale, Ont.—One of the oldest hardware stores in the country changed hands last week when Haskett Bros sold out to W. S. Perkins.

The business dates back to 1867—forty-four years ago. At that early date, W. N. Haskett commenced a tinsmithing business in Markdale in a little shop opposite where Rutledge's livery now stands. A year later he was joined by his brother John M. Haskett, who had been engaged in the hardware business with Butcharts in Owen Sound for five years previous to that. George Haskett left Owen Sound for Markdale on March 27, 1568. The roads to Chatworth were fairly well broken and he secured a ride that far, but from Chatworth to Markdale, no track was visible and the snow was four feet deep. Mr. Haskett was obliged to tramp the whole distance. Such was one of the joys of pioneer life.

In 1874 they moved to the present site and put in a small stock of hardware. By honesty and aggressive business methods, they gradually built up the hardware end of the business and today there is probably not a better known hardware business in the country than Haskett Bros.

Eight years ago W. N. Haskett severed his connection with the firm and has since lived retired. Two years ago Geo. M. was compelled to retire on account of ill health and the reins were handed over to his son Chester, who has since carried on the business. The latter has not yet decided on his future plans, but may go west.

W. S. Perkins, the new proprietor, has lived in Markdale for eleven years, coming here from St. Catharines. He was first in the employ of J. E. Trelford, later with Mr. Artley, and for the past six months with W. J. Bowes. He is a tinsmith by trade, but has also had considerable experience in the hardware line. He is leader of the Citizens' band of Markdale.

MADE JOINT STOCK COMPANY.

Halifax.—Announcement is made of the incorporation of Cragg Bros. Co., with E. J. Cragg as secretary-treasurer and F. J. Cragg as president. The business was started in 1889 and is well known as "The Cutlery House of Halifax." In an advertisement announcing the change, the firm say: "After 22 years of successful merchandising we have made a change, converting a co-partnership into a joint stock company, by the infusion of younger and more enthusiastic life, whilst maintaining the same high standards, hope to renew the vigor of the past, and look for a continuance of the patronage so liberally extended to us." 1

SEASONABLE WINDOWS IN MONTREAL.

Montreal, April 13.—Montreal hardware men are showing attractive windows this week. They are all seasonable and are generally neatly planned. The Raymond Hardware Co. show a window of paint; Philbin's hardware store on St. Catherine street, is conspicuous with a well designed window of carpenters' tools; R. & W. Kerr, show sporting goods, and the Jas. Walker Co., have a window of stains and polishes.

HOLDING FIRE SALES.

Barrie. — The fire sales conducted by J. R. Hambly have attracted very large crowds. Temporary quarters had been secured in the Wells Block and everything that had been saved from the fire, was offered. Nearly all the goods were the same as new goods, except for being slightly blackened by smoke or a little rusted by water.

The crowds in attendance were so large that it is said the streets were lined for several stores' lengths on both sides. It was found necessary to replenish the stock frequently from goods stored in the next store and in the old store.

MOVED POWDER MAGAZINE.

London, Ont.—The big powder magazine of the Hobbs Hardware Co., just west of the Coves is to be moved shortly to a point on the north bank of the river Thames, just south of Hyde Park. The old site served very well until the city started to grow out that way. Lately there have been a large number of houses and a church built in close proximity. The congregation began to harbor visions of being blown to atoms and, between the efforts they put forth and the representations of the residents made to the county council, the Hobbs Co., were asked to remove the magazine, which they promised to do.

HARDWARE STORE DESTROYED.

Strassburg, Sask.—A fire broke out on Saturday which completely destroyed the hardware store of H. B. Devine.

An explosion occurred in the rear of the store about midnight and in fifteen minutes the whole building was a mass of flames. Despite energetic measures, only the contents of the office were saved. What caused the explosion has not yet been learned. Mr. Devine's family, who lived over the store, escaped uninjured, but they experienced a very narrow escape.

It is stated that Mr. Devine's loss is about $30,000, but the insurance will cover only a part of that gmount.

CARRYING OF ARMS.

Toronto.—The carrying of firearms, air guns, knuckle dusters, sand bags and dangerous weapons, may be restricted by the Legislature. Hon. J. J. Foy, attorney-general, is introducing a bill dealing with this matter. Exception is made for certain cases, such as the militia, and persons to whom permits have been granted by police magistrates.

NEW QUARTER MILLION DOLLLAR PLANT.

The Hohlfeld Maoufacturing Co., of Philadelphia, who make an extensive line of hammocks, hammock couches and laundry bags, announce that they have purchased a large tract of land in Philadelphia, where they will erect a group of buildings at a cost of $250,000. The main building will be a three-storey and basement brick and concrete structure, and other buildings to be erected, include a one-storey power plant, and a one-storey storage building. The plant, as a whole, is being designed with an eye single to comfort, convenience, and the prompt and systematic transaction of business.

WHAT READERS SAY ABOUT US.

"Inclosed please find $2.00, being the amount of my subscription to Hardware and Metal. I would not be without it, as I consider it the best publication for anyone connected with the hardware or stove business."—H. D. Moss, Renfrew, Ont.

"We are well satisfied with our advertisement as shown in the Annual Spring Number, and we congratulate you upon getting out such a comprehensive and high class issue."—The Great West Wire Fence Co., Winnipeg.

"Your Spring Number is the best ever. It is worth the year's subscription alone."—T. M. Nash, Wellington, Ont.

"We have received your Annual Spring Number, and congratulate you upon the attractive addition. It is certainly well gotten up."—Merrick Anderson Co., Winnipeg.

HARDWARE TRADE GOSSIP

Ontario.

The James Smart Mfg. Co., of Brockville, suffered loss by fire this week.

Gus. A. Schmidt has purchased the hardware business of James G. Stewart & Co., Wingham.

A. D. Kennelly, Toronto manager of the McClary Manufacturing Co., has been indisposed for the past two weeks.

Welland has passed a by-law fixing a license fee for peddlers of hardware, groceries and dry goods at from $300 to $600.

J. S. Millar, secretary of the Bond Hardware Co., Guelph, has purchased a large price of property known as the Holliday estate.

Alex. Millar, Niagara-on-the-Lake, has secured a position with the Hobbs Hardware Co., London. He will move his family there in a few weeks.

The Aikenhead Hardware Co., Toronto, have a seasonable window display of rakes, lawn mowers, hose, sprinklers and other goods pertaining to the upkeep of the home grounds.

William Stewart, Fort William, was arrested on a charge of embezzlement of $927 from his employers, Gerry Bros. He had been with them for a year in the capacity of bookkeeper.

The Yale and Towne Manufacturing Company, Stamford, Conn., manufacturers of locks, builders' hardware and chain pulley blocks, have decided to establish a branch in Canada and St. Catharines has been selected. The site has been acquired and arrangements for construction are under way. It is hoped to have the plant in effective operation early in 1912.

A most pleasing event took place a few days ago, when the staff of Edwin Chown & Co., Kingston, Ont., presented Oliver Chown, managing director of this hardware establishment, with a handsome locket and guard, to mark an important birthday epoch in his career. Mr. Chown's friends, and they are legion, wish him many more years of good health and prosperity.

A deputation representing the council and Board of Trade of Peterboro, waited on the management of the National Hardware Co., Orillia, and, it is understood, made a tempting offer for that concern to move to Peterboro. The Orillia Times says:—"Orillia cannot afford to lose any of its industries, and the Town Council should see that every legitimate inducement is made to keep the Lock Works in Orillia."

Quebec.

Germain & Co., tinsmiths, of St. Romuald, have made a voluntary assignment.

F. Orr Lewis, of Lewis Bros., Montreal, arrived in Montreal on Sunday last from London, Eng.

W. H. Evans of the Canada Paint Co., Montreal, left this week for a holiday at Atlantic City, N.J.

J. A. E. Bureau, salesman with Lewis Bros., Montreal, is spending the Easter holidays in New York.

Dingman & McComb, manufacturers' agents, Montreal; have moved into a larger office at 22 St. John street.

Among the retail hardware men in Montreal on business bent this week were:—A. Lemieux, Henryville; A. McCommon, Inverness; Corriveau & Frere, St. Sebastien; S. Deschambault, Terrebonne, Que.

Maritime Provinces.

Morton & Crogg, 161 Barrington Street, Halifax, held a word contest recently, giving ten dollars' worth of kitchen utensils to the person making the most words out of the letters spelling "kitchen utensils." The winner, Rev. C. W. Vernon, found 980 words. A nickle plated copper tea kettle was given as second prize and a nickle plated tea kettle for third.

Allan McConnell, who has been in charge of the stove department in Emerson & Fisher's, has resigned his position and left last week for Vancouver, where he has secured a position. Before leaving friends presented to him a dress suit case. His place in Emerson & Fisher's has been taken by Richard H. Irwin, for some time manager of the retail store of McLean, Holt & Co., stove manufacturers and dealers. Mr. Irwin entered upon his new duties on Saturday last. His position in McLean, Holt & Co., has been taken by D. J. Barrett, formerly bookkeeper there. Before leaving to accept his new post Mr. Irwin was waited upon by the employes and a gold-mounted fountain pen, bearing his monogram was presented to him.

Western Provinces.

J. & T. Field, Bradwardine, Man., dealers in hardware, have sold out.

Hoshal & Carmichael are now nicely started in business at Weyburn, Sask.

F. W. Shoecraft & Son, are starting a hardware and grocery store at Rolph, Sask.

A number of the merchants of Kerrobert, Sask., have agreed to close their stores at 6 p.m.

G. L. Faull of Irricana, Alta., has sold his hardware stock to A. J. Gregory, at 60 cents on the dollar.

The bursting of a gasoline tank caused havoc in the store of Olive Stark & Son, Brandon, and endangered the adjoining offices of the Brandon Times.

The Imperial Oil Company will make Young their distributing point for central Saskatchewan. A site has been purchased and storage tanks and warehouses will be erected at once.

The Saskatoon Phoenix says:—"During the past few days the Westhaver Hardware Company have been busy unloading cars of wire, roofing, nails and builders' hardware in readiness for the spring demand."

M. Wright, of Calgary, for the past 17 years connected with the J. H. Ashdown Hardware Co., has bought the hardware end of the Taber Trading Company's business, Lethbridge. He will continue the business in the same stand.

N. D. Storey, hardwareman, Indian Head, Regina, in the course of an interview says:—"The commercial conditions have never been better. I am doing just now double the business I did last year and my books will verify this."

The annual meeting of the J. H. Ashdown Wholesale Hardware Football Club, Winnipeg, was held on Saturday, when the following officers were elected: —Patrons, J. H. Ashdown, A. E. Dykes, R. A. Graham and Harry Ashdown; hon. president, C. H. S. Banford; president, Geo. Woods; hon. treasurer, W. N. Lambert; secretary, W. McCaw; assistant secretary, A. M. White; committee, J. M. Pugh, C. Keele, H. McKenzie; delegates, D. Sutherland, Geo. Woods.

CHIEF IN THE FAR WEST.

Sketch of Man in Charge of Subscription Work for MacLean's.

H. Hodgson, who has been in charge for three years of the subscription work of the MacLean Publishing Company in the Provinces of British Columbia and Alberta has had an ideal training for our work.

He began his business career as a clerk in a retail store in South Africa and there is no better training for a young man than is to be found in a few years behind the counter in a small store. More men have laid the foundation of their success there than in any other experience.

H. HODGSON,

Who has had Charge of MacLean Publishing Subscription Work in British Columbia and Alberta for the Past Three Years, With Headquarters in Vancouver.

From Africa, Mr. Hodgson came to Canada and was for some years in the retail news business in Winnipeg. Seeing a good future in subscription work he joined the Collier's Weekly Staff. In his travels throughout the North-West he saw the MacLean Publications everywhere and came to the conclusion that with the rapid growth of the West there was a good prospect for him. He applied and was appointed to the staff.

NEW TRAVELER APPOINTED.

Jas. Squires, of Peterboro, Ont., has been appointed by the Standard Paint Company of Canada, Limited, as traveler in the southern part of western Ontario. His territory is along Lake Erie from Niagara Falls to Sarnia and extends north as far as London, Hamilton and other cities. Mr. Squires received a splendid hardware training as a clerk with the Peterboro Hardware Company and the good qualities that won him success as a retail salesman should be of service in his business relations with the retail trade in the territory to which he has been appointed as salesman for Ruberoid roofing and the company's other products.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 50.

MARKETS IN BRIEF.

Toronto.

Tin—Down 1 cent.
Turpentine—Decrease of 5 to 10 cents.
Rosin—Reductions noted.

MONTREAL.

Montreal, April 13.—Tin again afforded a feature to the metal markets by its near approach to the figure which it set some time ago as a high water mark. There was a feeling that the quotations were about to overtake this figure but on Tuesday the market broke slightly, weakening and relieving the tension. At the same time local dealers state that there is keen feeling in the tin market and while realizing the futility of trying to look ahead of the market the opinion has been expressed that with a continuance of existing conditions an advance is not entirely unlikely.

Copper and lead are practically unchanged and the same might be said of pig iron.

Pig Iron.—The different pig iron markets are without variety. Canadian furnaces report steady buying on the part of foundries, and while some of them reach into proportions of fair size nothing particularly heavy has been noted. The situation in the United States is unchanged and the same statement applies to pig iron in general. Prices are identical with those quoted last week. They are futures on dock Montreal.

No. 1 Summerlee, $20.00; select Summerlee, $19.50; soft Summerlee, $19.00; No. 3 Cleveland and Clarence, $16.50 to $17.00.

Tin.—Tin soared to a high figure this week, touching 194.10 on the London market and pointing to higher levels when a break came. The market is considered firm, reports to that effect being generally unanimous.

Copper.—There is not much to report in this market. Dealers find a good trade with some improvement since something like spring weather has been experienced. But the market is considered quiet and uneventful.

Lead.—This market has also been rather dull. There was a recent upward movement, but it did not prove of long duration. There is a fair demand for lead, it being something of a seasonable character.

Spelter.—In the primary market there has not been much variation. There is a fair demand for spelter but dealers do not speak of it very enthusiastically.

Old Materials.—In old materials there is a fair demand for heavy lead with enquiry also for tea lead, scrap babbit, pewter No. 1 and 2, solder joints and type metal. The market shows a little improvement. Prices are unchanged as follows: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron No. 1, $14.50; No. 1 wrought iron, $12.50; malleable No. 1, $9; miscellaneous steel, $5.00; stove plates, $12.50.

TORONTO.

Toronto, April 13.—The trend in metals is towards lower prices but this condition is not accompanied by any diminution in the volume of business. Activity still prevails but the price of several of the metals has shown a tendency to weaken. Tin has receded from its former high position, antimony is going back to the former level and copper is reported to be in like condition.

Locally, however, nothing but satisfaction is expressed with the general condition of trade. Orders are bigger and plenty of enquiries are being received. There seems to be every prospect that prosperous conditions will continue to prevail.

Tin. — Irregularity has marked the course of tin of late. On the London market the price has been receding and advancing again continually and uncertainty has prevailed. Locally, the price is weaker than last week and quotations received to-day vary from 43 cents to 45 cents. The demand continues good and buyers and sellers alike are displaying a full measure of confidence.

Antimony.—There is an easier tendency noted in the price of antimony. Some hold to last week's figures, 9½c., but other local firms are offering for 9 cents. There is not, at any time, much demand here for antimony and at the present time operations, as far as actual buying and selling are concerned, are pretty much at a standstill. It is understood, however, that some speculative buying has been done locally since the syndicate operations stirred up interest and gave promise of advances in price.

Copper.—Copper is reported to be in splendid demand, and at the present time the consumption is enormous. The price has been stationary at $13.50 per 100 lbs. for some time now but several firms quoted a slightly easier price today, the lowest figure heard being $12.85. Although there is plenty of copper in sight, the demand is keeping well up with it and there is altogether a good healthy tone to the market. "I received more enquiries for copper today," said one local man, "than ever before, to my knowledge." This shows pretty well the degree of activity that obtains in copper.

Plates and Sheets.—Business in plates and sheets is steadily increasing in volume. Of late years the demand for tinplates has grown to enormous proportions and there is every evidence that it will continue to grow. At the present time stocks here are reported to be light. Canada plates are still hard to obtain but, as the orders received are neither large nor frequent, the situation is not causing any anxiety.

Pig Iron.—With the opening of navigation and the resultant reduction in freightage, pig iron has started to move more freely. Prices now stand as follows: Canadian Foundry No. 1 is $19.50 and No. 2, 50 cents a ton less. Old country iron is quoted at $19.50 for Middlesboro No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22.00, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20.00 and $22.00 respectively.

Other Metals.—Spelter remains quiet but firm. The demand is showing signs of improvement. Practically the same condition obtains on the lead market. Lead has been dull for some months and, in the meantime, the price has remained stationary.

Old Materials.—Prices on old materials are strengthening up some. Quotations to-day are: Heavy copper and wire, 10c; heavy red brass, 9¾c; heavy lead, 3c; light copper and bottoms, 9¾c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1, wrought iron, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7, stove plate, $13.

EXTENSION IS ASKED.

Ottawa.—J. H. Plummer, President of the Dominion Iron and Steel Co., and M. J. Butler, general manager, were in Ottawa this week, interviewing the members of the Government in a final effort to secure a temporary extension of the bounties on wire rods, which expire on July 1.

It was pointed out by Mr. Plummer that, when the bounties were originally granted, it was never sipposed that in the event of their being terminated there would be any absolute refusal on the part of the Government to place a small protective duty on wire rods. Now under the proposed reciprocity agreement, wire rods are placed an the free list and it is claimed that Canadian manufacturers are left with no protection against the United States Steel Company, which can dispose of its surplus product in Canada at cost, or less than cost. There being no duty, there can be no application of the "dumping clause." Mr. Plummer states that already a contract is being made at Hamilton for the laying down of steel rods there at a price considerably lower than the American market price. He claims that the sudden abrogation of all protection will force the Dominion Iron and Steel Co. to cease making steel rods and reduce their staff at work until they can arrange to begin operations on some other line.

CEMENT MILL FOR WINNIPEG.

The Canada Cement Co., have plans under way for the erection of a clinker mill at Winnipeg, Man., to be commenced in the near future. One of the members of the firm stated to Hardware and Metal that the clinkers would be shipped from different points in Ontario where the company have plants. They will be taken via Port Arthur and Fort William to Winnipeg to be converted into cement. The West has been steadily increasing its demand for cement and this fact is one of the reasons for the erection of the new mill. The amount to be expended in the plant is estimated at $400,000.

AMALGAMATION STILL HANGING FIRE.

The proposed amalgamation among wholesale hardware houses is still a live issue if the fact that negotiations are still being carried on is a safe criterion. A meeting was held on Tuesday but nothing definite was announced as the result.

HARDWARE MARKETS

MONTREAL.

Montreal, April 13.—The general experience of the local jobbers during the past week or ten days is just about what was expected with the first real touch of fine weather. Practically all departments seem to have been helped as is shown by the new business practically all along the line. New life has been given the demand for carpenters' tools, lawn supplies, brushes, sporting goods and builders' hardware. It is hardly necessary to dwell on this subject, but it is a fact that the disappearance of the snow and the return of spring with its accompaniments of sun and fine weather has given outdoor work a new impetus. Operations in painting for instance show a big increase and in other lines work is beginning with the arrival of conditions that were necessary and near the ideal. In this market no particular price changes have been reported, steadiness prevailing.

Contractors' Supplies.—Orders for contractors' supplies are coming in freely from all parts of the country, the west and north-west contributing largely to the present demand. Reports also indicate that the building movement has commenced in earnest which as it becomes more general will have an increased effect on the existing hardware demand. Quotations same as last week.

Spring Lines.—There has been a real awakening in the demand for lawn mowers, hose sprinklers and other articles used in caring for the lawn. This has helped considerably. The demand for rakes, spades and similar tools for lawn work shows an improvement indicating a general movement in this direction. Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote hose clamps, ½ to ¾-in., 25c a doz.; hose couplings, ½ to ¾-in., $1 a dozen; hose sprinklers, ring pattern, $5.75 a doz.; revolving pattern, 12-in., $13 a doz.; 24-in., $34 a doz.; and 36-in., at $39 a doz.; hose nozzles, Gem, $3.50 a doz.; reels, 75c each and upwards; garden wheelbarrows, $27 a doz. The discount offered is 50 and 50 p.c.

Household Utensils.—There is a good steady business in household utensils. Ice cream freezers are being called for more frequently, and refrigerators are also on the move. Some of the prices quoted are:—Food choppers, from $9 to $15 a doz.; ice cream freezers, 1-qt., $1.50, 2-qt. $1.65, 3-qt. $2.05, 4-qt. $2.50, 6-qt. $3.15, 8-qt. $4; coffee percolators, $1.75 to $3.50; washing machines from $3.50 up; wringers, Royal Canadian, $47.75 per doz.; Universal, $37.75 per doz.; Safety, $56.25, less 20 per cent. per doz.; Mrs. Potts' irons, plain, 82½c per set; nickel-plated, 87½c per set; common sad irons, 4 to 7 lbs., $5 per cwt.

Carpenters' Tools.—This is one of the present active lines with the demand coming from all directions. The retail trade locally are showing a number of fine windows of carpenters' tools and the same is generally true throughout the country. There is a good demand now to the retailer and the wholesale houses are coming in for their share of the business. The following discounts are about the average: Steel squares, 50 per cent.; auger bits, 47½ to 70, according to quality; augers, short and long-eye, 65; chisels, 75, 10 and 5; draw knives, 75 and 10; handsaws, Canadian make, 35; boxwood rules, $1.15 and upward, a doz.; nail hammers, $2.75 and upward a doz.

Wire.—There is a good demand for wire just now due no doubt to the fact that there is a general movement of fence repairing and building. Tools used in the work are also coming in for a good share of trade. Present prices are: Barbed wire, $2.35; plain twist, $2.55; galvanized wire base, $2.27½; coil fencing (9) $2.30; (12) $2.45; staples, bright, $2.60; galvanized, $2.85.

Heavy Hardware.—There is a steady trade in the general lines of heavy hardware but nothing especially new to report. Discounts are: On carriage bolts, ⅜ and less, 70 per cent.; coach screws, 75 per cent.; stove bolts, 80 and 7½ per cent.

TORONTO.

Toronto, April 13.—Business has picked up splendidly during the past ten days. Although the weather has not been all that might be desired, it has been a great improvement over previous conditions and the result has been seen in an all round betterment of trade.

During the last few days there has been a heavy demand for many lines of goods, which is explained by the fact that a great deal of jobbing work is done around the homes on Good Friday It being the first holiday of the spring, most men take advantage of the occasion to do a little "fixing up" around the house. Consequently, there has been a big demand at the hardware stores for nails, hammers, locks and general articles of use around the household The jobbers have received their share, in the shape of rush orders for goods in which the dealers find themselves short. One local jobber states that he has during the past week received more inquiries and direct orders by mail than for a long time. This is one of the surest evidences of activity in the retail trade.

Seasonable Lines.—There has been a heavy demand for all spring goods. Spades, rakes, axes, hose, wire fencing, lawn mowers, sprinklers, etc., are moving well. The season is not yet far enough advanced for much trade in summer lines such as mosquito netting, ice cream freezers, etc., but there is every evidence of an early demand for such goods.

Household Goods.—In this branch of the hardware trade, things have been unusually brisk. Tinware and graniteware are selling well and house-cleaning articles are much in demand. Stepladders, mops, brooms, tacks, tack hammers and pullers and all the wide variety of articles, that are in use during that trying period of the year, are now moving well There is, as usual, a good call for such staple goods as pots, pans, meat choppers, washing machines, clothes wringers, etc

Builders' Hardware.—There has been an increased demand for all kinds of builders' hardware and contractors' supplies. The active resumption of building operations has had the effect of creating an earlier demand than usual. A good demand for mechanics' tools is reported. Lumbermen's supplies are not selling well now, as the season is practically over and the same condition prevails with reference to sugaring supplies. Building paper and roofing are becoming active.

Heavy Hardware.—In all heavy lines there is a steady call. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Stoves and Heating Goods.—In heaters there is little doing but ranges are quite active and gas stoves are selling so fast that the manufacturers report some difficulty in keeping up with the demand. Large shipments have been the order for some time back.

Sporting Goods.—In no department has there been a more active tone than in sporting goods. Rifles are much in demand and the same applies with reference to trap shooting supplies. Baseball goods are beginning to move. Aquatic sports are hardly yet popular but there has been some call for paddles, shells, etc

NEW PLUMBING AND HEATING FIRM.

Chatham, Ont.—The plumbing firm of Draper & Trumpour has started business in premises on Fifth St., Chatham. J. W. Draper has been with Westman Bros. for ten years, and Felix G. Trumpour with the same firm for seven years. Draper & Trumpour will handle plumbing and sheet metal work, tinsmithing, and the installation of heating appliances of all kinds. The new firm has already secured a contract from Wm. Gray & Sons, Ltd., for the installation of a complete ventilating system in their factory.

The Western Bridge & Equipment Co. has received the deed from the city of their new site on Inshes Ave. Building operations on the new steel-concrete factory will be commenced immediately.

Jacques & Williamson, architects, of Windsor, have the plans for a $20,000 hotel to be built at Wallaceburg. Marine City, Mich., men are behind the enterprise.

PENNANTS APPEAL TO BUYERS.

One advantage of pennants is that they attract the feminine fancy, a point that hardwaremen frequently strive to secure. "Young ladies and girls are crazy about pennants" said one dealer recently. "They use them for their rooms, library or den, cushions, etc., besides attracting young men club members. They also give tone to an interior decoration or window if kept in their proper place.

SHOWING THE STENOGRAPHERS HOW.

A representative of Hardware and Metal had the opportunity of seeing Miss Rose Fritz, of typewriter fame demonstrate to the stenographic staff of Lewis Bros., Montreal, the possibilities of the typewriter from the standpoint of speed and accuracy. She was accompanied by J. J. Seitz, President and General Manager of the Underwood Typewriter Co. and Mr. Robson, the Montreal agent. Her demonstration was not only an encouragement to the stenographers of the company but was of interest to the heads of departments as well.

The Western Hardware Market Situation

Heavy Movement of Seasonable Goods — Carload Lots Going Out in Good Numbers—Harvesting Tools Rather Slack.

Winnipeg, April 13.—As time goes on, merchants are beginning to bulk their orders and the line of goods comprises a very wide range. The enormous building operations that are now in progress in the west are receiving a great deal of attention at the present time. This has created a heavy demand for builders' tools, and builders' hardware. Steel and wood blocks, hinges, hooks and cables, are going out in car load lots to individual hardware stores. The ordering for harvest tools is not particularly strong at the present time, but it is gradually increasing and heavy orders will be booked very soon. Wire screens, and screen doors are rushing out in enormous quantities. Shovels and picks are another leading line.

The following quotations on rope are not standard and these quotations are somewhat higher than some of the local houses have quoted. It is not expected, however, that this price will have to weaken as tne rope market is very firm. Wholesalers report this week that wire is to be advanced 10c on the 15th of April. This advance has been expected for some time, and dealers everywhere in the west have been duly informed, and as a consequence are well stocked, taking nearly all the supplies on hand. Solder has not weakened very much, but there is a large quantity of poor quality stuff on the market which sells at a lower price than that quoted. We quote the pure solder which continues fairly firm.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅝ and smaller, 65; 7-16 and larger, 55; machine, ⅝ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts 77½.

Bar Iron—Bar Iron $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $13.

Blocks—Steel, 45; wood 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c pre lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.83; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware— Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; grainte, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron — Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 26, $4.20; 28, $4.60; 30 gauge or 10½oz., $4.80; Queen's Head, 28, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—¼ in., $3.50; ⅜ in., $3.80; ½ in., $4.25; ¾ in., $5.50; 1 in., $7.90; 1¼ in., $10.75; 1½ in., $12.70; 2 in., $17.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $5.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers — Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼ in., $2.55; ⅜ in., $2.85; ½-in., $3.45; ¾-in., $4.25; 1 in., $6.10; 1¼ in., $8.30; 1½ in., $10; 2 in., $13.30; 2½ in., $21.80; 3 in., $28.60; 3½ in., $35.60; 4 in., $40.80; 4½ in., $46.80.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9.50; dash, $9.75.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope.—Sisal, 8¼c; pure manila, 10¾c; British manila, 8½; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.25; broken lots, $8.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base $25.75 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate — I. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 33 1-3.

Wire—Barbed Wire, 100 lbs., $2.95; plain twist, $3.25; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15,

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

The movement is very brisk in the paint and oil market, and although this may be expected at this time of the year perhaps very few realize that the past few weeks have been the best season for the general paint and oil trade in the west that has ever been experienced. This was due to the fact that the idea prevailed that building operations would be very heavy this year in the west, and merchants naturally stocked well in all paint supplies. The trade is going on very satisfactorily, and will increase in varnishes, japans and finer finishings.

Linseed Oil.—Although there was a temporary weakness in the linseed oil market, prices have reverted back to a very strong figure, and the quotation to-day is $1.25 for raw, and $1.28 for boiled. The seed market is again becoming very strong and the outlook is for a very stiff market for some time to come. Local manufacturers are not calling for orders, as they require all stock on hand for their own use.

Turpentine.—There is very little turpentine moving, as there is very little to move. The price is $1.40 per gal. in barrels and is very firm. There is a good tradē coming on in adulterated turpentine, and competent substitutes. Reports from the south are that there is a fairly good flow of turpentine this year, but stocks are greedily taken up.

Paris Green.—Although the ordering is not very heavy at the present time, yet wholesalers expect a very good season in the Paris green market. A few orders are booked up, and jobbers are getting in stocks from manufacturers. The price is 23c for 100 lb. cases.

Putty and Glass.—Orders are heavy, and shipments are numerous in putty and glass, but as yet the trade is chiefly in the larger cities of the west, and as time goes on every town will be ordering freely in these lines. Price f.o.b. Winnipeg are bulk barrels $2.75, bulk cwts., $2.45, bladder cwts., $3.40.

Varnishes.—Indications are that there will be an excellent season for varnishes and all interior finishings. Prices are moderate, and there is no rumor of advances here.

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18½c.; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rose, in bulk, 22½c; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

The Importance of Paint Displays in Windows

Attention Should be Given to Arranging Attractive and Original Windows—Some Ideas Which Can be Carried Out With Little Labor and No Expense.

During the past few weeks many paint displays have been seen in the windows of hardware stores, some good, some bad, some indifferent. A few of the good windows were very good; and a few of the bad ones were very bad.

It is not a difficult matter to make up a pleasing window display of paints. At the same time, it frequently happens that the window dresser does not exercise sufficient care and the effect is then far from pleasing. An indifferent and careless arrangement gains from the passerby nothing but indifference. In making up a paint window, a certain amount of thought should be given to the matter. It does not do to merely pile up a few tins of paints, scatter brushes here and there and put in a number of manufacturer's lithographs. The other day, a representative of Hardware and Metal ran across a window display, which was distinctly unique in this respect. It was crowded full of odds and ends of stuff—razors, tools, bathroom accessories, rules, etc. Scattered through the window was a smattering of paint supplies and brushes. Everything but the paint was covered with the dust of several weeks. It looked very much as though the paint stock hgd been put in some time after the other stuff. This proved to be the case.

"Yes, we put in the paint display the other day," explained the proprietor, when the question was broached. "We've got to show paint at this season of the year you know. I intended to give up the whole window, but did not have the time to change it, so I just put paint tins in here and there with the goods already in the window."

Qualities to be Obtained.

Needless to state, that the dealer was not getting any results from his unique achievements in the matter of window dressing. In designing a paint display, an effort should be made to secure first, a pleasing effect and, second, a certain measure of originality. The latter quality is the most difficult to obtain, and yet sometimes the most simple arrangement lends an appearance of originality. One dealer attracted considerable attention by pouring out a large pile of dry color in the middle of his window. From a distance, it looked as though the window contained a mound of golden sand. People went out of their way to find just what it was. The idea was simple, perhaps even crude, but it had the desired effect.

A Suggestion.

The accompanying illustration shows an idea which could be carried out in designing a paint display. At the back of the window is a low platform, on the front of which is a sign, "Spring time is Painting Time." On the platform is a pyramidical formation of paint tins and in front is suspended a picture of a house attractively decorated, or some picture equally suggestive. Over this is a sign: "Make your home comfortable and attractive."

From the centre of this sign, streamers of ribbon or tissue paper are drawn to the front of the window where a row of tins and brushes are placed.

The piles of paint tins on each side begin at opposite corners of the window and run back to the platform. The words: "Buy now" are made by use of dry colors on a white background. If a number of different colors are used in forming the letters, a pleasing effect can be obtained.

This plan is one of many which could be suggested. Not a great deal of time would be needed to effect this arrangement and practically no expense would be involved.

A Splendid Window.

A window of more than usual merit was illustrated in Iron Age Hardware. In the centre of the space, was a miniature house, about 3½ feet high, artistically decorated. The house was surrounded by what looked like a very good imitation of a steel picket fence. The pointed pickets were made of 10-penny wire casing nails, held together by wire. On each side small trees were shown and the top of the window was decorated with branches and leaves. An attractive display of paint was shown on both sides of the house.

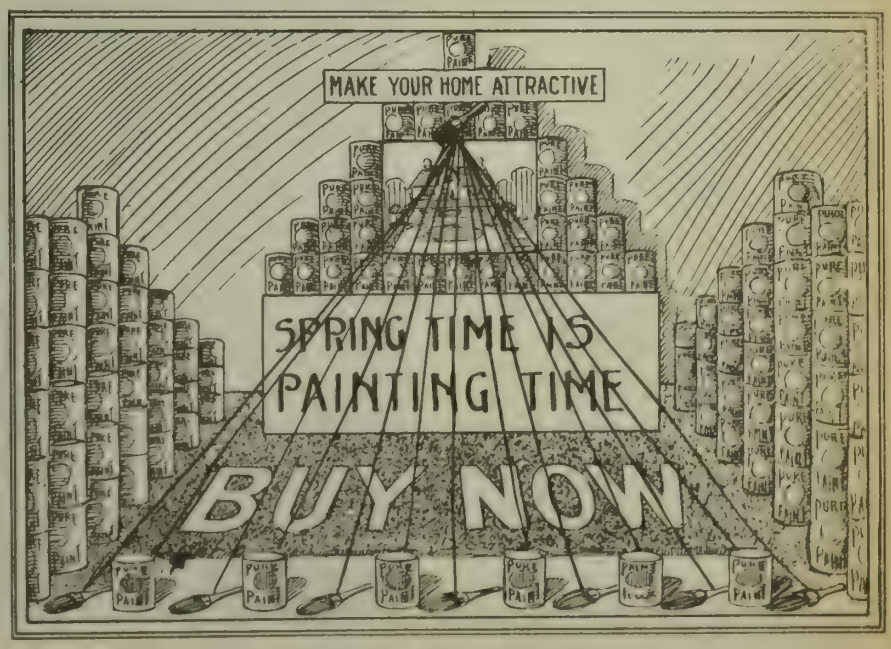
PROTECTION OF CONCRETE SURFACES.

The immense development in the use of concrete for building purposes, has resulted in a demand for some kind of coating which would both protect and beautify concrete surfaces. This demand has been met by the energetic efforts which have been put forth by many paint manufacturers in producing coatings which are at once protective, decorative and damp-proofing.

It is well known that cement surfaces dry out with an unevenness of color, and, in many cases they do not set uniformly, thus causing a variation in texture, or hardness of the surface, which causes disintegration in cement floors, due to frictional wear.

A Coating for Concrete Floors.

One of the objections which have been made to concrete floors, is that they are unsanitary. It seems almost impossible to keep them clean, as the roughness of the surface harbors dust and dirt. They may be swept over and over again, and each sweeping will bring out more dirt. Moreover, the constant frictional wear adds to the quantity of dust.



After exhaustive tests, conducted by both chemists and practical cement workers, paint manufacturers have produced a number of different finishes for concrete floors. These goods are applied with a brush, and they protect the floors from dusting and abrasion due to frictional wear, preventing the absorption of water, grease, oil and disease germs.

These finishes are made in light and dark drab, terra cotta and tan colors, as well as transparent, thus affording an attractive selection. They are suitable for the floors of factories and basements of residences, and for hospitals, schools and office buildings.

Damp-Proofing Concrete Foundations.

Concrete substructures have been used very extensively for a number of years, and have proven very satisfactory, except for the fact that they have absorbed dampness from the ground, and thus rendering the basements useless for most purposes.

During the past year or so, this objection has been largely overcome by the introduction of various damp-proofing coatings which have been produced by prominent paint manufacturers. In the large cities, practically all foundations are now treated in this way, and the use of these coatings is extending all over the country. Foundations are not only protected from disintegration, but, being damp-proofed, they render the

Suggested Arrangement for a Paint Window Display.

basements useful for any ordinary purpose.

Other products which are now on the market for treating concrete surfaces, include coatings for uniforming the surface color of concrete, cement, stucco, stone or brick. All these goods are applied by means of a brush.

A New Avenue of Trade.

All these new concrete coatings open up still another avenue of trade for hardwaremen. There is scarcely a town in the country where they could not be successfully introduced with a little effort on the part of the dealer. It will pay every hardware merchant to look into the situation in his own town, and see if he cannot help some of his customers to solve their problems in protecting, decorating and damp-proofing concrete surfaces.

PUSHING THE SALE OF BARN PAINT.

"I do not know what is the matter with Canadian farmers," said the American manager of a Canadian branch paint factory, the other day, "that they do not seem to think it necessary to protect the expensive lumber in their barns and outbuildings, with an occasional coat of paint."

The average Canadian on the other hand, has become so accustomed to the unsightly appearance of unpainted barns, that he rather marvels at seeing one that has been painted for any other purpose than to advertise "Castoria."

Why is it that this condition should exist in Canada, where the farmers are as prosperous as they are in any other part of the world? The more one thinks about it the more likely he is to conclude that the trouble is simply a matter of heredity. The farmer neglects to paint his barn because his father and grandfather also did, and the father and grandfather neglected it because lumber was cheap and paint was dear in those olden days.

Farmers Should be Educated.

It is high time for present day farmers to be educated up to the necessity of using paints on their outbuildings. The conditions which obtained in their grandfathers' days have been exactly reversed, and now while lumber is high in price and rapidly becoming higher, paints, on account of great improvement in manufacturing methods, are cheap. For the purpose of barn painting, almost every manufacturer of mixed paints has an article of merit, at a very low price, but the trouble is, that farmers do not seem to be aware of this fact.

Why do not hardwaremen use more effort to push the sale of barn paints? It would be easy to put up a good straight business proposition to the farmer along this line. Show them the exceedingly low cost of paint as compared with the value of the protection which it would give their lumber. Show some illustrations (which would be furnished by the manufacturers) of barns and outbuildings which are painted. Tell your customer, that, in the United States, the best business farmers think it as important to paint their barns as their houses—not from the decorative standpoint alone, but from that of protection to property. This statement will be readily verified by anyone who has traveled to any extent in the States and noticed the appearance of farm buildings along the line of railway.

Paris Farmer's Experience.

A farmer residing near Paris, Ont., told the writer of how he happened to paint his barn. He had erected a building of which he was very proud, and had it covered with a corrugated steel roof, purchased from his hardwareman. When the building was completed the hardware dealer suggested to him that it would still further improve the appearance of the barn, and keep it in condition a great deal longer, if he would treat it to a coat of paint.

"O that would cost too much," was the farmer's objection.

"Well, let us see just what it would cost," said the hardwareman.

He asked the size of the building and figured out approximately how much paint would be required. Then he estimated the cost, and when he mentioned the price, the farmer was more than surprised.

"Are you sure that will be enough to cover the barn?" he asked.

"Absolutely sure," answered the hardwareman, "and I believe you will have some left over."

"Then I'll take it."

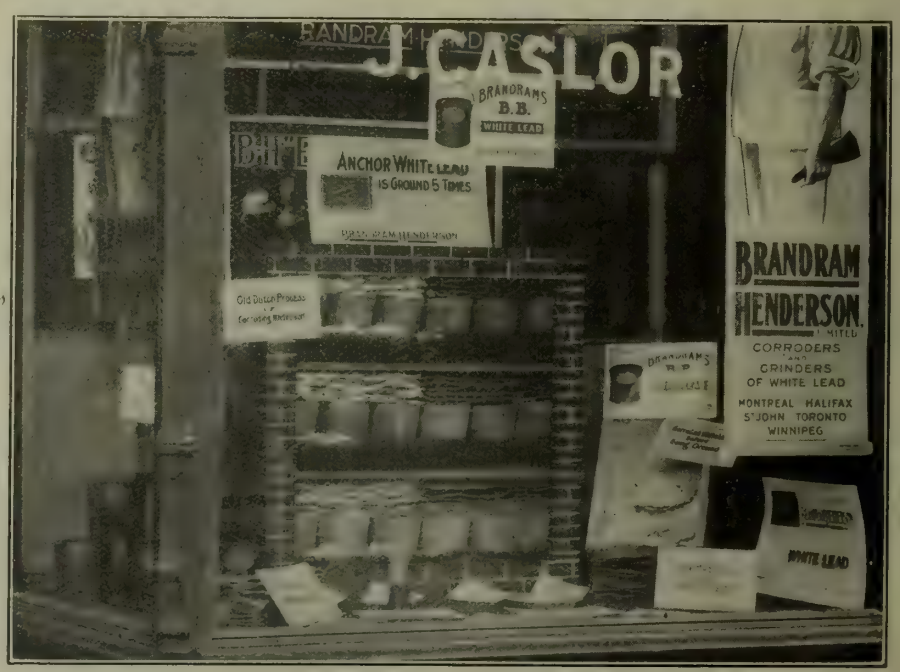
That farmer is so pleased with result of a coat of paint on his barn, that he has become a great booster for barn paint, and he has sent more than one customer to the same hardwareman. He says that the small amount he expended in barn paint was one of the best investments he ever made.

Why should not every hardwareman get some of his customers interested in barn paints?

LEAD PROCESS SHOWN.

A novel window display is seen in the store of John Caslor, Queen St. West, Toronto, this week. It shows the Old Dutch process of corroding white lead. The Old Dutch process is used by practically all white lead manufacturers and has been known for some centuries. The lead arrives in pig form and is melted down into "buckles," or thin layers. This is done to give a bigger surface to work upon. The buckles are then built up into large stacks, over receptacles filled with a weak solution of acetic acid. It is then covered with tanbark and left for a period sometimes reaching 100 days. During this time, the lead slowly rots. When the corroding process is over, the lead is cleaned and ground.

The window display in Mr. Caslor's store was supplied by the Brandram-Henderson Co. It shows everything in miniature and is very interesting indeed.



The same display was shown last week in the store of A. J. Wright, Hamilton. Considerable interest was aroused and classes from the technical school were taken down to see the process and have it explained to them.

BIG SHIPMENT OF CATALOGUES.

On Monday of this week the Canada Paint Co. despatched to the Montreal post office direct from their own advertising department, three double team loads of pamphlets and booklets, one of which it is expected will reach every buyer and prospective buyer of paint and varnish in the whole Dominion. During the week nine or ten such loads were sent out comprising 250,000 illustrated brochures. A representative of Hardware and Metal was invited to witness the company's staff artist photograph the first shipment, which created considerable interest.

WILL HAVE CANADIAN FACTORY.

Announcement is made by Geo. G. Veness Manufacturing Co., of Boston, that they will have their goods manufactured in Toronto, within a few weeks time. They have already placed an order for the necessary machinery, with a Toronto firm, and their Canadian factory will soon be in full operation.

Window Display in Store of John Caslor, Toronto, Showing Process of Corroding White Lead.

PAINT AND OIL MARKETS

MONTREAL.

Montreal, April 6.—Probably one of the features of these markets during the past week was the large number of peremptory orders for immediate shipment. This has perhaps been natural, owing to the fact that a goodly number of the buyers, owing to the weather and other conditions, refrained to a certain extent from purchasing earlier in the season. Now the demand is heavy for paints and varnishes and in addition it is wanted in a hurry.

Linseed Oil.—A slight reaction seems to have set in regarding the quotations on linseed oil and from a number of quarters it is reported that prices have sagged. However, stocks are regarded as light locally and the demand for manufacturing purposes continues heavy. There is as it were a passive resistance to the lowering of figures, a condition that it is believed will prevail more or less until supplies are more abundant.

Turpentine.—There is still a scarcity of turpentine and prices are being maintained at a rather stiff figure. The demand is not heavy due largely to the price and buyers are apparently ready to suffer any inconvenience rather than lay in stocks at the present figures.

Varnishes.—In spite of the price of turpentine, varnishes and Japans have not undergone any general advance. For round lots, however, advances of from five to ten cents per gal. have been asked. This price is being paid by those who understand the situation in turpentine. A fair enquiry is being experienced for all classes of varnishes, more particularly for house and furniture purposes. In Japans it is noticed that brown and black Japans have a steady request with a fair turnover in the better grades.

Paris Green.—Shipments are now moving out freely and judging from their volume stocks are apparently light throughout the country. Buyers should be prepared for the opening of the season, for while there is plenty for the present demand, it is just possible that conditions may change before the season is over. Prices are unchanged as follows: In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17¼c.; 50 lb. and 100 lb. drums, 18¼c.; 25 lb. and 100 lb. drums, 18¾c; 1 lb. packets, 100 lbs. in case, 20¼c per lb.; 1-lb. packets, 50 lbs. in case, 20¾c lb.; ½ lb. packets 100 lbs. in case, 22¼c per lb.; 1 lb. tins, 100 lbs. in case, 21¼c per lb.

Arsenate of Lead.—This insecticide is finding a little broader market as it becomes better known. The price is as formerly quoted: In bbls., about 800 lbs., 9c.; in half bbls., about 400 lbs., 9½c.; in 25 lb., wooden kegs, 10c; 5 lb. bottles, 12c; in 2 lbs. bottles 13c; in one lb. bottles, 14c.

White Lead.—With the opening of navigation in sight white lead has been receiving more attention, and for 1st of May shipments it is expected the output will show considerable improvement on what has been experienced up to the present. The prices for white lead are as follows: lots of one ton, $5.85, contracts of five tons and over, $5.70; shipments less than one ton, $6 f.o.b. Montreal.

Putty.—The putty market is busier due to the increased operations in painting. Prices f.o.b. Montreal are: Bulk, bbls., $2.20; bulk cwts., $2.45; bladder, bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.55; 25's cased, $2.70; 12½'s, cased, $2.90.

TORONTO.

Toronto, April 13.—The past week has been one of exceptional activity. In the first place, the retail trade was heavy, owing to the fact that the holiday presents the first good opportunity for doing any painting at home this year. Men who have floors, a porch, or a fence to paint, generally decide to utilize part of the holiday for that purpose. Consequently there has been a big rush on the retail stores for brushes and all kinds of paint and varnish. This, in turn, has created a busy demand on the wholesalers and manufacturers. Rush orders, many of them for small bulk, have been pouring in during the past few days and the shipping departments have been kept on the rush.

There have been developments in linseed oil and turnpentine during the past few days which promise to materially alter the present standing of both commodities. Turpentine has dropped and further decreases are anticipated. On the other hand, oil shows signs of strengthening up in price.

Turpentine.—The situation for the past week or ten days has been uncertain and only during the past two days have events taken on a more definite form. It has been known right along that the price was due to decline, but up to the first of the week no quotations were made at Savannah. In fact, no sales were recorded there for over a week, and, consequently, no figures were obtainable. On Wednesday, however, there was a drop and local prices took a corresponding slump. Quotations made here to-day range from $1.30 to $1.35. One local buyer ordered a carload at Savannah early in the week, at which time the price was uncertain. "I don't know at what price it was bought but it will be at a reduction," he said today.

Linseed Oil.—There is a strengthening tendency all around in linseed oil. English oil advanced this week sharply, despite the fact that a further reduction had been looked forward to with a certain degree of confidence. On Tuesday, crushers in Canada advanced their price 1 cent, but no change was made in the figure charged to the trade. Some are still quoting $1.14 for raw, and $1.17 for boiled, but the majority of the local houses are asking $1.15 and $1.18. It is quite possible that linseed will be advanced here next week.

One explanation advanced for the stronger tendency is that buyers had been holding off for months in the expectation of lower prices. When the recent slump came, a great many buyers came at once into the market and naturally forced the price up again.

Rosin.—The lower price quoted for spirits of turpentine has affected rosin and reductions are shown in all grades.

Putty.—There is a fair-sized demand for putty. Prices are standing at the same figures: Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same: Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead.—There has been a heavy lead. This is probably due to the fact that the fair weather of the past week has made a certain amount of outside work possible. It is not probable that any change in the price of linseed oil will affect the price of white lead at this season.

Varnishes and Japans.—There has been a splendid all-around demand. All local houses report that, during the past week, they have been in receipt of an unusual number of sorting up orders. The retail dealers, finding themselves plunged into the spring trade with incomplete stocks, are taking steps to complete their supplies.

Prepared Paints.—The demand is now reaching high water mark and large orders are being received. All indications are that the present spring trade will establish a new record.

Petroleum.—Prices are given this week as follows: Canadian prime water white, 12½c; United States water white, 14c; Pratt's Astral, 16c. The market is strong with a good demand in evidence.

DOES PAINTING COST MUCH MORE?

With all the cry that has been made, this year, about the increased cost of the materials which enter into the manufacture of mixed paints, what will the ultimate increase to the consumer, mean anyway?

The hardware dealer, who buys in large quantities, finds that the slight additional cost per gallon, brings the amount of his invoice to a considerably higher figure, on a consignment of any size. As a result he is likely to think, and even to say a lot about the increased cost of paints, this year. When a customer says that he guesses he will put off painting his house until next year, because paints are too high in price, a dealer who allows himself to dwell on this aspect of the case, will have only one argument to offer—that paints may possible be even higher, next year.

Getting down to brass tacks, in the matter, how much extra will the average consumer have to pay for painting his house this year, as compared with last year's prices? In comparing the current wholesale prices on mixed paines with those quoted in Hardware and Metal's columns one year ago it is found that the average cost per gallon is now about thirty-five cents higher than it was a year ago. The hardwareman will probably have advanced his price about forty-five cents per gallon. It would thus appear that the man whose work requires ten gallons of paint, will pay about $4.50 more for it now than he would have done last year.

That amount will not look very large, in comparison with the total cost of labor and material, and the actual percentage of increase on the job, will be small. However, the proper line of argument for the dealer to take is that a house which is in need of painting, will deteriorate enough in one year, to more than make up the additional cost of the paint. Moreover if exposed to another year's wear and tear, the lumber will absorb enough extra paint, to go a long way in paying for a slight increase in the cost of the paint this year.

China-Lac

The Perfect Varnish Stain---Extensively Advertised Yields the Dealer a Profit of over 58%

China-Lac is a Perfect Varnish Stain

Not made from heavy pigments that obscure the grain of the wood and give an appearance of a solid varnish paint. Not made from dyes that fade out in a week. But made from the most permanent light gravity, chemical pigments it is possible to obtain.

Made from Pigments

Pigments, made in our own dry color works, in the most scientific manner by our chemists, on formula brought direct from Great Britain.
Pigments that give lasting, non-fading effects.
Pigments that allow the grain of the wood to show up through the Varnish.

The Varnish

The Varnish used in China-Lac is specially made for that purpose. It was not hastily decided on but tested out by time and wear.
The combination of these pigments and varnish made a varnish stain that covers the wood with a rich lustrous coating, imitating most expensive hard woods.

The Colors

Made in sixteen beautiful colors. Eight to imitate natural woods.

The Store Advertising

Given with China-Lac comprises an attractive Window Trim, beautifully lithographed in three colors, red, black and white. This goes across the upper portion of window, and down each side, showing on the two upper corners the little Chinese boy with lantern. The two side panels have a lithographed bamboo frame and a large Black Dragon running up behind the panel.

Large Display Card for the Counter

This is a very handsome card, size 10x18, showing the 16 colors, in which China-Lac is manufactured; it makes a most beautiful appearance and is bound to command attention.

Eight-Page Booklet

This booklet gives full information about China-Lac, telling about the different colors, also what China-Lac can be used for, and gives other useful information regarding interior decorations.
The cover of this booklet is lithographed in green background, buff lettering.

Small Counter Cards

Lithographed green lettering on a buff background; they have small color strips, showing the 16 colors in which China-Lac is manufactured.

Are you aware of the great demand for

Boeckh's Brushes and Brooms

for use in factories of all kinds? A little time spent in getting this class of business will show good profits. They usually buy the better lines in Flat Paints, Badger and Fitch Flowing Varnish Brushes, etc., which yield an exceptionally good profit. We prefer to receive this class of trade through the Dealer, and we encourage factories to order from their local dealer.

The Boeckh Bros. Company, Ltd.

Amatite ROOFING

"NEEDS NO PAINTING"

AMATITE means more to the man who needs a roofing than just merely something to put on the top of a building.

It means a thoroughly satisfactory and reliable roof covering, without future *expense for painting*—because the *real mineral surface* makes painting unnecessary.

Frequently the cost of painting a roofing amounts to almost enough to buy a new Amatite Roof.

Amatite can be laid right over shingles, tin or other ready roofings. The directions hold good for laying Amatite anywhere and over anything, and are as simple as A B C.

For further information, booklet, samples, etc., address nearest office.

Everjet Elastic Paint A very tough, durable paint, at a low price. One color only—a lustrous black Use it for machinery, heating apparatus, smoke stacks, roofs, fences, water tanks, etc.

Creonoid Lice Destroyer and Cow Spray Cows give more milk if sprayed with Creonoid to keep away the flies which make them restless. The poultry output will be increased if the henhouse is made obnoxious to insect pests by disinfection with Creonoid.

THE PATERSON MANUFACTURING COMPANY, Limited

MONTREAL TORONTO WINNIPEG VANCOUVER ST. JOHN, N.B. HALIFAX, N.S.

YOU TAKE NO CHANCES when you handle OUR Building Papers and Roofings, because our reputation for quality is back of every roll of

Letters That Help Sherwin-Williams Agents Get Business

CANADIAN DIVISION

897 Centre Street, MONTREAL

Mr. Geo. Hamilton,
Burlington, Ont.,
Canada.

Dear Sir:

Varnish doesn't grow on trees—everybody knows that, but "everybody" doesn't know as do you that trees with the aid of flax fields are our best varnish markers.

Of course, the flax fields give us our Linseed Oil, and good Linseed Oil is as necessary for a good wearing varnish as flour is for bread, but the trees give us that which gives the varnish its finish.

You know that centuries ago out in the far corners of the earth there flourished trees filled with a sap that formed a very durable gum. In the course of years, the gum was fossilized, and today we mine this residue of these prehistoric forests for the purpose of making it into a product to do service in your handiwork.

Then again, there is something else in That's Turpentine which the pine trees of C know what any substitute for pine "turps" w otherwise good varnish.

If the varnish you are using is not gi there is a chance that the gum used was of that the "turps" didn't come from a pine tr

Sherwin-Williams Varnishes are made fr can be bought in the London and South Sea m is chemically pure and from Linseed Oil we know is right. We get the right raw stuff, right way, and we give you a varnish that w

Yours

THE

P.S. If you will give us on the enclosed c nigal varnishes you use and the names of yo will send you a pair of cuff links that are

CANADIAN DIVISION

897 Centre Street, MONTREAL

Mrs. F. J. Carpenter,
Fort St.,
Victoria, B.C.,
Canada.

Dear Madam:

Your senses of taste, touch and smell will not help you much in judging the quality of varnish.

Varnish is not a product of mystery, however, for it is easy to name the different things necessary for the making of a good varnish. They are good Copal gums, high quality Linseed Oil, absolutely pure Turpentine, adequate facilities, experienced makers and a good liberal supply of honesty.

The Sherwin-Williams Co. get good raw gums because they buy direct from the London and South Sea markets and buy in such quantities that they get the best qualities at minimum prices. They are sure of the quality of their Linseed Oil because they make it from selected Flaxseed which is crushed by a process of their own. Our Turpentine is purchased direct from the producers in the South and is thoroughly safe-guarded to see that no adulterations whatever are added.

Our five large varnish plants, our facilities cannot be surpassed; we can filter, store and age the goods as they should be. Our corps of varnish makers is not only large, but they are experts, having had years of experience and every opportunity to thoroughly know their business. Last, but not least, the Sherwin-Williams reputation for honesty of purpose and service is acknowledged the world over, and after all, this is the best thing we can give you, a dependable assurance of quality. The Sherwin-Williams name and reputation is back of every can of varnish we make.

If you have a surface which you desire to varnish and want information as to the varnish to use and how to use it, call on our dealer, E. J. Prior & Co., Victoria, B.C., Canada.

Yours very truly,

THE SHERWIN-WILLIAMS CO.

F.W. Nelson

H.H.V./M. Manager Promoting Dept.

Mr. Geo. Hamilton,
Burlington,
Ont., Canada.

Above are reproductions of actual letters on S-W Varnishes which we mail to lists of the best painters and property owners in the interests of Agents and Dealers handling S-W Varnishes. These letters are creating new varnish business for S-W Agents every day and keeping old customers in line.

Read them!

Our agents are enthusiastic about the splendid results in larger sales and bigger business which they attribute to these strong, personal letters. They agree that the letters are one of the strongest links in the whole Sherwin-Williams advertising campaign. Similar letters are used to aid in the sale of Sherwin-Williams Paints and other finishes.

And the Agent's name appears in every letter.

So widespread is the good reputation of Sherwin-Williams Paints and Varnishes that when a painter or property-owner receives one of these letters from the Sherwin-Williams Co. bearing the name of the local S-W Agent, it gets the same careful consideration as his other personal mail. If he has any need for paint or varnish the S-W Agent is pretty sure to hear from him.

These letters are mailed out under first-class postage and without a cent of cost to S-W Agents. The only thing we require of you is a list of desirable names in your locality, of the painters and property-owners you are most anxious to sell. We take care of the rest.

Remember that S-W Varnishes are of equally as high quality as all other S-W products. We have a storage capacity in excess of a million gallons which is a great aid to insure the proper aging and testing of varnishes for all varieties of modern requirements.

Is there any good reason why you should not have the S-W Paint and Varnish Agency in your locality?

THE SHERWIN-WILLIAMS CO.

ARSENATE

of Lead is rapidly coming forward as a useful article for all who wage war against leaf-eating insects and parasites which thrive upon the products of our fruit trees, berry bushes, orchards and gardens generally. The application of ARSENATE OF LEAD has only come into general use at a comparatively recent date and the hardware trade, especially in the fruit-growing districts, will do well to see that their stocks are well assorted to meet the requirements of purchasers who will undoubtedly be on hand early in the season. Careful tests have been made which show that the action of the ARSENATE OF LEAD is most destructive to the pests, and, consequently, beneficial to the gardener or husbandman. Its general employment is apparently only a matter of a very short time. ARSENATE OF LEAD will not replace Paris Green, which is so well understood in its application to the potato vine, but will prove a valuable complementary aid to this popular destroyer of the farmer's foes. Dealers should impress upon their customers that although the ARSENATE OF LEAD is white and has an innocent appearance it is very poisonous and should be kept out of the reach of children. It is made by the CANADA PAINT COMPANY and sold in 1-lb., 2-lb. and 5-lb. bottles and the larger quantities in

WANTED—Experienced salesman for plumbers' and steamfitters' supplies, including boilers and radiation. Good opening for man who thoroughly understands his business and can show results. State age, experience and salary expected. Apply J. H. ASHDOWN HARDWARE CO., Ltd., Winnipeg. (15)

PATTERN DRAWING

SHEET METAL WORKERS — Our Home-Study Course on Pattern Drawing teaches you the method of drawing patterns for anything required in sheet metal, whether in a small tinsmith shop or a large cornice and skylight factory. This course is adapted especially for home study, and is clearly worded and illustrated. It takes you behind the scenes and shows you that what has appeared mysterious is simplicity itself. The complete course, comprising 40 blue prints, 60 sheets of instructions and necessary drawing instruments, sent to any address in Canada on receipt of $20.00. Club rates, 3 to 5 members, $17.50 each; 5 members and over, $15 00 each. Address, THE SHEET METAL SCHOOL, Box 419, Galt, Ontario. (13tf)

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

MARINE VARNISHES

We put the same quality into our Marine Varnishes as we do into the rest of the DOUGALL VARNISHES.

Dougall's is not the only Marine Varnish made, but it is the only one that will stand the marine test.

If your customer has ever used Dougall Marine Varnish he will be sure to ask for it again; but if he just asks for Marine Varnish, you can feel perfectly safe in giving him Dougall's, for there is no Marine Varnish on the market that can give him the same satisfaction.

Our Motto: "Varnishes that Last Longest," applies to this line, too.

Do You Know the Main Facts About Our Two-Coat Combination Standard Turpentine Shellac and G. P. Hard Oil Finish?

Send for our sample on wood and judge for yourself.

Note particularly the remarkable *surfacing* and *holding up* or supporting properties of *Standard Turpentine Shellac.* It dries semi-flat, does not raise the grain of the wood and requires little or no sandpapering.

A single coat of our *G. P. Hard Oil Finish,* on account of its intrinsic body, produces over *Standard Turpentine Shellac* a really remarkable finish, as demonstrated in our *Two-Coat Combination.*

For first coating open grained woods, also paste filled woods, nothing equal's *Standard Turpentine Shellac.*

All Standard Varnish Products are manufactured by International Varnish Co., and sold only in Full Imperial Measure Cans.

Paint and Varnish Removers.

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	"Taxite"
International Varnish Co, Ltd., Toronto, Canada	"Klensa"
Pratt & Lambert, Inc., Bridgeburg, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapco"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	"Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

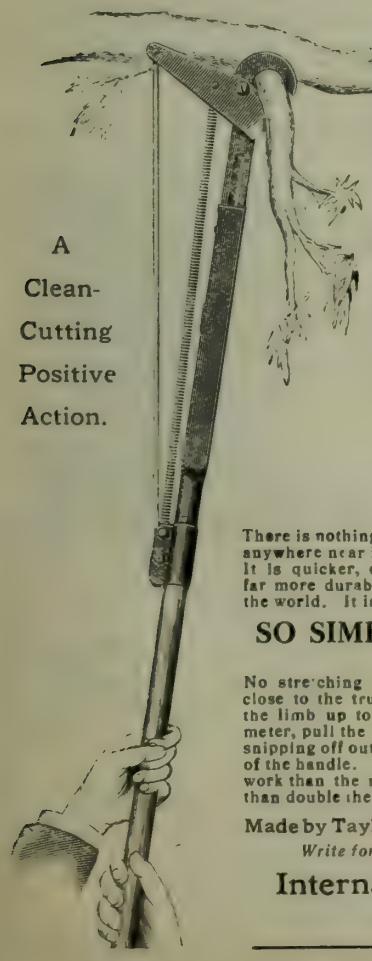
GREAT GUNS

The position held by Tobin Simplex Guns to-day as sporting weapons has been won only by the merits of the guns themselves. They have given sportsmen complete satisfaction and the demand is constantly increasing.

The "why" is simply because:—

The Tobin Simplex is the strongest light gun and the lightest strong gun.

The Tobin Simplex has frame and action parts made from steel drop forgings—sears, springs and locking bolts of tempered spring steel.



The Tobin Simplex is accompanied by a "Money Back" guarantee, which *assures* satisfaction.

Write us for catalogues and information. Stock up with a reliable gun.

Tobin Simplex Guns

WOODSTOCK ONTARIO

A Clean-Cutting Positive Action.

Every Fruit Grower needs a

"Kansas" Pruning Knife

(Improved)

There is nothing "just as good"—there is nothing anywhere near in the same class as the "Kansas." It is quicker, cleaner, far more convenient and far more durable than any other pruning knife in the world. It is

SO SIMPLE, SO POSITIVE
in its action.

No stretching or climbing. To take a limb off close to the trunk, simply place the hook around the limb up to one and a quarter inches in diameter, pull the handle and the work is done. For snipping off outlying twigs, pull the string instead of the handle. It will do five or six times quicker work than the next best knife and will give more than double the length of service.

Department of Railways and Canals, Canada.

ONTARIO—ST. LAWRENCE CANALS, CORNWALL CANAL.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Canal Office Enlargement," will be received at this office until 16 o'clock on Friday, April 21.

Plans, Specifications and Form of Contract to be entered into can be seen on and after April 3, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Resident Engineer of the Ontario—St. Lawrence Canals, Cornwall, at which places form of tender may be obtained.

Parties tendering will be required to accept the fair wages schedule prepared or to be prepared by the Department of Labor, which schedule will form part of the contract.

Contractors are requested to bear in mind that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted bank cheque for the sum of $500 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work, at the rates stated in the offer submitted.

The cheque thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfilment of the contract to be entered into.

The lowest or any tender not necessarily accepted.

By order,
L. K. JONES,
Secretary.

Department of Railways and Canals,
Ottawa, March 30, 1911.

Newspapers inserting this advertisement without authority from the Department will not be paid for it. (15)

DEPARTMENT OF RAILWAYS AND CANALS, CANADA.

ONTARIO—ST. LAWRENCE CANALS, FARRAN'S POINT CANAL.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Improving Lower Entrance," will be received at this office until 16 o'clock on Friday, April 21.

Plans, Specifications and Form of Contract to be entered into can be seen on and after April 3, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Resident Engineer of the Ontario—St. Lawrence Canals, Cornwall, at which places form of tender may be obtained.

Parties tendering will be required to accept the fair wages schedule prepared or to be prepared by the Department of Labor, which schedule will form part of the contract.

Contractors are requested to bear in mind that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted bank cheque for the sum of $9,000 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work, at the rates stated in the offer submitted.

The cheque thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfilment of the contract to be entered into.

The lowest or any tender not necessarily accepted.

By order,
L. K. JONES,
Secretary.

THE CONNOR BALL-BEARING WASHER

With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled. And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.

Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

THE "NIAGARA" SPRAYER

Especially adapted for the purpose of fumigating hospitals and sick rooms.

DID YOU GET YOUR COPY OF OUR 1911 SUMMER CATALOGUE?

THE "NIAGARA"
Capacity 1½ pints.

WRITE AND LET US KNOW. IT MAY HAVE GONE ASTRAY.

The action of this sprayer is such, that after the down stroke of the plunger is completed, the vapor still continues to issue from the nozzle for some time. The result is a continuous discharge of spray, without the necessity of any increase in the force or the speed of the strokes on the part of the operator.

The tank can be quickly unscrewed for the purpose of filling and for clearing out of the suction tube, if it should get clogged.

FENN'S
Adjustable Post Hole Auger

holds undisputed pride of place as the fastest digging tool on the market, and for this reason alone is a splendid line to handle and recommend.

Moreover, it is simple in construction, stands abuse well, and has no castings to break or rivets to work loose. Blades are of highest grade steel bolted directly to standards, and the "Fenn" can be adjusted to dig different sized holes. Digs a full size hole clean to the bottom, and works equally well in any soil. Better send along for prices and fuller description of this splendid tool.

It is a line that sells readily and profitably. Write us to-day. Descriptive booklet forwarded free to enquirers.

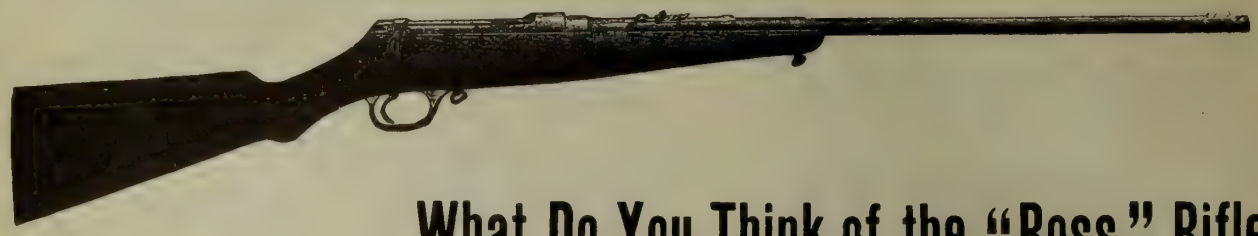
Selling Agents: ALEXANDER GIBB, 13 St. John St., MONTREAL

When you think of Metal Ceiling, think of "Galt."

Dealer, House-owner and Architect all favor "Galt" Art Metal Ceiling



Ernest R. Beckwith, C.E., architect on this job, says of the goods supplied:—

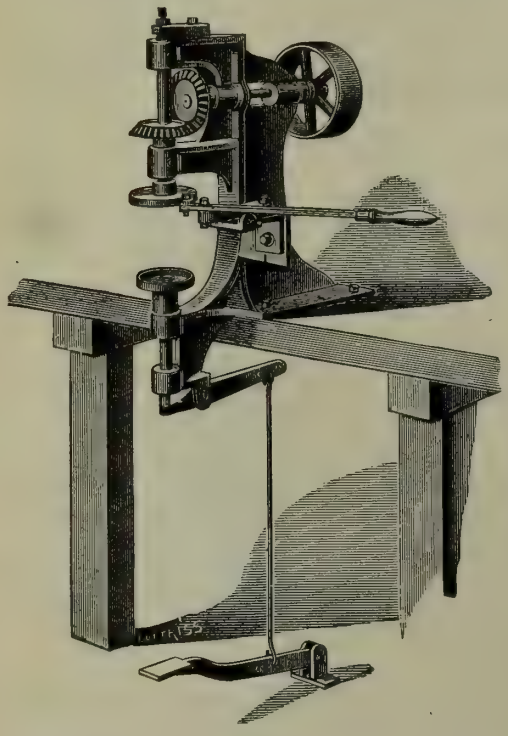
"Besides being one of the prettiest ceilings I have ever seen, it was exceedingly easy to erect. In fact, most of the work was done by unskilled labor owing to the regular tinsmiths being busy.

The special material made for the stage-front was accurate in detail and satisfactory in every way."

If you want to please your customer and his architect; if you want to build up a business in Metal Ceiling and if you want to make the most money from your metal ceiling work, send your orders and enquiries to

The Galt Art Metal Co., Limited, Galt, Ont.

What Do You Think of the "Ross" Rifle?



Sales increased 80% last year—mostly repeat orders.
Wherever introduced they score an immediate success.
The owner of a "Ross" Rifle would not exchange for any other make.
Dealers make good profits.
Supplies can be secured so promptly that a large stock is not necessary.
No trouble with duty.
The "Ross" Rifle gives a good profit to the dealer and complete satisfaction to the buyer.

PERFECTION AT LAST

The simplest and most efficient gasoline lamp in the world constructed upon new and scientific principles. A lamp that we guarantee and that guarantees itself through its very simplicity, ease of operation and utility. Absolutely nothing that can wear out or get out of order that cannot be removed and replaced without the use of tools, other than Nature has given, IN FIVE SECONDS.

A glance at the illustration will convince the most skeptical that we have at last solved the problem of a perfect

GASOLINE LAMP

Those who are using hollow wire gasoline lighting systems know to a certainty that the only place they ever have trouble is in the lamps. The tank, pump and wire tubing will last a lifetime.

There is only one wearing part—the generator. A simple twist of the wrist removes it and replaces it with a new one. An extra generator given with each lamp.

The IRONCLAD *Alarm*

"It Rings to Beat the Band."

IF we placed our IRONCLAD movement in an ordinary alarm case, the chances are it would *turn turtle* within a year. And if it lived to tell the tale, it would be to *tell a tale*—for it would get so *clogged* with dust, it could not tell the *truth.*

But it's CLAD in heavy IRON armor and it can't *keel over.*—It's stocky, sturdy, steady.—If it's *cleaned* every other year, there's *no telling* how long it'll last.

Packed 12 in a box with advertising matter. Dealers' names printed free on dials in lots of 24. Height 5 inches. Dial 2¾ inches. Weight 2½ lbs. Rings 35 seconds; can be shut off at will.

Stocked by 28 Canadian Wholesalers.

Have You Seen These

New "Yankee" Tools?

No. 1530 Hand Drill for holes up to 3-16 in.

Takes round shank drills. Has the famous Automatic Double Ratchet movement the same as our other "Yankee" geared Drills, so helpful in many ways especially at close quarters where only part turn of crank can be obtained. The wood Handle has magazine for drill points. A fine tool for metal workers, amateur mechanics, etc.

No. 130 Quick Return

Same tool as the No. 30 but with a Spring inserted in the Handle to drive the spindle back quickly, ready for the next push. A great advantage for overhead work or where only one hand can be used. Takes all the Attachments used in the No. 30.

No. 75 Push Brace

Bores holes up to ⅜ inches in hard woods and ⅝ inches in white pine, quicker and easier than a Bit Brace. Drives and draws screws—takes all the small tools and works in close quarters where a Bit Brace cannot be used. Bearing down on the Handle drives it with that quick and easy motion of the "Yankee" Spiral Driver.

They are catching the Mechanics.
Better let your Jobber quote at once.

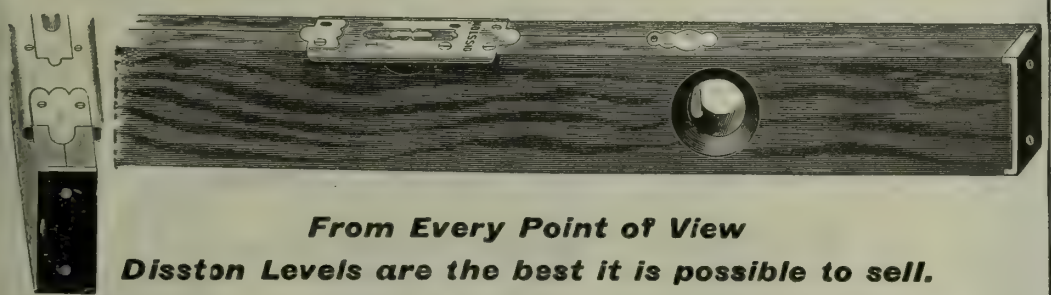
Just a few of the many patterns of Disston Levels

We carry a full line of Disston Levels, comprising many patterns and sizes



Disston Levels "are just as good as"---can be made. They---like all Disston products---are distinctive.

The stock is Best Grade Wood, well seasoned and accurately finished. The Glasses are made of finest flint glass. The Liquid cannot freeze. The bubble is unerring to the slightest variation. The Mountings are nicely finished and always closely and neatly fitted.

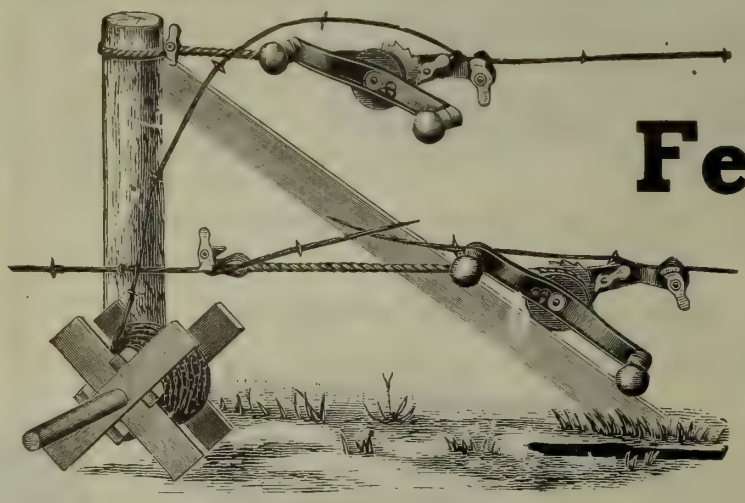
In a Word

A Disston Level is the kind of tool particular workmen of to-day like to use.

From Every Point of View
Disston Levels are the best it is possible to sell.

The Name Alone is a Guarantee of Quality

Disston Tools are known the world over--and most favorably known. The name of Disston associated with poor tools would be taken as a joke by mechanics and hardwaremen anywhere in Christendom; like oil and water, they don't (and won't) mix.



You can use this Disston reputation to your profit

Order early to insure Prompt Delivery

The Thos. Davidson Mfg. Co.
Limited

Montreal - - - Winnipeg

Fenwick, W. Va., June 23, 1910.

Henry Disston & Sons,
Philadelphia, Pa.

Dear Sirs,—Enclosed you will find check for the Crosscut Saws. Will mail you photo of cutting crew, and I will say the DISSTON CROSSCUT saw is the Best Hardwood and Hemlock Saw I have ever used, and I have cut timber all my life.

Yours truly, C. MARKLY

In the foreground will be noticed two logs, one of which is of the knurly or spiral-grained species, while the other is exceedingly knotty, showing two classes of timber which test the metal, temper and workmanship of saws more severely than any other known class, and as Disston Saws are successfully cutting this kind of timber, it is self-evident that they are of the highest quality in every respect, as confirmed by Mr. Markly's letter,

For Results Use Disston Saws.

(Manufacturers of Hardware Specialties for 25 Years)

Harvard, Illinois

Fig 386

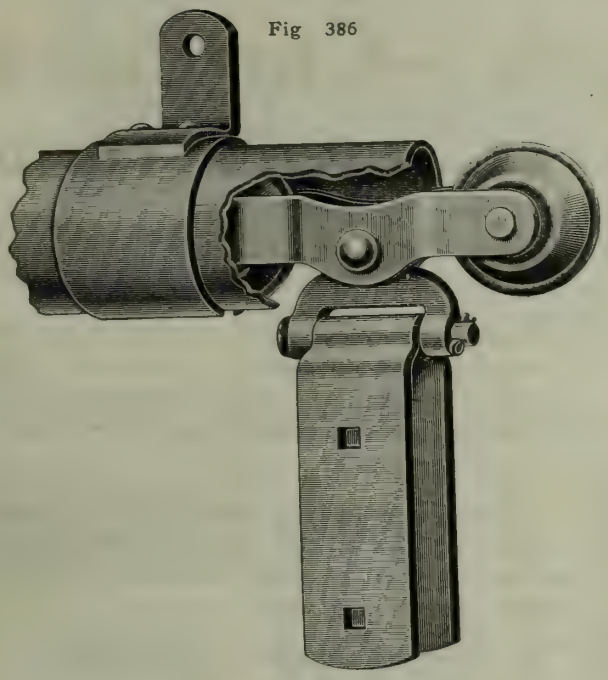

Fig. 404

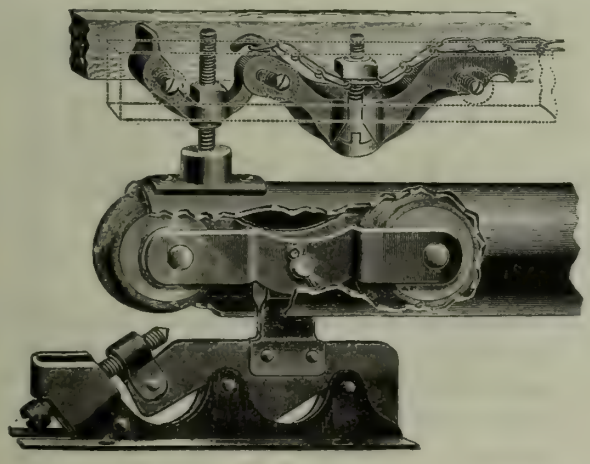

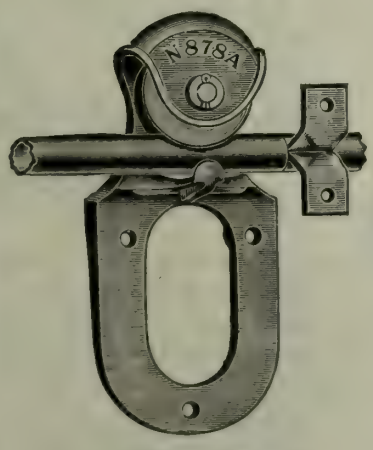

Fig. 28

Fig. 35

Front View

Rear View

The Cannon Ball Barn Door Hanger

Steel wheel, roller bearing, noiseless, tandem, flexible, bird-proof, waterproof, completely enclosed. The Track comes in 3-ft. sections, crated. 96 feet of track is packed in a crate. Can be put under the counter, making it convenient for stock. The Track Brackets are packed separately. Note that Cannon Ball Hangers run inside of the track, not outside.

"The Cannon Ball Beats Them ALL"

The Cannon Ball House Door Hanger

has two specially-formed rollers, which have steel bushings, covered with sole leather, making an indestructible wheel with wide tread and noiseless, being fitted with long roller bearings.

The Hangers are packed a full set or ½-set in a wooden box, neatly labeled. Ten full or ½-sets in a crate.

Cannon Ball House Door Track is made in lengths up to 12 feet, and is fitted with an Adjustable Wood Header, by means of which the Track is adjusted at the door opening with the use of a screw driver only.

"The Cannon Ball Beats Them ALL"

The 20th Century Barn Door Hanger

is finished in aluminum. The frame and hood of the hanger are one malleable piece, thus making the hanger strong enough for the largest doors.

The wheels have wide grooves and run on hardened steel roller bearings, reducing the friction to a minimum.

A lip projecting about 1 in. below the wheel makes it impossible for the hanger to jump the track.

20th Century Barn Door Track is put up in 2-ft. sections only, 100 ft. in a crate, making it convenient to stock right under the counter.

"The 20th Century Has No Equal"

Mackenzie Bros., Agents, Winnipeg and Calgary

Hunt, Helm, Ferris & Co., Manufacturers, Harvard, Illinois

Merchant—Clerk—Customer
ALL Need the PROTECTION Which Only a RECEIPT Affords

This Register tells you: 1—Total cash sales made by each clerk; 2—Total of your credit sales; 3—Total amount of money received on account, and 4--Total amount of money paid out. Has separate cash drawer for each clerk. Also secret adding counter tells you total amount of all cash taken in. Built to stand on floor or counter.

Issuing a receipt with every purchase protects the merchant against carelessness, mistakes and dishonesty—against disputes with customers about purchases paid for, amounts paid on account, etc.

Putting a receipt in every parcel protects clerks against suspicion, against the mistakes or carelessness of other clerks, and against misunderstandings with customers.

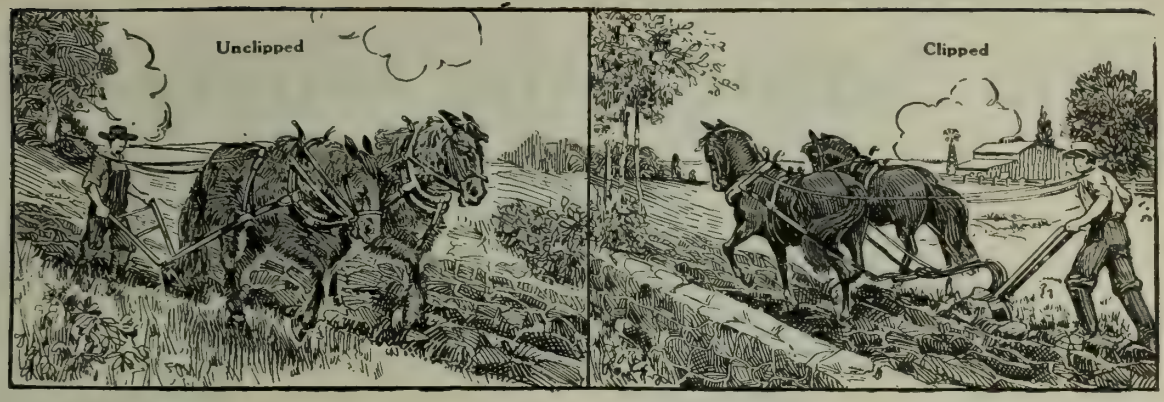
Protects customers, too. That's why

Successful Merchants Put a Receipt in Every Parcel.

Why don't YOU?

How can you hope to make a success of your business by following the methods of unsuccessful merchants? The difference between success and failure is simply a difference in methods.

Are you being influenced by the wrong kind of business men?



Why Aren't You Influenced By Successful Men?

They give every customer a receipt with every purchase. Why don't you? We'll send you a booklet showing you the best system—FREE

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Speaking of Stove Repairs

¶ Have you ever lost a regular customer, Mr. Dealer, just because you couldn't get repairs for his stove quick? Have you ever had to ask him to drive back into the country ten miles to see what the number of the stove was before you could supply the part he wants?

¶ GURNEY-OXFORD Dealers get away from this nuisance. With one complete set of firebox parts in stock, a dealer can at once satisfy any customer who has a 16, 18 or 20-inch Chancellor, square or with left-hand reservoir or with right-hand reservoir. He won't even have to ask the number. These parts will also fit the Quick Meal—a lower-priced range, but with identical firebox parts. We further improve this service by carrying stocks at

Hamilton, Montreal, Winnipeg, Calgary, Vancouver.

THE ALASKA FREEZER

"The freezer with the aerating spoon dasher"

Five Reasons Why the Alaska is the Best Freezer Made.

1. Its Aerating Spoon Dasher whips air into every particle of the rapidly freezing cream, making it light, smooth, delicate, delicious.
2. It makes the best sort of cream in record-breaking time—three minutes.
3. It is built to last a lifetime. Notice the details, such as the waterproofed pine tub, the completely covered gears, the weight of the metal parts, the quality of the cans.
4. It takes less ice and salt—and labor—than any other freezer.
5. It is fully guaranteed as to material, workmanship and mechanical operation.

Stimulated by ALASKA ADVERTISING—which is backed by the superior construction of the freezer—Alaska Sales will jump tremendously this summer.

You can do a large business with the ALASKA Freezer at a good profit. Let us send dealer's terms.

How to Get Results from Advertising

Money Spent on Newspaper Space Should be an Investment—Careful Study Necessary to Secure Best Returns—Planning a Lawn Mower Ad.—Some Current Hardware Ads. Received.

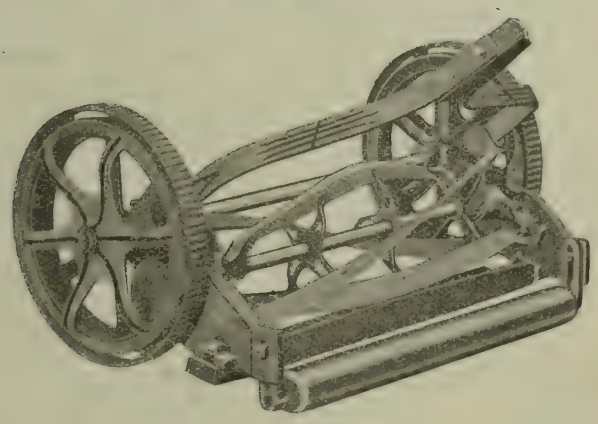
How to Get Results From Advertising.

Is it possible to tell beforehand, whether or not an advertisement is going to make a hit and pull big returns for the advertiser? Not absolutely. Some of the cleverest advertising managers on this continent, occasionally launch an ad. or a series of ads. which falls flat, and does not seem to create any impression on the purchasing public. On the other hand many ads. which have been tried out with the greatest misgivings on the part of the advertiser, have instantly made good, and started the dollars rolling into the store or office as the case may be.

So, to a certain extent, advertising still possesses a certain element of chance, despite the progress it is making towards becoming a science. But the average retailer need not worry on this score. This problem is not so complex as that of the manufacturer who has a national business and spreads his publicity campaign over the whole country. If he knows and closely follows a few of the fundamental principles of advertising, he will scarcely fail to gain a good measure of success.

A Concrete Example.

To illustrate what we mean by fundamental principles, we are going to describe the various steps which should be taken in writing an ad. for a retail hardware store. In order that it should be as practical as possible, we are choosing a lawn mower, as the subject, and any of our readers are at liberty to use the whole or any part of this advertisement in their own campaign. The lawn mower, too, is a particularly seasonable article, as lawns will soon require attention, and it is time to get the consumer thinking on the subject.



In a previous article, it was suggested that the ad-writer must put himself, mentally, in the position of a buyer, if he wishes to make a convincing appeal. It is in this way only that he can put up his proposition in such shape as to influence his prospect, and answer possible questions, objections or arguments that might be advanced.

The ad. writer then will suppose himself to be the possible buyer of a lawn mower. To what class does he belong? What kind of people do not own lawn mowers and yet require them? Well, possibly he has just taken up house during the fall or winter, and has never felt the need previously; or perhaps he has been using his neighbor's lawn mower, as so many people do. Ah! there's an idea for a catchy read-line: "Don't Borrow Your Neighbor's Lawn Mower!" That will strike home, so we will make use of it, having first selected a cut of a lawn mower, to draw attention to the ad.

How the Customer Looks at It.

The ad-writer, mentally disguised as the prospective purchaser, will muse thusly: "I mustn't borrow Smith's lawn mower this season. It makes me feel cheap. I'll have to buy one of my own, and there are lots of things about

Don't Borrow Your Neighbor's Lawn Mower

Buy one of our ——— Mowers, and save your self-respect.

The ——— Lawn Mower is light in weight, and is the easiest running machine we know of. That is because of the ball bearings, which also make the Mower practically noiseless.

The ——— Lawn Mower is built in a factory where they have specialized for years on mowers that cut clean and hold an edge. High-class material and workmanship are used in its construction and it is therefore durable—will stand up to hard and continuous work with little expense for sharpening and repairs.

Look at the Cut!

Is it not a good-looking lawn mower? It is finished in red and gold, the handle being of ash, handsomely varnished. You'll feel proud of this Lawn Mower.

The mower illustrated, is 14 inches wide, with 10-inch wheels, and sells at $——. But we have sizes and prices to suit everybody.

Come in and let us talk Lawn Mower with you!

JONES BROS.

THE RIGHT PLACE FOR HARDWARE

Smith's lawn mower, that I'll not stand for in mine."

"Smith's runs too hard hot work on a summer evening. It doesn't cut clean leaves whole rows of long grass standing. It is so noisy that it arouses the whole neighborhood, when Smith gets up at six o'clock to cut his lawn. It is a clumsy-looking machine—mine must have some appearance. Wonder what a good lawn mower would cost?"

It is safe to say that some such mental process as this would be experienced by any man of average means and common sense, who happened to be in the market for a lawn mower. By piecing together these objections to Smith's machine which the prospect has been borrowing, the ad. writer will have a pretty good idea of the arguments which must be advanced in order to sell this prospect.

He wants an easy-running machine which will cut the grass—not chew it. It must be free from noise and have an attractive appearance. Finally, the price must be right.

These ideas will furnish a pretty good foundation upon which to build an ad. It only remains to put them together in some logical way so as to make an enthusiastic, detailed and accurate description of the lawn mower or mowers which are offered for sale. The advertisement which is reproduced on this page suggests a method of doing this.

The young ad. writer must not feel discouraged, if he finds that it consumes a lot of time to plan and execute one single advertisement. It is bound to do so, and, even after he has begun to acquire the ad.-writing "knack," he will require to put plenty of time and thought on his subject, if he wants to make the best of the opportunities that printer's ink presents to him.

Hon. Sidney Fisher

Minister of Agriculture

has stated that there is more land wasted by old Rail Fences than would pay for erecting new, modern,

Wire Fences

We Can Supply You With the Best.

Ad. No. 2.

It is not good policy to rush the copy over to the printer's, as soon as it is written. It should be carefully studied and viewed, in an effort to improve upon it. The ad.-writer should again put himself in the position of a prospective buyer, and go over that ad. very searchingly to see whether it really appeals to him as a buyer. If it does, the next step is to have it set up in type. If it does not, there must be some weak points in the copy. Where are they? They must be hunted out and strengthened, before the printer gets possession of the copy. No general rules can be laid down for this process of improving the copy. If it is not strong and convincing the ad-writer must ask and answer the question: "Why?" Then he will have the key to the situation, and his success as an advertising man will largely depend upon his ability to carry out a correct analysis, in such a matter as this.

Some Hardware Ads. Reviewed.

In this week's issue, Hardware and Metal reproduces two representative hardware advertisements, and an extract from another. These may be taken as types of three distinctive styles of newspaper advertising now current in the trade.

Ad. No. 1 is headed "Code's Hardware News," which is along the line of advertising that has recently sprung into favor among hardwaremen. Some specimens have already been reviewed in these columns, but the present sample does not carry out the idea to the same extent as others which have come up for attention. In fact, the headline is the only part of the ad. which is suggestive of a news column or a miniature newspaper. The balance goes right ahead like the ordinary ad. so that the headline seems to be a little incongruous. It should either be dropped, or a more newsy style of copy writing should be adopted, so that the whole might be harmonized.

The ad. itself is much above the average. In the first place, a cut is used, which makes the subject more vivid, in the eyes of the reader. In the second place, prices are quoted which, in itself, is an important part of a real advertisement. In the third place, a strong point is made of the claim that the oil stove in question, will save 30% of the fuel bill. The opening sentence: "Mr. Customer, do you intend buying an oil stove," detracts from rather than adds to the strength of the ad. "Buy an Oil Stove This Season," would have more of the element of suggestion in it.

Another point is that the customer's probable main objections to buying an oil stove, are not answered. These have reference to safety and odor. A good many people are prejudiced against the use of oil stoves because they consider them unsafe, while others object to the kerosene odor caused by some of the cheaper oil stoves. The advertiser should have reassured his readers on these points.

A Good Argument Outlined.

No. 2 is extracted from a good full-page ad. inserted by R. Hawkins, of Smiths Falls, in his local paper "The Rideau Record." It outlines a good argument in favor of wire fencing—that the superfluous space occupied by an old-fashioned rail fence, if put to proper use, would more than pay the expense of putting up a new wire fence which leaves every inch of ground available. The fact that this statement was made by the Minister of Agriculture for Canada adds weight in appealing to the farmers. The argument should have been more fully developed, so that it might be obvious to all who read it.

Our Page for Hardware Clerks

WHEN YOU'RE SELLING A BICYCLE.

By Victor Lauriston.

There was a man once tried to sell me a bicycle. It was back in those glorious days when the old C. W. A. was a power in the land. This chap was obsessed with the notion that I wanted a wheel, and he strove at every opportunity to convert me to his way of thinking. Every day or so he waylaid me, and talked sprockets and chains and spokes and tires till he made me dizzy.

The odd thing of it was that I never bought a wheel from him. I never even thought of buying one till a friend stirred me up by narrating his experiences on a cycling tour.

All that was years ago. But with the return of dust and spring sunshine and good roads the lesson is just as timely as it was when the bicycle was new. The lesson is : that the vital thing for you to consider in selling a bicycle (or anything else for that matter) is, not "Why am I going to sell a bicycle to this man ?" but "Why is this man going to buy a bicycle from me ?"

The average bicycle buyer is not an expert. He doesn't know the names of the various parts, nor does he understand how they work in together. What he sees in a bicycle is, not a collection of small items, but a single large item —a more or less harmonious whole.

Here and there a buyer knows bicycles. To such you can talk bicycle technology, and make a hit. He will appreciate your expert knowledge, and be guided by the information you impart—that is, if you are as well informed as he is.

But the ordinary buyer doesn't buy from the expert standpoint. He purchases a bicycle for a particular purpose. He intends to ride to work, or to race, or to take little trips now and then through the country. He seeks one or more outstanding qualities in his wheel—a bit of machinery that will run smoothly, or wear well, or pedal along through life with the minimum of repairs.

Hence, when you give him your bicycle knowledge, give it to him in terms that he will understand.

Translate your spokes and rims into terms of endurance, your tires into terms of easy running comfort, your gearing into terms of speed. Transform the steel and wood and rubber of that bicycle you're trying to sell into a living, moving picture that will appeal to the fancy.

Speak of amateur photography and your hearer will instantly think of the kodak. That is the result of advertising. Yet the kodak is not advertised in technical terms of lenses and shutters and dimensions, so much as in terms of the results it will bring and the pleasure it will give. The idea of possessing all baby's pictures—or bring home souvenirs of pleasant jaunts—of having infallible evidence in support of your stories of hunting prowess—these are not technical facts, but pictured results. They tell a man, not what the article is, but what it will do for him.

It's just the same with that bicycle you want to sell. Next time you're advertising "1911 Model Bobby-Boy Bike, Just In," or next time you're talking technicalities to a prospective buyer, just stop and think. If you do, you'll set the new precedent of talking results ; of telling the customer, in person or by newspaper proxy, of the pleasure the wheel will bring, the time it will save, the joy of a quiet spin along a good country road, the quick home coming after the day's work is done.

There's not a school child on earth but will side-step the multiplication table in order to look at a picture. You'll find your customers are built on pretty much the same plan. Drop your multiplication table salesmanship, therefore, and try the picture idea for a day or two. You'll like the change.

KEEPING ONE'S MIND ON BUSINESS.

Where a good many clerks fall down—and fall down badly—is in properly applying themselves to business, during business hours. Arrived at the store in the morning. their first duty appears to be, to discuss the events of the previous evening, with their fellow clerks. If there has been a hockey match, it must be thoroughly threshed out, and discussed from every possible standpoint, with all due reference to what might have happened, if——.

Perhaps there has been a dance, in which case it is very necessary to compare programmes, and discuss each other's various partners.

It makes a very bad impression on a customer to find, on entering a hardware store to make a purchase, that the clerks are congregated in the back of the store, eagerly discussing topics which are so foreign to their work. In some cases, this is carried to such an extreme that the customer is made to feel almost like an intruder, and he decides then and there, that he will not repeat the visit.

Hardware clerks should take recreation, and plenty of it, for it is just as true as ever, that "All work and no play makes Jack a dull boy." But they should never allow their hours of pleasure or exercise to intrude upon their business. They cheat both their employer and themselves, when they spend a great part of the morning discussing the events of the previous evening, and of the afternoon in planning for the coming evening. It is the clerk who knows how to mix business and pleasure in the right proportions, who is most likely to succeed.

CLERKS NOW CONTROL STORE.

Almost constantly, we are hearing of hardware clerks who are opening a store on their own account, or succeeding to their employer's business, or being received into the partnership. This all proves that hosts of opportunities are awaiting the hardware clerks who are wide-awake to them.

The latest development in this line which has come to our notice, has taken place in Hensall, Ont. A few weeks ago Hardware and Metal chronicled the fact that the old hardware firm of J. & C. McDonell, of that place, had been burned out. The firm did not reopen, but two of their clerks, Messrs. Bonthron & Drysdale have now gone into business, handling all the lines which had formerly been handled by J. & C. McDonell.

A representative of Hardware aod Metal called on Bonthron & Drysdale a few days ago, and found them occupying a very neat and well-stocked store. Besides hardware they carry a full line of furniture, and do an undertaking business.

Both partners in the new firm are young men of good business ability, and they have bright prospects of success.

CULTIVATE GOOD PENMANSHIP.

Remember that there can be no excuse for a man to write so badly that the customer has trouble in deciphering the bill. Write clearly and make your figures so distinguishable that no doubt can arise. These things are little, maybe, but it is the small things in life that go to make up the sum total of big things. Don't imagine it would not be worth while to put in a little time o' nights at home with a copy-book. Other men—now big men in your business,—have done it. They consider those nights some of the best spent in their lives. Don't forget that nothing is ever really wasted.

WHAT CLERKS ARE DOING.

J. T. Brock has returned to Lumsden, Sask., accompanied by his bride. He has accepted a position with Donald and Thompson, hardware dealers and plumbers.

Mr. Schmidt, manager of the Blackie Hardware Co., Blackie, Alta., met with a serious accident while out driving. His horse ran into a barb wire fence, throwing him out. He was badly cut by the wire and will be laid up for some time.

Milton Wilson, who has been in the employ of the Brandon Hardware Co., during the winter, is returing to his home in Kilowna, B.C.

John Robinson has accepted a position in the hardware store of L. H. Phillips, Cartwright, Man.

BIG FACTOR IN SUCCESS OF RETAILERS

Few retail merchants are, to-day, satisfied to conduct their business according to standards which have been set up in their own experience, or in that of the few competitors with whom they are in personal touch. The majority of the trade have long since recognized that, in the ably edited trade paper, they have at their service one of the biggest factors tending towards success in merchandizing.

This fact has been brought home to us very forcibly by a letter which has been received this week, from S. Schwanz, a progressive hardware dealer of Rocanville, Sask. In the course of this letter, which is published in another column, Mr. Schwanz states that he and his clerks had all received such satisfaction from reading Hardware and Metal that they generally all wanted to read it at the same time. The result is that Mr. Schwanz has subscribed for his clerks as well as for himself, so that all may be at liberty to read the paper at their leisure.

This is an example which should be followed by every dealer who employs a staff of clerks. It would not only tend to increase the spirit of loyalty in the clerks, but would also increase their efficiency as salesmen, stockkeepers and all around business men.

Some weeks ago the writer was in conversation with the head clerk in a fine large hardware store about sixty miles north of Toronto. Speaking about advertising he mentioned that the proprietor had asked him to take part in a recent advertising contest which had been held by Hardware and Metal. He, however, did not feel competent, as he had not had the opportunity of studying the subject. Only one copy of Hardware and Metal went into the store, and the proprietor took that home with him to read on Sunday, generally forgetting to bring it back. That clerk was an excellent window dresser, was enthusiastic over his work, and a little encouragement by the proprietor would have been amply repaid. It would have been an excellent investment for the proprietor to have this clerk read Hardware and Metal every week.

Everyone connected with a hardware store should be thoroughly conversant with market conditions; should familiarize himself with methods of buying, selling, taking stock and displaying goods, as adopted by merchants in his line in widely divergent parts of the country; should especially study advertising, which alone, has made the catalogue houses a great mercantile power.

All of this information and much more is given in the columns of a live weekly trade paper such as Hardware and Metal admittedly is. No hardware merchant can so easily keep in touch with the progress of his trade, as by reading its columns every week. It is one of the big factors in the success of those dealers and clerks who read it regularly.

THE LIGHTING SUPPLY TRADE.

It is not so many years ago that electric and gas lighting were found only in the homes of the very well-to-do. To-day homes without either one or the other are the exception rather than the rule. Even the smallest towns now boast both electric and gas plants and consequently the privilege of using the light thus supplied is within the reach of all. With this change in methods, the importance of lighting fixtures has grown rapidly and to-day they have become a profitable branch of every progressive hardware store.

In many hardware establishments, fixtures and electrical supplies are not handled, probably for the reason that the trade has been allowed to drift into other hands. To neglect the opportunity presented of driving a profitable business in that line, is to make a very serious mistake. Fixtures and lighting supplies of all kinds are logically a hardware line. The hardwareman has always handled oil and spirit lamps; he supplies stoves and furnaces for heating; why, then, should he not complete his claim to the position of household outfitter by carrying and installing fittings for gas and electricity?

The present is a good time to make a start. In the spring there is a brisk demand for new fittings, incidental to the general renovation which follows housecleaning. It is within the power of every hardware dealer to secure a share of this trade.

MERCHANTS WHO DISHONOR DRAFTS.

One of the most annoying features in the financial management of a manufacturing or jobbing business, is the manner in which so many retailers persist in returning drafts, or in dishonoring them when they fall due, without consulting with the drawer.

The collection of accounts would be a very complicated and expensive procedure if it were not for the facilities afforded by the banks for this purpose. The great majority of business houses who have a large number of accounts on their books much prefer collection by draft to any other existing system, and it has come to be almost universally adopted.

The passing of a draft on a customer, in some isolated cases causes offence, but this is quite unreasonable as it implies no more lack of confidence in him than merely sending him a statement. It should be treated with ordinary business courtesy and if the terms and amount are correct, it should be accepted and honored at maturity.

If, on the other hand, there is some error in the draft, the proper thing to do is to request the bank to hold it and communicate at once with the drawer. Should the bank refuse to hold it, the reasons for non-acceptance should be endorsed on the draft and returned through the bank. At the same time a letter should be written the firm, explaining the circumstances more fully.

It is no doubt through sheer carelessness that many merchants neglect these little considerations but the drawer is often caused trouble and inconvenience as a result of this carelessness. If the retailers who are in the habit of disregarding drafts would use a little more consideration, they would save worry in a lot of hard worked collection departments.

KEEPING ABREAST OF TIMES.

It is noteworthy that the demand from retail dealers for vacuum cleaners has shown a marked advance this spring, pointing to an increased desire on the part of the public for this latest addition to the utensils of domestic sanitation. New ideas take hold rapidly nowdays. The luxury of yesterday is the necessity of to-day. People are quick to grasp the possibilities and to enjoy the benefits of new things. Consequently, they have come to realize that it is much more sensible and effective to let a machine do the housecleaning than to have the work done laboriously as of old by one-broom power.

But have hardwaremen as a whole realized fully the importance of meeting the public demand in this respect? There are many dealers still who do not carry vacuum cleaners. The same inertia is displayed in countless other directions. The vacuum cleaner is not the only new article on the market; it is but one in many. Man's ingenuity is continually bringing out improvements on the old established things and the public is not slow to adopt them. It is, therefore, necessary for the retail dealer to keep abreast of the times. He must keep in touch with the advance in ideas and be prepared to supply any demand that may arise. This applies particulatly to the hardwareman, the scope of whose business is almost unlimited.

INTERESTING TURPENTINE SITUATION.

After a prolonged period of unprecedented advances, during which the price reached the hitherto unheard of figure of $1.40, turpentine has begun to recede. It might almost be said that the bottom has fallen out of the market, so sudden and sharp has been the reduction in price. It is difficult to say just what the prevailing quotation is at time of writing but the figure most commonly quoted is $1.20, thus showing a decline of 20 cents in two weeks.

The decline in price has been due to the appearance of new stock on the market. Anxiety to secure the high price led to the market being loaded with new turpentine and, as a natural result, down went the price. The eagerness was then transferred to the buyers, who had previously been refusing to buy at all or had purchased just enough from time to time to satisfy immediate and pressing needs. When the slump came, they literally scrambled for the goods at the low price, the demand presenting a most striking contrast to the apathy which had prevailed before. It is now deemed probable that the activity of the buyers will check, temporarily at least, the downward trend and possibly cause a slight advance for the next week.

OUR ARTICLES ON ADVERTISING.

As advertising has been the great offensive weapon which has been used to extend the operations of catalogue houses, so it is now becoming one of the greatest defensive weapons in protecting the local dealer from the encroachments of mail order competitors.

Hardware and Metal is publishing a series of articles on advertising, which are designed to improve the publicity methods of Canadian hardwaremen as a class, and, already, many readers have expressed their appreciation of the services thus rendered by this paper.

It is our aim to make these articles so intensely practical that no one who reads them can fail to benefit from them. To that end, the co-operation of our readers is invited. They are asked to clip their advertisements appearing in their local papers and send them to Hardware and Metal for review.

This does not mean that they will be simply criticized. That is a very easy thing to do. What we will do, however, is to commend the strong features, point out the weak ones, and recommend such means of strengthening them, as occur to the editor from his many years of practical advertising experience. Our criticisms will be constructive rather than destructive, and our readers are cordially welcome to the benefit of our advice.

POINTED EDITORIALS.

There are several score farmers in your vicinity needing wire fencing at the present time. How many orders have you filled?

Why not secure a share of the large profits which go to the "five, ten, twent" stores? It lies within the power of every hardwareman to do so.

The public drinking cup is being forbidden in many cities. Now is the time for some hardwaremen to invent a convenient kind of cup, which all could carry around with them.

Guelph intends to give the members of the Ontario Retail Association a welcome next year quite in keeping with the name of the city, insomuch as it will be "royal" in every respect.

Winter is beginning "to lag superfluous on the stage" in the opinion of every hardwareman. It is time that it packed up and left to give place to a more agreeable, and business bringing, season.

No depression in the United States metal market can now disturb the activity which prevails here. Canada's industrial expansion is so great that even a temporary setback is highly improbable.

Paint is moving fast nowadays. People seem to be awakening to the fact that it is one of the best kinds of insurance known. It insures against exposure, cold, heat and wind and the ravages of Father Time.

Tin has continued the "uneven tenor of its way" during the past month. On the London market the price has varied from £193 to £173 and back again to £191 in the course of a few weeks.

It is a good idea to houseclean the store at this season of the year. A coat of paint on the front will help a lot and the vacuum cleaner will soon dispose of the dust and dirt, which has accumulated in the store. Neatness is next to aggressiveness in business as a means of success.

After a protracted upward climb, during which it has never once wavered, turpentine is at last on the "downward path." It has certainly broken all records to date, but there are some who believe that the situation has not yet been exhausted of all possibilities and that turpentine still has a few unlooked for developments to present.

The writer saw a splendid window display of tools in an Ontario store the other day but in order to get a glimpse of it, he had to look over a rampart of brooms, mops and step ladders which hedged in the glass. How many passers-by would see anything but the row of brooms, et al? The window might just as well have been empty for all the good it was doing.

Lighting Goods Paid From the Start

The Experience of Westwood Bros., Toronto—They Have Worked Up a Good Business in Three Months' Time—Why Other Hardwaremen Should Handle Fixtures and Supplies—Western Dealer Adopts Good Display Methods.

There are manifold advantages in handling lighting fixtures and supplies in connection with the hardware business. It enables the hardwareman to cater more fully to the public as a home outfitter. It brings new customers and it keeps old ones from going elsewhere for these supplies. And yet many dealers hesitate to take up this line, harassed by doubts as to their ability to handle it and fearing to find it not financially successful.

That there is no necessity for doubt and hesitation is the testimony of Westwood Bros., Queen street west, Toronto, who started to sell lighting goods for the first time three months ago. They took the plunge with some degree of hesitation, as the big departmental stores have largely controlled the lighting fixture trade in Toronto for the past few years. It looked like a stiff proposition but they were impelled to take up the goods by desire to complete their outfitting facilities. They do heating work, plumbing, gas fitting and carry a full stock of hardware. All that was required, then, was to sell and install lighting fixtures; and this they decided to do, in spite of the opposition which they knew they must encounter. As an added inducement they saw that the advent of Niagara power would inevitably increase the demand for electric goods.

Westwood Bros. have now carried the new department for three months and the results have far exceeded their most sanguine expectations. They have already worked up a good trade and have turned over a neat profit. In addition to this they have made many new customers, who are dealing with them for hardware as well.

"We find that it pays to carry an experienced electrician," said E. B. Westwood, to a representative of Hardware and Metal. "He looks after this end of the business entirely and we have had plenty of work so far to keep him busy.

"One objection that we have heard urged to going into the fixture business is that the store needs electric power, in order to show the stock to advantage. We haven't the power in yet and it does not seem to interfere with our sales to any extent. Any hardwareman who has kept out of the business on account of his lack of electric power need hesitate no longer. Possibly, more money could be made with electric light in the store. However, we have been perfectly satisfied so far."

Combination Lights.

Westwood Bros. have found that the most profitable line of all is the combination variety. In cities and towns where both gas and electric light are available, the combination fixture is very much in vogue. This is particularly true in places where the electric current is liable to interruptions.

They have also found that electric irons, toasters, etc., find a ready sale nowadays. People are beginning to appreciate the ingenious household conveniences which electricity has made possible.

Displaying the Fixtures.

It is not necessary to effect a rearrangement of the stock in order to accommodate lighting goods in the store. It would be better if it were possible to use a certain part of the store entirely for the display of fixtures and electrical novelties, but few merchants can afford the space. Westwood Bros. have not done so but will probably arrange to house the goods separate when they can do so without displacing any other stock. The chief advantage in having all the fixtures together is that customers can look the stock over easily and compare different kinds more readily.

Effective Display Measure.

A novel device was adopted by a Western Canadian hardwareman recently. At the back of his store the floor was raised several feet. Half of the elevated section was used as an office. The other half he had fitted up as a fixture show room. Both electric and gas fixtures were installed and connected up so that the light could be turned on at any time. In this way it was possible to show the customer exactly what the effect would be when the fixtures were in use.

Now is the Time.

At the present time, the lighting trade is bound to be brisk. Spring house cleaning operations have revealed the fact in many a household that globes are cracked and that the fittings need to be replaced. When the home is being tidied from top to bottom, the housewife is not likely to allow dusty and imperfect fixtures to remain, thus putting at naught the good work done elsewhere. There is, in consequence, an inevitable demand for new supplies.

The same condition applies with regard to oil and spirit lamps. In the early summer months, summer cottages are opened and the exodus from the cities begins. When man goes on a vacation, he is only too pleased to get away from civilization and all that it means. He desires to go where elevators and push buttons are unknown. Consequently, you do not often find a summer house where electric lights or gas is used. The primeval oil lamp is brought into requisition for use in cottages, club houses, boat houses, etc. Consequently, there is a fairly brisk demand for lamps, beginning about the present time, which the hardwareman should prepare to meet.

Electrical Accessories.

There is a long list of electrical goods and accessories which any hardwareman could handle with profit. Among the different lines might be mentioned bells, push buttons, irons, toasters, dry and wet batteries, knobs, rosettes, cleats, switches, drop cords and light bulbs. Goods of this description carry a good profit and are not hard to handle. They can all be stored conveniently on the shelves and can be sold by any member of the staff.

Monthly Meeting of B.C. Association

Twenty-Eight Members Present and Important Matters Discussed—Setting Retail Price on Sash Weights—Members Anxious to Tender on City Supplies.

Vancouver, B.C., April 19.—The last monthly meeting of the B. C. Hardware Dealers' Association was the best yet held, 28 members being present, and all taking a keen interest in the discussions. Topics bearing on the trade were taken up and action taken. Among those present were: President H. C. Martin in the chair; vice-presidents Blakely and Paine, retiring president Kirk, secretary-treasurer, R. D. Dinning, directors Bryson, Portier, Moscrop and Snell, and Messrs. Burnham, Clark, Gunn, Hoag, Kydd, Latimer, Owen, Brice, Robinson, Stearman and Wharnock; Messrs. Elliott and Wilson, representing McLennan, McFeely & Co., W. G. Mackenzie, of Wood, Vallance & Leggat, and Mr. Pennington, of Champion & White, dealers in builders' supplies.

The secretary reported on the result of an interview with Ross & Howard and the Vancouver Stove Works in regard to having a retail price set on sash weights. After discussion as to how the retail price might be regulated, the matter was referred back to the executive for further report at the next general meeting.

Relative to the complaint that nails were being sold for $3 a keg by dealers other than hardware men, it was decided that the secretary write the Wholesale Hardware Association notifying them that, in order for the Association to stay with local jobbers, a price of $3 base was insisted on, with B. C. extras, to everybody outside the retail association west of Mission Junction.

The recent cutting on the price of powder was taken up, and Mr. Paine, one of the committee appointed to interview the powder company, reported that the Hamilton Powder Company had promised to regulate the retail selling price and also agreed to cut out any re-

tailer who did not stay with the price. Representatives of the wholesalers present claimed to have received no such notification from the powder company, but were prepared to stay with any arrangements made toward having the price maintained. The following resolution was moved in the matter: "That the secretary write the Hamilton Powder Company regarding the committee's recent interview and request that they confirm the arrangement arrived at and advise the Wholesale Hardware Association accordingly.

The question of tendering for the supplies to the city was also thoroughly discussed. The retail merchants would like to have a chance at this business, and it was moved that the grievance committee meet the wholesale hardware association and see what arrangement can be arrived at as to the price to be charged the city for supplies.

The price on saws was another subject, and it was decided that the grievance committee should interview the different manufacturers in an endeavor to get them to place a retail selling price on their saws.

Mr. Pennington brought up the question of some so-called paint shops being supplied with paints at the same price as the retail merchants. Champion & White were the local agents for Berry Bros.' varnishes and they were prepared to cut out this class of trade and regulate the retail selling price. Messrs. Owen and Fortier were requested to wait on Champion & White to arrange a retail selling price on these varnishes, and report at the next meeting.

The recent rise in the price of turpentine was dicussed and in view of the fact that a number of substitutes were being placed on the market it was decided that the price be left open.

The price of horseshoes was increased as follows: One to nine kegs, $4.95; ten kegs or over, $4.65; fifty to one hundred, 5½ cents per pound; less than fifty, six cents per pound.

Messrs. Owen, Kydd and Wharnock were appointed a committee to wait on the Builders' Material Supply Association relative to having lien notices effectively put into force. This action was taken after Mr. Pennington had reported that the Association had stated that it was its intention to issue a notice in the daily papers that lien notices would be served with all supplies in the future, and requested the co-operation of the Hardware Dealers' Association.

Mr. Kirk submitted a report on his recent trip to the convention at Peterboro, which was listened to with interest. As the hour was late the report was only received and discussion arriving out of it will take place at the next meeting to be held in May.

A. E. Fee, Killam, Sask., is making improvements to his hardware store.

Bradshaw & Anderson have opened a stock of hardware and implements at Imperial, Sask.

Small Goods Department is Valuable Feature

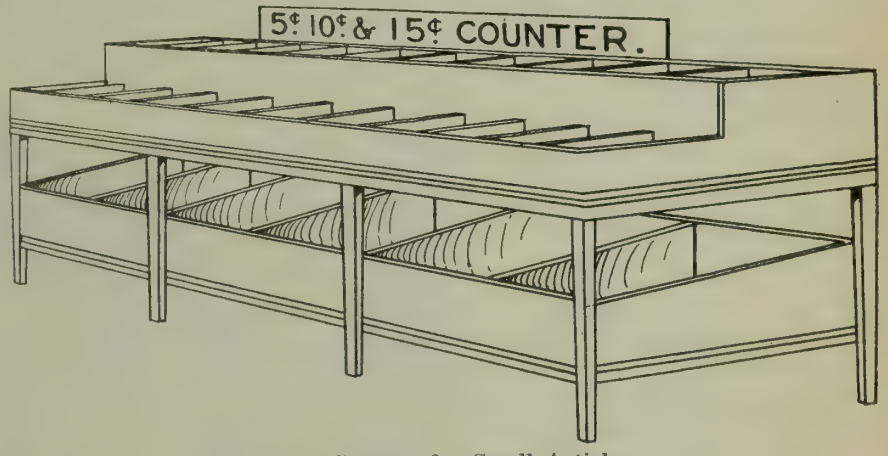
Many Hardware Stores Have Established 5, 10 and 15 Cent Branches—Patronage of the Ladies is Secured by That Means —Equipment Required is Neither Expensive Nor Bulky.

Hardwaremen sometimes complain of the opposition of departmental houses and the 5, 10 and 15 cent stores. Instead of complaining, would it not be better to take a leaf out of the book of the opposition and adopt somewhat similar methods to get the trade.

The sale of small goods, costing from 15 cents down, is not only remunerative in itself but serves as a means of attracting trade. Quite a number of hardware stores have adopted this plan and have made a "novelty counter" or "small goods counter" one of the regular departments of the store.

There are a great number of articles which the hardwareman sells at 15 cts. or lower. Most of them are of small bulk. Why not put them altogether in one part of the store or on one counter? It is practically impossible to show the price of all goods in the store in placards or cards of sufficient size to be noticeable; this is only possible where goods, selling at one price, are grouped together. Low-priced artticles are apt, therefore, to be overlooked by customers when they are scattered promiscuously throughout the building. But put them together, on one table, place a good sized placard with the words printed in bold type "All goods here selling at 15 cents," and practically every customer who enters will look the supply over. The assorted nature of the stock has almost as much to do with creating sales as the price.

If an assortment of nutmeg graters, for instance, were placed on a shelf, together with other goods of a more bulky nature, they could easily be overlooked. But if placed out with articles of a like nature on a "small goods counter," not one lady customer in ten would miss seeing them.



Attracts Lady Customers.

The interest which a department of this kind has for the lady customer is one of the chief points in its favor. As a general rule, ladies do not shop in hardware stores as much as the hardwareman would like. They seem to consider that purchasing hardware supplies is man's sole prerogative, just as buying dry goods is essentially woman's. But they flock to the 5, 10 and 15 cent stores.

Ir has been found that the carrying of a novelty department gives the hardware store an interest for women. They learn that bargains are to be secured there, as elsewhere; and they become regular attendants. It is not exaggerating to say that many dollars' worth of goods of the 5, 10 and 15 cent variety could be sold to the average woman customer every year. In addition, there is the opportunity presented of interesting her in larger articles such as stoves vacuum cleaners, washing machines, etc.

The Necessary Equipment.

In starting the department, it is generally wise to give up sufficient space in the centre of the store for a table or rack, to be used to display small goods only. The accompanying illustration shows a style of rack very largely used. The smaller articles are displayed in the upper sections, classified according to price. Larger goods are shown in the lower bins.

Suggested Counter for Small Articles.

The price of a fixture of this kind would be very small. In fact, a competent carpenter could put it together in a few hours' time, and the space occupied is quite small.

Advertising Necessary.

To make a success of the new department, it would be necessary to do a certain amount of advertising. This, coupled with good window displays, would create the required initial interest.

TO ERECT STEEL PLANT.

The Western Steel Corporation has purchased 2,000 acres of land with 17,000 feet water-frontage on the Fraser River, and will survey it as a townsite and erect a large steel plant in the course of the next three years at an expenditure of about $5,000,000.

HARDWARE TRADE GOSSIP

Ontario.

Hugh McLean and John Currie, of Crysler, have opened up a large hardware store at Finch.

The hardware business of R. E. McKay, hardware dealer and plumber, Toronto, is advertised for sale.

Steel and Radiation Ltd. are building a large plant at St Catharines. Construction work is already under way.

W. G. Colville, sr., of Fort William, and Robert Horne, of Sudbury, were in Toronto, this week on a buying trip.

R. P. Butchart & Bros., hardware merchants, Owen Sound, will erect a two storey block on Second Avenue east, this spring.

Gordon Whaley, of the office staff of Cochrane Hardware Ltd., Sudbury, has resigned his position, and will go to Montreal.

P. Bourrie is building a store at Port McNichol, for the purpose of carrying on a hardware business. It will be opened in a few days.

The Geo. Taylor Hardware Co., New Liskeard, in the last edition of "Taylor's News" advertise, among other new lines, burlap and wall paper.

Johns & Miners, of Alvinston, have disposed of their hardware business to J. E. Hussey, of Melbourne, who is to take possession on or about May 1.

The St. Mary's Hardware Company has installed a cyclone suction fan in the Wood Specialty Company's factory for clearing the air of sawdust and shavings.

Harland Brothers, Clinton, have disposed of the workshop end of their business, that is, the tinsmithing and plumbing, to R. S. Byam and J. A. Sutter, of Stratford.

The business men of St. Jacobs, Winterbourne, Conestago and West Montrose, have decided to close up at 6.30 on Monday, Tuesday and Thursday evenings after May 1.

S. Byam and J. Sutter, of the J. R. Myers Hardware Co., Stratford, have purchased the hardware and plumbing business of Harland Bros., Clinton. They take possession on Monday, April 24.

The merchants of Cornwall are holding a library voting contest. Among those entered are Alex. Jarvo, John G. Hunter, G. R. Phillips, W. H. Skeith, H. Pitt and D. E. Kennedy, all hardwaremen.

McPherson's hardware store at Prescott was burglarized Monday night, and so far no trace has been found of the guilty parties. The loot secured includede the day's receipts, revolvers, cartridges, knives, razors and other articles.

William Turnbull and Thomas Higgins, employed by W. H. Turnbull, tinsmith, Brantford, were injured on April 15th by the collapse of a scaffold on which they were working. Turnbull sustained a gash in the head, while Higgins was injured about the back.

Part of Colborne's business section was wiped out by a disastrous fire, which is supposed to have been started by burglars in the Express printing office and the Bank of Toronto. The loss will be near $25,000, and among the sufferers is Sam McClacken, hardware merchant.

W. B. Gillespie, formerly a retail hardware dealer on Dundas Street, London, has joined the Ontario traveling staff of Brandram-Henderson. He is making London his headquarters and, from that point, is covering a part of Western Ontario. Before going into business for himself, Mr. Gillespie was for 8 or 10 years with the Hobbs Hardware Co.

By the will of the late Charles Champion, retired hardware merchant, Brantford, who died on Sunday night, the sum of $45,000 is to be divided among local religious and charitable institutions. The bequests are: Brantford Y. W. C. A., $10,000; Brantford Y. M. C. A., $10,000; Brantford Widows' Home, $5,000; Brantford House of Refuge, $5,000; Children's Aid Society, $5,000; Brantford Salvation Army, $5,000; John H. Stratford Hospital, $5,000.

W. C. Wood, proprietor of the Gurney-Oxford stove store, London, sustained serious loss of Sunday, the 16th, when the confectionery store at 117 Dundas street, which he purchased not long ago from John Friend, was gutted by fire, and contents destroyed. The damage is estimated at $3 500, with insurance of $2,200. The building is owned by J. S. Stewart, of Toronto. Mr. and Mrs. Wood had to escape hurriedly onto the roof through a trap door, so much headway had the fire gained when discovered.

Charles C. Lee, Goderich, made a striking Easter display in his largest window for the holiday. Wire netting enclosed about ten improvised hutches of rabbits, big and little, long and short-haired, white, black and brown. One hutch held a litter of young bunnies, and the window was a great centre of attraction. A. H. Killing seed merchant, Stratford, followed the same idea, and had a couple of score of assorted rabbits loose in one of his windows. In neither case, however, was there any follow-up of the advertising value of the exhibit by a display of goods.

Quebec.

Geo. Caverhill, of Caverhill, Learmont & Co., Montreal, spent Easter in New York.

Napoleon Lefebvre & Hermas Herron, have been registered as hardware dealers in Montreal.

William Abbott has joined forces with Alex. Woods in the sale of William Jessop & Sons' high speed steel.

Messrs. A. A. Tritsch and A. F. Collins, of the International Distributing Co., have returned from New York after attending a convention of the Ever Ready Safety Razor Co.

The firm of Hopkinson & Combs, North Hatley, have bought out the hardware, tin and plumbing business of J. O. Brousseau. They have secured a large number of plumbing contracts.

Maritime Provinces.

Spurred on by the success of their initial word contest, Morton and Cragg, Halifax, are now offering $10 worth of sporting goods to the person who makes the most words out of the letters s-p-o-r-t-i-n-g g-o-o-d-s.

Western Provinces.

The Imperial Oil Co. will enlarge their Winnipeg plant.

Crossley & Johnson, Oxbow, who were burned out recently, will rebuild.

Johnston & Everitt have opened a hardware store at Mannville, Alta.

Howard Stevens has started a hardware business at Valley River, Manitoba.

Laut Bros. have started in business in hardware and groceries at Crossfield, Alta.

A. K. Helliwell has bought the hardware business of J. W. McDonald, Mortlach, Sask.

A meeting of the tennis club of Elbow, Sask., was held at Radcliff's hardware store.

Baker and Nerison, hardware dealers, of Champion, Alta., have dissolved partnership.

Smith and McLaren, hardware dealers, Yellow Grass, Sask., have dissolved partnership.

W. J. Mackay, hardware and furniture dealer, Midale, Sask., has sold to W. J Gyles, Virden, Man.

Brandt & Funk, hardware and implements, Drake, Sask., have been succeeded by Isaac & Janzen.

The hardware business of S. M. McKinley, Ninga, Man., is reported to have been sold to A. F. Johnston.

The lads af Radville, Sask., met recently in the Radville Hardware store, and organized a junior baseball club.

Copp, Sons & Co., dealers in stoves and furnaces, Winnipeg, will erect a brick building to replace the one they now occupy.

E. Troughton, hardware and furniture dealer, Lumsden, Sask., is enlarging his store premises. He is building an addition to the rear.

Rick Gyles, Virden, Man., has gone to Midale, Sask., where he will take charge of a hardware business recently purchased by his father.

Things are brightening up in Elko. The Agnew-McBain Hardware Co., are painting their new store.—Elko news in Cranbrook Herald.

Miss Laura Grundy, Duck Lake, has accepted a position in the hardware store of O. B. Manville, hardware merchant, Prince Albert.

H. S. MacGachen & Co., Whitehood, Sask., are advertising the fact that they are disposing of their stock of wall paper and paints at cost.

A safety razor traveler named Louis F. Gates, was arrested at the Alberta Hotel, Calgary, on a charge of getting between seven and eight thousand dollars under false pretences.

C. Worden, formerly a resident of Weyburn, Sask., is now engaged in the hardware business at Rouleau. He purchased the business of McGillivray & Montgomery, and took possessian on February 1.

A glass factory costing $100,000 will be established at Medicine Hat. Among those interested are: D. C. Cameron, James Savage, John McGavin and William J. Moran. These gentlemen are now interested in the manufacture of glass at Beausejour, Man.

News and Methods of Canadian Hardwaremen

St. John Firm Erect Lighting Post in Front of Store — A Novel Sporting Goods Window—A Western Hardware Store.

AN ORIGINAL WINDOW.

Toronto.—A novel idea has been introduced in a sporting goods display shown in a window of the retail store of Rice Lewis & Co. The window is cased in at the back, the casement being divided into three sections. The middle section has been taken out and a canoe has been shoved into the window through the space thus provided. Only about one-third of the canoe can be seen from the front, as it has been tilted up at the back, thus hiding from view all but the part that is actually in the window. In the canoe a complete angler's outfit has been placed.

The rest of the space in the window has been given over to a display of fishing supplies. The effect of the window is distinctly novel and it is calculated to interest every lover of outdoor sports.

WESTERN HARDWARE STORE.

The accompanying illustration shows part of the interior of R. F. Sanderson's hardware store at Alix, Alberta. Mr. Sanderson is one of the largest hardware dealers in the West, having worked up a splendid connection during the years that he has been in business. At the present time, he employs a staff of seven men and a boy.

The store is large and roomy, and is well fitted up. Mr. Sanderson believes in permitting the light to penetrate to all parts of the store, for he does not have goods suspended from the ceiling. A neat metal ceiling adds to the brightness of the shop. A large stock of shelf hardware is carried and there is also a good paint department in connection with the store.

Part of the Interior of the Hardware Store of R. F. Sanderson, Alix, Alta.

NOT DAUNTED BY FIRE.

Thessalon, Ont.—Bridge Bros., dealers in hardware, were the victims of a fire which swept part of the business section. The fire was first noticed about 7.30, and for a time it looked as though the whole business on both sides of the street would be wiped out. Merchants were getting their goods out but the firemen, despite heavy odds, finally got the blaze under control. The losses to Bridge Bros. and Cavanagh, druggist, will be heavy.

Bridge Bros. are not allowing the fire to check them in their business operatians. In the April 7th issue of The Thessalon Advocate, they had a good-sized advertisement of their stock of baby carriages. The ad. had been written before the fire occurred, but it was inserted just the same with a note to the effect that the greater part of the carriages were undamaged, and that bigger bargains than ever would be obtainable. ...

BUSINESS OPENS UP WELL.

Harris, Sask.—Trade conditions are good here. Business has opened up well, particularly in shelf hardware and paints.

M. F. Miskelly, having resigned his position in Hopper's hardware store, left on Wednesday for North Battleford where he has accepted a position with the Prince Supply Co. Since coming to Harris about a year ago he has made many friends, all of whom were sorry to see him leaving. He will be greatly missed in sporting circles.

EXPECT A RECORD YEAR.

Winnipeg.—Retail merchants throughout Western Canada are doing good business and all look forward to a record year. Incoming settlers are of the more desirable type and come with enough money to carry them long enough to get well set up in the farming business. All parts are receiving their share of settlers and hardware men will get a goodly share of the money to be spent.

J. H. Ashdown is expected home this week from his annual sojourn in the south. In all probability the new warehouse building will be started immediately upon his arrival.

Geo. Williamson, formerly of Lewis Bros., Montreal, comes east to take a position with Miller, Morse Hardware Co.

ST. JOHN DEALERS LIGHTING UP.

St. John, N.B.—The firm of T. McAvity & Sons, hardware dealers, have taken the initiative in providing more light in the business district and at the same time introducing a very attractive advertising device in front of their store on King Street. On the edge of the sidewalk, directly in front of their stores, the firm have erected a very neatly designed ornamental lighting post, of their own manufacture.

At the time of the Dominion exhibition, held in St. John last fall, King Street as well as a number of other streets were lighted with extra strings of incandescent lamps, forming a "Great White Way" from the Union depot to the exhibition grounds. An effort was made at the close of the exhibition to have the lights continued in the business section, but some of the merchants objected to the extra cost, and the project was abandoned. Recently Messrs. McAvity undertook the making of ornamental lighting posts in their foundry here, and the one erected last week is the first turned out.

It is made of cast iron and is about thirteen feet in height, with four hanging glass globes and one upright globe. The hanging globes are twelve inches in diameter and the upright one is sixteen inches. It is lighted with five 100 watt Tungsten lamps. The main column is corrugated and the arms at the top are square. Since the installation of this post several other firms on King Street have been considering putting posts of similar design in front of their premises, so that the street may again present the brilliant appearance that it did during the time of the exhibition last year. The upright globe contains the firm's name painted in black on the frosted globe.

Messrs. McAvity intend to have the lamps lighted every night. They are governed by a time clock in the store which will automatically light and extinguish the lamps. The firm are now figuring on a contract of 200 of these lights for one of the large western towns.

CONVENTION OF HARDWARE MANUFACTURERS.

The American Hardware Manufacturers' Association will hold their twentieth annual convention at San Antonio, Texas, from Wednesday to Friday of next week. The Southern Hardware Jobbers are to convene in the same city, at the same time, and elaborate preparations have been made to give all the visitors to both conventions a good time. A special train will convey the northern members of the association to the convention city.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 52

MARKETS IN BRIEF.

Montreal.

Turpentine.—Reduction noted.
Antimony.—An advance made.

Toronto.

Turpentine.—10c to 15c reduction.
Tin stronger.

MONTREAL.

Montreal, April 21.—Antimony presents a feature this week in the metal market by an advance of ½ cent a lb. in the local quotation. It is stated that the prevailing price is hardly known, but that 9½ cts. is a fair figure. The reason given is that those behind the antimony market are apparently not dealing through their local agents, at least to a certain extent and for quotations local houses have to wire for quotations, etc., direct. At any rate through the manipulations of those in control the price is advanced, but the general market feeling is not much improved. Copper is reported weaker, apparently the supply being a little too far ahead of the demand. Demand for it is fairly good, but as has been stated the supply has been heavy. Tin has been irregular and slightly weaker. The opinion is expressed that it is likely to firm up again within the week.

Pig Iron.—It has been said that metals are a little quiet at present for the reason that buyers are holding off until the opening of navigation which is expected within the next week or or two. With regard to pig iron the opening of water routes is bound to brighten business. Furnaces are reported busy with conditions practically unchanged. Activity among the foundries is stated to be on the increase and is welcomed. Future prices, on dock Montreal are: No. 1 Summerlee, $20; select Summerlee, $19.50; soft Summerlee, $19; No. 3 Cleveland and Clarence, $16.50 to $17.

Tin.—The market is still unsettled. After dropping in the primary market the price began to go up again, but it is a question whether any effect will be felt on this side of the Atlantic, as tin has been rather weak. Tin sheets are reported still scarce.

Copper.—The copper market is slightly weaker according to local sources. The consumption of copper has been good, but the output has been heavy. The market is reported a little quieter.

Other Metals.—Lead continues dull and steady. There has been an improvement in enquiry of late, but the market is not materially changed. Spelter, likewise, is practically in the position it occupied a week ago. It is a little firmer but otherwise quiet.

Scrap Material.—There is fair demand for a number of lines of scrap metals with prices unchanged, as follows: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron No. 1, $14.50; No. 1 wrought iron, $12.50; malleable No. 1, $9; miscellaneous steel, $5; stove plates, $12.50.

TORONTO.

Toronto, April 20.—There is a good healthy tone to the metal markets locally. Orders are being received in large number and for large bulk. The dullness reported on the other side of the border certainly has not spread this far. Metal men are not at all apprehensive that the active state of the Canadian market will be superseded by duller conditions, either now or later on.

There are few developments in the matter of price this week. Tin is a little firmer and it is reported that there are indications of another advance in antimony. Outside of this, everything has been quiet during the past week.

Tin.—Considerable interest has been shown in tin. A strengthening, tendency has developed and, whereas last week the price ran from 43c to 45c, the lowest quotation now heard is 45 cents. There has been a steady demand. In fact, tin has been uniformly good since the first of the year, the constant fluctuations not having in any way interfered with the local consumption. There is every reason to believe that tin will continue active, no matter what developments in the matter of price are reported from London.

Antimony.—Rumors of another advance in antimony are heard but so far nothing has transpired here. In fact, it is doubtful if any developments on outside markets could change the local situation. The antimony market here is lethargic and the present demand almost nominal, so that little interest is displayed in price tendencies.

Copper.—The situation is unchanged with respect to copper. Locally, the demand is very heavy, with prices standing firm. The trend in the United States is downward at present. The Metal Market says: "Our market which continues dull and weak has not been helped today by the fresh weakness that has developed in the stock market, and there are no signs that any business could be done except at a further concession in prices. At 12 cents delivered there are buyers for May, June Electrolytic, but that is a price that no one has yet felt inclined to accept and possibly the tonnage involved is not a sufficient inducement to the producers to lower their prices."

Aluminum.—A large amount of aluminum has been sold this year. Aluminum is now entering largely into industrial operations and a big demand is developing. The local price for ingots is 20 cents a pound.

Plates and Sheets.—Good business is being done in plates and sheets and prices are remaining firm. It is estimated that the amount of business done so far this year has been in excess of the volume for the same length of time during 1910. Stocks are still rather lighter than could be desired.

Pig Iron.—The demand locally is developing steadily and a good volume of business, for this time of year, is now being done. Prices remain firm as follows:—Canadian Foundry No. 1 is $19.50 and No. 2, 50 cents a ton less. Old country iron is quoted at $19.50 for Middlesboro No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22.00, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20.00 and $22.00 respectively.

Lead.—There is not a great deal of activity in lead. Buyers are purchasing mostly from hand to mouth. It is believed, however, that the near future will see better things. The price, in the meantime, remains stationary.

Spelter.—Conditions here reflect the state of affairs on the American markets. Spelter is in small demand. This is rather surprising to those who follow the spelter situation closely in the United States as it was thought the market would respond to the agreement made by Joplin producers to curtail the production.

Old Materials.—Quotations to-day are: Heavy copper and wire, 10c; heavy red brass, 9¾c; heavy lead, 3c; light copper and bottoms, 9¾c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steeel, $6 to $7; stove plate, $13.

TO MAKE "YALE" GOODS IN CANADA.

For some years past, the Yale & Towne Mfg. Co., whose officers are in New York City, and main works at Stamford, Conn., have had under consideration, the establishment of a branch plant in this country, to look after their Canadian business.

They have now definitely decided to create such a plant, and announce that they have selected the city of St. Catharines, Ont., as its location. They have secured a suitable site in that city, and will immediately commence the erection of the necessary buildings, which they expect to have ready for operation early in 1912. A subordinate organization under the name of "Canadian Yale & Towne Limited," is in process of formation, which will conduct the business of the Canadian plant after the latter begins operations.

It is stated that the new plant will be complete in every particular, the firm's experience of forty years at Stamford, Conn., standing them in good stead. The products of the new factory will be identical in design, materials, and workmanship with those of the Stamford plant.

EX-BANKER ENTERS BUSINESS.

Grimsby, Ont.—G. G. Bourne, formerly manager of the Bank of Commerce branch at Canora, Sask., has resigned his position, and will start in the hardware business here with his brother. Mr. Bourne was manager at Canora for about seven years, and was very active in public affairs

HARDWARE MARKETS

MONTREAL.

Montreal, April 20.—April is likely to show a deficit in its figures when compared with the business that was done during the same month a year ago. Thanks to the weather, outdoor activities have not had the opportunities that were presented in 1910 when April and March, too, opened spring much earlier than usual. However, there is a fair business passing, although wholesalers are depending but little on the local demand. Practically all find that this latter trade is quiet, although beginning to reach fair proportions. Bad roads and a late opening of spring-like weather has been responsible for the slowness noticed here. The feeling withal is optimistic, and while orders are coming in fairly well, there is still room for the improvement that is expected.

Kitchen utensils have been moving nicely, painters' and builders' supplies are also in good demand, wire fencing and poultry netting are receiving a large share of attention. Fishing tackle might move a little more briskly, but sporting goods as a whole are now moving freely.

Household Utensils. — The movement in this line is steady and has shown some improvement. At this season household utensils are much sought after. Kitchen goods, ladders for housecleaning, ice cream freezers, washing machines, etc., are all included in the general orders coming in. Some of the prices quoted are:—Food choppers, from $9 to $15 a doz.; ice cream freezers, 1-qt., $1.50, 2-qt. $1.65, 3-qt, $2.05, 4-qt. $2.50, 6-qt. $3.15, 8-qt. $4; coffee percolators, $1.75 to $3.50; washing machines, from $3.50 up; wringers, Royal Canadian, $47.75 per doz.; Universal, $37.75 per doz.; Safety, $56.25, less 20 per cent. per doz.; Mrs. Potts' irons, plain, 82½c per set; nickel-plated, 87½c per set; common sad irons, 4 to 7 lbs, $5 per cwt.

Spring Lines.—Business is steady in this department. Jobbers report an improvement in the demand and conditions are beginning to assume their usual proportions for this time of the year. Lawn mowers are in good demand, and other similar spring lines are favorites just now. Wholesalers report that this department has been giving a good share of trade. Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote hose clamps, ½ to ¾-in., 25c a doz.; hose couplings, ½ to ¾-in., $1 a dozen; hose sprinklers, ring pattern, $5.75 a doz.; revolving pattern, 12-in., $13 a doz.; 24-in., $34 a doz.; and 36-in., at $39 a doz.; hose nozzles, Gem, $3.50 a doz.; reels, 75c each and upwards; garden wheelbarrows, $27 a doz. The discount offered is 50 and 50 p.c.

Sporting Goods. — Baseball supplies are moving briskly and will likely continue to move in that way for some time yet. Fishing tackle has been a little slow, although others hold that it is quite up to the average. With the opening of the fishing season approaching, business should assume normal proportions. Already several windows of fishing tackle have been seen in Montreal. Guns are moving easily, with the Western trade increasing their enquiries. This promises to be a good year in the Western demand for arms, last year being quiet following the depression of the previous year.

Wire.—Fencing wire and poultry netting are being freely asked for. Wire netting of all kinds is in good demand, and from the number of orders it may be taken for granted that the activity in fence-building is considerable. Present prices are:—Barbed wire, $2.35; plain twist, $2.55; galvanized wire base, $2.272½; coil fencing (9) $2.30; (12) $2.45; staples, bright, $2.60; galvanized, $2.85.

Heavy Hardware — There is steady business in heavy hardware. Prices are unchanged. Orders for heavy goods are numerous. Some discounts are: on carriage bolts, ⅜ and less, 70 per cent; coach screws, 75 per cent; stove bolts, 80 and 7½ per cent.

Contractors' Supplies.—An increased demand for practically all lines of contractors' supplies is evident. The beginning of activities among the building trade locally and in the district is welcomed, and the rest of the country is contributing a large share.

For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upwards. Trade in these lines at present is promising.

TORONTO.

Toronto, April 20.—The weather still handicaps business in hardware lines but there has been, nevertheless, a marked improvement during the past two weeks. The demand has not yet reached to full spring-time proportions and will not do so until spring gives more convincing proof that it has come to stay. It requires a continued spell of mild balmy weather to get men interested in their gardens and in outside work generally. Consequently, the retail trade has not yet really started in seasonable goods and the demand on the wholesalers has been lighter than might have been expected at this season. No complaints are being voiced, however, as the wholesalers have been reasonably busy and now have the prospect of an exceptionally brisk business as soon as warm weather sets in.

Seasonable Lines.—Larger orders are now being received for all spring goods. Rakes, hose, spades, axes, lawn mowers, sprinklers, nozzles, wire fencing, etc., are all moving well. The number of enquiries received augur well for a still more active demand in the course of the next two weeks. Summer goods are not selling very much as yet, but sufficient orders are being received to indicate that there will be a healthy demand for window screens, wire netting, ice cream freezers, refrigerators, etc.

Household Goods.—There has been a heavy call for all varieties of tinware and graniteware. In fact, it is quite apparent that the house-cleaning and moving season is in full swing. Not only has there been good business done in such necessary articles as stepladders, mops, pails, brushes, picture wire, tacks, hammers, and carpet stretchers, but the demand for household supplies of all kinds has been heavy, showing that household "sorting up" has been started. After spring house-cleaning, the thrifty housewife learns of many needs and finds a variety of articles which need to be replaced. There is a good demand as well for staple household goods such as pots, pans, kettles, cookers, small culinary articles, meat choppers, washing machines, etc. A noteworthy feature is an increase in the number of vacuum cleaners sold.

Builders' Hardware.—In no department has the improvement in trade been more noticeable than in builders' hardware. Building operations have been going ahead, despite the weather conditions and consequently the hardware dealers have been losing no time in stocking up. It will be some time before many buildings are in a sufficiently advanced stage to create an active retail demand but the wholesale orders received are pretty good evidence of the fact that the retailers are anticipating a splendid volume of trade.

Heavy Hardware.—There has been a uniformly steady movement in all lines of heavy hardware. Nuts, bolts, screws and wire are in firm demand. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Stoves and Heating Goods.—The gas stove trade is now perhaps at its very heaviest stage. There is a big demand and the manufacturers are experiencing quite as busy a spell as they care for. Large shipments are now the order and it is quite apparent that dealers are preparing for a very brisk demand. Ranges are also quite active at the present time. Furnaces are starting to move but the building season will have to be further advanced before the call becomes very brisk.

Sporting Goods.—The demand for all kinds of sporting supplies has been quite satisfactory. Sales in the rifle and ammunition line are confined largely to trap-shooters' supplies, although the gun clubs are beginning to show activity in some parts. Baseball goods are now in active demand and the same can be said for practically all field sport supplies. A touch of real spring weather will bring the sporting goods business to the top notch.

CORRECTIONS.

In the advertisement of the Brantford Cordage Co., in the spring special number of Hardware and Metal, four letters were dropped from the words "who sell." The advertisement was prepared correctly by the Brantford Cordage Co., and the fault was entirely ours. It was unfortunate that a printer's error should have crept into this advertisement.

The Western Hardware Market Situation

Trade Conditions Continue Good—Snowstorm Serves as a Temporary Setback, But Weather Conditions Have Since Improved —Turpentine Shows Large Reduction.

Winnipeg, Apr. 17.—Trade conditions continue good, with a promise, since the recent fine rains, of exceptionally brisk times hereafter.

Retailers all report trade good, with many inquiries for later work.

Builders are getting busy, and already many new houses are under way. Help is plentiful, and wages continue high in all lines.

Merchants will do well to protect themselves on screen doors, netting, etc., against a rush later on.

During the past week copious rains fell throughout the West, followed by a heavy snowstorm. The weather now, however, is mild, and seeding will be general this week.

Grain men are very optimistic, and look for big returns this fall.

In general hardware, every line is moving out well. Cutlery is being bought in better quality than previously, showing that money is easier. Western travelers are all out, and report a favorable volume of business.

Some price changes have occurred during the past week. In horseshoes "M.R.M." and "Bell," No. 2 and larger, are now quoted at $4.65, a reduction of $1.00.

Barbed wire per 100 lbs. has increased from $2.95 to $3.05, while plain twist has gone from $3.25 to $3.40. Plain galvanized wire, on the contrary, shows a decrease in some lines. No. 9 now stands at $2.90 instead of $3.10 as formerly, and No. 12 is $3.10 instead of $3.20.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅝ and smaller, 65; 7-16 and larger, 55; machine, ⅝ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts 77½.

Bar Iron—Bar Iron $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $13.

Blocks—Steel, 45; wood 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c pre lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.83; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware— Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; grainte, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron — Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 26, $4.20; 28, $4.60; 30 gauge or 10½oz., $4.80; Queen's Head, 26, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—¼ in., $3.50; ⅜ in., $3.80; ½ in., $4.25; ¾ in., $5.50; 1 in., $7.90; 1¼ in., $10.75; 1½ in., $12.70; 2 in., $17.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers — Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼ in., $2.55; ⅜ in., $2.85; ½-in., $3.45; ¾-in., $4.25; 1 in., $6.10; 1¼ in., $8.30; 1½ in., $10; 2 in., $13.30; 2½ in., $21.80; 3 in., $28.60; 3½ in., $35.60; 4 in., $40.80; 4½ in., $46.80.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9.50; dash, $9.75.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope.—Sisal, 8¼c; pure manila, 10¾c; British manila, 8½; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.25; broken lots, $8.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base $25.75 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate — 1. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 33 1-3.

Wire — Barbed wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $2.90; No. 10, $3.60; No. 11, $3.70; No. 12, $3.10; No. 13, $3.40; No. 14, $4.25.

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

There is a brisk movement on the paint and oil market and trade is reported to be thoroughly satisfactory. Orders now are for large quantities mostly.

The feature of the market has been the slump in turpentine, which receded 10 cents this week, making the present price $1.30 per gallon in barrels.

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18½c.; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rose, in bulk, 22½c; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

LARGE PAINT TRADE IN WEST.

Reports from Hardware and Metal's Winnipeg office indicate that there is a very good tone to the Spring paint trade in the West, and that the demand is gradually increasing. The wholesalers and jobbers of Winnipeg have been shipping these goods in large quantities.

As an instance of how the business is going, it may be said that very recently the Winnipeg Paint and Glass Co. shipped at one time two carloads of mixed paint and finishing materials, one to Carter & Bailey, Moose Jaw, and the other to the Saskatoon Hardware Co., of Saskatoon.

This is an evidence of what is being done all over the West, and retailers are evidently emphasizing the point that paint is not a luxury, but a necessity. Dealers are conscious, also, that they can do a great deal towards building up their home town by beautifying and preserving the structures within its boundaries.

Although Winnipeg prices are very firm, there is no abatement in the ordering, and all wholesalers at that point anticipate a very good season.

Pay Attention to Interior Varnish and Stain Trade

In the Spring There is a Heavy Demand for These Lines—The Effectiveness of Circular Advertising Demonstrated.

Many paint dealers are prone to pay attention almost exclusively to outdoor paints at this season of the year, forgetful of the fact that spring is the best time for the sale of interior varnishes and stains.

April and May are moving months. It is then that the migratory spirit commences to make itself felt. People who are dissatisfied with the house they are living in, almost invariably select the spring as the most suitable time to look for different quarters. Leases are generally so dated that they expire in the spring.

When a family moves into a new house, the need for interior paint is immediately felt. The rugs leave margins around the sides of the rooms, the hall floors get scraped with the moving and the family do not feel "settled" until floor stain has been bought and applied. Then there is the need of a stain or veneer to brighten up the furniture, which necessarily accumulates a liberal supply of scratches in the moving.

But the paint dealer does not have to depend upon the families which move to sell his stock of interior varieties. With those who do not change quarters, house cleaning time takes the place of moving. Everything is taken up and the place cleaned from top to bottom. Before she feels that she has really done her duty, the housewife has to have everything shining and bright as a new dollar. To make this possible, it is found necessary to lay in a stock of paint and touch up the floors, woodwork and furniture, wherever the need is shown.

It follows then that the spring is the busiest time of the year for varnishes and stains of all kinds and the hardwareman who shows that he possesses the three G's (ask Pres. R. C. Chown for further particulars) in the way that he handles this department will be amply repaid.

The Circular Plan.

To sell this class of goods, the circular plan always proves effective. A neat little booklet sent around to the house is a sure way of advertising the excellence of your wares. It is hardly necessary to create a demand; at this season of the year, the demand creates itself. It is, however, necessary to get in ahead of the other fellow and the circular does this for you. It is, perhaps, wisest to address it to the lady of the house. This makes it certain that it will be opened. The good woman will most certainly have been thinking of paint every time that she has noticed how bare and worn the floor looks around the outside of the rugs. The circular will therefore have an interest for her and she will almost certainly read it through. If the writer has done his work with any degree of skill, it will not be many days before some member of the household drops in for a supply or varnish and stains.

It will not be going too far to adopt an "outside salesmanship" campaign to get business in this line. During housecleaning time, the household is so upset that it may be impossible for any member of the family to find the necessary time to go down town and buy a supply of paint. If one of the store staff were to make a series of calls, he would doubtless secure many orders which would not otherwise have been placed.

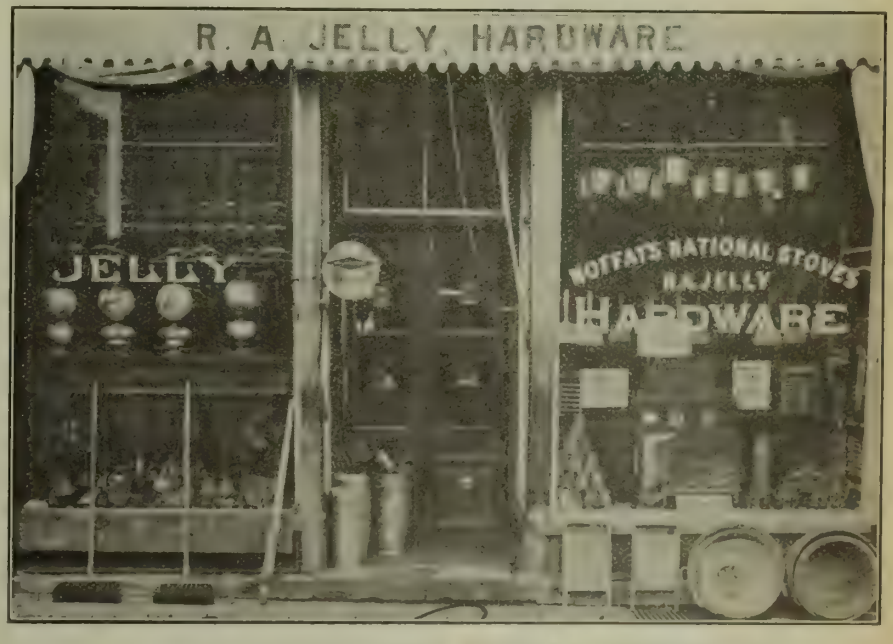
PAINT WINDOW IN SHELBURNE.

It has often been remarked in these columns, that a paint window with real selling value is a difficult thing to produce. Of course, it is not hard to arrange a number of cans of paint in such a manner as to make an attractive display—one that will create interest, and call the attention of passers-by to the line of paints carried. And, certainly, a window of this kind will be bound to sell some of the products it displays.

However, a can of paint, or a pyramid of such cans, will not produce exactly the result, on the mind of the prospective buyer, that the dealer wishes to create. It is not likely to awaken in him a lively desire to buy the paints, for the simple reason that it does not show what the paints will do. The great point in selling paint is to convince your prospects that they need paint. For that reason, the protective and decorative qualities of paint should be brought out as strongly as possible.

Various expedients have been adopted by window dressers to bring out this idea. A great many are, this season, making use of posters and stickers which are furnished by the manufacturers, and which show the paint being applied to houses, floors or interior woodwork, or, sometimes an assortment of colored prints are used, showing the appearance of house exteriors or interiars after the paint has been applied.

These plans are excellent, as they help to put the paint propostion more vividly before the mind of everybody who sees the window. He can see ideal color schemes as they would appear on the job, when completed. He mentally draws a picture of how the same color harmonies would appear on his own house, or in his own rooms. It gets him thinking about the advisability of using some paint to improve the appearance of his property or to protect it against decay. It puts the paint germ into his system, when a methodical pile of cans might fail to do so.



R. A. Jelly, of Shelburne, Ont., has a novel way of showing the results of using paint. His window, which is illustrated on this page, has as its central feature, a miniature house painted in an attractive combination of colors. As a background, several color cards are shown, while, on each side of the miniature house, are to be seen conventional piles of paint cans.

An interesting feature is also to be seen in Mr. Jelley's left hand window. It is a double-decker, showing electric lighting fixtures in the bottom part, and coal oil table lamps in the top portion.

SPRING DISPLAY OF BRUSHES

A few ideas for displaying brushes are very useful at this time of the year, as merchants as a rule, are generally busy with the rush of spring business. So some definite ideas to work on, such as are here presented, will no doubt be appreciated. They may be adopted according to the amount of display space which the dealer has at his disposal.

No. 1.—First take a frame or make one about 24 x 36, then stain and varnish. Next take some poultry netting and cut to the size of the frame and put on with double pointed tacks, to keep the wire from sagging. Place screw eyes equal distances apart on top of the frame. Then put on enough wire to hang up, just as you would a picture

R. A. Jelly's Display Windows at Shelburne, Ont.

frame. When completed, you can place handles of paint or varnish brushes between the meshes of wire, without injury to brush. On larger brushes, such as kalsomine, whitewash, scrubbing brushes, hair brooms, dusters or bannisters, put a screw hook (any kind) in the end of each brush. Then hang on wires properly spaced. When completed, you will have a very creditable display, and very little time lost in making it. If you wish to add a finishing touch, place some turkey red or black lining on the back of the frame, for a background.

No. 2.—Take barrel hoops, large or small ones, wind with turkey red or other suitable color. Then place small hooks or nails inside of the hoop. Next put screw eyes or twine on the end of brushes, and place them on the hooks hanging up your hoop with wire or picture cord. The brushes are then out of your way and can easily be seen by customers coming in or going out of your store.

No. 3.—Take barrel covers and fasten the parts securely together, and cover with suitable material. Place your brushes on, in one or two circles, to have the required effect. Use tape or elastic, putting brass head tacks on each side of the brush handle, to hold brushes on the board with the tape. Put hooks on the edge or top part of the cover, to hang up in a suitable location. You can also place similar display on the reverse side of the cover, to have the effect of being seen on both sides. Of course, if the display is to be placed on the wall, one side is all that is necessary.

Brushes Receiving More Attention.

Hardwaremen are probably giving more attention to the display of brushes, this year, than ever before. Nearly every paint window is well supplied with brushes, and, in many cases, attractive displays have been made of brushes alone.

This condition is largely due to the co-operation of manufacturers, who are taking a great interest in helping retailers to sell brushes. Hardware and Metal was informed the other day by Boeckh Bros., of Toronto, that they have been quite busy this spring, sending out free electros and illustrated circulars to their customers. They have also supplied various kinds of show cards, for decorating the windows and store.

MAKE EVERY PACKAGE ADVERTISE PAINTS.

The season for pushing paints and varnishes to the limit, is right here. No opportunity for influencing business, should be neglected by the hardwareman who wishes to make the most out of his paint department.

Here is a suggestion which should help to bring the paint question home to every customer of the store. It has been adopted by many hardware dealers, already, and, if carried out persistently, it cannot fail of bringing results.

This suggestion is to put some kind of paint literature in every package that leaves the store. Whether it be a color card, a suggested harmony scheme for interior or exterior decoration, or merely a folder telling the advantages of protecting property by means of paint, something in the nature of paint advertising could easily be dropped into the package, and it would almost surely be read, upon the parcel being opened.

No fault can be found with the manner in which paint manufacturers keep their agents supplied with circulars of this description. They are all most generous in supplying everything within reason which would assist their dealer in moving the paints from his shelves. It therefore remains with the dealer himself to say whether or not the best possible use will be made of this literature.

Some dealers place a small pile of these circulars on the counter or show case, and customers who feel like taking any of them are at liberty to do so. Others simply put them in a corner some place behind the counter, and content themselves with handing out a circular or color card to customers who ask for it. Such dealers are not pushing their paint department; they are selling paints in a very negative way.

Why not try the scheme of making every parcel carry the gospel of good paints into some home in your town? It will cost nothing except the minimum of attention on the part of the clerk, and it would be strange indeed if some good did not result from this method of gaining publicity for your paints.

THE FLAXSEED CROP.

It is estimated that the flaxseed crop in Canada this year will show a large increase. As a result of the educational work which has been started, the farmers of the North-west are becoming interested in flax and the acreage devoted to the growth of the seed will be considerably augmented.

It is very doubtful, however, if the output will show a sufficient increase to relieve the shortage, which has developed of late years. The Paint, Oil and Drug Review says: "The acreage of flaxseed will be greatly increased in Canada, but whether it will be largely augmented in this country is problematical and remains to be seen. The cost of seed is high, and there is a scarcity of seed in some localities in the Northwest, which has not been remedied despite the efforts of crushers, sub-divisions of the states interested and individuals. The loss in acreage in settled countries will be offset by the gain in Montana and in Western South Dakota and a small part of Western North Dakota, but whether the gain in acreage in these regions will be so large as to result in an unusually big crop is highly improbable, even if crop conditions are favorable and a normal yield per acre is obtained."

A New Land Crop.

Flaxseed is essentially a new land crop. It grows the first year after the land is broken and consequently is grown very largely in some sections of the North-west where the land is being worked for the first time. Speaking of flaxseed in this connection, the Paint, Oil and Drug Review says: "It is the crop that makes the difference between prosperity and poverty to the man who has either settled on a claim or purchased land in the great regions of our own state which are just being opened. The farmer can get a flax crop the first year after the sod is turned and even when the plowing is done in the spring. He can not raise any other crop under those conditions with success. The flax crop is the first money producer on the new land, and it is what has given this state (Dakota) its great attraction for men with plenty of muscle and energy and little cash. It is what has made a home and independence possible to thousands who live in this state, and it is what will make the same things possible to thousands more."

HEAVY DEMAND IN LONDON.

It does not seem at all probable, on the surface of it, that the crowning of King George will have any effect on the price of linseed oil. And yet such threatens to prove the case. London advices are to the effect that the foreign trade are expecting a sharp advance in the price of linseed in London due to the large call for paint there. In expectation of the coronation ceremonies, residents of "old Lunnon" are sparing no pains to brighten up. Houses, stores and public buildings in almost countless numbers are in the hands of the painters. Fences are being painted and fresh coatings are being applied to lamp-posts. In fact, the demand for paint there is the heaviest that it has possibly ever been.

As a result of the heavy consumption, linseed oil may be advanced in price on the London market. It is very doubtful, however, if the Canadian price will be affected.

RETIRING MANAGER HONORED.

On the occasion of his retiring from the position of works manager of the Peterboro Lock Co., C. J. Caley was waited upon by the employes of the company and presented with a very handsome silver tea set. The address was read by E. H. Howson, secretary of the company, and John Emmerson, foreman of the tool room, made the presentation.

Mr. Caley has left for his home in New Haven, Conn., where he will proceed to take things more easily.

Mr. Caley, who has been with the Peterboro Lock Co. for about a year, served his apprenticeship in the Norwich Lock Co. He was foreman with the Sargent Co., New Haven, Conn., for seven years, and foreman of the Yale Towne Co., of Stamford, Conn., for nine years. For eleven years afterwards he was general superintendent and later general manager of the Russell Erwin Company of New Britain, Conn. He is a pastmaster of the A.O. U.W., a member of B.P.O.E. Lodge of Elks, and of the American Society of Mechanical Engineers. He is also a past president of the American Brass Founders' Association and vice-president of the American Foundrymen's Association, as well as a member of the Institute of Metals, London, Eng.

Established in England in 1834. **377-387 Carlaw Ave., Toronto, Can.**

PAINT AND OIL MARKETS

MONTREAL.

Montreal, Apr. 21.—Spring conditions have certainly helped the paint trade, and orders have been coming in quite freely. Those who may have been holding off with their orders are apparently sending them in now and the campaign carried on by retailers throughout the country is undoubtedly having the desired effect of bringing in a big share of business. Shipping departments are busy getting out the goods that are now demanded and the general report is one of satisfaction with the present character of business.

Linseed Oil. — The market has been rather steady and has lost but little ground. Prices are a little easier, but the difference is not very material. The tendency toward lower prices was broken about a week ago, and the feeling since has been of a more healthy tone. The demand for linseed oil is well maintained and should continue to be so. The local quotations are given as follows: raw $1.10, boiled $1.13.

Turpentine.—The easier feeling in this market a week ago is apparent yet. When prices began to soar a few weeks ago it was felt that under the conditions they would be maintained for a longer time than they have been. The demand is steady, purchasing being necessary for the general business now passing. Local houses are now asking $1.20 per gal.

Prepared Paints.—While the majority of the retail trade are supplied for this demand there are still sufficient orders coming in to show that business in this line is good, and that there were loopholes still to be filled. It is apparnet that the retail trade is devoting considerable attention to their paint trade just now and adopting various methods to secure the business that is passing just now. It is prepared paints that present one of the readiest selling lines for present requirements. Floor paints are in good demand.

Paris Green. — Enquiries for Paris green are still coming quite liberally, and the trade are rapidly preparing themselves for the first demand upon their stocks.

Prices are unchanged as follows: In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs.; 17¼c; 50 lb. and 100 lb. drums, 18¼c; 25 lb. and 100 lb. drums, 18¾c; 1 lb. packets, 100 lbs., in case, 20¼c per lb.; 1 lb. packets, 50 lbs in case, 20¾c. per lb.; ½ lb. packets, 100 lbs. in case, 22¼c per lb.; 1 lb. tins, 100 lbs. in case, 21¼c per lb.

Arsenate of Lead.—Orders for arsenate of lead are fairly free, this insecticide receiving its share of the trade.

Prices are: In bbls., about 800 lbs.; 9c.; in half bbls. about 400 lbs., 9½c; in 25 lb. wooden kegs, 10c; 5 lb. bottles, 12c; in 2 lb. bottles, 13c; in one lb. bottles, 14c.

White Lead.—There is a good demand for this article, the expected increase having come with the weather. White zinc is also moving out well.

Quotations are as follows: Lots of one ton, $5.85; contracts of five tons and over, $5.70; shipments less than one ton, $6 f.o.b. Montreal.

Putty.—Business in putty is brisker, the spring trade showing itself in this direction.

Prices f.o.b. Montreal are: Bulk, bbls., $2.20; bulk cwts., $2.45; bladder, bbls.; $2.70; bladder, cwts., $2.80; 25's, loose, $2.55; 25's, cased, $2.70; 12½'s, cased, $2.90.

TORONTO.

Toronto, April 20.—The local paint and oil market has been seasonably active during the past week. Despite the handicap of cold weather, the trade has grown rapidly and there is now a splendid movement in all lines. That the retail demand is now active is rather forcibly demonstrated by the number of "rush" orders received.

The feature of the market has been the almost sensational slump in turpentine. The high price of three weeks ago, which was attained very gradually, the price advancing as the scarcity became more marked, has been receded from almost at one step. The decrease in local prices varies from 10 to 20 cents this week. Opinions as to the price next week differ. Some predict lower prices still, while others have figured it out that an advance is almost sure to result.

Linseed Oil.—Linseed oil is still firm. The local price is $1.15 for raw and $1.18 for boiled, at which price it has been selling for some weeks now. It is now deemed unlikely that there will be any change for some time at least. It is stated that the jobbers are not making as much profit as they ought in cases where they have to purchase at the present time from the crushers but they are not likely to advance the price this month. In the meantime there is a very lively demand and it is reported that stocks are getting pretty light. In view of all circumstances there seems to be no immediate prospect of easier quotations.

Turpentine.—To-day the prices quoted for spirits of turpentine differed rather widely. Some houses quoted $1.30 while others were as low as $1.20. The latter figure is probably nearer the mark as the price on the primary market at Savannah has been going down, down, down, regularly for the past two weeks. The slump has been caused by the rush of new stock on to the market, in anticipation of securing the high price which has prevailed. As buyers have refused to meet the sellers at the old figures, the latter have been obliged to accept a considerable reduction. The reduction has very materially stimulated the demand. Buyers who have been holding off entirely, or merely buying hand to mouth, are now rushing in. Although the supplies that came forward during the past week were much larger than was anticipated at the reduced price, the market was almost entirely cleared. From this it is predicted that a slight advance may take place during the coming week.

In regard to the local price, it is interesting to note that one jobbing house has sold a number of barrels for delivery the end of this week at $1.15.

Rosins.—The price of rosins generally keeps pace with that of spirits of turpentine and it is therefore safe to assume that there will be a corresponding reduction in the near future. For the present, however, the new supplies have not been nearly as large in proportion to the new spirits. Consequently the reduction has not been anything like that which has taken place on the turpentine market.

Putty.—The demand is seasonably active at present. Prices are standing at the same figures: Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead.—With the resumption of outdoor operations, made possible by the improved weather conditions, there has been an increase in the demand for white lead. Painters are now doing considerable outside work and, as soon as the weather becomes really favorable, it is expected that the demand will break all records. No talk has been heard for the past few weeks of an advance in white lead. In view of the improved situation on the oil market, there is every probability of the present figures being firmly maintained.

Varnishes and Japans.—The demand is very heavy. It is quite evident that the retail trade has been active during the past week or two for the supply houses are kept busy meeting rush orders and requests for immediate delivery. Prices are now stationary and will probably remain so until after the busiest part of the season, at least, is passed.

Prepared Paints.—Large orders are being received. In addition to the business which flows in through the regular channels, jobbers and manufacturers report that a great deal of unsolicited trade has cropped, showing that the retail demand for paints has been heavy.

Petroleum.—The lengthening of the days has cut off the consumption of coal oil to a large extent. Prices quoted here are:—Canadian prime water white, 12½c.; United States water white, 14c.; Pratt's Astral, 16c. The market is strong with a good demand in evidence.

CORRECTION.

In our April 8 issue we referred in full page advertisement to sale of business at 111 Dundas street, London, Ont. This refers to sale which took place some time ago, and was not intended to convey the impression that the business of J. E. Young & Co. had changed hands.

B-H "ENGLISH" PAINT

70% PURE WHITE LEAD – 30% PURE WHITE ZINC

100% PURE PAINT

Why Experiment when you don't have to?

You can settle the question of quality in paint for yourself and your customers at once and for all time, by handling a paint bearing a formula guarantee showing it is made on a white base of 70% pure white lead and 30% pure white zinc—100% pure paint.

This is the guarantee on every can of B-H "ENGLISH" Paint.

And all this large percentage of white lead is Brandram's B.B. Genuine---The standard of the world. We are in a position to use this large proportion of white lead because we are corroders and grinders of white lead---the only paint makers in Canada who corrode and grind white lead.

You recognize, and your customers recognize, that this guarantee formula means the highest grade of goods that can be made. It settles the question of quality—and quality counts.

Highest quality paint brings customers, brings them back again—and their friends with them.

Highest quality paint gives you confidence, and your clerks confidence, to go after business and to get business.

Write to-day for dealers' price list and data on the 1911 advertising campaign back of B-H "ENGLISH" Paint. Address our nearest office.

Are you aware of the great demand for

Boeckh's Brushes and Brooms

for use in factories of all kinds? A little time spent in getting this class of business will show good profits. They usually buy the better lines in Flat Paints, Badger and Fitch Flowing Varnish Brushes, etc., which yield an exceptionally good profit. We prefer to receive this class of trade through the Dealer, and we encourage factories to order from their local dealer.

The Boeckh Bros. Company, Ltd.

TORONTO, CANADA

Offices, 80 York Street — Factories, 158 to 168 Adelaide St. W.

Sell Varnish With Enthusiasm

WHEN you tell a customer you carry Pratt & Lambert Varnishes you stand straight and look him squarely in the eye. You have the Quality varnishes on your shelves and the "House" back of you. You're partners—you and the "House." Pratt & Lambert don't simply **sell you** a bill of goods, but they help you sell to your customers, by consistent co-operation, and the most thorough and complete advertising in the trade.

It pays to do business with a house that backs you up. If I were you, I would write and ask for prices and terms.

White Mountain, 50 p.c.

Congo Roofing

Guaranteed Until 1921

The owner of any building covered with Congo Roofing is not only satisfied with his purchase, but has the satisfaction of **knowing** that it is **guaranteed** for 10 years.

That's real protection.

Every roof of 2-ply and 3-ply Congo is guaranteed in this way.

In every roll of Congo is a **genuine legally binding Surety Bond** issued by the National Surety Company, of New York.

This year we will guarantee thousands of roofs all over the country **to last till 1921** on this basis.

Of course, we are not going to lose—we are offering a sure thing, as Congo will last **more** than 10 years.

One thing the guarantee forces upon us; it makes us extremely careful in manufacturing.

We make doubly sure that every roll is perfect. We use the best material that money can buy.

Another detail is the nailing. To avoid any trouble from this source, we provide free of charge, **galvanized** iron caps, which are rust proof, and will last as long as the roofing.

In every way we protect ourselves against the possibility of a complaint.

Send for a copy of our Guarantee Bond, and a Sample of Congo Roofing. The guarantee will show you what a real legal roofing guarantee looks like.

CONGOLEUM

We should like to send you a sample of Congoleum. It is fitted for floors and wainscoting in homes, stores, offices, etc. It is a perfect imitation of oak. Its surface has a high polish. Unusually durable. The price is very low. Write for samples and further information.

Canadian, 50 per cent.

SHOW IT UP!

Every agent for Ramsay's Paints has a set of paint cards, that will bring trade to his store, wherever he shows them. They are full of suggestions for painting and choosing of colors. Agents for

RAMSAY'S PAINTS

show up your cards! If you want more, write us. If you want help to secure orders write us. We are helping others all over Canada to-day and they are getting orders straight through our helps, that might go to other stores. We make a rule to put Ramsay's agents in front for all paint orders. Have you Ramsay's Catalogue?

The CHAMELEON may change its "COLORS" and the ETHIOPIAN his skin, but the "ELEPHANT'S" hide is impervious to all climatic conditions. The "ELEPHANT" brand of GENUINE WHITE LEAD is without a peer for DENSITY, BRILLIANCY, COVERING PROPERTIES and DURABILITY.

The "ELEPHANT" is the HARDWARE MAN'S FAVORITE and the PAINTER'S CHOICE because it is the great "MULTUM in PARVO" White Lead, a GREAT deal in a LITTLE space.

WE LEAD THE WORLD

The ever-increasing demand for

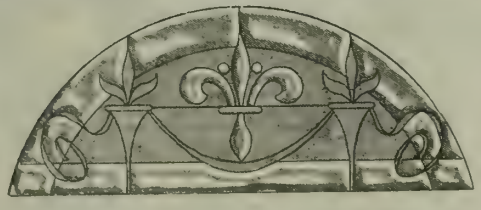
BEAR BRAND LAMP BLACKS

has necessitated this increase in our manufacturing facilities, as shown in the figures below:

	CAPACITY
1902 - - -	3,000,000 pounds
1905 - - -	6,000,000 "
1911 - - -	10,000,000 "

Our growth is entirely due to the consistent high quality and absolute uniformity and purity of our products, together with the courteous treatment always extended to our customers.

If you are not using OUR BLACKS, write us and we will submit samples and prices which will save you money and secure your orders.



WILCKES MARTIN WILCKES CO.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

THE National Cash Register Company guarantee to sell a better Register for less money than any other house on earth. We can prove it. Make us. The National Cash Register Co., 285 Yonge Street, Toronto

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

What Will Your Answer Be

When a customer says "I want a varnish for such a purpose and I want one that I can depend on?"

There is a separate DOUGALL VARNISH for every purpose and each one is the best of its kind. Dougall Varnishes are the result of years of careful study and are the best that brains, up-to-date machinery and the best of ingredients can produce.

Don't have any hesitancy in recommending this varnish. Our reputation is behind every gallon. We KNOW that your customer will be pleased and that you will reap the benefit therefrom.

We would like you to have a copy of our booklet "QUALITY and QUANTITY in VARNISH and VARNISHING" and will send you one on receipt of a postcard from you.

CHANCE'S

"FLEMISH" GLASS

is a new product of the famous glass works of Chance Bros. & Co., Ltd., near Birmingham, Eng.

"Flemish" is a new and most attractive variety of Ornamental Window Glass, unsurpassed in character and brilliancy. It is particularly effective in the best kinds of leaded light work, and for glazing in casements, door panels, or interior partitions, where the object is to obscure the vision, but not the light.

Flemish glass is made in large and small patterns, and in white, staining white and numerous tints.

To architects, contractors and hardware dealers, we will send on request samples of Chance's Flemish, figured, rolled, muffled, double rolled, cathedral and other lines.

Ford's Single Lip Bit

Bores Straight Thru Knots

and cracks as readily as thru a clear board—nothing stops its nail-proof screw point, backed up by FORD'S wonderful PATENTED CONCAVE TWIST with its "razor like" edge that cuts a clean smooth hole in any kind of wood—and it cuts it faster, truer and with less labor than any other bit made. There's NO FRICTION—NO SCRAPING—NO CHOKING—NO SPLINTERING, the FORD works easily, freely and smoothly under all conditions.

Ford's Single Lip Bit is

Made so well it can't break

Listen—we buy the best steel in the world, and buy in 50-ton lots to insure absolute uniformity. It's tempered for us under expert supervision and by a secret process.

Each Bit is forged under trip hammer blows, and undergoes a treatment which gives it FINENESS, TOUGHNESS and DURABILITY that's unequalled. The FORD will stand up under the most severe strain and POSITIVELY WILL NOT BREAK thru any fault in its manufacture.

Ask your dealer—and insist on the FORD—It's best by every test.

2 Gold Medals National Horticultural Congress.

R. D. HEARD, 1382 King Street, LONDON, CAN.

Nature has solved the problem of distribution. It uses a multitude of agents to effect the distribution of its products.

Nature does not expect every seed to fall upon fallow ground and to take root. But, it achieves a profitable percentage upon its distribution. This is all that an advertiser has to do to reap a profitable harvest on his outlay.

Moore's Sani-Flat

is a flat drying oil paint, specially recommended for Wall pa nting, Woodwork, Furniture, Steel Ceilings, Burlap and for all classes of interior decorating.

It produces that desired dead flat finish, having the soft velvety effect of water color, combined with the advantages of being washable and durable as oil paint.

Easy to apply, sets slowly and covers perfectly without showing laps or brush marks.

Saniflat is unfading and covers fifty per cent. more to the gallon than ordinary oil paint.

WOODSTOCK ONTARIO

Every One Sold Sells Many More

Beyond Competition

It is no mere brag for us to say that the

"Kansas" Pruning Knife

(Improved)

is beyond competition. One glance at its improved construction, its positive action, its absolute freedom from all complicated parts, will convince any discerning dealer of its unique superiority. The "Kansas" takes off any branch up to one and a quarter inches in diameter. No climbing or straining. To take a limb off near the trunk simply place the hook over the limb, pull on the handle, and the work is done. For snipping off outlying twigs, pull on the string instead of the handle. The "Kansas" is so much better, quicker, and more convenient than the next best that five or six trees can be trimmed with it while one is being done with any other knife made.

Consequently the "Kansas" is the BIG seller.

AGENTS WANTED.

We talk quality in the "Buco" because we know its quality is unique.

The "BUCO" Garden Cultivator.

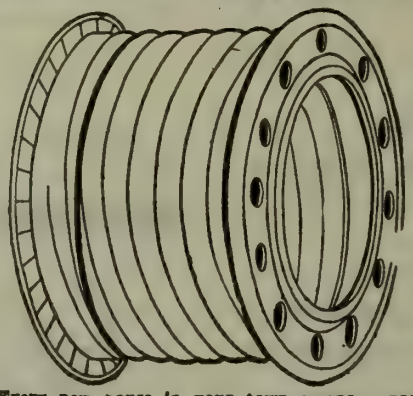
Handle 4½ft. Long

Extra ash handle, best we can get, and malleable head, but it is the teeth we talk about. These are the vital parts.

The teeth of the "Buco" are all high grade springs, tempered in oil by experts, and tested. After a strain in use which would yank the other kinds out of shape forever, they spring back to position unaffected. This means more life in work, greater durability and a most satisfactory tool to handle.

The "CUMA" CULTIVATOR

Total Length, 18in.



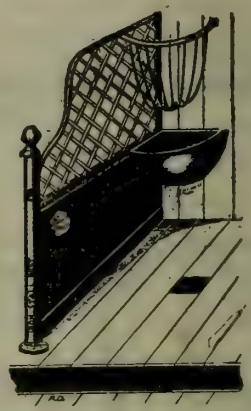
The most effective little tool made for flower bed and fine work. Sells at sight and pleases customers.

The Bailey - Underwood Company, Limited
NEW GLASGOW, N.S.

ONE of the most successful retailers of late years says: "When a firm advertises in trade papers it is getting into good company. As I pick up one of a dozen of these periodicals here in my office, and glance through it, I find that the best people, the successful firms, are represented in such a way as to reflect their importance in the trade."

When writing advertisers kindly mention having seen the advertisement in this paper.

O.K. THIMBLES



Every new house in your town means a prospect for several O.K. Stove Pipe Thimbles. You should carry a good supply in stock and be ready to supply them when wanted.

O.K. Thimbles are made for both floors and partitions. They can always be put in place instantly. Your customers will prefer them to any other Stove Pipe Thimbles they can buy.

Get the Local agency for "Safelock" Wire Fence

You will find "Safelock" the best selling line of fence you ever handled, because you can prove by actual demonstration that it really is the strongest fence made.

Look at this little cut—note how the stay wires interlock where they wrap the strand wire. You simply cannot make a "Safelock" stay slip in any direction. And, as the strand wires are not kinked, at the lock, every wire retains its full strength.

Better write us to-day about getting an exclusive "Safelock" agency for your locality

The Owen Sound Wire Fence Co., Ltd., Owen Sound, Ont.

Western Agents: The Brandon Safelock Fence Co., Brandon, Man.

IT IS PERHAPS NOT GENERALLY KNOWN

That we have an Information Department, consisting of trained and practical men, whose time is employed solely in answering enquiries from people interested in cement.

NOW IT WILL BE READILY UNDERSTOOD

that out of the mass of enquiries that come to us, there are a number that include questions as to what might be termed Allied Industries. These we now answer to the best of our ability, but we could answer them still more satisfactorily if manufacturers of materials used in conjunction with cement would co-operate to the extent of sending copies of their catalogues and other literature, to be placed on file in our office for reference.

WE SHOULD LIKE TO OBTAIN

the names and addresses, together with catalogues, and any other obtainable information, of manufacturers of and dealers in:—

(1) CONCRETE MACHINERY. (2) BUILDING BLOCKS. (3) CEMENT BRICKS. (4) TILE MOLDS. (5) FENCE POSTS. (6) REINFORCING MATERIAL. (7) WATER-PROOFING COMPOUNDS.

It is not alone for our own convenience that we make this suggestion—firms who manufacture or deal in such articles will find it to their own advantage to have this information in the hands of our Information Department, thereby enabling us to hand on to them, from time to time, enquiries for such materials as they severally make.

In sending catalogues, literature or information, please address same to "Sales Department."

"ROSS" RIFLE REASONING

The "Ross" Sporting Rifle is cheaper than any imported rifle of equal quality. What sense is there paying the extra duty for another rifle, certainly no better and probably not so good as the "Ross" Rifle?

Dealers who can make this clear to their customers make more sales and help their customers to economize.

The fact that sales increased **80% last year** shows that dealers are wide awake to the advantages of selling the Canadian Arm.

If your stock is low, increase it. If you are not handling "Ross" Rifles take a leaf from the other dealers' book and order now.

$25.00 and Upwards

Show Them WHY GILLETTE Blades Shave Best

You know some men have an idea that, after all, there's no razor edge like that on the old-style forged steel blade. For some reason or other they fancy that the GILLETTE blade, stamped out of thin steel, can't be as hard and keen as a forged blade. So they don't buy a GILLETTE.

It is up to YOU TO SHOW THEM.

Tell them what "forging" really means. How the piece of mild steel is heated and hammered out till it takes the form of a razor blade. How every heating, every hammering, changes the hardness of the steel a little—how much, no man can tell, but more in some parts than others, because these parts are hammered out more.

Explain how impossible it is for the manufacturer to temper perfectly a blade of such uncertain hardness, and how widely different razors in the same lot vary.

Then tell them how we make GILLETTE blades. How we start with an ingot of steel too fine in quality to stand forging, *whose composition we know.* How we roll this out to the required thinness, then analyse the thin sheet before we stamp out or attempt to harden the blades.

The composition of the steel is thus proved, not altered, by the rolling and stamping as it is by forging, so that each GILLETTE blade comes out not only even in texture throughout, but of the same quality as every other blade. As our patented automatic tempering process tempers each blade *through and through* in precisely the same way, the finished blades have an even, uniform hardness which cannot possibly be equalled in forged blades.

A clear explanation along these lines will convince your customer that the GILLETTE carries the keenest, smoothest, hardest shaving edge in the world. To you this means a $5.00 sale instead of one for $1.50 or $2.00—a better pleased customer—and an annuity from the blades which he'll come in regularly to buy.

MONEY IN YOUR POCKET

LEWISITE ROOFING is **BETTER** than other roofings.

It is a substantial, permanent, satisfactory roof covering that will withstand any climate.

LEWISITE ROOFING is One Solid Flexible Sheet, not several sheets stuck together, consequently it lies flat on the roof.

LEWISITE ROOFING is a Sheet of Special Felt impregnated with a preservative saturant and coated on both sides with a Heavy Gum Compound which makes it absolutely waterproof.

This Saturant and Coating is entirely different from the tarry or resinous substances used on cheap roofings. It contains no tar. It remains permanently proof against all kinds of weather---ice, snow, slush, hot sun---LEWISITE will resist them all.

It also resists fire and is unharmed by acid or alkali fumes that would destroy many roofings.

LEWISITE ROOFING

WILL PUT MONEY IN YOUR POCKET

BECAUSE it is what your customers want at the price they want to pay. it is a quality roofing that will give satisfaction and build up a good business for you in your locality.

We can offer you substantial proof of this. We can show you why LEWISITE is a better roofing, why it resists fire and is unharmed by acid fumes.

Will you let us lay the proof before you ?

It costs you nothing to investigate. When we prove what we say here,
IT WILL MEAN MONEY IN YOUR POCKET

Front View

Rear View

The Cannon Ball Barn Door Hanger

Steel wheel, roller bearing, noiseless, tandem, flexible, bird-proof, waterproof, completely enclosed. The Track comes in 3-ft. sections, crated. 96 feet of track is packed in a crate. Can be put under the counter, making it convenient for stock. The Track Brackets are packed separately. Note that Cannon Ball Hangers run inside of the track, not outside.

"The Cannon Ball Beats Them ALL"

The Cannon Ball House Door Hanger

has two specially-formed rollers, which have steel bushings, covered with sole leather, making an indestructible wheel with wide tread and noiseless, being fitted with long roller bearings.

The Hangers are packed a full set or ½-set in a wooden box, neatly labeled. Ten full or ½-sets in a crate.

Cannon Ball House Door Track is made in lengths up to 12 feet, and is fitted with an Adjustable Wood Header, by means of which the Track is adjusted at the door opening with the use of a screw driver only.

"The Cannon Ball Beats Them ALL"

The 20th Century Barn Door Hanger

is finished in aluminum. The frame and hood of the hanger are one malleable piece, thus making the hanger strong enough for the largest doors.

The wheels have wide grooves and run on hardened steel roller bearings, reducing the friction to a minimum.

A lip projecting about 1 in. below the wheel makes it impossible for the hanger to jump the track.

20th Century Barn Door Track is put up in 2-ft. sections only, 100 ft. in a crate, making it convenient to stock right under the counter.

COLLINGWOOD, CANADA, Sept. 2, 1909.

DICTATED BY M/1 IN YOUR REPLY REFER TO FILE NO. S.4.

E. G. Gooderham, Esq.,
President, Toronto Silver Plate Company, Limited,
Toronto.

Dear Sir:-

As you are perfectly aware, our Company as well as the combined Companies for which we purchased some years ago were in the habit of purchasing their silverware from your Company and we always found that any goods supplied by you were fully up to any representations you had made regarding them. Three years ago we, through some changes made in our Company were induced to buy another make of ware, which we put on our Steamers and after two years' trial found that they were not giving the same wear that yours had previously done, and as we were about to purchase the silverwear for our steamer HAMONIC, which we were just bringing out this year, we naturally felt that it was up to the Purchasing Department of our Company to get the very best goods for the money that could possibly be obtained in Canada. In doing this we invited tenders which we received together with samples, and after looking them over carefully and noting particularly one feature, the quality of nickel silver which was put into the manufacture of the goods we required, we decided to give the order to your Company.

E.G.G. -2-

As the design which you submitted met with the approval of our people, and considering the satisfaction you had given us on former occasions we felt that you were entitled to our confidence.

We have no hesitation in saying that after the goods having been used on our Steamers for the past three months, we have found them fully up to our expectations, and not only that but they have been admired by a very large proportion of the passengers who have travelled on our boats. We certainly feel that we cannot in justice to you say anything but what is of the highest praise for the goods supplied by your Company during this past year, and I think that you may safely rest assured that as long as we get the same satisfaction from your Company that we have had this year, you will be entitled to the consideration of any future orders which we may be able to give your Company.

Wishing you and your Company every success as a purely Canadian industry, which I can assure you bore a great deal of inducement with us in placing our order, as we were building a Canadian ship with Canadian material as far as possible and Canadian workmen, so that we can conscientiously say when completed that our new Steamer HAMONIC was a Canadian product pure and simple.

Yours truly,

C. Macdonald

NEWMARKET CANADA

A REMARKABLE TEST OF MAGNOLIA

BY THE UNITED STATES GOVERNMENT
USING WATER AS A LUBRICANT

The "No. 2 Magnolia" mentioned in "TABLE E" contained the same proportions of tin, antimony and lead as the genuine "No. 1 Magnolia," but did not contain graphite, nor was it treated by our special foundry process: however it was made of virgin materials mixed in the ordinary way, and would class as a high grade babbitt.

TABLE E. Giving results of combined ahead and reverse for friction test of Magnolia and "A" White Brass for each change of weight for 100 lbs. per square inch to 600 lbs. per square inch of projected area of bearing surface by increasing weight 100 lbs. per square inch at each change—**Lubricant: Water.**

"	500	60	58.650	488.75	511.82	72.0	76.0	73.33	1.33	77.5	142.0	105.33	28.83	77.0	130.0	98.58	22.58	0.002427	
"	600	60	58.870	490.58	513.74	68.5	71.0	68.25	−0.25	78.0	140.0	97.08	19.08	76.5	124.0	92.60	16.16	0.00275	

"A White Brass" could be tested up to only 200 lbs. per square inch, as the machine would not turn beyond that weight. The Testing Machine turned easily up to 600 lbs. per square inch with the genuine Magnolia No. 1.

It was not thought necessary to test the No. 2 metal beyond 200 lbs. per square inch. This Water Test shows the true intrinsic value of Magnolia Metal as compared with other metals: It also demonstrates that a metal may show relatively the same analysis as Magnolia and yet fall far short of giving equal results; it also shows the destructive effect of frictional heat on even a very hard metal like White Brass.

It will be observed that the genuine Magnolia Metal (No. 1) proved to be twelve times superior anti-frictionally to white brass and three times superior to the No. 2 or ordinary grade of babbitt.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries co ne from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

TWO CENTS PER WORD

You can talk across the continent for two cents per word with a Want Ad. in this paper.

MAKE ADVERTISING WORK FOR YOU

At a meeting of the Toronto Advertising Club at McConkey's last Saturday some two hundred men sat down to lunch together and the President of the Toronto Board of Trade was Chairman. The leading business men of the town were among the gathering. Ten years ago an ad. club luncheon in this town would have meant the gathering of a baker's dozen of solicitors for local papers. *Why then this change?*

Because good merchants have wakened up and know something about the *selling power* of well-written advertisements in well-selected papers. One weekly publication on the American side, with a circulation of just about two million, gets Four Thousand Dollars a page for a single advertisement; and in a recent issue there were thirty-two pages of ads. —a number of pretty hard-headed business men had spent that One Hundred and Twenty-eight Thousand Dollars in one paper, in one week, because *they knew it would sell goods in proportion.*

ADVERTISEMENTS HAVE AFFECTED YOU.

Take yourself, Mr. Hardware Dealer, when you buy goods for your own household or personal use, haven't you in your shopping asked for Waterman pens—Grapenuts—Heinz Sauces—National Cash Registers—Slater Shoes—Christie Biscuits—Williams Shaving Soap? Yet you certainly have never come in contact with a salesman representing each of these lines. Cold type, or rather, splendidly written ads., have sent you into stores *with a request for these goods.* And the man who sold you a substitute had to work hard to do it, and sometimes *he didn't sell you at all,* because he didn't have what you wanted.

THE GUARANTEE ON ALL ADVERTISED GOODS.

Advertised goods really are *best* and people are beginning to realize it. They are made better than non-advertised goods and this is the reason. Supposing this company has spent a certain amount of money in your town, or in papers that come to your town, advertising the GURNEY-OXFORD Trade Mark. If we shipped *one range* that was not satisfactory to that town *we would undo all the good that money had bought us.* Every dollar of advertising a manufacturer puts into a locality is a *guarantee* of quality in his shipments because one enemy will undo all the work of his advertising. Therefore, a manufacturer with an advertising appropriation is more careful to make his goods *right* than a manufacturer *without* one. So people who buy advertised goods, while not reasoning it out this way, know that they are practically always excellent. You do, and that's why you ask for Christie Biscuits, Heinz, National Cash Registers, etc.

If a Trade Mark is good to buy on, *it's good to sell on.* When a woman wants a new range, she'll think of an advertised brand *sure,* and if you make your selling effort on a name she already knows and has confidence in, the remark, *"We'll take it,"* will come easier and more surely. Now, how many brands of stoves are there in Canada, Mr. Dealer? About seventy-five. How many nationally advertised brands? Ask your local newspaperman. Not five.

THIS PRINCIPLE APPLIED TO YOUR STORE.

The GURNEY-OXFORD Brand will this year be backed by the most comprehensixe advertising proposition ever placed before a Canadian stove man. Included in that plan are some new wrinkles *as effective in an advertising way as the GURNEY-OXFORD Economizer is in stove construction.*

Therefore, just as you are a good business man you will make a point of having this book *before you buy another unadvertised stove.* This book will make you see that this year GURNEY-OXFORD Dealers will have a long start on the man who doesn't believe in advertising. A post card to our nearest office, making sure of a copy of this book, published May 15th—would be the part of wisdom.

Forty-four Years as Retail Hardwaremen

Harland Bros., of Clinton, Ont., Opened Hardware Store in 1867, and Are Still At It—Interesting Review of Their Long History in the Trade—Recently Sold Tinsmithing and Plumbing Department.

A hardware business which dates its history from 1867, and which is still in possession of the original founders, is indeed a rarity in so young a country as Canada. Yet such is true in the case of Harland Bros., whose hardware store at Clinton is one of the neatest and most complete in Western Ontario.

A change took place in Harland Bros.' business a few weeks ago, when they disposed of the plumbing, heating and tinsmithing department to Byam & Sutter, of Stratford. This change in so old a concern awakened the reminiscent spirit in their fellow business men of the town, and the fact that their store was as old as the Dominion of Can-

WM. S. HARLAND,
Of Harland Bros., Clinton, Ont.

ada, that it had been established in the very year of Confederation, was seized upon as an interesting item in their history. When a Hardware and Metal representative recently visited Clinton, he heard frequent mention of this fact, and he saw that an interesting article could be prepared on this subject.

Both Partners Hale and Hearty.

In spite of their long and, at times, strenuous business career, both members of the firm are in the best of health, and, as their portraits show, will be good for many more years of active business life. They are proud of their long connection with the hardware trade, and, in fact, the business people of the town in general feel a genuine pride in the long and honorable history of a Clinton firm.

Wm. S. Harland, the elder of the brothers, had his first hardware and tinsmithing experience in the United States, but he was residing in the Township of Chinquacousy, Peel County in 1867. At that time, he and his brother, J. T. Harland, determined to establish themselves at Clinton, and they accordingly opened a small tinshop there.

For fifteen years they dealt almost exclusively in tinware, but at the end of that time they had an opportunity to purchase the hardware stock of R. M. Raay, which they did.

Early Experiences.

Canadian life was very primitive in those early days, and Harland Bros. have some very interesting and amusing stories to tell of their business experiences.

Clinton was served then by only one railway, running east and west, but as it was the nearest railway station for a very wide extent of country, customers came into the village from many miles north and south, driving their ox teams over very bad roads. This made Clinton quite a business centre, and the merchants prospered, Harland Bros. among the rest.

Currency was exceedingly scarce in that district — so scarce, indeed, that business was largely done on the principle of barter and exchange. Customers would offer, in exchange for hardware, such articles as shingles, sheepskins, hides, furs and various other goods which are the products of the primitive settlers.

The goods they took away from Harland Bros.' store would look very peculiar to the present day customers of the firm. Those were the days when the time-honored candle moulds and candlesticks were in vogue. The lanterns carried at that time, were made of perforated tin, and had very much the appearance of nutmeg graters.

The hardware store did not contain any of the luxuries and package goods which are coming to fill so large a function in the modern establishment. The stock of Harland Bros., and of their competitors, at that time, consisted of the muscle-developing necessities of the day. There were scythes, axes and saws, of primitive pattern compared with the same goods of to-day—stoves with the old-fashioned elevated oven, and many other articles now obsolete. Comfort in the hardware business, as it is now known, was unthought of.

A Good Training School.

It is only natural to suppose that a firm who had been themselves so thoroughly grounded in the rudiments of the hardware business should be able to train up their subordinates to be good hardwaremen, also. It is one of Harland Bros.' proudest boasts that many of the men who served their apprenticeship in the Clinton store are now prominent and successful hardware merchants in various parts of Canada and the United States.

Methods are Modern.

Harland Bros. do not belong to that class of hardwaremen who think that because they have been a certain number of years in business they have nothing further to learn about merchandising. Surely an experience of forty-four years

J. T. HARLAND,
Of Harland Bros., Clinton Ont.

would justify such an opinion, if it were at all justifiable.

This firm are wideawake to every possibility which presents itself. They are open to adopt new ideas if they are good, no matter what their source. They are not yet through with studying how to improve their business.

The result is that their hardware store as at present equipped is a credit to their town, and one of the best retail hardware establishments in Western Ontario. It will not stand still. Despite their forty-four years in the hardware business, Harland Bros. are both in vigorous health to-day, and they undoubtedly have a long period of successful retailing still ahead of them.

One-Price System is Safest

Dangers of Quoting One Customer Lower Price Than Others —Customers are Lost Through This Method — Clerks Should Not Cut Price to Their Personal Friends.

"One price to everybody" was the subject of a conversation a representative of Hardware and Metal had recently with the manager of a prosperous retail hardware store.

The question put to him was this: "A man goes into a store in which one of the clerks is an intimate acquaintance. He buys an article. Let it be anything you will. Say a pocket knife marked at sixty cents. The customer says 'How much, Tom?' and the latter hesitates a minute and says 'Oh, fifty cents to you, I guess.' Now can the store really afford to allow this principle of a special price to friends continue indefinitely?"

The manager answered by saying that his method was one price to everybody, and went into details on the question to prove why this was the safest principle and also the most profitable.

Lawn Mower Sale Lost a Customer.

"You know, that our store is looked upon as one of the best in this town," he said, "and we have a good class of customers who are willing to pay good prices. Not long ago a friend of mine asked me to show him something in lawn mowers. After looking over the stock he bought one for $4.50, which was fifty cents below the marked price. I think that was the figure. However, sometime previously, I sold a mower to another acquaintance, one whom I knew only fairly well, and as I afterwards remembered, it was the same make and style but was sold at the regular marked price. These two men lived on the same street as I knew, but it was a fact that did not present itself to me until far too late. In some way or another while one was passing the other's house while the latter was using his mower they got into a conversation which turning to lawns and mowers, touched upan prices, and the one man discovered that he had paid fifty cents more for the same article than had the other.

"My friend told me about it after and since that occasion I don't think I have seen the other in the store, and to tell the truth I do not blame him. The point that I want to emphasize is that in this giving a special price to one customer you never know whether you are not thereby injuring yourself. You not only sacrifice a little of your profit in that case but others may hear about it and the reputation of having two prices is not a good advertisement. Your friend does not intentionally brag about the special rate he obtained, it is generally an unconscious act, but it does the harm just the same. I could mention other cases to show that giving special prices to friends or others is not at all a safe policy."

Small Cuts Aggregate High in a Year.

"I had charge of the clerks in one store and I found by examining their sales sheets now and then that they were giving special prices, either to friends or to close buyers. I gave them strict orders that they were to maintain the marked price but still they were cutting. So one morning I called them together to show by actual figures how they were cutting down the profits of the firm. It was an easy matter. I supposed that each of the ten clerks threw off just ten cents a day. In a year they had caused a loss of $300 to the firm. They knew that they were averaging much more than a reduction of ten cents per man and the truth was brought forcibly home to them."

Another question asked the manager was "Suppose that a competitor is doing more or less cutting what would be your policy?"

Let Competitors Cut.

To which the manager replied: "Let him cut. Mark your goods at a fair price and sell them according to it. If somebody finds fault with it you or your clerks can point out that only a fair profit is being asked, that is if you want to say anything at all. I made it the rule that if an order was important and the customer wanted a special price they were to be sent to me. Then I could use my own judgment. I believed in giving the clerks a certain amount of responsibility, but not all of it. I do not think that you can carry on business without some special prices here and there on large orders, or those of a very special nature."

All Purchasers of Firearms Must Secure Permit

New Legislation Goes into Effect in Ontario—Jobbers and Retailers Claim That Losses in Trade Will Result—Much Work Will be Entailed on Dealers—Strong Protests Are Being Entered.

Toronto, April 21.—Commencing tomorrow, rigid relations go into effect in all parts of the Province of Ontario, regarding the sale of offensive weapons. The proclamation issued states that every person who sells a revolver, pistol, sling-shot, air-gun, bowie knife, dirk, dagger, stiletto, etc., to any person not holding a permit from the local or provincial police will be liable to a fine of from $25 to $200. The same penalties will apply to any person who makes the purchase, without a permit. Dealers will be required to keep records of all transactions and the names of purchasers, the same as druggists do in the case of the sale of poisons. These records will have to be sent to the provincial police every three months.

Officers are given power to search people whom they have reason to believe are carrying concealed weapons, and regulations are included looking to the deportation of foreigners upon whom such weapons are found.

The Reason for It.

The reason given is that the increase of crime in the Province must be checked by some means or other. It is aimed particularly at the foreigners.

Will Be Enforced.

It is given out by the Provincial Police Department that the new law will be strictly enforced all over the Province.

"Will every sportsman who wants to buy a new rifle and every farmer who gets a gun have to take out a permit?" was asked.

"That's the law," was the answer. "It will be up to the local police."

"How about boys and air-guns?"

"Stricly speaking, they are not allowed to have them. It is a matter for police discretion. Under proper conditions for practice, such as in the case of boy scouts for instance, the sale and use of air rifles might be all right."

Deputy Chief of Police Stark, of Toronto, rules that boys scouts will have to get their air rifles through the officers of their command, the same as the militia do.

Harold A. Wilson, dealer in sporting goods, Toronto, states that there are thousands of air rifles sold in Toronto and hundreds of thousands throughout the province.

Opposition Arises.

It is certain that the legislation will arouse opposition from wholesale and retail dealers in sporting goods and hardware. Already strongly worded protests have been entered and more aggressive measures may yet be taken.

"It is bound to cripple business in these lines," declared an official of a Toronto jobbing house to Hardware and Metal. "In order to stop foreigners from carrying dangerous weapons, they propose to restrict legitimate business all around. We have already protested strongly and I am convinced that a most general protest will be voiced."

The Length of Knives.

"Here's another point," he continued. "The new law prohibits the sale of knives over three inches, unless a permit has been secured. Why people will not be able to buy butcher knives, carvers or table knives without asking permission first. In its present form, the new law will be a great hardship."

Lost Trade by It.

A number of retailers were also spoken to on the matter, among them, Mr. Warren, of Warren & Ellis, Yonge St., Toronto.

"Saturday, a customer came in," declared Mr. Warren, "and asked to see a revolver. I explained that he would have to get a permit and he at once said that he would not bother doing so. He had merely wanted the revolver to keep in the house. Consequently, I lost a customer."

Other dealers complain that the keeping of records is bound to prove a great bother. The hardware dealer is a busy enough man to-day without having to attend to work of this kind. Much labor and some losses will be entailed, according to the opinion of most of the retailers who were seen.

Others did not take quite as serious a view of it. A. Fenn & Co., successors to the Warren Sporting Goods Co., Toronto, state that they sell about 300 revolvers a year and do not expect to lose much of this, as their customers would be able to get permits easily enough. It is the sale of offensive weapons to foreigners, which will be restricted chiefly.

Strong Objections Lodged.

Toronto, April 27.—Now that the terms of the new legislation are more generally known, strong objections are being voiced on every hand. Wholesalers and retailers alike are loud in their disapproval of the new measure. It is generally claimed that the regulations will unfairly hamper trade.

Protests are being sent in to the Provincial Attorney-General from individual sources and this will be followed by official protests from the organized bodies. It is understood that the wholesale association will take up the question and, from the opinions expressed by individual members of the body, it is safe to assume that a very strong protest will be lodged by the association.

It is contended, for one thing, that the terms of the new legislation are ambiguous. For instance, "air rifles" are named on the list of articles which can be sold only to persons holding permits. Now, strictly speaking, there is no such thing as an air rifle sold in this country. The article commonly designated in that way is not in reality an air-rifle, insomuch as it is fired by a spring. Then the restriction on the sale of knives over three inches will apply to carvers, butcher knives, etc., and consequently borders on the ridiculous.

Old Customers Followed Firm to New Section

Old Customers Followed Firm to New Section—Christie Bros., West Toronto, Had People Visit Them From Far Distant Parts of City—Good Service Was the Magnet—Why and How Service Helps in Holding Stove Trade.

It is an old business axiom that the merchant who is satisfied with making sales, will not meet with as much success in the long run as the man who makes customers. The store policy should be shaped toward that end—the making of regular and well-satisfied customers. The first order leaves a measure of profit with the merchant; but it is the "repeats" which count.

This applies to the stove department as much as to any other. People have to live with a stove for a great many years, and, if they are satisfied with it, they will continue to give all their custom to the dealer who sold them that stove. On the other hand, if they are not satisfied, they can, and probably will, do the dealer a great deal of harm by noising their dissatisfaction abroad. A disgruntled customer is the worst advertisement that a dealer can have.

Service is one of the elements of success in building up, and holding, a good stove trade. If new parts are promptly secured when needed by a customer, and repairs are attended to quickly, that customer will continue to deal there.

Here is a case which illustrates what splendid results good service will bring. Christie Bros., West Toronto, formerly conducted a store in the central part of the city. They decided, however, to concentrate on their business in West Toronto, and closed the city store. They found, however, that the customers they had made in the city did not leave them. Not only did old customers go out to the "Junction" to shop at their store but they took new ones with them. This was particularly the case with stoves. So satisfactory had been the service given these old customers that they did not care to deal elsewhere, and were prepared to make the long trip to Christie Bros.' store at West Toronto. Last week two stoves were sold to people who lived near the Woodbine, which is at the extreme east end of the city, and a good many miles distant from the store. These stoves were sold off the floor, the people having journeyed out from the Woodbine by street car—a jaunt of nearly an hour and a half in duration.

One would naturally suppose that Christie Bros. had taken some steps to hold their old customers, either by personal calls or letters. But such is not the case. The only string that holds them is the good service rendered in the past.

There is much food for thought in this instance. If one firm can move away and still hold custom, it should not be difficult for the dealer, who does not find occasion to move, to keep his trade intact. Further, if the magnet of a good reputation for service can draw new customers from a distance of about ten miles, then what wonders in the way of new business might it not effect for the merchant in his own immediate vicinity?

The Other Way.

Some few years ago, a well-to-do citizen of an eastern Ontario city bought a range from a local dealer. It was a good range and gave uniform satisfaction but the purchaser, nevertheless, did not give any more custom to the man who had sold it to him. It happened this way. A couple of weeks after the sale had been closed, Brown, the purchaser met the merchant on the street. The latter glanced at him casually, did not recognize him and passed without salutation. Brown felt aggrieved. The purchase of that stove had seemed like a big deal to him and he thought that Smith, the merchant, should have remembered him. The difficulty lay in the fact that the sale of that particular stove had been but one incident in a busy day for Smith and, while Brown's face seemed familiar in a vague sort of way, he did not remember who it was until after they had passed. As Smith was a maker of sales and not a maker of customers, he did not stop, call Brown back and ask him how the range was working.

Mistake number two came in when Brown sent for a new oven door. Smith had to send away for it and, being one of the careless sort who are very lax in matters of correspondence, he forgot to write the letter for a day or two. A couple of days afterward, Brown telephoned to the store to know when he was going to get that new oven door. Smith was out and the clerks who answered knew nothing about the matter and did not seem to feel any interest in it. He promised to speak to Mr. Smith about it but forgot to do so. The new piece arrived a week after and, in the course of a day or so, it was sent up to Brown's and that was the reason why Smith lost a good customer.

Too many stove dealers make the mistake of considering a sale closed when the stove is installed in the customer's home. It is, in one sense, only begun. A certain amount of service thereafter should go with every stove sold.

Brisk Spring Business.

Reports from all sections indicate that the trade in stoves this spring has been very brisk. Many dealers state that it has been the best spring they have ever experienced in this line. The demand has been particularly heavy for gas stoves and ranges. It is, in fact, becoming more apparent every year that the spring trade is growing in importance and dealers are resorting to special measures to capture a good share of it.

One plan recently followed out was the holding of a range auction. It was advertised that on a certain day, a steel range would be sold to the highest bidder and everybody was invited to call at the store and get blanks upon which the bids were to be made. The advertisements explained that, on the day of opening, all bidders had to be present in the store or have authorized representation. The range brought a fair price but the chief advantage scored was that a large crowd of people came to the store and many bought other articles.

J. C. Luergering, of Fort Madison, Iowa, recently held a four day demonstration. Each person who attended received a coupon with a number printed on it. On the last day a draw was made and the holder of the lucky number was given a coal and gas range. The store was crowded every day and a thriving trade done, not only in stoves but in general hardware lines.

SHARING THE TRADE IN WEDDING GIFTS.

Hardwaremen who made a big success of their presentation specialties during the Christmas season (and few there are who did not), will find other good opportunities for that trade in this line, during the next six weeks.

The open season for weddings, is now on. There is scarcely a railway platform in the broad Dominion which will not receive plentiful sprinkling of rice and confetti for some weeks to come. And a wedding without its showroom of gifts, is something unthinkable.

So, it is a foregone conclusion that a good few retail merchants are going to supplement their usual business, by sales of wedding gifts, during May and June. It is for the hardware dealer to exert himself so that he may secure a good share of this interesting and profitable trade.

Of course, the purchasers of wedding gifts will still buy a good many carving sets, and the various articles of silverware which have become irrevocably associated with these festivities. But it begins to appear that this season's donations will include a fair proportion of more practical articles which are just as much in the hardware line as silverware and fancy cutlery.

Thanks to the extensive advertising which has been done by the manufacturers, brides-elect are now thoroughly familiar with the merits of such convenient and labor-saving articles as electric irons electric toasters and electric chafing dishes. This fact, coupled with the introduction of cheap electric power in so many parts of Canada, opens an attractive field of merchandizing for hardwaremen, and the season of weddings insures a good opening demand for these lines, if properly pushed.

Already, reports from the larger trade centres, indicate that a good business is being done in modern electrical conveniences, and, while present sales are largely for the purpose of wedding gifts, there is undoubtedly a good future for this line, which is bound to become more and more of a staple each year.

MUTUAL FIRE INSURANCE.

At a recent meeting of the executive committee of the Ontario Retail Hardware and Stove Dealers' Association, it was virtually decided to recommend the appointment of an advisory committee on fire insurance. For some years the question of mutual fire insurance has been under consideration. The committee felt, however, that they were not certain enough of their ground to proceed with this undertaking. Promises of support had been received from a large number of hardwaremen but not from enough to make success in any sense assured. It was felt, also, that there was ground for doubt as to the possibility of securing the necessary legislation to carry on a mutual fire insurance business.

The duties of an advisory committee would be just what the name suggests. The committee would be expected to secure information for the benefit of members of the association. The committee would be at the service of any member who desired enlightenment on any point or assistance in the matter of getting insurance.

One thing is certain, that fire insurance is one of the most important problems that faces the retail dealer. That sufficient attention has not been paid to this phase of business in the past, is equally certain. Each individual should go into the question fully himself and it is a problem that the association as well should take up in some way. Hardware and Metal has often drawn attention to the importance of this problem in the past, in the belief that the best interests of the trade demand action of some kind. The suggestion emanating from this paper that an expert be secured to act in an advisory capacity seems to have found favor with the executive. No doubt an advisory committee, as now suggested, will go a long way toward solving the problem.

OVERCOMING THE WORRIES OF BUSINESS.

It is not often that business men still in the harness, are able to look back upon more than forty years of successful endeavor in the same town or village. The wear and tear upon the nerves of the merchant in these days, are such that only the stoutest can survive so long an experience, and retain perfect health. Those who do so, must be credited not only with fine physiques, which resist the wearing effects of a strenuous life, but also with a genius for organizing and systematizing, which help to overcome the worries of a growing business.

The leading article in this week's issue of Hardware and Metal, sketches, in a brief way the history of a firm who have conducted a hardware store in Clinton, Ont., for over forty-four years. The business has grown steadily until it occupies a foremost place among the retail hardware establishments of Western Ontario. At the present time, the annual turn-over is large, and the business, in less capable hands, would be a constant source of worry. But Harland Bros. have come through this long period of business activity with unimpaired health.

This fact is a fine tribute to the physical strength of the brothers, but it also indicates that they possess executive ability of a high order, and the general appearance of their store—neat and tidy, reflecting the prosperity of the business—bears out this opinion. The example of this firm shows that a properly conducted business is conducive to health, strength and mental alertness.

THE SALE OF FIREARMS.

The new legislation, enacted to govern the sale of firearms, knives, etc., in the Province of Ontario, is bound to create much discussion and to raise a storm of dissent from both buyers and sellers. It would not be wise to express an arbitrary opinion, either in favor or in condemnation of the measure, until the exact terms and probable effect become thoroughly understood. A cursory study of the enactment, however, leads to the impression that it has been loosely constructed and is likely to cause much confusion and trouble.

The object of the legislation is commendable. Any efforts to stamp out crime and deeds of violence in the province are worthy the support of every right thinking man. But care, at the same time, should be taken not to hamper the carrying on of legitimate business. It is the

opinion of hardware and sporting goods dealers that the new regulations will have this result. Further complaint is made that the terms are ambiguous and that certain branches of trade will suffer, which those instrumental in drawing up the measure, certainly did not have in view. For instance, strictly interpreted, the law will allow carving sets and butcher knives to be sold only to persons holding permits for same. If this is really the case, a highly farcical situation will result and trade will be hampered to no inconsiderable extent.

One may well question the advisability of putting the new regulations into effect before sufficient time had been allowed for public discussion. In framing legislation of this kind, all sides of the question should be considered. All interests involved should be heard from and their interests given due consideration. It seems apparent that such has not been done in the present case.

DEMAND A FAIR PROFIT.

One of the last things that a retail dealer cares to do is to raise the price of an article, even when circumstances make it absolutely necessary. Many dealers will bear the loss themselves rather than ask their customers to pay more for some line of goods on which the manufacturing or wholesale price has been raised. This course is foolish and unnecessary ; foolish because a fair margin of profit must be charged to cover the cost of doing business and unnecessary because the public will pay the increase quite willingly in a large majority of cases.

As a specific instance, we might quote paint. Hesitation has been felt by dealers in raising the price of mixed paints, because they have expected a howl of protest from the ultimate consumers, the public. Recently increases have been made, however, as the inevitable result of the unprecedented cost of oil and turpentine. What is the result ? People are buying in as large bulk and just as readily as ever. Hardwaremen say that they have had no trouble getting their price, that customers have paid the extra charge without a murmur. This is due to the fact that the public realizes that the price of an article must advance in accordance with the advance in the cost of production. If at first a customer demurs, it is not a difficult matter to point out the reason for the increase and convince him that it is absolutely necessary.

The retail dealer is entitled to a fair margin of profit and he should never hesitate to demand it. If, through some mistaken motive, he neglects to do so, the loss is all his own.

CANADIANS BECOMING READY SPENDERS.

About the first thing one sees upon entering a hardware store, just now, is a display of refrigerators. Sales have not been numerous as yet, but the season is on, and, in most stores, stocks are complete.

A particularly striking feature of the refrigerator stocks (and the same may be said of gas ranges and other seasonable lines), is the preponderance of quality goods. A refrigerator to retail at about fifteen dollars, seems to be the average in many establishments, while a surprisingly large number of dealers are stocking heavily in those which will sell at twenty dollars and upwards.

Some years back, a fifteen dollar refrigerator was considered a reckless extravagance, even though its quality did not compare with what can be bought, to-day, at the same money. Yet it is only an average price now. To such an extent has the public taste been educated.

Anyone who looks over a hardware stock to-day, and compares it with what he would have seen in the same store fifteen years ago, must realize the great development which has taken place in the tastes of Canadians during the past decade and a half. As the hardware business is one of the surest indications of a country's progress, we must therefore conclude that Canadians, as a people, are buying and demanding a better quality of staples and a greater variety of luxuries now than at any other time in their history. Canadians are becoming extravagant spenders.

Many hardwaremen are taking advantage of this fact, greatly to their profit. They not only take care to keep a good up-to-date stock on hand, but they see that it is tastily displayed and well advertised. They realize that the modern Canadian likes to patronize a "classy" store, and they try to provide one for him.

Of course, there are still buyers who are interested only in low prices, and there will always be such. But they are no longer in the majority, and there is hope of educating a good proportion of this class to the numbers of those who buy quality goods which are worth a good price.

POINTED EDITORIALS.

There are a good many hardware dealers handling seeds this year, and none of them express any regret that they are doing so.

* * *

A western plumber describes his home city as a "plumbers' heaven." Might not one question the advissability of associating the two words ?

* * *

If the Ontario authorities desire to stop crime among the foreigners, would this purpose not be effected by prohibiting absolutely the sale of weapons to people of alien extraction ?

* * *

A hardware store at Content, Alta., has been sold. If the name does not belie the place, how can anyone think of leaving so ideal a locality to embark once more in the constant struggle outside, where discontent is the common lot ?

* * *

From the number of factories being established in the West, it is clearly apparent that this is indeed "growing time" and that the growth is not confined to the crops. The industrial expansion of the West has been very rapid of late years.

* * *

Another western hardwareman, with the courage of his convictions, has changed to the cash system of doing business. If he perseveres prosperity will be his lot. Although it requires nerve and strickatitiveness to stay in the cash highway, it is the one sure path to good profits.

* * *

The new Ontario regulations prohibit the sale of knives over three inches to people without a license. Will the housewife, who wants to buy a set of carvers, have first to depose before the local chief of police that said carvers will be used for the dissection of fowls and roasts, and for that purpose only ?

* * *

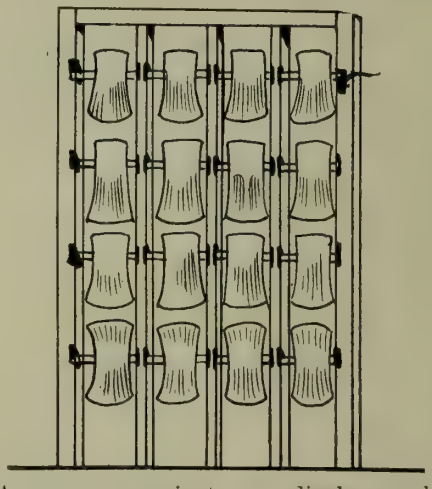
In an address before a body of advertising and business men at Chicago, R. R. Shuman gave a valuable lecture on the place and value of the trade paper, referring to it as the "merchants' market place." Mr. Shuman advanced many telling arguments in favor of trade paper advertising, giving figures to show that it is more profitable to talk to 10,000 people, 95 per cent. of whom may buy and resell your goods than it is to talk to 100,000 of whom 10 per cent. may 'ask' for them.

Ingenious Devices for Displaying Goods

How Watts & Bate of St. Catharines, Ont., Solve Some Knotty Problems — Several Space-Saving and Time-Saving Contrivances Described — Displaying Rope Without Occupying Store Space—Simple Method of Showing Axes.

Neatness and order are everywhere apparent in the hardware store of Watts & Bate at St. Catharines, Ont. From the trimly kept silent salesman at the front door, right through to the goods entrance at the rear lane, everything is in applie-pie order, and all possible precautions are taken to keep stock readily available so as to save time for clerks and customers. This has been successfully accomplished, and the strange thing about it is, that, although nearly the whole stock is right at the clerk's elbow, all the time, the floor and shelf space in the store are not by any means crowded.

How Space and Time are Saved.



As an example of how space and time are saved in this store, Hardware and Metal is illustrating some of the schemes which have been devised and carried out by Watts & Bate.

In the first place, the idea which prompted many of these contrivances, was that the floor space in the store should rather be used to display samples of the lines carried, than the complete stock, or any considerable portion of it. Especially is this the case with bulky goods for which the customer simply leaves an order, and which has to be delivered. The customer merely requires to examine samples of the stock, and, having made his selection, delivery is made from the warehouse, which in the case of Watts & Bate, is directly at the rear of the store.

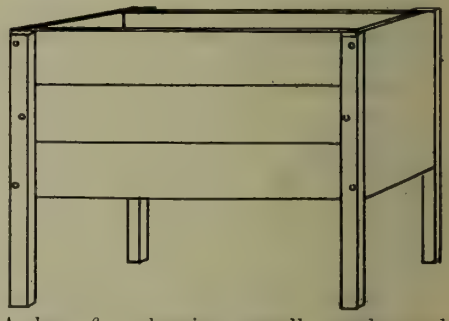
Displaying Full Line of Axes.

One of the most difficult lines to display in a hardware store is axes. They are heavy and very inconvenient to handle, but Watts & Bate have devised a rack which enables them to exhibit a sample of every axe they carry, in very small space, and in such a way that every axe may be taken off the rack instantly, and a closer examination permitted.

As will be seen by the illustration, this rack is a very simple affair which

A very convenient axe display rack.

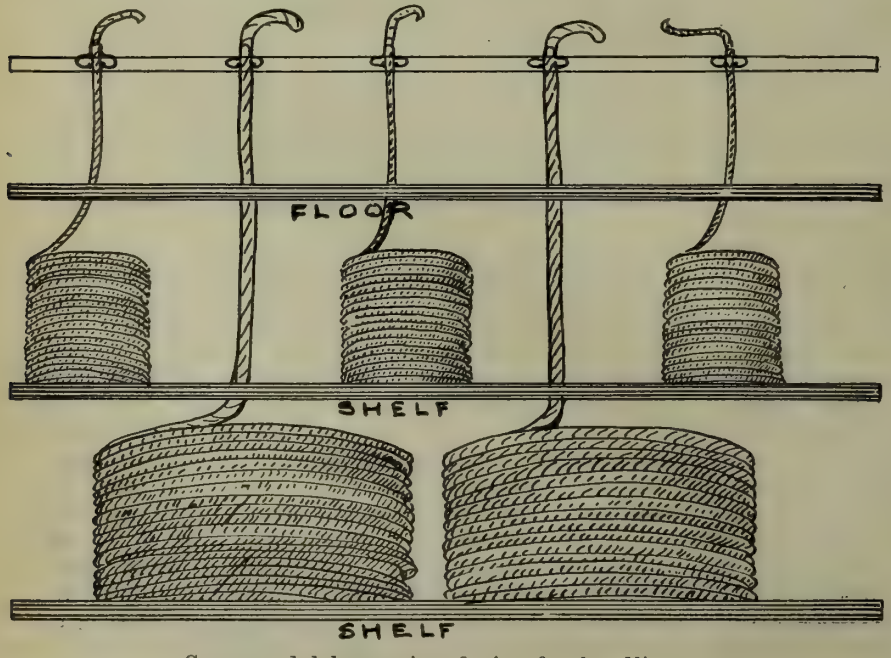
could be made by any handy man. It is made just wide enough to accommodate four upright rows of axes, or a total of sixteen. This gives the opportunity of showing a very complete line.



Diagonal notches are chiseled out, along the sides of the uprights, so as to support the short iron rods which, in turn, hold up the axes. To take the axes out of the rack, all that is necessary is to take up the rods at each end and lift them up, bringing the axes with them. This is a very simple matter, but even that is not necessary, as the rod acts as a kind of pivot, and permits of the axe being handled so as to carefully examine its edge and finish, without taking it from the rack.

Something New in Rope Display.

Ten different sizes of rope are stocked so that they can be measured out and cut to length without leaving the store, and yet, to all practical purposes, no floor space is taken up.



How this is done is shown in the accompanying illustration. The rope is stored in the basement, on two shelves, the heavier grades being on the bottom shelf. The ends are run up through holes which have been bored in the floor and are held in position, a few inches above the floor line, by a cleverly devised wire arrangement, bent so that the rope comes through next the wall, and is then pulled over to the narrow part of the contrivance, where it is held in place as though by a spring.

Thus, all the different sizes are in full view of the customer. When he has made his choice the clerk detaches the

A box for showing small goods and notions.

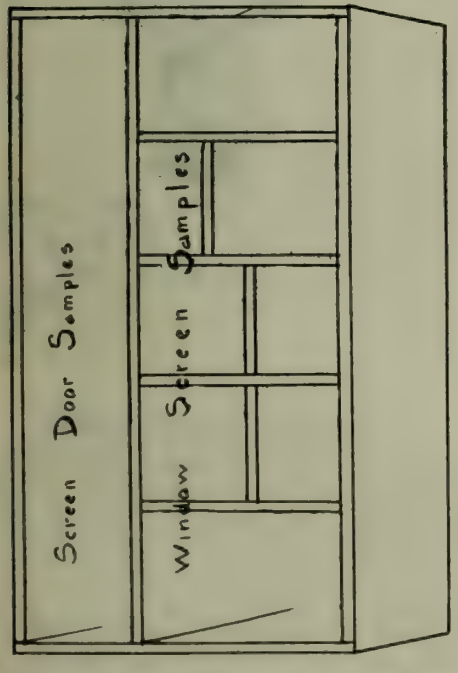
size required from the wire holder, measures off the length required, cuts it on a patent knife which is conveniently attached to the floor, and then clutches the end again, in the wire holder.

Space and labor-saving device for handling rope.

Showing Screens in Small Space.

There are few things around a hardware store which are so hard to dispose of conveniently, for display purposes, as screen doors and windows. They are very bulky, and, as usually stored, they entail a lot of work on the clerk who is showing the customer his complete line. Watts & Bate have overcome this difficulty in a very simple manner, by making up a rack such as is illustrated on the following page.

Samples of all the screen doors carried in stock stand in the large compartment, and they can be pulled out very easily to show customers. The smaller compartments are for window screens of different sizes and prices. Each compartment has a ticket stating the size when closed, size extended, height and price of the screens it contains.

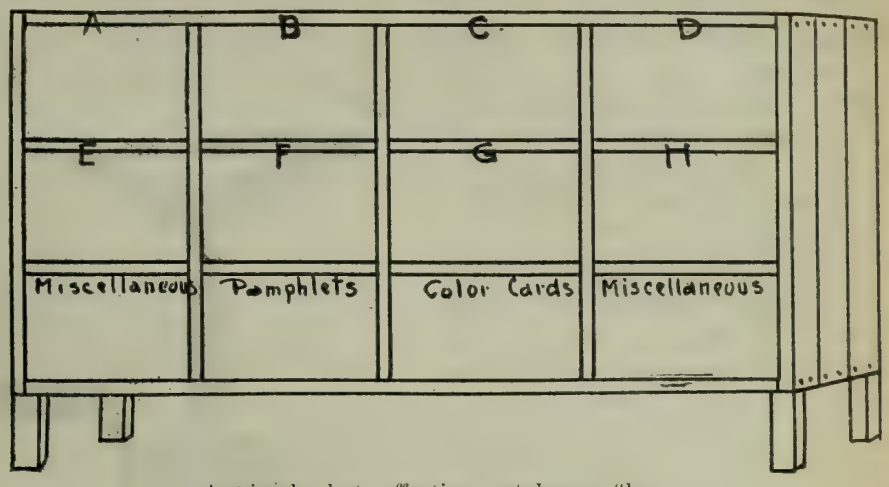


Useful Box for Notions.

By simply putting legs on an ordinary packing case of small size, Watts & Bate have made a very useful means of displaying notions and small goods of different kinds. When the Hardware and Metal representative called, it was filled with horse brushes and curry combs.

Keeping Catalogues on File.

Watts & Bate have a good scheme for keeping their catalogues where they can put their hands on them at a moment's notice. They have constructed a catalogue cabinet which is divided into compartments A, B, C, D, E, etc., and some smaller compartments. Those marked A, B, C, D, are the largest in the cabinet, while E, F, G, H, are designed to accommodate catalogues of smaller size. In addition, there are compartments for circulars, color cards and miscellaneous advertising literature issued by manufacturers.



"I never throw away any advertising literature we receive," said Mr. Watts, as there is no telling when it may come in handy. If there does not appear to be any use for it in our trade, I put it in the file entitled 'miscellaneous,' and if a customer should, at any time, ask about goods a little out of the ordinary, I am almost sure to find some literature about it in the miscellaneous file. Color cards have also been placed in a file by themselves."

This rack is to hold sample screen doors and windows.

Every catalogue that comes into the store is immediately numbered—A138, B230, and so on. Two indexes are kept —one according to number, and the other according to the name of the firm. If it is desired to find out whose catalogue is numbred C160, the number index is consulted. If Blank & Co.'s catalogue is wanted, the name is looked up in the name index, and the number is found to be D230. It then takes only an instant to locate number 230, in compartment D.

As soon as the 1911 catalogue of any firm is received, the 1910 book is destroyed to avoid confusion. If a duplicate catalogue is received, it is put away separetly for it will generally come in handy.

A simple but effective catalogue file.

CHANGE IN FIRM NAME.

The Marble Safety Axe Co., of Gladstone, Mich., announce that they have decided to change their firm name to the Marble Arms and Manufacturing Co.

The reason for making the change is that the old name has been found inadequate to cover the business of the company, as it signified only a small part of its product. The concern originally was on a very small scale, manufacturing only an ingenious safety pocket axe, which had been invented and used for many years by W. L. Marble, the general manager of the company.

From time to time new lines were added, consisting of unique outing articles also invented by Mr. Marble, until today the variety of the products is so great that the new firm name is considered necessary to properly represent them.

Fire, originating from an unknown cause, destroyed the annealing department of the Brantford Screw Works early Wednesday morning.

An Advisory Committee May Be Organized

Ontario Executive Discuss Mutual Fire Insurance at Guelph—This Plan is Favored by Members—Convention Will be Held in Winter Fair building.

Guelph.—A meeting of the executive committee of the Retail Hardware Merchants' Association was held at the Wellington Hotel here. President Chown, of Belleville, presided and the others present were: M. S. Madole, of Napanee, 1st vice-president; H. Occomore, Guelph, 2nd vice-president; W. Wrigley, Toronto, secretary, and W. W. Bennett, Gananoque; D. Brocklebank, Arthur; W. F. McPherson, Prescott; Chas. Conn, Tilsonburg; D. A. McNab, Orillia, and Wm. Wright, Toronto.

The question of mutual fire insurance was debated at some length, in fact the discussion on this subject occupied the greatest part of the session. Mr. Brocklebank, who has been handling this question, had a large number of replies from association members, stating their willingness to enter into a mutual arrangement. The number received was not large enough, however, to insure the success of the undertaking. In addition, it was felt by many that considerable difficulty would be encountered in securing the necessary legislation to validate the formation of the body. After a long discussion it was decided that some steps should be taken and the executive favored the formation of an advisory committee or board. The duties of this body would be to advise members on the subject of fire insurance and provide them with the means to safeguard themselves.

In Winter Fair.

Another important matter taken up was with reference to the convention next year, which is to be held in Guelph. The Winter Fair Building was visited and Armouries would also have been inspected had time permitted. It was understood, however, that the Armouries would not be large enough and it was virtually decided to hold the convention in the Fair building.

Other arrangements were made and it is believed that in many ways, the 1912 gathering will be the best ever held.

New Hardware Goods

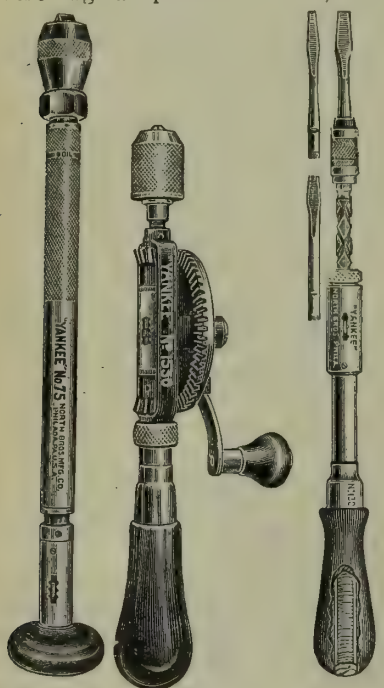
THREE NEW "YANKEE" TOOLS.

North Bros. Mfg. Co., of Philadelphia, Pa., have added three new tools to their "Yankee" line, all of these being illustrated on this page.

Fig. 1 shows their new "Yankee" Push Brace No. 75, so named because it will hold all the small tools used in a bit brace, but is operated by pushing the handle to revolve the tools. It will drill holes, drive screws in or out, and can be used for tapping holes and, with a socket bit, to drive in small lag screws, as well as to perform many similar tasks. The entire length of the tool, without bit, is 16¼ inches, when closed, and 23½ in. when extended.

Fig. 2 illustrates the new "Yankee" Hand Drill No. 1530, with right and left hand ratchet movement. This is a smaller size hand drill for light work. The wood handle with ferrule, is 4 in. long, large end 1½ in. diameter. It can be detached from the frame by a milled nut, and thus use the interior of the handle as a magazine for drills. The extreme length of the drill is 10½ inches.

Fig. 3 shows the "Yankee" Quick Return Spiral Ratchet Screw Driver. This is the regular pattern No. 30, with a



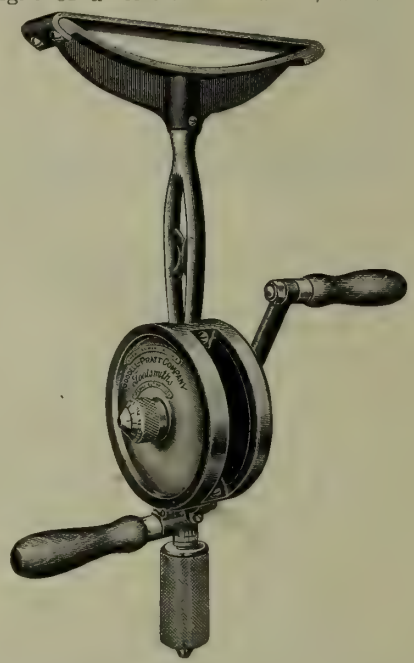


Fig. 1. Fig. 2. Fig. 3.
Three New Yankee Tools.

spring added in the handle as shown in the cut. This spring causes the handle to come back for the next push in driving screws in or out. It is said that the tool can be successfully used with only one hand driving the tool. The extreme length of the tool with bit in chuck, is 20½ inches when extended.

GOODELL-PRATT BREAST DRILL.

Among the new tools which the Goodell-Pratt Company are showing in their new No. 10 Catalogue is the No. 86 ratchet breast drill. This tool is equipped both with changes of speed and changes of motion, making it possible to operate either at fast or slow speed, as a regular breast drill, with either a right or a left hand rachet, when in

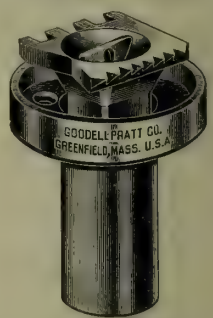
cramped quarters, or with a reciprocating motion as desired. The changes of speed are controlled by reversing the position of a nut on the frame. The changes of motion are operated from the hub upon the left hand side of the machine as held in operation. This hub is marked with characters indicating the different motions by merely turning it slightly to the point desired that motion which is wanted comes into play.

The gearing is all enclosed in a guard, so that it will be impossible to injure the hands in any way, regardless of how the tool is held. The wide saddle breast plate with a strap top will be much appreciated by the user.

The chuck upon this machine, is of a new design, giving greater strength at the point of greatest strain. It is made entirely of steel, and furnished with hard steel jaws.

STRETCHED RUBBER PATTERN FILTER.

The Anti-Splash Filter Co., of Owen Sound, Ont., have a new article for the trade in the shape of an Anti-Splash Stretched Rubber Pattern Filter. This filter will fit any ordinary plain faucet,



oval or round, as shown by the illustrations. It may be taken apart for cleaning purposes, and it is said to collect a surprising amount of sediment from the drinking water. The filter is so constructed as to allow a quick nonsplashing delivery of water.

OTTERVILLE FIRM HAS NEW LINE.

The Otterville Manufacturing Co., Otterville, Ont., have added to their plant a lot of fitting machinery and are now making an extensive line of combination brass and iron unions, non-corrosive in contact and threading, having secured the Canadian patents on the latest invention of these from a large Chicago firm.

NEW BENCH HOOK.

The Goodell-Pratt Company, of Greenfield, Mass., has lately put on the market a bench hook, shown herewith. This doesn't require the use of a screw driver for adjustment, as a quarter turn of the T lever in the round depression at the top releases the hook so that it can be lifted to the desired height, when a

quarter turn back locks it and makes it perfectly rigid. The hook may be removed from the plate and any of the four faces used against the work.

The entire tool is nickel-plated and the parts visible after it is inserted in the work bench are polished bright. They are each packed in a strong pasteboard box and neatly labelled.

BRONZE SCREEN CLOTH.

The B. Greening Wire Co., of Hamilton, have recently placed on the market a new line of Rustless Screen Cloth, which promises to be very popular with the trade. It is of antique bronze finish and is claimed to be perfectly rust proof. The manufacturers have distributed, among their customers, a quantity of very attractive sample cards to which are attached small pieces of the Bronze Screen Cloth. These will prove of considerable convenience in presenting to prospective buyers, the advantages of a rustless screen cloth. The B. Greening Wire Co. have still a few of these samples on hand, which they are prepared to send out to the trade, upon request.

NEW PATENTS ISSUED.

The following is a list of patents recently granted by the Canadian patent office, as furnished by Fetherstonhaugh & Co., Ottawa:

131,877. Enameled Metal Co., corporation of Sharonsburg, Pa., assignee of Jno. S. Pratt, Springdale, Pa. Method of treating pipes. Enameled Metals Co.

Hardware Letter Box

Deafening Felt.

Arcade Hardware Store, Forest, Ont.—"Please advise us, if possible, who are the manufacturers of 'Excelsior' Deafening Felt?"

Barrett Mfg. Co., whose Canadian agency is Paterson Mfg. Co., Toronto.—Editor.

Wire Woven Fencing.

The Okotoks Hardware, Okotoks, Alta.—"Will you kindly give us the address of the makers of the Ellwood Wire Woven Fence?"

Canadian Steel & Wire Co., Hamilton, Ont.—Editor.

Cream Whippers.

C. C. Falconer & Co., Winnipeg.—"Kindly let us know where we could procure Fries' Cream Whippers?"

Can any subsriber furnish the information.—Editor.

Bicycle Accessories.

Clements & Co., Milton.—"Kindly advise us through Hardware and Metal, where we can purchase in Toronto, bicycle tires and accessories?"

Canada Cycle & Motor Co., John Millen & Son, Dunlop Tire Co.—Editor.

Grates for Duplex Range.

A. Symon, Thessalon.—"Where will I get grates for Smith's Patent Duplex Range?"

Smith's Duplex Grates are used in Happy Thought Ranges, manufactured by Wm. Buck Stove Co., Brantford.—Editor.

Fly Exterminator.

F. J. Trapp & Co., New Westminster, B.C.—"Would you be kind enough to inform us who it is, in Toronto, that has the rights for Dr. Williams' Fly & Insect Exterminator?"

Can any subscriber furnish us with this information?—Editor.

Closet Seats.

Johnson & Co., Brandon, Man.—Please give us the names of manufacturers of closet seats."

..Jas. Smart Mfg. Co., Brockville, Ont.; Goderich Organ Co., Goderich, Ont.—Editor.

Steel Flag Poles.

Fred. Adams, Fordwich, Ont. — "I would be much obliged if you could let me know the name of Canadian manufacturers of steel flag poles."

Ontario Wind Engine & Pump Co., Toronto; Goold-Shapley-Muir Co., Brantford.—Editor.

Aluminum Vessels.

The Shirreff Mfg. Co., Brockville.—"Can you give us the names of any firms who manufacture aluminum vessels such as are used in making fireless cookers?"

Northern Aluminum Co., Toronto. — Editor.

Stove Repairs.

S. R. Peart, Rockwood.—"Can you tell me where I can get stove repairs to the Favorite range, manufactured by Findlay Bros?"

Write to the manufacturers, Carleton Place.—Editors.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Roofing and Building Papers.

"Neponset" Roofings and Building Papers are described in a twenty-four page booklet printed in two colors, which is being circulated by F. W. Bird & Son, Hamilton, Ont. The booklet is enlivened by several fine half-tone reproductions of buildings in which "Neponset" products are used.

Furnaces and Heating Supplies.

An instructive Catalogue No. 75, has just been issued by the Pease Foundry Co., of Toronto. It deals with warm air furnaces, steam boilers, hot water boilers, and heating supplies. The book contains 110 pages, and it abounds in good information on heating technicalities in general, and, of course, with "Economy" goods in particular. List prices are quoted on all the articles described.

Door Hangers and Hardware Specialties.

The Richards-Wilcox Manufacturing Co., of Aurora, Ills., hgve just issued Catalogue No. 7 of the Wilcox Manufacturing Co., dealing chiefly with door hangers and hardware specialties.

This catalogue was almost completed in the press, when the consolidation of the Richards Manufacturing Co. and Wilcox Manufacturing Co. took place. Therefore it shows only the lines known to the trade as the Wilcox products. They are, however, extensive and include, besides door hangers, grindstones, overhead carrying systems, rolling store ladders, sleds, and other hardware specialties.

The book is printed on heavy coated stock illustrated with splendid half-tone engravings, and contains one hundred and fifty-seven pages.

Capewell Horse Nails.

Any dealer who thinks there is not much to be said about nails, will be agreeably surprised upon reading a little twelve-page booklet which has just been issued by the Capewell Horse Nail Co., of Toronto, Winnipeg and Vancouver. The various talking points of this firm's products are brought out in a very interesting and instructive manner. The booklet is printed in two colors and the cover is embossed in silver and red. It is attractively gotten up.

Summer Specialties.

E. T. Wright & Co., Hamilton, have issued to the trade their 1911 catalogue of "Selected Specialities for Summer Sales." It contains thirty-two pages which are devoted to oil and gasoline stoves, hot water heaters, ovens for summer stoves, refrigerators and similar lines. The book is well illustrated and contains list prices which are subject to a trade discount of 50 per cent.

Hot Air Furnaces.

Wheeler & Bain, 179 King street east, Toronto, have recently issued their 1911 catalogue, showing their full list of metal goods and furnaces. Among the goods shown are galvanized iron eavetroughs, trough hangers, lock-seam pipe, conductor pipe, octagon elbows, conductor hooks, malleable iron holdfasts, galvanized iron valleys, ridging, finials, cornices, window caps, skylights, galvanized sheeets, sidings, rotary ventilators, a complete line of hot air furnaces, stoves, hot air registers, feed furnaces, campers' cook stoves and plasterers' heaters. The booklet is neatly gotten up and well illustrated.

U. S. PIG IRON PRICES REDUCED.

Cleveland, O., April 27. — The Iron Trade Review to-day says: The reduction of 50 cents a ton in the price of lake iron ore, which became general late last week, following sales aggregating 550,000 tons by a Pittsburg seller, has had little, if any, effect upon general market conditions. A fairly heavy tonnage of iron ore has been covered by reservations which are being converted into contracts, but furnace interests generally have been slow to cover for their future requirements. Since the ore prices have been announced, consumers of pig iron have shown no desire to test the market, and no important inquiries have appeared. On the other hand, the reduction in the price of iron ore had been discounted by furnace interests, and no effort is being made to force sales by offering further price concessions. The scrap market shows further weakness, and prices on heavy melting steel have dropped to a lower level than at any time in more than two years.

Trade conditions are being discussed at a series of meetings being held by representatives of the various branches of the iron and steel industry.

FIRE AT WESTPORT.

The plant of the Westport Manufacturing Company, manufacturers of platings and castings, was wiped out by fire between 4 and 5 o'clock Thursday morning of last week. The cause is unknown, and the loss will be heavy. Between twenty and thirty mechanics are thrown out of employment.

The Hall Manufacturing Co., of Monticello, Iowa, announce that they have purchased the entire post hole, auger and digger business of the Western Steel and Iron Works, of De Pere, Wis.

HARDWARE TRADE GOSSIP

Ontario.

H. D. McInnis, has succeeded G. C. Staple, in Kirkfield, Ont.

J. Bailes & Son, of Oshawa, have sold their Cobalt branch to the Northern Canada Supply Co. The deal was put through April 1st.

The Toronto Plate Glass Importing Co., Toronto, have erected a garage at their factory and, it is understood, are purchasing a new motor truck.

Taylor Bros., New Liskeard, have issued a catalogue of their mining, mill, blacksmith and contractors' supplies. It is the first issued in that district.

W. F. MacPherson, Prescott, is advertising sporting goods in the local papers. This week a sporting goods window in his store is attracting much attention.

E. Morgan, veteran hardwareman of Delhi, has sold his hardware business, and the new proprietor will take charge on May 1. Mr. Morgan has been in the business for over thirty-six years.

Any dealer can secure a copy of the new provincial law regarding the sale of offensive weapons by applying to the office of the superintendent of provincial police at the parliament buildings, Toronto.

The Aikenhead Hardware Co., Toronto, have sued a storekeeper for instaling a device to prevent window glass from frosting, which they claim as their own. The case was adjourned until a test can be made, which will not be until winter comes again.

Mr. L. C. Karstedt, has opened up a fine store on 2nd avenue, east, Owen Sound, and has it artistically arranged with bathroom fittings of every description, he intends going extensively into the plumbing business. Mr. Karstedt advertises he is ready to contract for anything in the plumbing, steamfitting or tinsmithing line.

Messrs. Creeper and Griffin, The Hardware Men, of Owen Sound, were among the first business men to forsee the advertising they would receive by subscribing to the Library Voting Contest. It has been running some weeks, and, judging from reports appearing in the Owen Sound papers, it is creating a great deal of interest.

The other day the Hobbs Hardware Co., London, received the following letter, accompanied by a 25-cent piece:—

"Dear Sir,—Some time ago, having taken from your firm a bag of putty, which I did not pay for at the time, and having joined the church since, I now can see it my duty to pay for it, for I cannot rest with it on my mind. I will inclose the amount for the same.

"Yours sincerely,

"A CITIZEN."

Horse show week finds many hardware stores in Toronto with window designs to suit the occasion. The Aikenhead Hardware have a window display of everything in hardware pertaining to that department, the whole being set off with horses' heads and a neat display of the horse show colors.

Western Provinces.

Thos. Moffet will open a hardware store at Ogema, Sask.

C. B. Steinman has opened a hardware store at Rainton, Sask.

McCallum & Co., dealers in hardware, Cranbrook, have sold out.

Moore & Camroux, Langham, Sask., have suffered a loss by fire.

Chas. Mills & Son have opened a hardware business at Milden, Sask.

D. W. Whiting has taken over the hardware business of G. S. Smaill.

D. B. Davies, dealer in hardware, Bangor, Sask., has discontinued business.

F. Schofield, hardware dealer, Lipton, Sask., has sold his stock to Dillon & Co.

G. H. Smith, for several years sales manager at Winnipeg for the McClary Manufacturing Co., and identified with the different branches of that company, has resigned his position, and has entered into the real estate and financial

G. H. SMITH,

Formerly Sales Manager Winnipeg Branch McClary Mfg. Co.

business with headquarters at Winnipeg. Although Mr. Smith is already active in his own business, he is tutoring the sales staff of the McClary Manufacturing Co., at Winnipeg. Mr. Smith gives lectures on salesmanship two or three evenings every week, and will continue to do so until the sales staff is developed to a high state of efficiency.

J. W. Payne, Cheadle, Alta., has sold his business in hardware and implements.

C. Flury & Co., Midale, Sask., announce that they have placed their business on a cash basis.

Chas. Whitman has purchased the hardware stock of the estate of R. Hamilton, Emerson, Man.

Michael & Milne, dealers in hardware and implements, Content, Alta., have sold to Ferrel & Ferguson.

MacDonald & Fleming, hardware dealers, Winnipeg, have sold the lease of their store, and will not continue in business.

G. H. McDonald, Strassburg, Sask., has sold his hardware business to Rodger Bros.

W. H. Fread is erecting a store at Ryley, Alta., in which he will establish a hardware store.

Hamilton & Son, hardware dealers, Emerson, Man., have sold their stock to Charles Whitman.

H. H. Johnston expects to have his new store at Aylesbury, Sask., open for business by May 10. It will be some time, however, before he gets the premises completed.

W. F. Pieper, Swalwell, Alta., will shortly move his hardware store to his new site on Main street. He expects to erect a much larger and more commodious building this summer.

J. Harry Matthews who bought the tinsmithing business of L. Y. Birmie, Phoenix, B. C., some months ago, has decided to go to Medicine Hat, where he will become a partner with Mr. Birmie in a large hardware business. He will ship his hardware stock from Phoenix.

A. Fulton is building a large and thoroughly up-to-date hardware store at Enderby, B. C. It will be 50 feet wide by 110 feet long, with a 14 foot ceiling on the lower floor, and a 12 foot ceiling on the upper one. The entire building will be covered with rockfaced siding and heavy cornice work. A large plate glass front will be put in. The ceilings and walls will be finished with metal.

The Gordon Wire and Wire Nail Works are asking that the proposed agreement with the city of Medicine Hat be changed in one respect. The agreement forwarded by the city called for the erection of a building costing not less than $80,000 and for the employment of 100 men when the plant is running at its capacity. The company in returning the agreement objected to the clause placing an amount on the cost of construction of the building and simply wanted to guarantee the construction of a plant with machinery installed sufficient to serve as equipment if 100 men were employed.

Quebec.

J. E. Robert, of Grand Mere, Que., was in Montreal on business this week.

The Calumet Metal Co. have begun the construction of a concentrating plant on Calumet Island. About sixty men are employed.

Norman Labelle, of the firm of C. Labelle & Co., Three Rivers, Que., is rapidly recovering from a recent illness.

On Friday last an interesting event took place at J. S. Mitchell & Company's new store, Sherbrooke. The occasion was Mr. Mitchell's birthday and the first day business was carried on in the new store. The staff waited on Mr. Mitchell and made a presentation to him in honor of the occasion.

Maritime Provinces.

E. K. Spinney, of Yarmouth, N.S., has been spending a day or two in Montreal and Ottawa this week.

News and Methods of Canadian Hardwaremen

Spring Business Being Pushed Everywhere — Hamilton Firm Advertising Screen Doors in Large Space — Niagara Falls Dealer Running Cash Store.

SCREEN DOOR SELLING IN HAMILTON.

Hamilton, Ont.—Stanley Mills & Co. are putting on an aggressive anti-fly campaign through the medium of the local papers. In last Saturday's Spectator, they had an advertisement of spring goods, which filled a page, all but one column. The central theme of the advertisement was the opening sale of screen doors, announced for Monday of this week. The reading columns, right alongside this advertisement, has an article on the deadly nature of the typhoid flies, urging that every household should join in the fight against them. This article was no doubt inspired by the advertiser, and shows what can be done toward educating the people to the dangers of a screenless house, by co-operating with the enwspaper editors.

A splendid feature of the Stanley Mills & Co. advertisements, is the original drawing at the top. In this particular case, it showed a typical spring cleaning scene, in the back yard of a suburban home. Every body was busy and using some tool such as is purchased in a hardware store. The lady of the house was setting out her plants, two men were fitting a screen door, while two others were beating a carpet. Three young boys were raking up debris and burning it, while the lord of the household was planting a young tree. The result was to give added attractiveness to a decidely well written and illustrated advertisement.

SPRING ANNOUNCEMENT.

Elmira, Ont.—M. Weichel & Son, hardware dealers, have come out with their 1911 spring announcement. Full-page space is used in the local and Waterloo newspapers and a complete list of seasonable goods is included.

In the reading matter at the head of their advertisement, Weichel & Son say:

> Spring business, just like that of every other season, is most friendly to the man who is best prepared for it. Not only should the remnants of winter goods be out of sight and your store in readiness, but you should also be posted on the season's needs, its new things and opportunities. Let the values testify whether or not we are entitled to your hardware business. Take 5 minutes to scan through this page; noting the bigness of the lines, the bed rock prices and remember the goods we offer are strictly standard. Every item on this page is worthy of your consideration.

In the ad. mention is made of the following articles: wire fencing, poultry netting, tar paper, counter scales, chicken nests, sad irons, roofing, wire nails, portland cement, washing machines, pulleys and belting, axle grease, rope, paints, enamels, fence gates, stall fixtures, curry combs, tools and lawn rakes. There is one illustration in the advertisement.

GARDEN TOOLS ARE FEATURED.

Chatham, Ont.—The Willard Hardware Co. signalized the approach of the gardening season by featuring a tool and seed window. The front part of the broad window is carpeted with a strip of white cheese cloth, upon which a complete assortment of seed packets, both flowers and vegetables, are neatly displayed. In the background are shown spades, hoes, rakes, hand cultivators, step ladders, hose, and other garden accessories.

W. C. Cartier, better known as "Dick," till recently of Detroit, has bought the tinsmithing business on Lacroix Slip, formerly conducted by John Simon. Mr. Cartier has had much experience in tinsmithing and aluminum work, having been connected with several local shops, and has already secured several large orders.

The Chatham Malleable Iron & Steel Co., with which W. H. and A. D. Westman are connected, intends building a new factory in the near future. Temporary store rooms have been secured on King St. West, adjoining the post office.

TRIED CASH SYSTEM SUCCESSFULLY.

Niagara Falls.—"We Sell For Cash Only," reads a sign right at the doorway of Joseph T. Henderson's hardware store in this city. Mr. Henderson has been running his business under the cash system for two years and a half, and would not consider, for a minute, going back to the old conditions. How he inaugurated the system and carried it out, will be fully described in an early issue of Hardware and Metal.

G. H. Clark has his window taken up with a neat display of garden tools. A feature of this window is the unusually attractive background, which is built up of Southern pine, finished so as to bring out the grain of the wood. It makes a very effective window for display purposes.

RACKS MADE OF PIPE.

Toronto.—P. H. Finkle, hardware dealer on Queen Street West, believes in letting nothing go to waste. Recently he found that a collection of odds and ends of lead pipe had collected on his hands and he decided to make use of them in some way. By ingeniously putting the pieces together, he constructed three racks for the display of goods in the store.

One rack consists of two long lengths in upright position, converging almost together at the top, where they are joined by a short length of pipe. Cross pieces are attached to both uprights at regular intervals, extending over a foot on each side and giving room for the display of rolls of screen wire.

The second rack is constructed along somewhat similar lines except that the cross-arms are wider. It is used for the storing of large rolls of poultry netting.

The third one is smaller and is modeled somewhat on the lines of an umbrella stand. It is used to store axes and axe handles.

The material used did not cost Mr. Finkle anything, as it was gleaned entirely from odd lengths which could not have been used for any other purposes. The racks are very handy and they save considerable store space.

MARITIME FIRM APPOINTS NEW WESTERN MANAGER.

St. John, N.B., April 23.—Raymond Archibald, who for a number of years, has been the New Brunswick representative for the Sherwin-Williams Co., is leaving this week for Saskatoon, where he has accepted the position of manager for the Enterprise Hardware Co.

Mr. Archibald has been spending a few days at the works of the Enterprise Foundry Co., Sackville, getting himself thoroughly familiar with the various processes of stove and furnace making; and he feels very enthusiastic about the future possibilities.

This company report business exceedingly good with a growing demand for their stoves from all points between Cape Breton and British Columbia. In accordance with their recognized progressive policy they keep constantly adding to their facilities. They are now increasing their moulding shop capacity and have recently installed several of the most modern moulding machines. In addition they are building a sand warehouse and a fire-proof building for patterns; also increasing their storage capacity and enlarging their plating department. They have also just completed an overhead trolley system which greatly facilitates the handling of castings and other goods between the various departments. The plant is now one of the most up-to-date in the country.

CARRYING INTEREST IN CUSTOMER BEYOND THE SALE.

Winnipeg.—C. C. Falconer & Co., of this city, have adopted a scheme which is intended to show customers that the firm's interest in them, does not cease when they have made a purchase. They are enclosing in every parcel which leaves the store, a circular neatly printed in red ink, which reads as follows:

> HOW DOES THIS PACKAGE OPEN UP?
>
> Do you find it all you expected when you bought—in style quality, everything? Is it good value—have you got your money's worth? When you and every other customer of ours—can answer "yes" to these questions we can feel that our store is all we aim to make it—a perfectly satisfactory store. Finding it so, will you not tell others about it and help us to build up a constantly better business? That favor will be highly appreciated.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 52

Toronto.

Turpetine.—Reduced 10 cents.

Plaster of Paris.—Advanced to 1 cent a pound.

MONTREAL.

Montreal, April 29th. — During the past week iron ore in the United States was reduced 50 cents a ton, with the intention no doubt of stirring up new interest in a market that has been stagnant for some time. As yet there has been nothing of a similar action on the Canadian side, but the situation in the United States is naturally creating considerable interest here. If a reduction in pig iron follows the decline in ore, and the foundries to the south are enabled to offer a special price aginst Canadian furnaces, the latter would probably have to meet them, but that is entirely a contingency depending upon several ifs. At present there is a good demand for pig iron from a Canadian standpoint, although the situation is not materially changed here.

Pig Iron.—Several vessels with English and Scottish iron are expected to tie up at the Montreal docks during the coming week, and the opening of navigation is expected to have a general brightening effect upon business. It is a question whether the reduction of fifty cents a ton on iron ore in the United States will have any results in Canada. It means a decline of $1.00 a ton on the cost of pig iron, as two tons of ore are required for one of iron. As yet there has been no decline in the price of American iron, but there seems to be a feeling that it may follow. One report says: "If the iron and steel market had not been stagnant, last week's reduction in iron ore would have made it so. While pig iron buyers do not necessarily claim that they should have a reduction in pig iron by reason of the ore reduction, they naturally want to get the reduction if one is coming, and it would be absurd if they did not wait and see. As to finished steel prices, there is no serious question in any quarter. Finished steel prices are not governed by ore, nor is ore by finished steel prices." (Prices are the same as quoted last week.)

Tin.—Dealers report that enquiries for tin are for small quantities and that the trade is of a piecemeal character. The market is considered practically the same as that of last week, as far as the local market is concerned. The market has as usual been fluctuating, but has assumed what may be termed a dullness. The New York report to the American Metal Market says: "The market does not seem to be in a position to maintain an advance, except on stimulation and encouragement from America, and in the present state of business and outlook this would seem not likely to be forthcoming."

Copper.—The copper market shows no change. Demand is reported steady here, but the situation is generally regarded as uneventful.

Other metals.—Lead is quiet, and regarded as rather weak. In spelter there is not much change, but in both these metals there is a fair demand. Antimony remains in about the same position it held a week ago, with the syndicate seeming to have a rather strong hold on the market.

Scrap Material. — The market shows something of a bareness of scrap material, but it is thought that holders have been holding off with their shipments until the opening of navigation, when they would be enabled to take advantage of the reduced rates. Prices are unchanged, and it is said there is a fair demand for practically all the old metal materials.

Prices quoted are: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron No. 1, $14.50; No. 1 wrought iron, $12.50; malleable No. 1, $9; miscellaneous steel, $5; stove plates, $12.50.

TORONTO.

Toronto, April 28, 1911.—Conditions on the metal market, as reported by local merchants, is practically unchanged from last week. There is a good normal amount of business doing, but everybody would welcome a little more activity in ordering. It would seem that the backward spring has made the large metal consumers rather cautious, and until some favorable crop reports are received from the West, it is not likely that the situation as regards the volume of actual business will show any very decided change.

Prices, in general, remain the same as were quoted last week. Tin has been fluctuating somewhat, and, at the present time, is a little weaker on primary markets. The difference, however, is not sufficient to alter the price quoted last week.

Business in pig iron is quiet, and there is little inquiry for lots of any size. This is not due to the reduction of 50 cents per ton declared by United States ore producers during the week, but rather to that spirit of caution mentioned above, which is engendered by the uncertainty of Western crop prospects.

Tin.—During the early part of the week London prices rose from £192 15s to £194 12s 6d and then receded, New York quotations remaing stationary in the meantime at 42.45. At the present time primary markets are somewhat weaker, but the Toronto price is unchanged at 45 cents.

Antimony.—This metal is dead quiet, and there is nothing doing locally. In spite of the stagnant market, however, last week's price is maintained, and would be quoted in response to inquiries, if there were any.

Copper.—Copper has had about the same experience as tin, having advanced and then eased off again. The price in New York rose from 11¾ to 11⅞, and then went back to 11⅝. The consumption of the metal in Canada is really enormous, but no larger than usual, so that there is no special flurry observable. The price ruling in Toronto at time of writing, is 13¼ cents. The chief complaint among the metal jobbers is that the price of copper is cut so fine as to make the handling of copper, in the words of one authority, almost the same as changing dollars.

Aluminum.—The consumption of aluminum is steadily increasing in this country, and the market locally is firm at an unchanged price of 20 cents per pound.

Plates and Sheets.—A good normal volume of trade is being done, shipments being to a large extent, simply to apply against contracts booked for the first part of the year. Prices are the same as last week.

Pig Iron.—The situation shows only quietness. While the foundries should be purchasing stocks at pressent, the fact remains that they are not doing so, until confidence in the consuming power of the West this year is more fully assured. Prices quoted locally are as follows:—

Canadian Foundry No. 1 is $19.50 and No. 2, 50 cents a ton less. Old country iron is quoted at $19.50 for Middlesboro No. 3; and $20.25 for Clarance No. 3; Summerlee No. 2 is $22.00, and Cleveland No. 1, $20.50. Jarrrow and Glengarnock irons are at $20.00 and $22.00 respectively.

Lead.—Price is unchanged here and there is really no demand. Quotations in London are lower, but this weakness has not been reflected on the local market.

Spelter.—United States prices have declined somewhat, the New York quotations being 5.45 as against 5.55 a week ago. In Toronto, there is little business doing in spelter, but the price is maintained at the same figure as last week.

Old Materials.—To-day's quotations: Heavy copper and wire, 10½ to 11c; heavy red brass, 7½; heavy lead, $2.90; light copper and bottoms, 9¾c; tea lead, $2.40; machinery cast iron, No. 1, $14.00; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $12.50.

WILL BE RENEWED?

Ottawa.—There is every indication now that the bounty on wire rods will be temporarily renewed in spite of the tentative assurance of Mr. Fielding that "there is no intention of renewing this aid." Strong pressure has been brought to bear, it is said, on the Finance Minister by his parliamentary colleagues from Nova Scotia It is understood that the bounty on wire rods will be renewed on July 1 for another year at least.

HARDWARE MARKETS

MONTREAL.

Montreal, Apr. 28th.—It is everywhere admitted that one of the important branches of labor in Canada this year is that of railway construction. And this is important from the standpoint of the hardware trade, although the ordinary retailer may not be called upon to supply any of the demand that is now reported, but nevertheless there are hardware houses interested. A representative of Hardware and Metal in conversation with a hardware traveler who looks after the demand from the railway companies stated that were it not for the railway construction in progress there would be an army of unemployed. Reports of the demand for railway hardware are to the effect that the demand is very considerable, and is likely to remain so throughout the summer. This particular business is undoubtedly contributing largely to the prosperity that is evident in the hardware trade.

Demand in spring lines is increasing and the fine weather that has set in has also brightened other departments of the trade just now. Local demand, which has been held back by the unseasonable weather has shown much improvement and the same may be said of the general city demand throughout the country. The West continues to send in a large share of orders covering general hardware lines.

Spring Lines.—Conditions appear to be brighter in this department of the trade. Brushes and other painting and cleaning accessories are freely asked for. Lawn mowers, rollers, rakes, etc., occupy a foremost place on the order lists just now, and hose, reels and other allied lines are going out well. Apparently the retailer is beginning to take advantage of the spring demand for these seasonable goods.

Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote hose clamp, ½ to ¾-in., 25c a doz.; hose couplings, ½ to ¾-in., $1 a dozen; hose sprinklers, ring pattern, $5.75 a doz.; revolving pattern, 12-in., $13 a doz.; 24-in., $34 a doz.; and 36-in., at $39 a doz.; hose nozzles, Gem, $3.50 a doz.; reels, 75c each and upwards; garden wheelbarrows, $27 a doz. The discount offered is 50 and 50 p.c.

Contractors' and Builders' Tools.—Jobbers report a very satisfactory increase in the demand for supplies required in building operations. The new business is sufficient to indicate a brisk season throughout the entire country. It is the beginning, and as such it is quite auspicious. Trade in carpenters' tools shows improvement, and, in fact, every activity carried on outdoors seems to have taken on a new lease of life with the advent of the fine weather. In this department, too, the West is contributing a good share of the business that is coming to the Montreal houses.

For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5.75 and upwards. Trade in these lines at present is promising.

Wire.—There is a continued good demand for wire and wire netting, indicating considerable business in these lines throughout the country.

Some prices are: Barbed wire, $2.35; plain twist, $2.55; galvanized wire base, $2.27½; coil fencing (9) $2.30; (12) $2.45; staples, bright, $2.60; galvanized, $2.85.

Heavy Hardware.—Orders for heavy hardware hold their own with the rest of the present demand. Trade is of a steady character, with prices unchanged. Some discounts are: on carriage bolts, ⅜ and less, 70 per cent; coach screws, 75 per cent.; stove bolts, 80 and 7½ per cent.

Household Utensils.—Included in the average order there is a place for household utensils. Carpet beaters, ladders, ice cream freezers, food choppers, electric irons, washing machines and a general line of kitchen and house utensils which the hardware man is usually called upon to supply.

Some of the prices quoted are:—Food choppers, from $9 to $15 a doz.; ice cream freezers, 1-qt., $1.50, 2-qt. $1.65, 3-qt. $2.05, 4-qt. $2.50, 6-qt. $3.15, 8-qt. $4; coffee percolators, $1.75 to $3.50; washing machines from $3.50 up; wringers, Royal Canadian, $47.75 per doz.; Universal, $37.75 per doz.; Safety, $56.25 less 20 per cent. per doz; Mrs. Potts' irons, plain, 82½c per set; nickel-plated, 87½c per set; common sad irons, 4 to 7 lbs., $5 per cwt.

TORONTO.

Toronto, April 27.—Things are now going with a rush. The spring trade is at its height and the local jobbing houses are finding it difficult to cope with the business that is coming in. The improvement begun about the middle of last week, when weather conditions took a turn for the better and every day since has seen an augmentation in the demand. "One bright day means that the next two will see a flood of orders," said a local salesmanager. "As all days are now bright and warm, you can readily see how business is piling up for us." The comparative slackness which has prevailed for the past month is now forcing the market to the other extreme. Dealers who held back from ordering are now in the market and business is literally "making up for lost time."

The only price change recorded this week is on plaster of paris. Owing to the burning of the mills at Hillsboro, it is now found necessary to import supplies from the other side. The wholesale price has been advanced from two-thirds of a cent to a cent a pound, at which figure it will probably remain as long as present conditions maintain.

Seasonable Lines.—There is a heavy all-around demand for spring goods. Rakes, hose, spades, lawn mowers, sprinklers, nozzles, axes, wire fencing, poultry netting, watering cans, and all the many articles required in "garden and lawn culture" are now selling briskly. Enquiries are still received, but most dealers are now buying for immediate shipment. Goods for summer use are also showing activity. Window screens, mosquito netting, ice cream freezers, refrigerators, etc., are in fair demand.

Household Goods.—Trade in the household department is slowly emerging from what might be termed the "housecleaning era." There is still some call for mops, pails, brushes, stepladders, carpet stretchers and the many other articles peculiar to housecleaning and moving time, but the heaviest of the demand seems to be over. There is just as heavy a demand as ever, however, for staple household goods. Tinware and granite goods are selling briskly.

Builders' Hardware.—There is a heavy call for all varieties of builders' hardware. Although the frost is not yet completely out of the ground, building operations are well under way and the retail demand for supplies has already become quite heavy. One retailer informed the writer the other day that he had already sold out a cabinet of lock sets four times this season. In the meantime, dealers are stocking up heavily in anticipation of the demand that is bound to ensue when the buildings now in course of construction reach a more complete stage.

Heavy Hardware.—The demand for heavy hardware has been uniformly good, with prices steady. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½. Reports are heard of advances in the United States and Canadian West on barb wire, but local quotations have not been affected.

Stoves and Heating Goods.—There is a heavy demand for gas stoves and ranges. The manufacturers report that they have experienced as good a trade as ever in the past; some believe that all past records will be broken before the demand is satisfied. At present the retail trade is quite busy. A few ranges also going and enquiries are being received every day for furnaces.

Sporting Goods.—Heavy business is being done in sporting supplies. Baseball goods are particularly in demand, while the call for anglers' supplies is now at its busiest point.

MANUFACTURERS IN THE WEST.

The Prairie Glass Co., Winnipeg, have been incorporated.

The Anthes Foundry Co., Toronto, will establish a plant at Winipeg.

The Wortman & Ward Co., manufacturers of pumps and farming tools, have purchased a site at Winnipeg.

The plant of the Alberta Linseed Oil and Paint Co. at Medicine Hat will cost $180,000.

An English concern are planning to erect a steel plant near Vancouver at a cost in the vicinity of one million pounds sterling.

The Galt Art Metal Co. have established a new branch at 839 Henry ave., Winnipeg, with H. F. Hobbs in charge.

The Western Hardware Market Situation

Slight Advance in Galvanized Wire—Business Coming With a Rush—Large Number of Small Orders Indicate Improved Conditions—Prospects in Northern Alberta Exceptionally Good.

Business is coming in with a rush. From the amount of little orders received, there must be an immense improvement through the whole West.

From northern Alberta reports are that business is extra good, and prospects very rosy.

Local trade is heavy about Winnipeg, and building operations are on a larger scale than ever.

A goodly number of changes are likely to take place in hardware circles in Winnipeg. McDonald & Fleming are selling out, Kennedy Bros. have sold to another party their business in Elmwood. Weir & Wilson are reported going out, and some other changes are likely to occur during the coming summer.

Heavy sales of garden tools are now being made. The extra fine bright weather is bringing everything along with a rush.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts, 77½.

Bar Iron—Bar Iron, $2.50; Swedish iron, $4.75; sleight shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $13.

Blocks—Steel, 45; wood 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.83, 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron —Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 26, $4.20; 28, $4.60; 30 gauge or 10¾ oz., $4.80; Queen's Head, 23, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—¼ in., $3.50; ⅜ in., $3.80; ½ in., $4.25; ¾ in., $5.50; 1 in., $7.90; 1¼ in., $10.75; 1½ in., $12.70; 2 in., $17.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6 $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron washers—Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼ in., $2.55; ⅜ in., $2.85; ½-in., $3.45; ¾ in., $4.25; 1 in., $6.10; 1¼ in., $8.30; 1½ in., $10; 2 in., $13.30; 2½ in., $21.80; 3 in., $28.60; 3½ in., $35.60; 4 in., $40.80; 4½ in., $46.80.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9.50 dash, $9.75.

Poultry netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope—Sisal, 8½c; pure manila, 10¾c; British manila, 8½c; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.25; broken lots, $8.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base, $25.75 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate—I. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box, $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I. C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 33 1-3.

Wire—Barbed wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $2.95; No. 10, $3.60; No. 11, $3.70; No. 12, $3.15; No. 13, $3.40; No. 14, $4.25.

Wire Nails—$2.90 Winnipeg, and $2.45 Fort William.

Wringers — Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

Paints and oils and all kindred lines are moving very freely, and prices are the same as quoted last week, throughout.

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18½c.; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rose, in bulk, 22½c; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

MARITIME FIRM IN THE WEST.

St. John, N. B.—The rapidly expanding business of T. McAvity & Sons, in the West, has necessitated the opening and maintaining of a branch in Winnipeg for the distribution of the firm's products throughout the western country. During the last few years as the west had filled up, an increasing percentage of the firm's business is done west of the great lakes, and the question of transportation and distribution becomes yearly a more important one, making it necessary to devote more attention to that part of Canada. The Winnipeg branch is located at 147 Bannatyne avenue and the manager is C. E. Chown.

ALL WANTED TO READ AT SAME TIME.

Rocanville, Sask., April 11, 1911.

Hardware and Metal,—I am enclosing herewith cheque for $6 to pay for my subscription until Sept.,1911, and one for A. I. Holden, and one to R. G. Rock, all of Rocanville. These men are in my employ, and we have had such good satisfaction out of your paper, and sometimes we all want to read it at the same time, that I have decided to secure this for them, so that we can all read it at our leisure. Hoping that this will be entirely satisfactory to you, and awaiting the arrival of the new papers,

I am, yours truly,

S. SCHWANZ,

General Hardware and Crockery Merchant.

SPRING ARITHMETIC.

It was the busy hour of four,
When from a city hardware store
Emerged a gentleman who bore
1 hoe,
1 spade,
1 wheelbarrow.
From thence our hero promptly went
Into a seed establishment
And for these things his money spent:
1 peck of bulbs,
1 job lot of shrubs,
1 quart of assorted seeds,
He has a garden under way
And if he's fairly lucky, say,
He'll have about the last of May
1 squash vine,
1 egg plant,
1 radish.

—Washington Herald.

Adequate Display Greatest Aid to Paint Sales

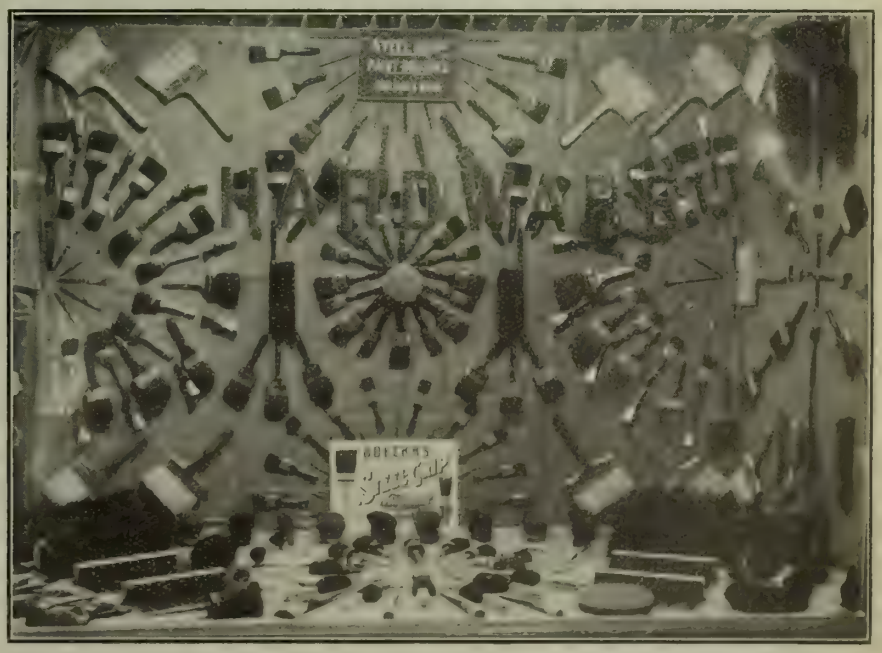
Neat Appearance of Paint Stock in West Toronto Store Leads to a Large Business—T. E. Hoar & Co. Keep Department in Very Creditable Manner.

"Adequate display." In these two words is summed up the secret of success of most large retailers of paint. To sell paint successfully one must observe a number of rules; but first, last and always, it is necessary to keep the stock well to the fore, to display it where customers will see.

It is indeed a pleasure to visit a hardware store, where the paint stock is well kept up. The writer had occasion the other day to visit the establishment of T. E. Hoar & Co., West Toronto. The door stood invitingly open and through it one caught sight of a generous array of paint tins occupying the whole front of one side of the store. The view improved on closer acquaintance for it was found that the paint stock was in "apple pie" order. The cans were arranged systematically and were all bright and new. If there were any with faded or ragged labels, they had been put in the background, where they could not offend the eye. The woodwork and the shelves shone with varnish, of recent application quite apparently. The appearance of the whole department, in fact, was highly pleasing and business-like.

One store window was given over to a paint display, in the arrangement of which some measure of originality had been shown. In different parts of the store, as well, one could see little racks containing veneer, or furniture stain, or some other paint specialty. In fact, one could not enter the store without running into paints in some form or other on every hand. The fact that this was painting time was impressed on the mind indelibly, was hammered right in, by the process of "adequate display."

It went without saying that this store was bound to be handling a big paint trade. The writer found such to be the case, when he enquired how business had been. "Never better," was the response. "Paint has been selling like fun." The informant went on to explain that people were buying paint in big bulk, cheerfully accepting the higher price asked. More complaints had been received it seemed when the price was advanced from 45 to 50 cents than since the last increase in price. A few customers had complained but they had all belonged to the class of chronic grumblers anyway.



This shows what can be done by displaying the goods to advantage. In a great many establishments, the paint department is kept at the rear of the store. The boy who does the dusting generally tires before he works back that far, or else he counts on no one seeing the dusty and disordered state of the goods on account of the lanterns, mitts, brooms, etc., which hang from the ceiling. As a result, the paint tins become shopworn, and do not present the neat appearance which makes sales. Dealers who run their stock in this way—and, unfortunately, there are many who do—get just as much business as comes to them in the ordinary course, and no more.

On the other hand, an effective display creates sales. People will be reminded of some need in that line and will purchase, where otherwise they would have just let things slide. A display such as that made by T. E. Hoar & Co. does more than bring the subject of paint into the minds of all who enter the store. It shows what can be done by the use of paint, and that is the most forceful argument possible.

A BRUSH DISPLAY.

Recently a good display of brushes was arranged in a window of D. W. Douglas' store at Campbellford, Ont. Chas. H. Smith, who designed the window, deserves credit, for he undoubtedly succeeded in effecting a very atractive and striking arrangement. The photograph gives an inadequate idea of the completeness with which each detail was carried out. The background was filled in with green sateen, while over the top and sides, streamers of twisted tissue paper were drawn.

The window attracted considerable attention and stimulated sales in that department.

Display of Brushes in D. W. Dougle's Store, at Campbellford, Ont.

AN INSTRUCTIVE CALENDAR.

A neat calendar has been sent out by Brandram-Henderson, to practically every householder from coast to coast. It is dated from April, 1911, to April, 1912, and shows a pretty scene at a summer home.

On the back is printed a great deal of information relative to the formulas and the use of paint. An interesting table is given to show how much paint would be required to cover a certain area. It is estimated that one gallon will cover 100 square feet with two coats. The following explanation is appended:

Dry surfaces will naturally absorb more paint, and considerable will be taken up in the beads, edges and cracks, where it cannot be thoroughly spread. This being the case, it is safer to estimate on 340 square feet to the gallon, which is about the average quantity required.

To ascertain the number of square feet, add the number of feet in length (both sides) to the number of feet in width (front and rear), and multiply in the average height. Divide this by 340 and you have the number of gallons wanted to paint your house.

Example—

Building, side	42 feet.
Building, side	42 feet.
Building, front	26 feet.
Building, rear	26 feet.
	136 feet.
Multiply by height...	25 feet.
Divided by	340)3400

For two coats 10 gallons.

On the back, also, a small envelope is attached, containing samples of colors.

HELD A DEMONSTRATION.

An effective method of attracting notice to a new specialty or to renew interest in one that has been on the market for some time, is to hold a demonstration. Painters will always manifest interest enough in an exhibition of this kind to attend and others will stop long enough to get an idea of the merits of the article used.

During the past week a demonstration was held in the store of the Sanderson-Pearcy Co., Toronto, the article shown being a well-known paint remover. In order to attract attention and make the demonstration a success, cards of invitation were sent around to all the painters in the city. A large number res-

ponded and the crowds in attendance were quite satisfactory. A number of old pieces of furniture were operated upon, including a dresser, a table and a door. The door had been exposed to the elements for many years quite apparently, and the surface was sadly scarred and marked. The remover did not find any particular difficulty in trimming the paint off, leaving the surface reasonably smooth and clean.

The process was fully demonstrated and the proper application explained. The audiences were duly impressed, and large sales resulted.

PORCH FLOOR PAINT BEING LIBERALLY USED.

As one goes along the streets in these warm spring days, it is surprising to notice how many amateur painters are at work applying a coat on their porch floors and side walks. And, on second thought, it is surprising to notice how many people there are, with really disreputable looking floors and walks, who do not appear to be taking any steps to protect them and improve their appearance.

As a matter of fact, the explanation is easy. It is simply that dealers are not pushing the sale of porch floor paints. They are not well advertised, as a rule, and, even in the store display, they usually occupy some out-of-the-way corner. They are sold to people who really want them and ask for them.

It is a mistake to neglect publicity on this line. The fact that the average householder would not use more than a quart or half a gallon at most, to paint his porch floor, should not deter the dealer from endeavoring to interest as many of his custimers as possible in porch floor paint. If the average purchase is small, the number of possible buyers is very large indeed, as almost everybody has sufficient porch to make it worth while painting the floor.

If fifty per cent. of the people of your town who have a porch floor a little the worse for wear, should buy half a gallon of porch floor paint, would it not mean a vast increase in your paint business? It looks as though it might be well worth while to suggest to customers, the advisability of investing in this article. What better method is there of doing so than by means of a circular inserted in each parcel that leaves tne store, as suggested in last week's issue of Hardware and Metal?

SELLING PAINT BY EXAMPLE.

A customer dropping into J. E. Wainwright's hardware store on Roncesvalles Ave., Toronto, not long ago, wished to know what material he should use to decorate the interior of his house. He said that he had tried two or three advertised preparations, but had made a bad mess of his walls, as he was doing the work himself.

"How do you like the way I have decorated my own walls?" asked Mr. Wainwright, pointing around the store.

"Why, that is fine," answered the customer. He walked over and scrutinized the walls closely, rubbing them with his fingers. "It doesn't rub off. either."

"No, it's on for keeps," said Mr. Wainwright. "You might think, to look at it, that it is a water color, which might rub off. But it is not. In spite of its dead flat appearance, it is an oil paint, which may be washed with soap and water, without in any way altering its appearance, except to cleanse it when it's dirty."

"Is it difficult to apply evenly?"

"No! I did it myself, and I'm no painter. Besides, I was rushed for time, and was not able to paint as carefully as I would have liked."

"And did you stencil the border yourself?"

"Yes! That is easy, too. I have some stencils here which I loan my customers, when they wish, and anybody can secure good results from their use. You will notice that I painted the walls a light green. For the stencil work, I used the same kind of paint, but in an olive green shade. Don't you think the effect is very attractive?"

"I do indeed," returned the customer, "and it is just what I want on my own walls. What is the price of this paint?"

The customer walked away with enough of this flat oil paint to do one room, and the chances are that he'll come back for more. This sale was made so easily, because the dealer could point to a concrete example of work which the paint could perform, right in his own store.

The merchant who keeps his own premises bright and attractive, will not have so much difficulty in persuading his customers to do the same.

CHATHAM CLERKS WILL PLAY BALL.

The hardware clerks ball team recently elected officers for the year. E. C. Brisco was chosen manager and Brady will be field captain. The battery this year will be King as catcher and Brady as pitcher, the club, including Ed. Wanless, Sep. Pool, Thatcher, Head, Windegarden, Willard, Eberts and Glassford. The new manager put up the cigars for the gathering.

CLERKS ORGANIZE SOCIAL CLUB.

The first banquet under the auspices of the social club formed by the members of the Jas. Walker Hardware Co., Montreal, was held on Tuesday night and proved a most enjoyable affair. The social club is a development of the hockey club which, during the past winter, proved valuable in uniting the employees in an interest apart from work. F. H. Malone is president of the club, Andrew Gross, secretary-treasurer and Capt. Leblanc, of the hockey club, is the third member of the executive. The idea is a new one and in its infancy has proved such a success that the feeling is unanimous that it be given every opportunity of development.

The banquet was held in the Castle Blend tea rooms and the good things that were served were undoubtedly responsible for the "flow of soul" that characterized the post prandial speeches. Letters were read from Jas. Walker, President of the company, and D. S. Walker, vice-president, expressing regret that other engagements prevented them from attending the banquet. With Mr. Hill, they expressed their sympathy with the idea of forming a social club among the members, feeling that its influence would not only be beneficial to the members, but also that the harmony thus created would be an asset to the staff in their relations to the company.

Music and readings added to the pleasure of the occasion and it is believed that the Social Club, thus auspicuously inaugurated, will become a live association, as the members were delighted with the spirit manifested and the impetus given to broaden relations among the staff.

WHAT CLERKS ARE DOING.

L. Hunter, of Saskatoon, has taken a position with the Battleford Hardware Co., Mr. Arcand having gone to his farm.

Roy Claus has severed his connection with J. W. Paisley, Cedar Springs, and has taken a position with Peter Cunningham, hardwareman, Chatham.

A happy event took place at Hespeler, Ont., wnen Percy C. Green, of the Wallaceburg Brass Co., was united in marriage to Miss Birdie Bolduc.

F. Senten has left Ridgeville to take up a position in Hamilton's hardware store at Emerson, Man.

The employes of the T. J. Trapp & Co., hardware store, New Westminster, have challenged the employes of the Cunningham Hardware Co. to a game of soccer football and the latter have accepted. The Cunningham team will line up: Goal, W. Turnbull; backs, J. McDonald and Davis; halves, Swanson, Saint and Dawe; forwards, Eickhoff, Wright, Savers, Crawford and Follin.

NEW COMPANIES.

Canadian Yale and Towne Ltd., have been incorporated to manufacture safes, locks, hinges, padlocks, door checks, chain hoists and other forms of hardware; head office, St. Catharines; capital stock, $100,000.

The Martin Bennett Asbestos Mines, Ltd., have been incorporated, to manufacture asbestos or any mineral in all its branches; head office, Thetford Mines, Quebec; capital stock, $500,000.

The Dominion Electric Heating Co., have been incorporated to manufacture electrically heated devices and other electrical appliances; head office, Toronto; capital stock, $60,000.

J. Watterson & Co. have been incorporated to manufacture and deal in iron, steel, metals, metallic substances, oils, glass, vitrified wares, etc., and to carry on the business of general hardware merchants; head office, Montreal; capital stock, $150,000.

La Fonderie du Peuple, Limitee, have been incorporated to cast, mold and smelt metals and to manufacture and repair all steel, iron, brass and wood works; head office, Joliette, Quebec; capital stock, $40,000.

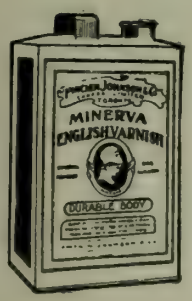
Justify every claim you can make for them, every effort made to push their sale—because they are trade-winners and trade-holders in every sense. We help you sell them by effective, persistent advertising—and you make good, steady, easily-earned profits.

Write for our attractive proposition to live dealers who want to "ginger up" their paint trade. Address place nearest you.



IMPERIAL VARNISH & COLOR CO., LIMITED

6 to 24 MORSE STREET, TORONTO

524 Beatty Street, Vancouver — 108 Princess Street, Winnipeg

Write or wire orders you want filled in a hurry. We carry complete stocks, so we can ship same day we get your order.

Your Immediate Profit May Be Large

if you handle an inferior brand that offers a larger percentage of profit, but it is poor business sense to be influenced by alluring, quick-return propositions. The paint or varnish that offers a fair margin of profit and a high-class reputation that means repeat orders is the kind that eventually brings the best returns.

MINERVA
PAINTS AND VARNISHES

can't be made any better. They have attained that degree of perfection beyond which brains, science and modern manufacture have been unable to make any advance. For 76 years Minerva Brands have been manufactured in England, and are to-day the very highest class of paint and varnish made. A thoroughly modern, fully equipped Canadian factory is now supplying a rapidly growing demand. Are you getting your fair share of paint business—paint profits ?

The largest steamship and railroad companies and prominent decorators all over the world use Minerva Brand. Mr. Dealer, you have a profitable proposition waiting for you. If you haven't already looked into the Minerva plan, write us.

PINCHIN, JOHNSON & CO. (Canada), Limited

Established in England in 1834. — 377-387 Carlaw Ave., Toronto, Can.

PAINT AND OIL MARKETS

MONTREAL.

Montreal, April 28th.—Painting time has at last become a reality indeed, and apparently the call for paint, varnishes, etc., is well up to the average. The weather man has finally removed his ban, and retailers should now take every advantage of the opportunities for business. Orders are coming in freely with varnishes, prepared paints and white lead probably bringing in the most business.

During the past week linseed oil has remained steady in price, but turpentine has slumped again, and is quoted ten cents per gal. lower than the quotations a week ago. The supplies coming forward now rather more liberally than was expected has taken from the market that strength which so marked a short time ago.

Linseed Oil. — There has been no change in this market during the past week. Conditions seem to be stationary for the time being, and give the appearance of remaining around the present figure. The demand for linseed oil is steady, with the feeling rather firm. The present quotations are for raw per gal. $1.10, and boiled $1.13.

Turpentine.—Another decline is reported in this market, the price now quoted being down to $1.10 per gal. Offerings have been coming forward rather freely, and under this condition the market has lost its former strength. The demand for turpentine remains active.

Prepared Paints.—This market is in a healthy condition, thanks to the demand that the country at large is making upon stocks for the annual campaign.

White Lead.—The demand for white lead is heavy, owing to the amount of outdoor painting that is now in progress. The market is firm under the new demand and present prices are expected to prevail.

Quotations are as follows: Lots of one ton, $5.85; contracts of five tons and over, $5.70; shipments less than one ton $6 f.o.b. Montreal.

Paris Green.—This article is still going out nicely, indicating that there are still some to secure their supplies. The season for its use is gradually drawing nearer, and it is preferable to obtain requirements early.

Prices are unchanged as follows: In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17¼c; 50 lb. and 100 lb. drums, 18¼c; 25 lb. and 100 lb. drums, 18¾c; 1 lb. packets, 100 lbs., in case, 20¼c per lb.; 1 lb. packets, 50 lbs. in case, 20¾c per lb.; ½ lb. packets, 100 lbs. in case, 22¼c per lb.; I lb. tins, 100 lbs. in case, 21¼c per lb.

Arsenate of Lead.—Orders for this insecticide are also being received rather freely, indicating a certain interest among the trade.

Prices are: In bbls., about 800 lbs.; 9¢; in half bbls., about 400 lbs., 9½c; in 25 lb. wooden kegs, 10c; 5 lb. bottles, 12c; in 2 lb. bottles, 13c; in one lb. bottles, 14c.

Putty.—The demand for putty is good, being a part of the regular business that is felt at this time of the year.

Prices f.o.b. Montreal are: Bulk, bbls., $2.20; bulk, cwts., $2.45; bladder bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.55; 25's, cased, $2.70; 12½'s, cased, $2.90.

TORONTO.

Toronto, April 27.—The demand for all varieties of paint and supplies during the past week has exceeded past records by a comfortable margin. With the advent of fair weather, activity became at once the dominant note. People flocked to the hardware stores for paint and the dealers in turn literally flooded the manufacturers and jobbers with orders, mostly all of the "rush" variety.

The feature of the market has been the continued slump in turpentine. After showing a tendency early in the week to strengthen up a little, turpentine suddenly dropped again, and at time of writing is selling at $1.10. No other price changes are noted.

Linseed Oil.—The market again manifests some slight weakness, brought about most probably by the fact that the season has been so late in opening up. The demand up to the present has not been quite so large as in other years. Conditions now are very healthy, however, and the local trade in Toronto speak of business as being very good in oil.

Turpentine.—The very considerable reductions of the past two weeks, though not altogether unexpected, came as somewhat of a surprise, and there was, in consequence, a large demand at once from varnish manufacturers and dealers in paints, so that the supplies coming forward were promptly taken up. The inevitable result. as forecasted in last week's Hardware and Metal, was a strengthening at Savannah and Jacksonville. An advance of from 4 to 4½ cents per gallon was recorded there last week, but the local price remained steady. The impression prevailed that there would be still further advances on the primary markets, as the nights have been unusually cold in the turpentine belt. It was feared that this would check the flow of gum for some days and tend to retard the production of turpentine for a week or more. This contingency did not arise, however, the supply continuing to arrive on the market in good bulk. As a result, the price began to fall off and the local quotation dropped on Wednesday to $1.10, a reduction of 10 cents.

In connection with the turpentine situation, it is worthy of note that one of the large turpentine producing companies has just gone into bankruptcy, with liabilities of $115,000 and assets valued at only $65,000; this despite the fact that the price realized for turpentine has been about double that of two years ago. High prices do not necessarily mean profit to the producer.

Rosin.—Rosin has been fluctuating to some extent, though it has not been affected as quickly as the turpentine market. A very strange feature occurs in this department: the extra fine grades are now only from 25 to 50 cents per barrel higher than the dark rosins.

The only explanation for this is that the gatherers of gum have been more careful in treating it by which they have been enabled to have a greater proportion of finer grades than formerly.

Putty.—There is a seasonably good demand at present. Prices are standing at the same figures: Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead.—There is a steady movement to white lead. Painters are now actively engaged in outdoor work, and consequently are beginning to buy white lead in good bulk. During the past week there has been a marked increase in the output. The price is standing the same.

Varnishes and Japans. — All specialties are in active demand, and varnishes are traveling out just as fast as the manufacturers and jobbers can ship. All reports point to a splendid retail trade at present. Prices are stationary and will almost certainly remain at the present figure for some time.

Prepared Paints.—The call for prepared paints is probably at its highest point at the present time. Dealers are finding it necessary to renew stocks in order to meet the demand, and the manufacturers as a result are kept busy supplying the demand.

Petroleum.—There is not a heavy demand for coal oil at the present time. Prices quoted here are:—Canadian prime water white, 12½c; United States water white, 14c; Pratt's Astral, 16c. The market is strong with a good demand in evidence.

WAGE INCREASE TO BROOM TYERS.

An entirely voluntary increase in wages has been granted to the broom tyers in the broom manufacturing department of the Boeckh Bros. Company of Toronto. For some years past the prices paid for tying brooms was regulated largely by prison competition, which has now, happily, been done away with, and the company has, after careful consideration, decided to increase the wages of their workmen. In doing so, it has, however, been stipulated that every broom must be absolutely perfect, as otherwise it will be rejected by the firm's inspectors, thereby insuring to the consumer an article that will give the very best of satisfaction. The same rule has been in effect in the brush department of this company for sometime, and has proved entirely satisfactory to all concerned.

Dependon——Light Hard Oil Finish.

Everlastic——Quick-drying Floor Varnish.

Gold Medal——Inside and Outside Varnish.

—These three varnishes meet all the regular demands of your trade—simplify your varnish stock—increase your varnish profit.

If any part of your house or your customer's house, is in need of varnishing, the requirement is met by one of these three B-H Varnish Specialties—Gold Medal, Everlastic, Dependon.

GOLD MEDAL.—If the front door, porch, ceiling or bathroom wants brightening, Gold Medal, Inside and Outside Varnish, gives pleasing results with its easy flowing action, and will protect the exposed surface with a durable coating, which will fight the effects of moisture and changing temperature.

DEPENDON.—If the furniture, wall, inside door, or any interior work, of either hard or soft wood, is in need of finishing or renovating, Dependon dries free from tack in a few hours, and can be polished, if desired, in twelve, stands hard wear and dries with a brilliant lustre.

EVERLASTIC Quick drying Floor Varnish has these special qualities. It dries hard and makes a very durable coating. It is elastic and tough. It does not show heel marks nor scratches easily. It dries quickly. Has a fine lustre, and can be walked on the next day after application.

These varnishes are sold in beautiful, lithographed gallon, half-gallon, quart, pint, and half-pint cans, imperial measure. The packages make a most attractive store display. Handsome lithographed illustrated signs will accompany your order.

ICE CREAM FREEZERS.

White Mountain, 50 p.c.

Amatite ROOFING

"NEEDS NO PAINTING"

AMATITE means more to the man who needs a roofing than just merely something to put on the top of a building.

It means a thoroughly satisfactory and reliable roof covering, without future *expense for painting*—because the *real mineral surface* makes painting unnecessary.

Frequently the cost of painting a roofing amounts to almost enough to buy a new Amatite Roof.

Amatite can be laid right over shingles, tin or other ready roofings. The directions hold good for laying Amatite anywhere and over anything, and are as simple as A B C.

For further information, booklet, samples, etc., address nearest office.

Everjet Elastic Paint A very tough, durable paint, at a low price. One color only—a lustrous black Use it for machinery, heating apparatus, smoke stacks, roofs, fences, water tanks, etc.

Creonoid Lice Destroyer and Cow Spray Cows give more milk if sprayed with Creonoid to keep away the flies which make them restless. The poultry output will be increased if the henhouse is made obnoxious to insect pests by disinfection with Creonoid.

THE PATERSON MANUFACTURING COMPANY, Limited

MONTREAL TORONTO WINNIPEG VANCOUVER ST. JOHN, N.B. HALIFAX, N.S.

SHOW IT UP!

Every agent for Ramsay's Paints has a set of paint cards, that will bring trade to his store, wherever he shows them. They are full of suggestions for painting and choosing of colors. Agents for

RAMSAY'S PAINTS

show up your cards! If you want more, write us. If you want help to secure orders, write us. We are helping others all over Canada to-day and they are getting orders straight through our helps, that might go to other stores. We make a rule to put Ramsay's agents in front for all paint orders. Have you Ramsay's Catalogue?

A. RAMSAY & SON CO.

Established 1842

The Paint Makers

MONTREAL

HENRY WRIGHT & CO.'S

ANVILS & VICES

FAMOUS ENGLISH MAKE

Best Solid Anvils; long, narrow pattern.
Face and bick in one piece—not built up.
Vices are well made with good strong jaws.

Have your jobber supply them

A. C. LESLIE & CO., LIMITED

MONTREAL

KEEP YOUR EYES OPEN

Your nearest competitor in the trade is very much wide-awake, but you can make sure of your share of the paint trade by handling

New Era Paint

This is the honest paint at the moderate price, which covers more surface, lasts longer and holds its color better than any other prepared paint.

WRITE FOR DETAILS AND PRICES

Just Now the "IDEAL" Self-Heating Sad Iron is the Centre

of attraction among ironing devices—the Best—because its first cost is its last outlay—except for gasoline at the rate of one cent per day. It holds enough gasoline for four hours' burning. Better still :

The "Ideal" Gets and Holds Trade

Because its perfect combustion makes it odorless in operation ; it's laborless, because it does away once for all with walking back and forth between ironing board and stove. Fine for travelling and camping. Send for price list, or ask your jobber.

Ideal Sad Iron Mfg. Co. Dept. B

CLEVELAND, OHIO, U.S.A.

LONDON BAR IRON

is the best line of bar iron that money can buy. It possesses a uniformity of texture, toughness, and easy workability that means perfect satisfaction both to you and to your customers. And the price is as low as we can make it without sacrificing anything of its quality.

What our Decorative Department does for the Sherwin-Williams Agent

The S-W Decorative idea has proved a ten-strike ! No other one thing has ever done so much to educate property-owners to the splendid decorative possibilities of paint and varnish. No other selling help was ever so effective in drawing trade to the stores, increasing sales all along the line for S-W Agents.

The property-owner's first interest is to make his home beautiful. When it becomes necessary to repaint or redecorate it, he and his wife will spend hours planning how the outside should be painted and how to decorate each of the rooms. Sometimes the result is satisfactory. may times not. Unreasonable people will often blame the dealer, the painter or the paint if the finished work is not as pretty as they expected.

The result is a lost or dissatisfied customer through no fault of your own.

These beautiful natural color portfolios were especially designed by the S-W Decorative Department to enable our good agents to place before their customers complete color designs for a variety of exterior and interior decorations Many styles and sizes of houses are included, showing the exact colors most suitable for each. All the rooms from parlor to kitchen appear, with suggestions for color schemes which insure beauty and attractiveness. The effect can be seen before the work is done, and exact specifications for securing each effect accompany each plate. The buyer can't go go wrong. Think of being able to advertise and offer such service to your customers free !

This is only one of the helps the S-W Decorative Department extends to S-W Agents. We will have more to say in our next advertisement, but in the meantime, why not write for information on the complete S-W Agency Proposition ?

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS

CANADIAN HEAD OFFICES AND FACTORIES: MONTREAL

BRANCH OFFICES AND WAREHOUSES: TORONTO, WINNIPEG AND VANCOUVER

Condensed or "Want" Advertisements

Address Box 501, HARDWARE AND METAL, Toronto. (19)

AN IRONMONGER, who will shortly dispose of his business in Wales, is anxious to obtain a situation in Canada in any of the following departments of the hardware trade: Salesman in any branch; office or counting house. Young, healthy and energetic; of good address, having a wide experience of British trade, in all its branches. An expert draughtsman and designer, holding 3 first-class certificates for "Advertisement Designs," and 3 first prizes for designing at the Royal National Eisteddfod of Wales. Engraver or metals, such as coffin plates, monograms and inscriptions for presentations, etc. Expert window dresser. Total abstainer and holds the highest possible character. Box 2011, HARDWARE AND METAL, Toronto. (23)

EXPERIENCED retail hardware salesman desires position; eight years' experience, married, sober, eighteen months as manager of general hardware business. Good reasons for leaving. A1 references. A. E. DICKSON, Andover, N.B. (17)

SITUATIONS VACANT

TINSMITHS WANTED for Western Canada towns. Apply THE McCLARY MFG. CO. Winnipeg, Man., who will furnish list of towns. (18)

WANTED—Young man who understands repairing guns for wholesale hardware house. State experience, references and salary expected. P.O. Box 1016, Montreal. (17)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314. Stair Building. Toronto.

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

725,000 LIVE MERCHANTS use National Cash Registers. We couldn't sell them unless they saved people money. The National will guard your money too. Write us for proof. National Cash Register Co., 285 Yonge St., Toronto.

When writing advertisers kindly mention having seen the advertisement in this paper.

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

SPECIAL LINES OF MARINE VARNISH

You will have call now for varnishes for boats, canoes, and all sorts of water craft. Are you prepared to meet the demand?

Have you varnish on your shelves which will positively stand the marine test? How much is a customer worth to you whom you satisfy with a varnish which will stand the marine test?

DOUGALL'S MARINE VARNISHES

are made specially for boat work. A surface varnished with "Dougall Marine" will keep a smooth and beautiful finish proof against salt or fresh water—brine—spray—exposure of any kind—heat or cold or hot sun.

"Dougall Marine Varnishes" are MADE to stand this severe test. Woodwork treated with this varnish CANNOT be hurt by exposure.

Be sure of DOUGALL'S name on the label.

Paint and Varnish Removers

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	"Taxite"
International Varnish Co., Ltd., Toronto, Canada	"Klensa"
Pratt & Lambert, Inc., Bridgebury, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapoo"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	"Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada.	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada.	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

Chadeloid Chemical Company 100 William Street NEW YORK, N.Y.

DO YOU BELIEVE IN---

THE "HORSE SHOE" FAIRY TALE?

Miracles do not happen in business, yet—lots of otherwise sensible men believe in Luck.

They will tell you that things happen—that the successful man is the lucky man. But getting down to brass tacks, you know perfectly well that nothing happens.

You know that success is the result of certain causes –

Causes so obvious that believers in the "Horse Shoe" fairy tale pass through life without noting them.

90 per cent. of the successful Hardware Merchants do not believe in luck—

They use "Buying Sense" instead,

And stock the lines which mean profit and reputation for them—**International Varnish Products.**

"ELASTICA" Floor Finish—the one perfect floor finish—the durable, beautiful, waterproof finish that never turns white or cracks.

"LACQUERET"—the Household Beautifier—a prime necessity in every home.

"SATINETTE" White Enamel—the enamel that stays white—made for both interior and exterior work.

FLATTINE FINISH—the finish that produces a full dead or flat appearance **without the labor and expense of rubbing.**

KLEARSTONE Stains (Acid or Oil)—the perfect wood stains.

Every **International product** you sell adds to your reputation and increases your bank balance at the same time.

N.B.—All International Varnish Products are sold in full Imperial Measure cans.

When writing advertisers kindly mention having seen the advertisement in this paper.

DEPARTMENT OF RAILWAYS AND CANALS, CANADA.

ONTARIO—ST. LAWRENCE CANALS.
RAPIDE PLAT CANAL.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Improving Lower Extreme to Lock No. 24," will be received at this office until 16 o'clock on Friday, May 5th.

Plans, Specification and Form of Contracted to be entered into can be seen on and after Monday, April 17, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Resident Engineer of the Ontario—St. Lawrence Canals, Cornwall, at which places form of tender may be obtained.

Parties tendering will be required to accept the fair wages schedule prepared or to be prepared by the Department of Labor, which schedule will form part of the contract.

Contractors are requested to bear in mind that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted bank cheque for the sum of $9,000 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work, at the rates stated in the offer submitted.

The cheque thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfilment of the contract to be entered into.

The lowest or any tender not necessarily accepted.

By order,

L. K. JONES,
Secretary.

Department of Railways and Canals,
Ottawa, April 14th, 1911.

Newspapers inserting this advertisement without authority from the Department will not be paid for it. (17)

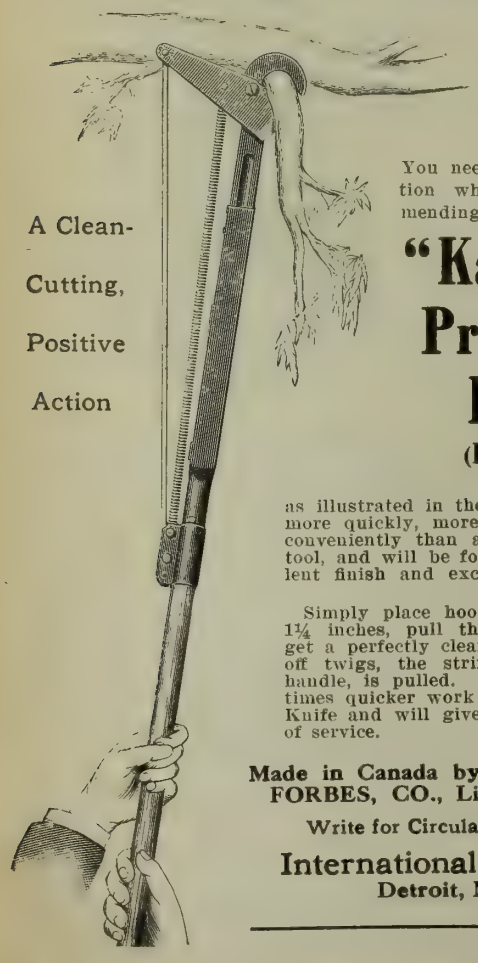
GREAT GUNS

The position held by Tobin Simplex Guns to-day as sporting weapons has been won only by the merits of the guns themselves. They have given sportsmen complete satisfaction and the demand is constantly increasing.

The "why" is simply because:—

The Tobin Simplex is the strongest light gun and the lightest strong gun.

The Tobin Simplex has frame and action parts made from steel drop forgings—sears, springs and locking bolts of tempered spring steel.



The Tobin Simplex is accompanied by a "Money Back" guarantee, which *assures* satisfaction.

Write us for catalogues and information. Stock up with a reliable gun.

WOODSTOCK ONTARIO

A Clean-Cutting, Positive Action

Every Fruit Grower a Customer

You need have no hesitation whatever in recommending the

"Kansas" Pruning Knife

(Improved)

as illustrated in the cut. It works far more quickly, more cleanly, and more conveniently than any other pruning tool, and will be found to be of excellent finish and exceptional durability.

Simply place hook over limb up to 1¼ inches, pull the handle, and you get a perfectly clean cut; for snipping off twigs, the string, instead of the handle, is pulled. Will do five or six times quicker work than the next best Knife and will give double the length of service.

Ford Auger Bits
create steady customers

Discerning dealers everywhere have learned the judiciousness of recommending the FORD to the man who steps in and asks for an Auger Bit.

Not simply because of the generous profit from the immediate sale but because of the cumulative value of that sale. One Ford sale means sure future sales—for the man who buys a Ford gets the speediest, smoothest and strongest bit made---hence obtains maximum satisfaction.

His confidence in your judgment not only clinches his regular bit trade but benefits you in every department of your business.

We help you make sales

in every possible way. Thru circular letters, catalog and magazine advertising we reach practically every Auger Bit user---thus stimulating a demand for the FORD. We refer every inquiry to the nearest dealer.

The FORD is unquestionably the finest Bit on the market to-day. Aside from doing better work faster and with less trouble, it has---figuratively speaking---the strength of Gibraltar, and we unhesitatingly back it with a solid guarantee.

There's money in selling it, Mr. Dealer, May we send you our catalogue and circulars?

"MONARCH" WIRE FENCE

If you have a call for a cheap bush or portable fence we can supply a **"Monarch"** perfectly adapted to this need.

The **"Monarch"** is made in 15 sizes, so you can have one suitable for any purpose, even close enough for hogs. Every wire is No. 9 hard steel, and well galvanized.

The **"Monarch"** has the best Ring Lock in Canada, and cannot slip nor come loose.

It will sell itself if you have it where your customers can see it.

IT IS PERHAPS NOT GENERALLY KNOWN

That we have an Information Department, consisting of trained and practical men, whose time is employed solely in answering enquiries from people interested in cement.

NOW IT WILL BE READILY UNDERSTOOD

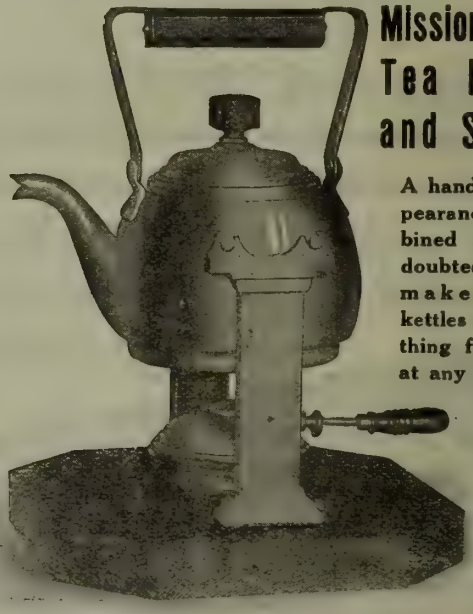
that out of the mass of enquiries that come to us, there are a number that include questions as to what might be termed Allied Industries. These we now answer to the best of our ability, but we could answer them still more satisfactorily if manufacturers of materials used in conjunction with cement would co-operate to the extent of sending copies of their catalogues and other literature, to be placed on file in our office for reference.

WE SHOULD LIKE TO OBTAIN

the names and addresses, together with catalogues, and any other obtainable information, of manufacturers of and dealers in:—

(1) CONCRETE MACHINERY. (2) BUILDING BLOCKS. (3) CEMENT BRICKS. (4) TILE MOLDS. (5) FENCE POSTS. (6) REINFORCING MATERIAL. (7) WATER-PROOFING COMPOUNDS.

It is not alone for our own convenience that we make this suggestion—firms who manufacture or deal in such articles will find it to their own advantage to have this information in the hands of our Information Department, thereby enabling us to hand on to them, from time to time, enquiries for such materials as they severally make.



In sending catalogues, literature or information, please address same to "Sales Department."

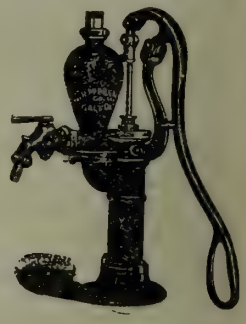
FENN'S
Adjustable Post Hole Auger

holds undisputed pride of place as the fastest digging tool on the market, and for this reason alone is a splendid line to handle and recommend.



Moreover, it is simple in construction, stands abuse well, and has no castings to break or rivets to work loose. Blades are of highest grade steel bolted directly to standards, and the "Fenn" can be adjusted to dig different sized holes. Digs a full size hole clean to the bottom, and works equally well in any soil. Better send along for prices and fuller description of this splendid tool.

It is a line that sells readily and profitably. Write us to-day. Descriptive booklet forwarded free to enquirers.

MALTHITE ASPHALT ROOFING

IS THE LINE YOU SHOULD STOCK AND RECOMMEND BECAUSE OF ITS PERFECT SATURATION

Any asphalt roofing is only just as good as its saturation, and "Malthite" Roofing is saturated solely with "Gilsonite" Natural Asphalt—the kind that is weather-proof, water-proof, vermin-proof, frost-proof.

But because there is no oil to evaporate in "Malthite" Roofing, it retains its weather-resisting properties indefinitely.

This is the line for you to feature right now. Our prices are specially low for prompt delivery.

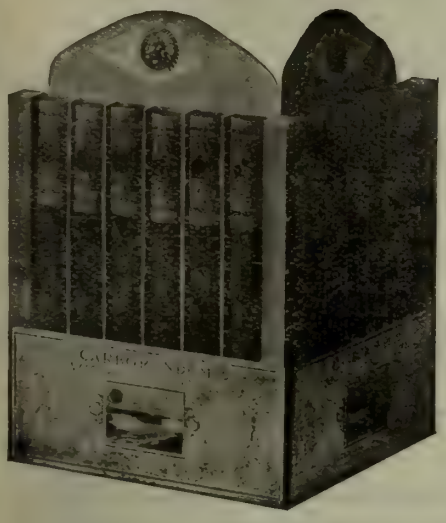
The IRONCLAD *Alarm*

"It Rings to Beat the Band."

IF we placed our IRONCLAD movement in an ordinary alarm case, the chances are it would *turn turtle* within a year. And if it lived to tell the tale, it would be to *tell a tale*—for it would get so *clogged* with dust, it could not tell the *truth.*

But it's CLAD in heavy IRON armor and it can't *keel over.*—It's stocky, sturdy, steady.—If it's *cleaned* every other year, there's *no telling* how long it'll last.



Packed 12 in a box with advertising matter. Dealers' names printed free on dials in lots of 24. Height 5 inches. Dial 2¾ inches. Weight 2¼ lbs. Rings 35 seconds; can be shut off at will.

Stocked by 28 Canadian Wholesalers.

Carborundum

Niagara Scythe Stones

The demand this spring is going to be bigger than ever. Have you stocked up?

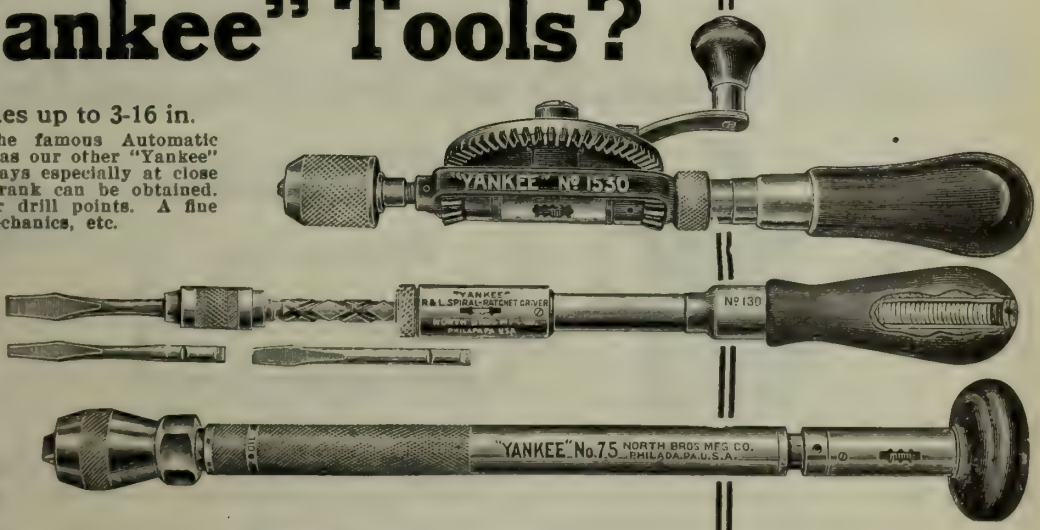
Remember, the only way you can get the advantages of the big demand Carborundum Advertising is Creating is by handling and pushing Carborundum Sharpening Stones. : : : :

The Carborundum Company, Niagara Falls, N.Y.

Have You Seen These

New "Yankee" Tools?

No. 1530 Hand Drill for holes up to 3-16 in.



Takes round shank drills. Has the famous Automatic Double Ratchet movement the same as our other "Yankee" geared Drills, so helpful in many ways especially at close quarters where only part turn of crank can be obtained. The wood Handle has magazine for drill points. A fine tool for metal workers, amateur mechanics, etc.

No. 130 Quick Return

Same tool as the No. 30 but with a Spring inserted in the Handle to drive the spindle back quickly, ready for the next push. A great advantage for overhead work or where only one hand can be used. Takes all the Attachments used in the No. 30.

No. 75 Push Brace

Bores holes up to ⅝ inches in hard woods and ⅝ inches in white pine, quicker and easier than a Bit Brace. Drives and draws screws—takes all the small tools and works in close quarters where a Bit Brace cannot be used. Bearing down on the Handle drives it with that quick and easy motion of the "Yankee" Spiral Driver.

They are catching the Mechanics. Better let your Jobber quote at once.

NORTH BROS. MFG. CO.

Philadelphia, Pa.

"Quality is essential for reputation and profit.
It pays to sell goods you can guarantee."
—The Philosopher of Metal Town.

Every sheet fits evenly—each corrugation is guaranteed perfectly uniform.

CORRUGATED IRON

ROOFING AND SIDING

It's the "Metallic" workmanship that counts. Every employee of the large "Metallic" Plant is imbued with "Metallic" ideals—absolute perfection. The high standard of all "Metallic" goods is the result. "Metallic" Corrugated Iron is superior to all others. The corrugations are pressed one at a time—not rolled. The sheets fit perfectly —guaranteeing absolute satisfaction.

Flat or Curved—Galvanized or Painted.

Any Size or Gauge.

DISSTON

INSULATE SCREW DRIVER

This tool is designed expressly for Electricians' use. The blade of crucible steel, hardened and tempered, is embedded in a handle of hard rubber of a texture that eliminates brittleness. It WILL NOT work loose. The rubber handle is milled grip, with projecting rings which prevent the hands from slipping down on to the blade. The hard rubber handle acts as insulation.

The Disston Insulate Screw Driver is something new. Most practical Electricians' screw driver ever made.

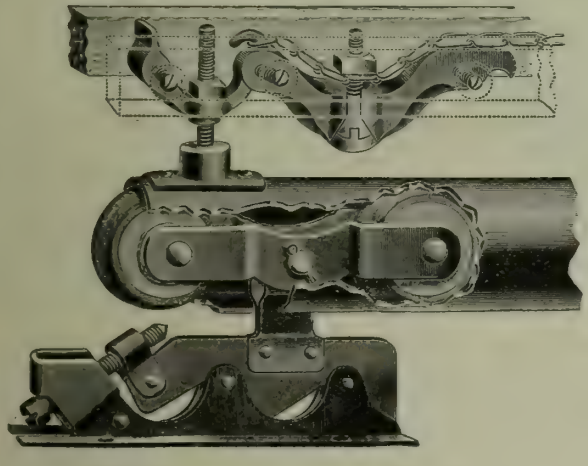
(Manufacturers of Hardware Specialties for 25 Years)

Harvard, Illinois

Fig 386



The Cannon Ball Barn Door Hanger

Steel wheel, roller bearing, noiseless, tandem, flexible, bird-proof, waterproof, completely enclosed. The Track comes in 3-ft. sections, crated. 96 feet of track is packed in a crate. Can be put under the counter, making it convenient for stock. The Track Brackets are packed separately. Note that Cannon Ball Hangers run inside of the track, not outside.

"The Cannon Ball Beats Them ALL"

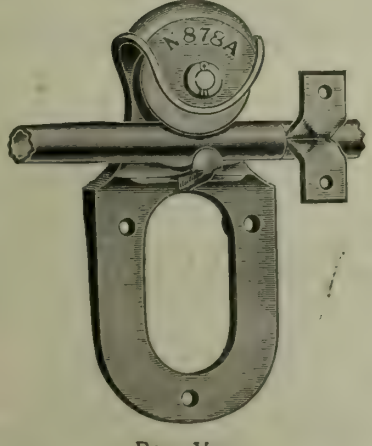
Fig. 404

The Cannon Ball House Door Hanger

has two specially-formed rollers, which have steel bushings, covered with sole leather, making an indestructible wheel with wide tread and noiseless, being fitted with long roller bearings.

The Hangers are packed a full set or ½-set in a wooden box, neatly labeled. Ten full or ½-sets in a crate.

Cannon Ball House Door Track is made in lengths up to 12 feet, and is fitted with an Adjustable Wood Header, by means of which the Track is adjusted at the door opening with the use of a screw driver only.



"The Cannon Ball Beats Them ALL"

Fig. 28

Front View

Fig. 35

Rear View

The 20th Century Barn Door Hanger

is finished in aluminum. The frame and hood of the hanger are one malleable piece, thus making the hanger strong enough for the largest doors.

The wheels have wide grooves and run on hardened steel roller bearings, reducing the friction to a minimum.

A lip projecting about 1 in. below the wheel makes it impossible for the hanger to jump the track.

20th Century Barn Door Track is put up in 2-ft. sections only, 100 ft. in a crate, making it convenient to stock right under the counter.

AN HONEST ROPE

Honesty—trust-worthiness is one of the highest qualities in the human character. So it is with any article of merchandise. The thing which makes it most valuable is the honest quality which is made a part of it by the manufacturer.

Good, sound raw material and intelligent, honest workmanship, not only talked about but actually put into the goods, are what make an article trustworthy—desirable.

In this class for the last eighty-six years has been

PLYMOUTH ROPE

"The Rope You Can Trust"

There is pleasure in using an article of this kind—there is satisfaction in selling it. Are you getting some of this satisfaction?

Our well distributed stocks and the readiness with which your jobber can get his supply of PLYMOUTH rope make the filling of your orders easy and prompt.

Tell your Jobber to send you PLYMOUTH next time.

This Wrench Sells Itself

"I am the

Cochran Pipe Wrench

and I speak for myself—good, strong selling points, too. Look at the bend in the hook of my jaw—see how strongly it is reinforced? Powerful grip, with a quick get-away. I never lock or crush a pipe—guarantee not to.

"And here is one of the secrets of my success, that users can see without your telling them—that rocker bearing that takes the strain which in ordinary wrenches is thrust upon the helpless little frame pin. Any wonder I would win out?

"You can give a side twist or a sudden jerk and you make no more impression on this rocker feature of mine than Jeff did on——but let me me send you the binding guarantee given by my backers—it gives you absolute protection."

"Frame and Handle one solid piece

No small parts to keep together; nut longer than on other pipe wrenches, reduces strain on threads. Cannot bind and gravity alone brings instant release.

Send us a trial order, and a ten-day trial will convince you that the **Cochran Pipe Wrench** sells itself. The progressive workman demands this up-to-date tool, as he cannot let competitors get them before he does and beat him out—and a word to the wise is sufficient.

Cochran Pipe Wrench Mfg. Co.

CHICAGO, ILL.

Canadian Branches: 70 George St., Ottawa, Ont. 156 Lombard St., Winnipeg

Give a Receipt and Get Protection

For example:

A customer comes into your store in a hurry, makes a fifty-cent purchase, hands you a bill and gets $1.50 change, sticks it in his pocket and hurries out.

Half an hour later customer returns and says he gave you a $5.00 bill and got only $1.50 change.

What are you going to do about it? Argue and lose a customer? Or "give up," feeling sure you have LOST $3.00.

A National Cash Register positively prevents errors of this kind—protects both you and the customer against such disputes. Does more than that—it insures absolute accuracy in every transaction. Records all cash sales, credit sales, money received on account, money paid out.

Pays for itself with the money it saves you.

National Cash Registers cost less now than ever before. Let us send you our booklet and new price list.

National Cash Register Co.

F. E. MUTTON, Manager for Canada

285 Yonge St. - - Toronto

Successful Merchants Put a Receipt in Every Parcel.

National Cash Registers afford the quickest and best means of recording sales, and of automatically issuing a printed receipt that cannot be altered, numbered, dated, with clerk's initials—making a duplicate record, which is locked inside the machine for the proprietor's use.

You can increase your sales by making a window display of

1847 ROGERS BROS. MERIDEN B.CO. **X S TRIPLE**

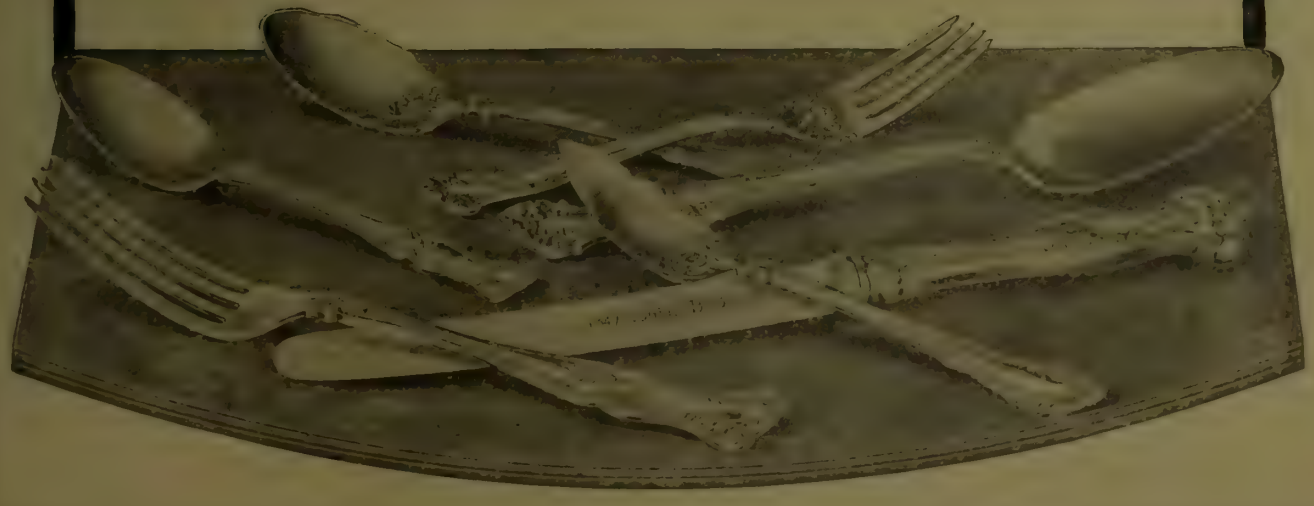
SPOONS, FORKS AND FANCY SERVING PIECES

You can further increase your sales by locally advertising

"SILVER PLATE THAT WEARS"

Talk "quality." The kind of Silver that looks well in the show case and will not stand daily service is not a good kind to buy, or a good kind to sell. Silverware must do more than appeal to the eye.

1847 ROGERS BROS. MERIDEN B.CO. **X S TRIPLE**



has for sixty-three years been known as

"SILVER PLATE THAT WEARS"

and is the highest grade of Silver Plate made.

We have advertising helps for those who wish to use them---Electrotypes, Display Cards, Counter Mats and Post Cards.

Meriden Britannia Co.
Hamilton - Canada

Over Fifty Million Readers

See the advertisement of "1847 ROGERS BROS." silverware every month.

The various magazines in which our advertisements appear have a combined circulation of over 10,000,000—and, figuring the customary way, five readers to each copy, have between fifty and sixty million readers.

And this does not include those who see our advertisements in weekly newspapers, with a total circulation of over half a million.

In line with the policy of its owners for the past fifty years to make flat ware bearing the trade mark

1847 ROGERS BROS

the best, we now furnish wares of this brand in the following grades only :

1847 ROGERS BROS. XS TRIPLE

Tea spoons plated not less than six ounces per gross (other staple pieces in proportion). List prices on all articles in this quality will be the same as former "A-1" plate.

1847 ROGERS BROS. XII XS TRIPLE

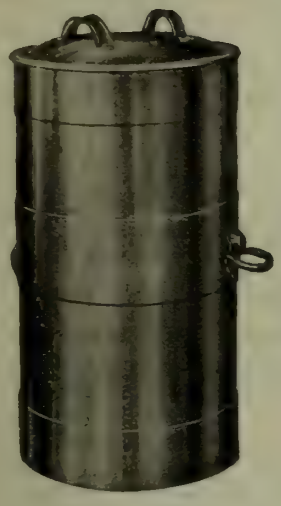
Tea spoons plated not less than six ounces per gross (other staple lines in proportion), and in addition the parts most exposed to wear bear an additional plating. List prices on all articles in this quality will be the same as our former "XII" plate.

1847 ROGERS BROS. XS QUINTUPLE

Tea spoons plated not less than 10 ounces per gross (other staple pieces in proportion). List prices on all articles in this quality will be the same as our former triple plate.

The plate on fancy pieces will be in keeping with grades described above.

Our No. 12 Medium Knives are now plated 16 dwt. and bear the trade-mark :



Make a display and link your store with this advertising.

THE CONNOR BALL-BEARING WASHER

With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled. And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.

Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

FIX UP YOUR CHIMNEYS

Even the best stove or furnace will be unsatisfactory if the chimney does not draw well. But the

"Zephyr Ventilator"

will give a good draft to any chimney. It will even allow the burning of soft coal in the stove, with good results.

We want you to sell the "Zephyr Ventilator" in your town. There is money in it, and the satisfaction that it gives will bring you new customers. **The "Zephyr"** cannot be excelled for ventilating the rooms of **Clubs, Steam Laundries,** etc. **The "Zephyr" makes high chimneys unnecessary.**

Montreal, Dec. 4th, 1905
J. W. Harris Mfg. Co., Ltd.
Montreal, Que

Gentlemen.—

It pleases me to be in a position to state that the "Zephyr" Ventilator placed on my chimney is giving me the greatest satisfaction

The smoke which we used to have in the house has completely disappeared, owing to the good work of you "Zephyr" Ventilator.

I remain, gentlemen,
Yours truly,
T. A. GAUTHIER,

"ECONOMY" SIDE WALL REGISTERS

Are made from original bronze patterns, are exceptionally well finished and attractive.

The face and frame are separate castings and so constructed as to permit of connecting to register box with straps or drawing into position against face of register box with wood screws.

The face is attached to frame with one set-screw at top, has large area, and being convex offers little resistance to the passage of warm air currents.

The lever is attached to **centre of Valve** at top and can be operated by hand or foot.

It is made in Standard Sizes, finished in Black Japan, Oxidized or Nickel-plated, and sells at the correct price.

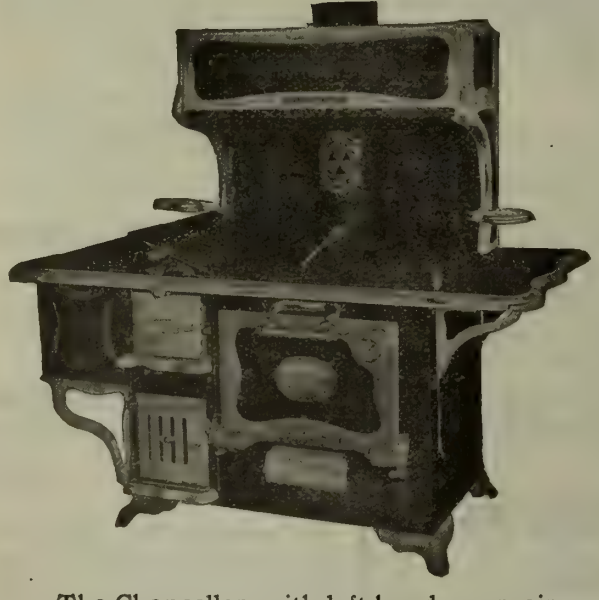
Is the Mail Order Business Gaining Ground In Your Town?

IT'S not remarkable that they get the stove business in some towns. They put out attractive catalogues, follow them up with effective printed matter, and advertise heavily. Some of them say, "Money back if not satisfied." Their prices, too, look attractive. If the local hardwareman is one of those fellows who "keeps" stoves instead of selling them—keeps them with the nickel dull; keeps them covered with a miscellaneous litter of hardware; keeps them in such shape that mail order cuts look like better "buys" than the stove shown locally; then it's not remarkable that the cashier of the Stove Department, Mail orders, Limited, has lots to do.

The mail order man *can't sell stoves in some towns.* When a woman buys a stove, she likes a local man's guarantee that it will bake—the printed word isn't so convincing—and how much easier it is to sell a high-grade, tasty, teatureful range, that the woman *sees* will fit her kitchen, than to get an order with only a cut to sell from!



We, at the office of the Gurney Foundry Co., Limited, want *second orders* more than *sample orders,* and so we have this year concentrated nearly all of our sales and advertising expenditure—many thousands of dollars—on the proposition that the retailer, properly helped, can *corral his home trade, and hang on to it!*

GURNEY-OXFORD

You Can Corral That Trade

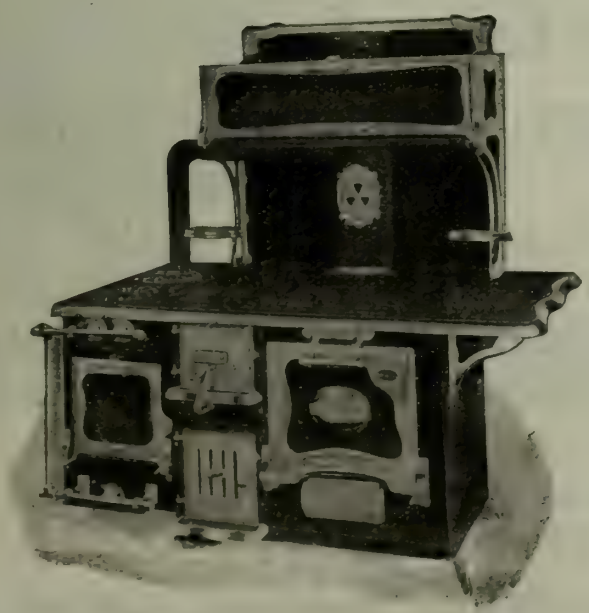
And Keep It!

EVERY live, up-and-coming man, every dealer whose office is painted a ginger color, can get big business—can keep big business from leaving his *home town* this year of 1911. .The newest, most radical, and most effective business-getting methods ever offered a Canadian retailer are yours gratis, for a postcard request. The plan is too comprehensive to outline here. It's in a book, though. We have just published a book just crammed with oodles of new, different, better methods, all woven into a scheme that *you need and will want.* This plan will put new accounts on your ledger, new forcefulness into your business machine, Mr. Dealer.

We'll be ready with the book at the Toronto office on the 15th—Branch house offices will have the plan a day or two later—*but get your request in now.*

Apart from co-operation—just on the merits of the line—look at the variety offered by the steel range line illustrated on these pages—just one little division of the *Gurney-Oxford* line.

Realize, too, that one set of fire box repairs will fit all styles shown here, and another complete line too.



You'll see new possibilities for 1911 when you look over the line complete and read that new book on *different* ways of getting stove business.

Can you say "yes" when a customer asks if you sell Tobin Guns?

Here and there throughout Canada will be found districts wherein Tobin Guns lack dealer representation. That is in no instance our fault —it's because the dealers in those places haven't yet taken hold of our proposition.

In such districts the public are supplied with Tobin Guns direct, until such time as the local hardware merchant awakens to the opportunity that he is allowing to pass him by.

But we *want* to do our business through the Trade—we want a representative in every community for

Tobin
Simplex Guns

We aim to *protect* the dealer—the consumers' price on every one of our guns is fixed, and allows the dealer a goodly margin.

Wherever we have a hardware merchant representing us, we send to him all inquiries and orders that come to us from his neighborhood.

The extensive magazine advertising we have arranged for will result in a greatly increased demand for Tobin Guns this year—and that demand will extend and extend as the high merits of the Gun become known.

If you are not handling Shot Guns, you're losing a profitable source of revenue—if you do sell guns and haven't yet stocked our guns, we will welcome an opportunity to explain wherein the Tobin article excels—why it pays the dealer to stock and feature it—wherein Tobin quality, backed up by Tobin advertising and the Tobin guarantee, is going to build up both sales and reputation for the merchants who handle these celebrated and high-grade guns.

BELT PERFECTION

Stitched Cotton Duck Belting Makes Business

TRADE COMES WITH CONFIDENCE. WHY?

Because "MAPLE LEAF" costs much less than leather, rubber or Balata belting, is stronger and more efficient, and its durability has been thoroughly demonstrated.

We give the dealers every help possible in securing and holding belting business.

DOMINION BELTING CO.

LIMITED

HAMILTON CANADA

Keen Buyers

of Horse Clipping Machines

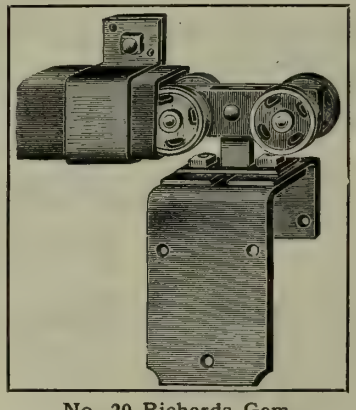
BUY THE BEST MACHINES. IT'S MERELY A MATTER OF BUSINESS—NOT SENTIMENT

It really makes no difference to the hardware dealer where the machine was made. He is in business to sell ***good*** goods—goods that satisfy customers and bring more business. The merit of a machine lies in what it will do—how long it will last—and how much it costs.

ON THE STRENGTH OF ITS MERITS

Stewart Horse Clipping Machines

are being used by horse-owners and sold by dealers in every civilized country on the globe.



One concern pilfered the idea on our Stewart No. 1. Of course, it was rather a clumsy adaption, but it was visible acknowledgment of Stewart superiority. The "counterfeit" machine resembles the Stewart in appearance—but the similarity ends right there. They couldn't steal the manufacturing process, because it may be imitated, but it is ***not*** equaled. Again, the Stewart has gears made of cut steel made file hard—not mere cast steel.

We fit the Stewart No. 1 with plenty of high grade flexible shaft and equip it with the famous Stewart tension one-nut clipping knife. We guarantee it to please the user better than any other machine made, or it can be returned to us at our expense and money will be refunded.

Send for details of our plan which helps dealers sell more horse clipping machines and which includes individual advertising.

CHICAGO FLEXIBLE SHAFT CO., 250 La Salle Avenue, CHICAGO

This shows the wonder-working aerating spoon dasher

More points of excellency are embodied in the ALASKA Freezer than in all other makes combined.

The ALASKA Aerating Spoon Dasher has given a new meaning to ice cream making in the home. It makes smoother, more delicious ice cream than any ice cream freezer ever made before and that too in three minutes' time.

It operates much more easily than any other freezer, transforming ice cream freezing from HARD WORK TO NO EFFORT WORTH TALKING ABOUT.

It is the simplest in construction. It requires neither skill nor patience to put an ALASKA Freezer together in from 15 to 20 seconds.

Every ALASKA Freezer is guaranteed as to material, workmanship and mechanical operation.

Are Manufacturers and Wholesalers Bound by Act?

Must Retail Dealer Send Permit From Police in Ordering Revolvers From Wholesale House?—Acute Question Raised as Result of New Offensive Weapons Act—Jobbers and Dealers Alike Stand to Face Losses on Unsalable Stock.

All branches of the hardware trade have been stirred up by the provisions of the new Ontario "Offensive Weapons Act," and it is highly probable that concerted action will be taken. Arrangements are under way, it is understood, for a number of the wholesalers to wait upon the Attorney-General, their object being to secure an interpretation of some points, which are not now thoroughly understood, and to protest against provisions which are deemed to be too rigid.

In the meantime the act is in force and it would be well for all manufacturers, wholesalers and retailers to go carefully into the matter and sift out the meaning of each clause. A transgression, even though made in ignorance of the new provisions, might bring down serious penalties. As dealers in many sections of the province are still unaware of the terms of the new act, the important clauses are herewith reproduced:

1. This Act may be cited as "The Offensive Weapons Act."

2. Every person who exposes for sale, offers for sale, or sells any bowie-knife, dirk, dagger, stiletto, metal knuckles, skull cracker or slung shot, or who sells a revolver, pistol or air gun to any person other than one holding a certificate issued under section 118 of the Criminal Code, or one, being over 18 years of age, who produces to and leaves with the vendor a permit in writing, signed by the Superintendent of Provincial Police, or a Chief Constable of a city or town, allowing him to purchase a revolver, pistol or air gun, shall be guilty of an offence and liable on summary conviction to a penalty not exceeding $200 or less than $25, or to imprisonment for a term not exceeding six months with or without hard labor or to both, and the bowie-knife, dirk, dagger, stiletto, metal knuckles, skull cracker or slung shot, revolver, pistol or air gun so exposed or offered for sale, or sold by such person, shall be confiscated by the Police Magistrate or Justice and transferred to the Superintendent of Provincial Police, or destroyed as such Magistrate or Justice may see fit.

3. (1) Every person who sells a revolver, pistol or air gun under the provisions of section 1 hereof, without keeping a record of the date of the sale, name of maker, serial number of such revolver, pistol or air gun, and the name, address and occupation of the purchaser, or who sells or exposes or offers for sale any revolver or pistol which does not bear a serial number and the maker's name, shall be guilty of an offence and liable on summary conviction to a penalty not exceeding $200 or less than $25, or to imprisonment for a term not exceeding six months with or without hard labor or to both, and the revolver, pistol or air gun so exposed or offered for sale, or sold by such person, shall be confiscated by the Police Magistrate or Justice and transferred to the Superintendent of Provincial Police, or destroyed as such Magistrate or Justice may see fit.

(2) The record referred to in subsection 1 may be inspected at any time by any peace officer and a copy thereof shall be transmitted by the person making the sale to the Superintendent of Provincial Poilce within seven days after the 31st March, 30th June, 30th September, and 31st December in each year. A violation of this subsection shall render the offender liable, on summary conviction, to a penalty not exceeding $50.

4. Every Peace Officer may search any person who he has reason to believe and does believe is violating any of the provisions of sections 115, 116, 117, 118, 120, 121, 123, 124 and 127 of the Criminal Code, and may seize any of the weapons which such person is illegally carrying, and any weapon seized under this section shall be confiscated and handed over to the Superintendent of Provincial Police or to the Chief or High Constable of the municipality to be by him transferred to the Superintendent of Provincial Police or destroyed as he may see fit.

5. If any of the weapons mention in the first section hereof is found upon a person believed not to be a native of Canada by the constable making the search or by the justice of the peace or magistrate before whom such person is charged with an offence, he shall report such facts to the Provincial Secretary and the Provincial Secretary may communicate with the Minister of the Interior with the view towards deporting such person under the Immigration Act.

6. The Lieutenant-Governor in Council may make such regulations as shall be deemed necessary or convenient for carrying into effect the provisions of this Act.

Are Jobbers Included?

The most acute question raised is with reference to the position of the manufacturer and the jobber. Can not the manufacturer sell to the jobber unless the latter produces first a permit from the police authorities? Cannot the jobber in turn sell to the retailer unless the retailer obtains a permit and sends it to the jobber?

This point is causing much discussion and agitation in legal as well as hardware circles. Opinions differ and it is possible that it will be left for the courts to pronounce upon. In the meantime the trend of opinion, in authoritative circles, is rather in favor of the idea that the manufacturer and the jobber are bound by the provisions of the Act. "Every person" is the way the Act reads and that would seem to cover the wholesaler, according to the opinion of Solicitor Bailey of the Attorney-General's department.

"If a dealer in North Bay bought a consignment of revolvers from a Toronto wholesale house, would he have to secure a permit first and send it on to Toronto?" was asked.

"Yes," was the reply," unless it had been decided that the Act refers only to retail selling."

"Would it not serve if the dealer showed his permit to the traveler who took the order?"

"No. The Act clearly states that the certificate must be left with the vendor."

The situation is therefore very unsettled at the present time. To the writer's knowledge, one Toronto wholesale house has been refusing orders since the enactment was made. Considerable uncertainty will continue to exist until the question has been settled one way or the other. It is regarded as hardly probable that the department will endeavor to enforce the provisions strictly as far as the wholesale trade is concerned.

Will Cause Heavy Losses.

Clause 3, which provides that no revolvers, pistol or air gun without the maker's name and the serial number stamped upon it can be sold, is causing worry as it is bound to result in losses to both wholesaler and retailer. Only the better grade revolvers and pistols are stamped in this way. Many of the best known manufacturers make and sell cheap revolvers which are not stamped. As there has been a big demand for the cheaper grades, the jobbers have been carrying more or less large stocks and some are now caught with a supply of these goods on their hands which they are forbidden by law to sell. Many retailers are also stocked up with revolvers which they cannot now sell and which will consequently be a dead loss.

"The government cannot saddle us with a heavy loss this way," declared a Toronto jobber, in discussing the matter. "Fairness will compel the authorities to take some action to relieve the trade."

But Superintendent Rogers, in whose hands the enforcement of the new act will be, takes another view. "That clause was inserted particularly to prevent the sale of unnumbered revolvers," he declared. "Those who have stocks laid in will suffer some loss, but what is that compared with the welfare of the province as a whole? We intend to enforce this clause to the letter."

Ignorance No Excuse.

Word has been received from various parts of the province from dealers who claim that they have not seen the act or learned anything definite of its provisions. The authorities declare that it devolves on every dealer to inform himself on this matter, and that, where infringements take place, ignorance of the law will not be accepted as an excuse. It would be wise, therefore, for every hardwareman to cut out the above copy of the act and keep it for future reference.

Advertisements That Win Attention

Two Distinct Kinds of Advertising Copy Now in Vogue Among Canadian Hardwaremen—Relative Advantages of "Miniature Newspaper" and "Illustrated Copy" Styles Discussed—Use Copy That the Readers Understand.

In the columns of Hardware and Metal, during the past few months, hardware advertising methods have been discussed from a practical standpoint, and a number of advertisements being run by Canadian dealers have been reviewed and criticized or commended, as the case might be. Among those which came in for commendation there were two distinct styles, both of which seem to have impressed themselves upon the trade and to have won a following among dealers who give thought to their advertising.

Of these two styles, the more novel was the "miniature newspaper" idea—the paper within a paper. The George Taylor Hardware Co., of New Liskeard and Cobalt, Ont., were among the first to successfully launch this style of advertising, their ads. being gotten up in the form of a newspaper page, under the caption, "Taylor's News." The idea caught on at once, and the Taylor people have found that the readers of their local paper have been looking forward to each issue and displaying a keener interest in "Taylor's News" than in the actual news columns of the paper.

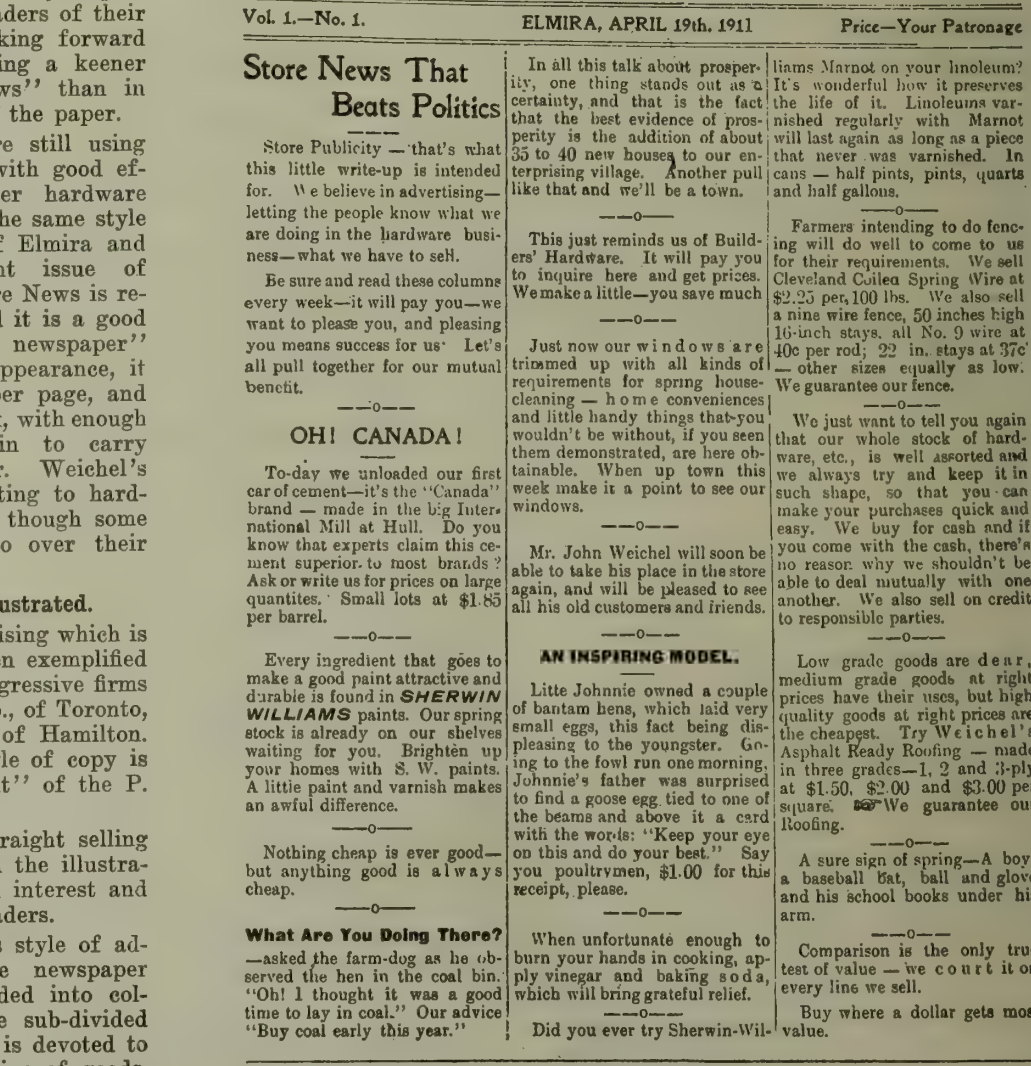
The Geo. Taylor Co. are still using this form of advertising with good effect, and among the other hardware dealers who have adopted the same style are M. Weichel & Son, of Elmira and Waterloo, Ont. A recent issue of Weichel's Weekly Hardware News is reproduced on this page, and it is a good sample of the "miniature newspaper" idea of advertising. In appearance, it closely imitates a newspaper page, and the copy is good selling talk, with enough wit and gossip thrown in to carry through the idea. Mr. Weichel's "Weekly" will be interesting to hardwaremen everywhere, even though some of the local hits may go over their heads.

Serious Copy Well Illustrated.

The other style of advertising which is coming to the fore has been exemplified for some years by such progressive firms as the Russill Hardware Co., of Toronto, and Stanley Mills & Co., of Hamilton. A good sample of this style of copy is the "Spring Announcement" of the P. Hymmen Co., Berlin, Ont.

This advertisement is straight selling talk from first to last, and the illustrations are calculated to add interest and attract the attention of readers.

To a certain extent, this style of advertising also follows the newspaper idea. That is, it is divided into columns, which, in turn, are sub-divided into panels, each of which is devoted to one particular article or line of goods. This makes a very readable advertisement, and, assisted by suitable cuts, it almost compels the attention of everyone who glances over the paper.



An Example From the East.

In the Paint Department of this issue mention is made of a first-class paint advertisement which had been used by T. McAvity & Sons, St. John, N.B., and afterwards reprinted in the form of a circular. This advertisement partakes partly the nature of the "miniature newspaper" advertisement, inasmuch as it is headed like all the advertisements of this firm, "McAvity's Messenger." The balance of the advertisement, however, is simply selling copy, and good copy, too.

Effectiveness of Styles Compared.

The "miniature newspaper" idea depends largely upon its novelty for results. The notion of a paper within a paper will be so unusual to the readers of most weeklies or small dailies that the "store news" will be greedily read, especially if it is cleverly written.

There are two outstanding difficulties in this style of advertising. One is that the appeal for business must be so disguised as to be in keeping with the general make-up of the ad. There is a danger that this will decrease the business-getting efficiency of the ad. The other difficulty is that the public may grow tired of the "miniature newspaper" as its novelty wears off. Both these points mean that the utmost ingenuity and cleverness is required, to keep this style of advertising in the resultful class. The effect of the ad. should be closely watched, and, as soon as it shows signs of falling flat, switch back to the more serious style of advertising.

Weichel's Weekly Store News

Vol. 1.—No. 1. ELMIRA, APRIL 19th. 1911 Price—Your Patronage

Store News That Beats Politics

Store Publicity — that's what this little write-up is intended for. We believe in advertising—letting the people know what we are doing in the hardware business—what we have to sell.

Be sure and read these columns every week—it will pay you—we want to please you, and pleasing you means success for us. Let's all pull together for our mutual benefit.

—o—

OH! CANADA!

To-day we unloaded our first car of cement—it's the "Canada" brand — made in the big International Mill at Hull. Do you know that experts claim this cement superior to most brands? Ask or write us for prices on large quantites. Small lots at $1.85 per barrel.

—o—

Every ingredient that goes to make a good paint attractive and durable is found in ***SHERWIN WILLIAMS*** paints. Our spring stock is already on our shelves waiting for you. Brighten up your homes with S. W. paints. A little paint and varnish makes an awful difference.

—o—

Nothing cheap is ever good—but anything good is always cheap.

—o—

What Are You Doing There?

—asked the farm-dog as he observed the hen in the coal bin. "Oh! I thought it was a good time to lay in coal." Our advice "Buy coal early this year."

In all this talk about prosperity, one thing stands out as a certainty, and that is the fact that the best evidence of prosperity is the addition of about 35 to 40 new houses to our enterprising village. Another pull like that and we'll be a town.

—o—

This just reminds us of Builders' Hardware. It will pay you to inquire here and get prices. We make a little—you save much

—o—

Just now our windows are trimmed up with all kinds of requirements for spring housecleaning — home conveniences and little handy things that you wouldn't be without, if you seen them demonstrated, are here obtainable. When up town this week make it a point to see our windows.

—o—

Mr. John Weichel will soon be able to take his place in the store again, and will be pleased to see all his old customers and friends.

—o—

AN INSPIRING MODEL.

Litte Johnnie owned a couple of bantam hens, which laid very small eggs, this fact being displeasing to the youngster. Going to the fowl run one morning, Johnnie's father was surprised to find a goose egg tied to one of the beams and above it a card with the words: "Keep your eye on this and do your best." Say you poultrymen, $1.00 for this receipt, please.

—o—

When unfortunate enough to burn your hands in cooking, apply vinegar and baking soda, which will bring grateful relief.

—o—

Did you ever try Sherwin-Williams Marnot on your linoleum? It's wonderful how it preserves the life of it. Linoleums varnished regularly with Marnot will last again as long as a piece that never was varnished. In cans — half pints, pints, quarts and half gallons.

—o—

Farmers intending to do fencing will do well to come to us for their requirements. We sell Cleveland Coiled Spring Wire at $2.25 per 100 lbs. We also sell a nine wire fence, 50 inches high 16-inch stays, all No. 9 wire at 40c per rod; 22 in. stays at 37c — other sizes equally as low. We guarantee our fence.

—o—

We just want to tell you again that our whole stock of hardware, etc., is well assorted and we always try and keep it in such shape, so that you can make your purchases quick and easy. We buy for cash and if you come with the cash, there's no reason why we shouldn't be able to deal mutually with one another. We also sell on credit to responsible parties.

—o—

Low grade goods are dear, medium grade goods at right prices have their uses, but high quality goods at right prices are the cheapest. Try Weichel's Asphalt Ready Roofing — made in three grades—1, 2 and 3-ply at $1.50, $2.00 and $3.00 per square. ☞We guarantee our Roofing.

—o—

A sure sign of spring—A boy, a baseball bat, ball and glove and his school books under his arm.

—o—

Comparison is the only true test of value — we court it on every line we sell.

Buy where a dollar gets most value.

M. WEICHEL & SON, Hardware Merchants. ELMIRA

The "Miniature Newspaper" Idea, as Exemplified by M. Weichel & Son, Elmira and Waterloo, Ont.

The latter form will always be effective, if the copy is changed regularly and confined to seasonable or staple goods. It is necessary to remember that an ad. of this kind, as shown in Hymmen's announcement below on this page, while practically composed of a collection of smaller advertisement, must be welded together in such a way as to form an harmonious whole, in which the advertiser's name is unseparably connected with every article advertised.

HYMMEN'S—

SPRING ANNOUNCEMENT

Everywhere is the call for the Annual Spring Cleaning and Planting. We wish to draw your attention to the numerous articles the Big Hardware Store offers, to help you do the work properly and with ease also to the many other seasonable goods. Look carefully over this page, as it will amply repay you.

Robertson's Ready Mixed Paint

Good Paint is a good investment. It protects buildings from the destroying elements—Sun Rain and Frost. Good paint also improves values by beautifying the appearance. Robertson's paint is the most dependable most durable paint you could use. It wears so much longer that you will not need to paint so often. We offer you this reliable paint at a lower price than any other good paint on the market.

½ Pints 20c Quarts 35c
Pints 35c ½ Gals $1.00

LIQUID VENEER

MAKES OLD THINGS NEW

IT BRIGHTENS the home as nothing else will do, by renewing the finish of furniture and woodwork. It is highly beneficial to the finest finish, even that of a $1,000 Piano, and its price is low enough to admit of its use on the cheapest, down to a 50c kitchen chair. It will improve the most beautiful furniture, including Mahogany, Rosewood, Golden Oak, White Enamel, Gilt, Silver Equally well adopted to any color paint.

Liquid Veneer is not a varnish but a surface feed and cleaner. It removes scratches, stains, dirt and blemishes. Applied with cheese cloth. Leaves no coating or streaks and is not inflammable.

It enriches and builds up the finish instead of ultimately destroying it as do all preparations containing benzine or similar ingredients. Test Liquid Veneer for yourself, it will not ignore. It is wonderful for dusting. Try it and you will always buy it.

NEW SIZE PACKAGES
4-ounce bottle, 25c. 12-ounce bottle, 50c.

YOU CAN'T KEEP HOUSE WITHOUT JAPALAC

If you have a few cans of Japalac in the home you can put your white bed steads into condition—refinish your floors, touch up your furniture, enamel the whole bathroom, varnish your pantry and regild and silver your frames, radiators and plumbing. There is a different

JAP-A-LAC

Made in 12 colors and natural (clear)—renews everything from cellar to garret

for every possible use you can think of. Always satisfactory, always best, the least quantity goes the farthest.

A Pail, With Water—a Brush—and a Pkg. of Alabastine

WILL transform the ugliest walls into walls of rarity—of artful refinement. Alabastine was to are pleasing to the most cultivated tastes. Anyone can apply Alabastine by following the directions. All you need is a pail with water, and a flat brush. The rest is easy. Alabastine, unlike wall paper and kalsomine, hardens and becomes part of the wall itself. Alabastine sticks to the wall permanently. It is the only absolutely sanitary wall covering.

THE CANADIAN METAL SITUATION.

The positive stagnation which characterizes the metal market in the United States, just now, is to a certain extent reflected in this country and there is no disguising the fact that the consumption of metal generally is below the level reached a year ago. Building operations are unprecedentedly heavy, and all the principal Canadian railways are spending large sums both in construction and equipment. In the face of these outward evidences of prosperity, it is somewhat of a puzzle why buying of metals should be on such a cautious scale.

The uncertainty existing in the United States is also felt here, regardless of tariff walls and separate nationalities. Buyers in the former country are afraid to purchase for future requirements, in view of the possibility of tariff changes and judicial decisions affecting the earning powers of important interests. On this side of the line, caution is also being exercised, due either to the influence of the United States, or to the expectation of lower prices, or both.

A disquieting fact is that, although most manufacturers of metal products are very busy, trade in general is being conducted upon a very close margin of profit, which gives rise to uneasiness and consequent fear of buying too largely for the future.

In comparing the situation with the record of a year ago, it is well to remember that the first half of last year produced very heavy business in the metal trade, while the second half fell off badly. This year, the first few months have been fairly active, but certainly below the same period last year. It now remains to be seen what the second half of the year will bring forth. If the weather becomes more favorable and good crops result throughout the country, the second half of the year should show considerable improvement.

OFFSETTING CATALOGUES BY PERSONALITY.

A close study of the advertising put out by mail order houses during the past few months reveals the fact that, almost without exception, they are endeavoring to place before their prospects some element to take the place of the personal contact which is characteristic of selling over the counter.

Some firms strive to accomplish this result by reproducing, in the advertisement, a photograph of their founder, president or manager, the idea being carried still further by a facsimile signature. In many cases the advertisement is written in the first person, expressing a burning desire on the part of the head of the firm to show the readers how honest he is and how profitable it would be to deal with him.

This fact brings to mind the tremendous advantage which the retailer has over the mail order houses in the matter of personal contact with his customers. It is an advantage which he should push for all it is worth, and it is worth a great deal.

The merchant who is acquainted with all his customers, and is able to call each one by name, has a strong hold on his trade, but this is obviously impossible, except in the smaller places. At the same time, even in the larger towns and cities, it should be the aim of the dealer to extend his acquaintance as widely as possible, and take every opportunity of personally greeting the customers who come into his store.

The hardwareman is a living personality, approachable by every one in his community. He does not require to publish his photograph in his advertisements, for he can make himself known in a more pleasing and direct way. As a matter of fact, the local merchant cannot get away from his personality. It permeates every department of his business, and, if it be a winning personality, backed with energy and business ability, there will be little difficulty in offsetting the catalogues of the far distant mail order houses.

CO-OPERATION BETWEEN CREDIT MEN AND RETAILERS.

The Canadian Credit Men's Association with head offices in Winnipeg, has secured the services of J. A. Reed, formerly associated with Messrs. Foley Bros. & Larson, Winnipeg, as fire adjustor to represent the assured. It has been felt for many years that a fire adjustor was necessary to protect the interests of the retailer and the wholesaler, as in the majority of the fires which have occurred throughout the West in retail merchants' stores, the insurance companies have succeeded in cutting down the payments, on the strength of some technicalities which the merchant was not able to overrule. Mr. Reed will devote all his time to the adjustment of fire insurance, and will establish his office at 401 Ashdown Bldg., adjoining the offices of the Credit Men's Association.

The appointment of Mr. Reed is a further instance of the policy of the above mentioned association in an endeavor to be of assistance to the retail merchants. At the meeting held last week, it was decided by a vote to continue the policy of using pamphlets, having for their object the education of the retailer to keep proper books and accounts, to keep his stock well assorted, to look well after his outstanding accounts, the taking advantage of discounts by cash payments wherever possible, the taking of stock at least once a year, and the preparation of a financial statement and the submission of the same to the mercantile agencies. All these important features are being enlarged upon for the benefit of the retailer, and already hearty co-operation exists among wholesalers and retailers. The matter of insurance will be dealt with thoroughly, from now on, and merchants are being influenced by the association to carry adequate insurance, having confidence in satisfactory adjustment in case of fire.

PROSPERITY REIGNS SUPREME.

Go out through any part of the country and talk to the hardwaremen in that section and you will return pretty well convinced that there is nothing wrong with trade conditions in this country. Nothing but complete satisfaction with present business and optimism for the future are expressed. Hardware dealers are doing well and are expecting to do better. They report big advances over last year's trade and are not afraid to predict that conditions will show still further improvement as the year advances.

One young hardwareman stated to a representative of Hardware and Metal last week that his business during January and February this year showed an advance of between $600 and $700 over the same two months in 1910. January and February are the two dullest months of the year and the only conclusion to be drawn from this very decided advance is that trade conditions have "picked up" considerably. As still more conclusive evidence, a certain firm in Western Ontario report that during March their business actually increased from $1,700 to $2,700. New methods have been adopted but full credit for the remarkable advance in business could not be charged to that cause. A brisker tone to the business outlook was undoubtedly the main contributing factor.

Not a single dissentient note was voiced. Opinions on business conditions differed only in the degree of their enthusiasm. All agreed that they had no cause for complaint and were counting on breaking a few records before the year nineteen hundred and eleven had run its course. Under the circumstances, the conclusion to be drawn is that the retail trade at the present time is blessed with an unusual degree of prosperity, incidental to the expansion of the country. The dealer who finds things not to his liking must look to himself and his methods of doing business for the cause.

BACK TO THE HARDWARE TRADE.

During the past few years, a tendency has been noticed among manufacturers of certain specialties to go direct to the consumer for business, or to appoint special representatives or agents to cover definite territories. Traveling salesmen have been sent out to call upon farmers, and catalogues and price lists have been mailed to consumers without consulting the trade, who had, in the past, controlled the bulk of such business.

The only reason for going over the heads of hardware dealers and depending upon local agents, was the fact that hardwaremen did not appear to be wide awake to the possibilities of doing business. They were content to stand behind their counters, or sit in their offices, and take the business that came to them. In other words, to use a well-worn phrase, they were order-takers instead of salesmen.

Only recently, however, the opposite tendency has begun to manifest itself, and the cry among many of the manufacturers who have tried to be their own distributors is now "Back to the Hardware Trade."

A prominent firm, manufacturing gasoline engines, have come out with a declaration that they intend to sell their product through the hardware trade, exclusively. A firm in the United States making a high-grade lamp for burning kerosene, formerly endeavored to dispose of their goods entirely by mail, but they found that the selling expense was so high as to jeopardize their existence, and the mainstay of their sales organization now is the hardware dealer who is their "protected distributor."

Moreover, signs are not wanting that the metal roofing trade, much of which has, in recent years, been done through the medium of country carpenters, will, in future, go more and more through its natural, legitimate channel—the hardware trade.

These are all evidences that hardwaremen, as a class, are displaying better salesmanship than formerly characterized them. They are going after business, and are not only mere distributors, but agents who are doing things. Hardwaremen are, as a rule, the most substantial class in any community, and manufacturers, recognizing that they are thoroughly responsible, would much prefer dealing through them, to any other selling plan, provided, only, that the dealers are prepared to do their share in pushing sales.

GROWTH OF CANADIAN STEEL TRADE.

Some idea of the rapidity with which the domestic steel business is growing, may be had from the very large operations which have been completed, or are still under way, at the plant of the Dominion Iron and Steel Company.

During the past year, this interest has completed one hundred and twenty by-product coke ovens of the latest type, at a cost of a million and a third dollars. These, together with the old coke ovens, will give a daily capacity of nearly two thousand tons.

In addition there are now under construction two open-hearth furnaces, among the largest in the world, with a capacity of 500 tons each; one Bessemer converter, two blast furnaces, a merchant mill for bars and rods, as well as a new power house and new pumping machinery. With a new repair shop and office building, the total expenditures will reach $4,000,000.

The Dominion Co. began the manufacture of steel in 1902, with a production for the year of 99,400 tons, against 302,118 in 1910. Pig iron to the amount of 111,000 tons was turned out in 1901 and 255,161 last year. March figures were 20,450 tons of pig iron and 24,700 tons of steel.

POINTED EDITORIALS.

There has been a good demand for paint removers in the Hardware and Metal sanctum this week. Painters have been decorating the office partitions, and members of the staff just naturally couldn't keep away from the wet paint.

"Licensed to carry a revolver" may be a proud distinction in the near future, if recent legislation is rigidly enforced. It will, at least, imply the possession of considerable energy on the part of the man who has fulfilled all the requirements of the Act.

In the face of unsteady trade conditions in other parts of the globe, Canada continues to make rapid progress, and has earned the reputation of being the most prosperous country in the world. Canadian hardwaremen have no need to feel envious of their brethren in any other country.

Rigid legislation against mail order houses is pending in Missouri. In the state where occular demonstration is deemed necessary, the legislature is considering a measure to impose a state tax on these concerns. The tax would be placed on the amount of business done and would work on a sliding scale. It is quite frankly admitted that the idea is to assist the home trader.

How Large Tinshop Department is Handled

Howie & Feely, Brantford, Employ Twenty-five Men all the Year Round—Stock is Kept Under Lock and Key—Each Man Fills Out a Daily Time Card—A "Call" Book Used.

The management of the tinshop is a problem which worries many hardwaremen. They find it difficult to keep accurate account of material and time. During slack seasons, the department becomes a serious drag on the business. Tools, ladders, etc., are left around and speedily disappear. Other causes contribute to the worries which are met with in the conduct of a tinshop and help to create the losses so often experienced.

The remedy lies in the adoption of a rigid system of checking up time and material and in canvassing for business to keep the department going through the seasons of the year, which are bound otherwise to be slack. If no effort is made to stimulate business during the winter months the proprietor will soon find that he is getting little in the way of returns for the salaries that he must continue to pay. It becomes a case of "all going out and nothing coming in."

Few tinshops can boast of as complete and satisfactory system of management as that adopted by Howie & Feely, of Brantford. This firm have an extensive business and employ about twenty-five men in the tinshop all the year round. They are fortunately situated to do tinning work, as Brantford is a big industrial centre. A large share of the factory work goes to Howie & Feely, and, as this is not confined to any season, they run full-handed right along. In fact, during the past winter they increased their staff.

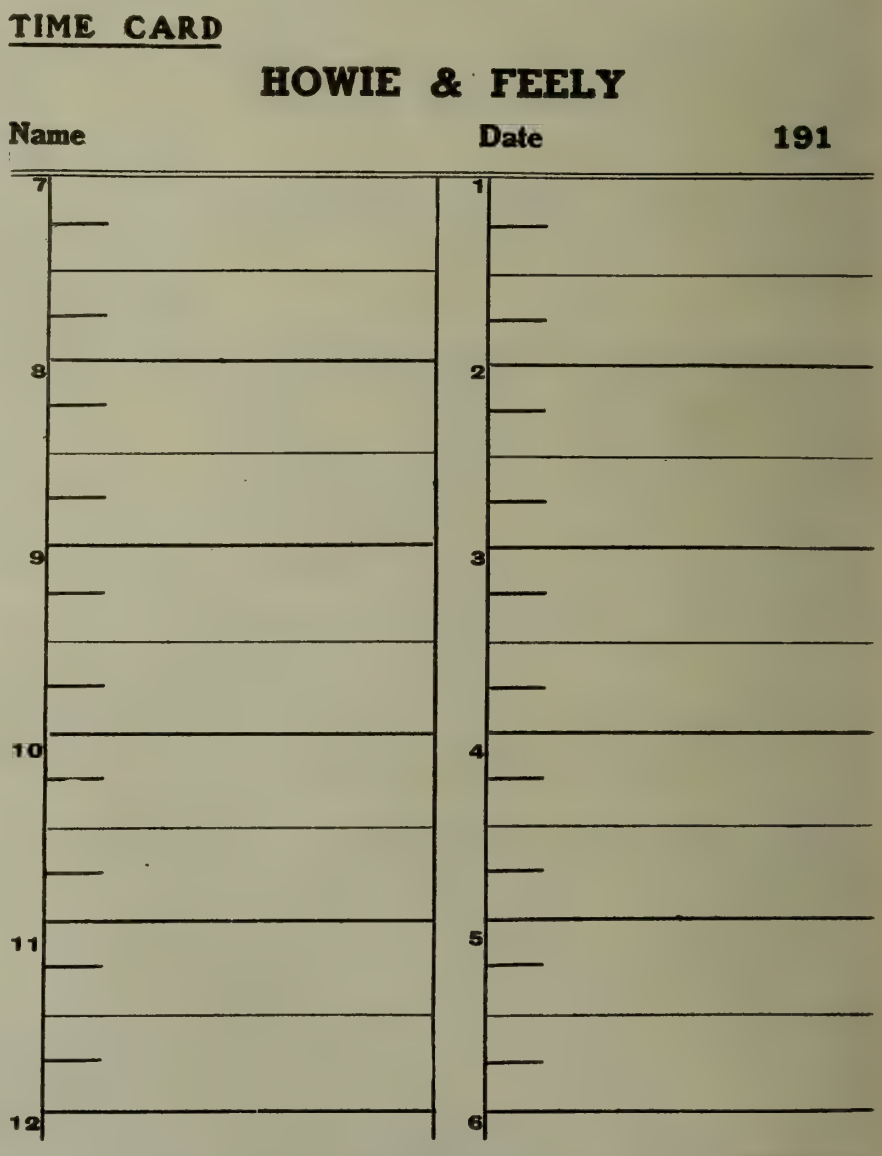
This business was worked up by paying attention to factory needs and keeping closely in touch with the manufacturers. The firm are now in a position to carry out thoroughly and expeditiously any variety of tin work required in an industrial plant.

Checking of Material.

It is quite apparent that, with such a large connection, the necessity has been felt for some system to keep track of the stock. The plan followed is to have everything kept in charge by a stockkeeper. Access to the supplies can be had only through application to him. He keeps it under lock and key. On starting out in the morning, each employee goes to the stockkeeper and gives a list of what he will require. He has to sign for this. If he brings anything back to the shop, he hands it over to the stockkeeper and receives credit for same. The stock used is then made up and charged to the job on which the man was engaged. If fresh supplies are needed, the men on the job cannot go back to the shop and take what they need. They have to secure the material in the same way.

All the supplies used on any contract are then entered up and charged.

The stockkeeper looks after tools and ladders in pretty much the same way. When a ladder is taken out for use at a certain house, the fact is entered in a "call" book When the men report that they have finished the work, the rig is sent to get the ladder, tools and whatever material is left over. By consulting this book, it is possible to find where all tools and ladders are and it is practically impossible to lose track of anything of that description.



Time Cards Used.

With such a large staff, a thorough time-checking system is necessary. Each man on starting out in the morning is supplied with a card, which he is required to fill out. As each hour is divided into quarters, it is possible to tell almost to a minute how much time was spent on each job done during the day. The men sign their cards at night and turn them in to Mr. Feely, who is in charge of the department. The time and the material are taken from these records and charged against each job.

Stay at Factory.

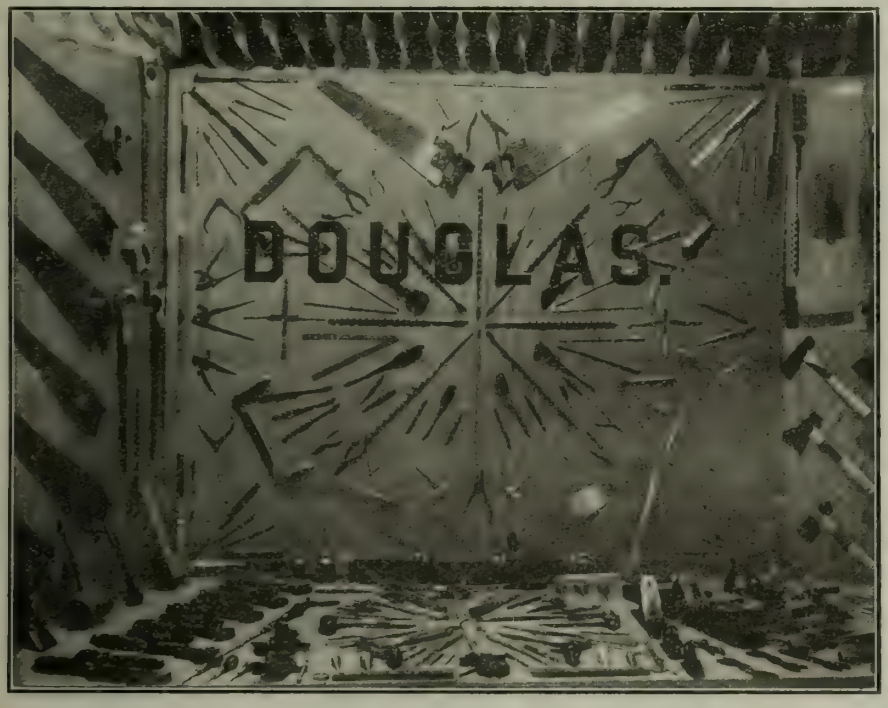
So much work is done at one Brantford factory that the firm keep two of their men there practically all the time. These men report at the shop first thing in the morning, secure the material they will require during the day, sign for it, get time cards and then repair to the factory. At night they call back, hand in their cards and report progress to the head of the department. Generally, also, they indicate about what they will need to have the next day. The bulk of the work done in the factories is in putting up "blowers," guards, etc.

Howie & Feely have found the system outlined above very satisfactory in every way. They are able to keep track of every foot of pipe and to account for each minute of the day of each employee. They experience no losses in either respect.

Time Card Divided Into Quarter Hours Which Each Employee Must Fill in Every Day.

Some Seasonable and Educative Window Displays

Points to be Remembered in Arranging Goods in the Store Window — How West Toronto Firm Gave Seasonable Color to a Display of Garden Tools—Tillsonburg Dealer Proves the Reliability of Gas Stoves—Effective Device in Paint Window.



One of the first objects to be aimed at in arranging a window display, is to make it seasonable. Not only should the goods shown be among the "best sellers" for that time of year, but the arrangement and the decorations should have something in keeping with the season and the goods shown. For instance, during Christmas time, evergreen, holly, mistletoe, imitations of snow and ice are much affected. Undoubtedly, all such devices are found effective. They attract and draw trade, while their absence repels customers. How many people care to do Christmas shopping in a store where the windows are dull and utterly devoid of all recognized Yuletide trappings?

An original attempt to give seasonable color to a window was made by Christie Bros., West Toronto. Last week they put in a display of garden tools and supplies. A good selection of hose, rakes, lawn mowers, shears, etc., were shown, and, to give a touch of reality, the bottom of the window was covered with what appeared to be a healthy growth of green grass. The length and fresh color of the verdure were too marked for the real article at this early season, and the suspicion of artificiality was confirmed on closer inspection. What had been done was to take excelsior and dip it in green paint. When placed in the window, this gave a splendid representation of real grass, and added very largely to the good effect of the display.

A Good Tool Display.

Nothing could be more seasonable at the present time than a tool window. With the advent of warm weather, outside work generally is being started. Tools, are, therefore, in greater demand than at other times of the year. Every mechanic will be needing some tool to replace one of his own, which has become worn out or which lacks the latest improvements. A store window, filled with the best things going in the tool line, will have a great attraction for men engaged in any mechanical line.

The accompanying illustration shows a window display in the store of D. W. Douglas, Campbellford, Ont. It was designed by C. H. Smith, and attracted much favorable comment. The variety of articles shown was very large, ranging from a carpenter's rule to an axe. The tools were neatly arranged on a base and background of yellow sateen, while twisted streamers of tissue paper of the same color were drown across the top.

A Seasonable Window Display of Tools in the Store of D. W. Douglas, Campbellford.

This display helped to increase sales in tools, but it might have proven still more effective if the price of each article had been marked on cards.

Window displays should also have an educative value. Last week three gas stoves were shown in a window of the Torrens hardware store, Tillsonburg, together with a number of smaller goods, such as electric toasters and electric sad irons. In the evenings, when the store was closed up, a kettle full of water would be found over a lighted jet on one of the gas stoves. The kettle would soon start to boil quite briskly and the steam thrown off would partially fill the window. Large numbers were attracted to the spot each evening. A friend of the proprietor met him on the street the first night and warned him that something was going to happen.

"You'll have a fire or something," he declared, "leaving a jet burning in your window that way after locking up the store."

"Not a bit of it," declared Mr. Torrens. "You see, I can regulate those stoves perfectly, and I have full confidence in them."

"You must have," rejoined the friend.

That was exactly the idea that Mr. Torrens desired to impress on all who noticed the display. The fire would not be turned off until about 11 o'clock, when one of the clerks would slip back for that purpose. In the meantime many people would see the stove in action and doubtless be struck with the confidence shown. Quite a number of sales were made during the week, not only of gas stoves, but of electric toasters and other small electrical articles.

An advocate of the educative window is R. P. Bell, who has charge of the retail store of R. M. Bell & Co., Halifax. Mr. Bell believes it is a mistake if, having gained the attention of the passer-by, you let the opportunity to convey a definite suggestion pass. He believes in making a window forceful, as well as attractive.

One of the most recent displays arranged by Mr. Bell was a paint window, described by the Maritime Merchant, as follows:

"The central figure in the exhibit was a large, white card enclosed in a frame 26x30 inches and mounted on a small pyramid of half-gallon tins of paint. In the left-hand corner, about 6 inches from the top, was pasted on very carefully a copy of a letter which had been received from the manufacturers, telling about the quality of the paint they are producing at the present time. We read the letter as we stood there and we thought it exceedingly good argument for the man who wants to know the why and the wherefore of things in advance of making a purchase. And in order that no one who stopped might escape reading this important communication the following sentence printed in large one-inch lower-case black letters appeared immediately to the right of the letter and below:

> " 'Replying to your question,
> the letter to the left speaks for
> itself.'

"In the back of the window there were cases of paints. The strength of the advertisement, at least so it appeared to us, lay in the story told by the letter."

The window dresser who directs his efforts from the standpoint of both attractiveness and educative force, will find that the results amply repay him.

Practical Demonstrations of Gas Stoves Advisable

Customers Should be Thoroughly Initiated Into the Methods of Handling Ranges—Advertising Help Along Sales Appreciably—An Educative Window Display.

In selling a gas stove, it is well for the salesman to have a thorough knowledge of the subject. It is more necessary, in fact, to understand all about gas stoves than it is about any other kind. Most people know pretty well how to handle a coal range, and if a salesman can demonstrate how to check the fire and manipulate the dampers, his stock of information may not be called upon any further. But with a gas stove it is different. To many people it is an absolutely new thing. They know nothing about handling it, and with their ignorance is combined a certain degree of fear. They have, perhaps, read of explosions and are, therefore, anxious to know everything there is to know about the stove before they will undertake to manipulate it.

The salesman will more than double his chance of making the sale and will, at the same time, save much future trouble if he demonstrates the working of the stove most fully. When the customer has decided to make the purchase a further lesson should be given, and under no circumstances should the customer be allowed to depart until the salesman is quite convinced that he or she is thoroughly informed. Many people will follow a demonstration with every evidence of concentrated interest and will bob their heads knowingly at each step as though they were absorbing everything; and when they get home they discover that they have forgotten some very important detail or that only a hazy recollection of the whole thing remains. To escape future trouble with cocksure customers of this sort, it is well to have them operate the stove themselves in accordance with instructions given.

Have Stove Connected.

In order to do this, it is necessary to have one connected up. It is then possible to light up each jet in turn, and, after giving full instructions, have the customer do the same. A practical demonstration of this sort is worth any amount of verbal instruction, and the chances are that the customer will be able to handle the stove thereafter without any difficulty.

"I have been bothered a great deal recently," declared a stove dealer, "by owners of gas stoves calling up and asking me to send someone up to see what is wrong. The most trivial thing will cause them to send in a demand for a man to fix the stove. They do not seem to know the first thing about it. It costs me quite a pile in wages to help customers in this way."

It is highly probable that trouble of that kind would be avoided in practically all cases if sufficient care were taken in the first place to thoroughly explain the working of the stove.

Advertise Your Stock.

It is advisable at this season of the year to advertise your stock of gas stoves. While most people realize now the usefulness of the gas stove, there are still many who regard it with the indifference or suspicion which so often attaches to an article which is comparatively new. Large numbers are still going along in the old way, cooking right through the summer months with a coal or wood range. Effective advertising will do much to bring to these people a sense of what they are missing.

In favor of the gas stove, there is a wealth of argument which can be adduced. From the economical standpoint it is a paying investment and on top of that is the saving in time and labor, the added comfort and the improved facilities provided for getting up a quick meal. If the true value of the gas range for use in summertime were realized by every housewife, not a home would be found lacking one. It is, therefore, the duty of the retail dealer to spread abroad the story, to impress on the minds of everyone in his district the manifold advantages of the gas stove. He should strive to place one in every home which lacks it now. And this can be done only by advertising.

A good educative display was shown in a window of the store of Westwood Bros., Queen Street West, Toronto, this week. The window was bordered with a series of placards stuck to the inside of the plate glass, each one of which contained a reason why gas ranges were necessary and why the particular range handled by the firm was the very best on the market. Taken altogether, these placards presented a very complete case in favor of the range. A high-grade gas stove was shown in the window and bands of tissue paper were attached to each placard and drawn back to the stove.

It was an argumentative window, if such a term be permissable, and undoubtedly attracted more attention than the usual hackneyed style of stove display could ever do.

GO AFTER FURNACE JOBS EARLY.

There are a good many reasons why dealers should clinch their furnace jobs as early as possible. The most obvious one, of course, is to get the business in shape as soon as is convenient so that the contracts may be executed in due course, without the uncertainty and disappointment which usually accompany the rush season.

Other reasons, however, are of even more pressing importance, and they will readily be understood by anyone who has ever installed a warm air furnace in a house which was not carefully planned to receive it.

Making the Installation Easier.

Almost every furnace man in Canada, will agree that the architects with whom he has had experience, have been very remiss in providing for furnace installations in residences or public buildings which they have planned. They may be very careful in arranging for the requirements of every other trade, but, when it comes to the heating, the poor furnace man need expect little or no help.

On nearly every job, it takes a great deal of thought, to decide how and where pipes should be run, in order to heat a building properly. Even so simple a matter as the location of the furnace, itself, will reward any attention which may be paid it, for this is a problem, the solution of which may mean considerable economy of fuel, and better results in heating.

Commence With the Architect.

It therefore looks as if a good time to land a furnace job is before the architect has drawn the final plans. This will enable the furnace man to give the architect the benefit of his advice, so that, when the job is being done, everything will work smoothly and the result will be more profit to the furnace man and more satisfaction to the owner. Every jog in the warm air shafts which can be obviated, will contribute to this end.

If impossible to land the order before the plans have been drawn, every effort should be made to close before the carpenters get busy on the building. By laying out the system beforehand, and deciding where the pipes should be installed, a lot of trouble will be saved. How often does it happen that the very place which would furnish an ideal location for a warm air pipe is made impossible by the presence of an upright, or a doorway. This is a case where getting the job early, and advising the carpenter, will save time and trouble, and consequently tend to increase profits.

This is going to be a season of heavy building operations. From one end of Canada to the other, foundations are laid for a record-breaking number of buildings, and there will be lots of furnace business for the dealers who can handle it. Get after it early, so that you will know where you stand, and will be able to co-operate with architect or builder to make better jobs, surer profits, and good reputations.

TO BUILD NEW FACTORY.

The P. L. Robertson Mfg. Co., Milton, Ontario, manufacturers of the Robertson patent socket head wood screws, are intending to erect a large building this year. The new plant will enable the company to produce 10,000 gross of wood screws per day. It is understood that a wire-drawing plant for drawing screw, rivet and nail wire will be added. A producer gas plant has been installed.

Our Page for Hardware Clerks

POSSIBILITIES IN SMALL ARTICLES.

Salesmen are often so deeply engaged in striving after big orders, that they neglect countless opportunities for making small sales which, in the aggregate, would mean a nice tidy sum in a year.

This statement applies to retail clerks just as much as it does to the traveling salesmen of manufacturers or wholesalers. The hardware clerk who is keen for sales of from five dollars up, may be overlooking a good many selling possibilities in smaller goods which, although entailing but a small amount of money, are correspondingly easy to sell.

Consider the Penknife.

As an instance of this point, just think of some staple article which every man should have. For example take a pen knife. There is hardly a man or boy of your acquaintance who does not require a pen knife several times a day. And yet, if you should stand them all in front of you, and ask them to show their pen knives, how many of them would there be who could produce an article for which they would not feel obliged to make excuses?

The writer of this article has a pen knife which he uses very often, to sharpen pencils. It has two blades, and was a good knife at an earlier date in its history, but time has not dealt kindly with it. The large blade is now so hacked as to be useless, and beyond hope of any further service, while the small one is dull as a hoe. Sometimes a friend with a broken lead pencil will ask: "Have you such a thing as a knife?" Then the writer turns red in the face, fumbles in his pocket, and produces his veteran with the remark: "This is a thing which somewhat resembles a knife, only that it won't cut. Still, if you use the small blade up near the point, you may be able to sharpen that pencil."

Not being a monstrosity, the writer imagines that there are probably a good many others in the same boat. In fact he knows it, because he borrows a knife once in awhile, himself.

If Everyone Would Buy.

Why is it that so many people carry such disreputable pocket knives? Simply because nobody has ever tried to sell them a decent one.

Now, here's the point. If everyone in your town, or even every regular customer of yours, who has a poor knife, could be induced to buy one that he would not be ashamed of, how long would your stock of pen knives last? Why there would be a good cutlery order in the mail before many days had passed, and the goods would be wanted by return express.

The moral of this little article has not been very successfully hidden. It lies plainly on the surface and it is just this: Suppose you try how many pen knives you can sell next week!

WINNING PROMOTION THROUGH STUDY.

A promising young hardwareman who has won his way from junior to head clerk, and finally to manager, is H. Filsinger, of Teeswater, Ont.

Mr. Filsinger was, for several years, a clerk in the hardware department of Mann & Ewing, Teeswater, and showed such marked ability, that he was promoted to be head clerk of that department. A couple of years ago, the hardware end of Mann & Ewing's business was purchased by R. A. Little, who was so well pleased with the success achieved by Mr. Filsinger in his old position, that he promptly offered him the position of manager in his store.

In conversation with a Hardware and Metal representative a few days ago, Mr. Filsinger stated that he ascribed much of his success to a regular and careful study of Hardware and Metal. This, he considers, the only way to keep in touch with up-to-date methods of hardware retailing.

"Anyone in the hardware business who depends on his own resources alone, will soon be a back number," is the way Mr. Filsinger puts it.

There is no doubt that a hardware clerk who is addicted to studying his business, to learning what other hardwaremen are doing to improve their conditions, will imbibe ideas which will send him on toward head clerkships and managerships, and ensure his success when he establishes himself in a business of his own.

HOW CLERK WON PROMOTION.

About a year ago a clerk from a small town hardware store secured a position in the retail department of one of the largest hardware establishments in the country. In his former position he had been the head, and only clerk. Consequently, the task of looking after the stock had developed largely upon him. He had generally made up the order lists and had been responsible for keeping the stock up. During the first two days of his experience in the larger store he noticed that a number of lines were getting low. On the second day, he went to the manager. "I've just sold an electric sad iron," he said, "and I noticed we have only two or three more in stock." The manager thanked him, and promptly put through an order for a fresh supply. The same thing occurred regularly after that. Whenever the new clerk noticed that a certain line of goods was getting low, he reported to the manager at once. The latter found this method of doing things a refreshing change. As a general rule, his clerks had waited until they found some line absolutely exhausted before they reported to headquarters. He knew of numerous instances where clerks had sold the last article in stock and had waited until a customer came in for that very article before notifying him of the shortage. In such cases they appeared indignant at having lost a sale and inclined to blame the office for laxness.

To make a long story short, when the position of retail salesmanager became vacant, the young clerk was given the position in preference to the older and more experienced men on the staff. He has since "made good" in real earnest and has established a deserved reputation for the way in which he keeps the stock sorted up.

How many clerks make it a point to report shortages in stock, without any delay? A great many, we fear, are inclined to let things drift until, perhaps, they lose a sale. When a clerk shows sufficient interest in the welfare of the store to endeavor to keep all lines well stocked up, he is bound to attract the notice of the proprietor, and may fairly be said to be on the high road to promotion. Is it not worth trying?

WHAT HARDWARE CLERKS ARE DOING.

T. Kinley, of Toronto, has joined the office staff of Cochrane Hardware, at Sudbury.

Harris May, of Creemore, Ont., has gone West and taken a position with the Brandon Hardware Co., of Brandon, Man.

Clayton Groff, formerly of the Storey Hardware Co., Indian Head, Alta., but now of Regina, revisited the former town last week, renewing acquaintances.

G. F. Pearson, of the Geo. Taylor Hardware Co., New Liskeard, Ont., was married in Toronto last week, and is receiving many good wishes for his happiness.

Malcolm Hewer, who has been connected with Nixon & Hewer's hardware store at Nanton, Alta., for several months, has now accepted a position at Trochu, Alta.

P. F. McClure, of Virden, Man., who has been with the Manitoba Hardware Furniture and Lumber Co., has been appointed manager of the Company's branch at Hamiota.

A. MacDonald, of Sydney, N.S., has accepted a position in the Glen Ewen, Sask., branch of the Oxbow Mercantile Co. His brother, A. J. MacDonald, is manager of the store.

The Clerks' and Salesmen's Association, Guelph, have organized for the year with the following officers:—Hon. Pres., J. W. McKenzie; president, H. Farrow; vice-pres., E. G. Hicks; Sec.-Treas., Geo. Freeland; executive committee, R. S. Robinson, A. T. Black, L. Taylor, G. H. Howard, W. Doherty, C. S. McQueen, C. Deverel.

HARDWARE TRADE GOSSIP

Ontario.

General regret will be felt at the sad death of Mrs. Fielding, wife of E. Fielding, commission agent, Toronto.

The Aikenhead Cup, with a photo of the Aikenhead team, champions of the Toronto Mercantile Hockey League, is on exhibition in Ryre Bros.' window.

A "nautical" window display is shown this week in the retail store of Rice Lewis & Co. Large coils of rope, life preservers, steering gear, compasses, etc., are shown.

It is stated to be uncertain whether the National Hardware Company will remain in Orillia or remove to Peterboro. They are now running at full capacity, and efforts will be made to keep them in Orillia.

James Kerr has accepted a position with the Cochrane Hardware Co., at Little Current. Fred. Warren, who was formerly in the store of O. N. Fenn, at Parry Sound, but who left some time ago to accept a position with the Cochrane Co., has moved to Port Arthur.

Harold Young, of Young Bros., hardware dealers, Hanover, was filling a gasoline tank in the rear of the store while parties nearby were busy pulling down an old wall. It so happened that the wall fell at the same time that Young pulled the plug out of the can. Thinking that the gasoline had exploded, he experienced quite a scare and incidentally spilled the gasoline.

The hardware store of M. Weichel & Son, Elmira, was recently the scene of a daring attempt at robbery. Entrance was gained through the cellar window, but, while endeavoring to open one of the doors in the cellar, the burglar became alarmed, and fled. He was detected by the night watchman, who gave chase, but without overtaking the fugitive.

Quebec.

Aime Lemieux, Henryville, Que., was calling upon the Montreal wholesale trade recently.

E. Labrosse, of Vankleek Hill, was in Montreal recently in the interests of his business.

James Reid Wilson, of the Thos. Robertson Co., Ltd., returned from a European trip this week.

Mr. C. R. Bloxam, representative of Hobbies, Limited, Dereham, England, is in Canada, on his annual trip. He paid a visit to Hardware and Metal's Montreal Office this week.

A presentation took place on Monday in the office of the Mechanics' Supply Co., Quebec, when an automobile was presented to Guy Simpson on behalf of the company in recognition of his valuable services of over twenty years. Walter Wilkinson, in the name of the company, read a eulogistic address, and W. H. Wiggs also testified. Mr. Simpson made a suitable reply.

Western Provinces.

Wm. Atkins, tinsmith, has started business at Carberry, Man.

A hardware store is to be opened in the Adams Block, North Lethbridge.

Caffery & Chaplin have started in the hardware business at Elstow, Sask.

The Taber Hardware Co., of Taber, Alta., have been incorporated.

E. H. Insull, Craik, Sask., has been succeeded by R. J. McNaughton.

Benwell Bros. have opened a hardware store at North Vancouver.

The Western Hardware Co., have opened a retail business at Edmonton.

The Pratt Hardware Co., have commenced business at Indian Head, Sask.

McDonald & Fleming are discontinuing their hardware store at Winnipeg.

S. Mitchell, hardware dealer, Grand View, Man., has sold to G. L. Challoner.

R. B. Sharpe, hardware dealer, Viking, Alta., is opening a branch at Kinsella.

S. B. Mitchell, Grand View, Man., hardware dealer and grocer, has sold out.

A. F. Johnson has taken over the hardware business of S. M. McKinley, Ninga, Man.

SUBSCRIPTION FRAUD BEING PRACTISED.

A man who signs himself as W. Keppel White is taking collections, renewal and new subscriptions for the MacLean publications in the Maritime Provinces, without authority.

The assistance of any subscriber in locating this man will be appreciated.

We would ask our readers never to pay their subscriptions to any person not showing the regular MacLean's receipt form. The ordinary general receipt form is never used by any of MacLean's authorized representatives.

The Innisfail Hardware and Saddlery Co., have commenced business at Innisfail, Alta.

J. H. Ashdown, Winnipeg, has returned from a trip to California. Harry Ashdown is back from Europe.

The Warnken Hardware Co., of Winnipeg, are changing the name of the firm to Quinn, Cobban Hardware Co.

David Whiting has opened a new hardware store at Lang, Sask., where he will keep a full line of shelf and heavy hardware.

Rodgers Bros. have taken possession of the hardware business at Strassburg, Sask., which they recently purchased from Geo. H. McDonald.

S. Schwanz, Rocanville, Sask., now has three first-class tinsmiths engaged in his tinshop, having just added to his staff, Fred. Wright, of Boissevain, Man.

A permit has been taken out at Saskatoon by the Ashdown Hardware Co., for a six-storey warehouse to cost $150,000. It will be used for the distribution of goods throughout that district.

F. H. Tallman has sold his hardware business at Red Deer, Alta., to Victor Day, who was lately in the cartage business. Mr. Tallman, who has not been enjoying good health for some time past, will continue with the new proprietor for a year at least.

Neil McDonald, of the Carman Hardware Co., Carman, Man., is enjoying a trip to Ontario points. Before he returns to the West, he will take part in a very interesting event at Glencoe, and his bride will accompany him on the homeward journey.

Maritime Provinces.

Wm. Dunsmore & Son, Oxford, N.S., have moved into their fine new store on Water St.

Robert Creighton, of St. John, N.B., has been transferred to Winnipeg as manager of the Canadian Oil Co.

A. J. Grant, of A. J. Grant & Co., wholesale hardware merchants, Halifax, who has for the past thirty-nine years covered as far as Cape Breton, has decided to retire from the road and devote his time to the business at Halifax. His son, J. R. Grant, will take up the traveling.

INSURANCE WAS PAID.

Toronto.—A judgment of considerable interest was reversed in the Court of Appeal on Tuesday, in the case of Wade vs. the Rochester German Fire Insurance Co.

The facts of the case were as follows: The firm of Brooks-Sanford Hardware, Limited, was insured against fire in the Rochester German Company. It made an assignment to Osler Wade in favor of its creditors. Shortly after the assignment the property was destroyed by fire. The insurance company declined to pay the loss, on the ground that by the assignment and transfer of the hardware company's property to Mr. Wade, they had been relieved from liability. Mr. Wade took the matter to the courts and was awarded judgment amounting to $2,402.09.

The insurance company appealed the judgment, but the appeal was dismissed with costs.

DEALER MANUFACTURES TINWARE AND HARNESS.

Zurich, Ont.—This village, situate in Huron County several miles from a railway station, possesses some retail stores which are a surprise to a stranger.

C. Hartlieb, hardware merchant, has a fine two-storey building and occupies 11,880 square feet of floor space. In addition to a complete hardware line, he does a considerable manufacturing business in tinware and harness. He also carries a stock of trunks, valises, furniture, and boots and shoes, and employs about a dozen people.

J. Preeter, general merchant of the same place, also has a fine hardware department, which rivals in size and methods of display, the stores in large trade centres.

News and Methods of Canadian Hardwaremen

Cash System Adopted in Woodstock—Hamilton Firm Hold Record Screen Sale—St. John Hardware Trade Prospering.

DOING CASH BUSINESS.

Woodstock.—Fred W. Karn, West end hardwareman, had a big spring opening advertisement in the newspapers on Saturday, April 29. He used full page space and advertised a wide variety of goods with a large number of illustrations. Mr. Karn does a straight cash business, as he states in his opening remarks in the ad:

"As we come before you for another spring's business, we must thank one and all of our many customers for their generous patronage for the last year. The past year has been a most exceptional one in the history of this store, it being one of the biggest year's business this store has ever experienced, but we do not claim all the credit to ourselves, for without our many friends, our business would be small. Still we claim that prices and fair treatment must count for something—that has been our aim from the start, and this year will be no exception to the rule. Every dollar you spend here you are sure to receive a dollar's worth, which amply accounts for our large trade. We are determined to keep down the price and keep up the quality of everything we handle. It is only by long experience, close attention to business, buying in bold quantities for spot cash and selling for spot cash that enables us to do so."

INCREASE IN BUSINESS.

Brantford.—All hardware dealers in this district report that business has been exceptionally good. Extensive building operations are being carried on in the city and, as a result, the call for builders' hardware. One dealer states that his business during January and February — usually the dullest months of the year—his business improved by $600 or $700 over the record for the same period in 1910.

Geo. Elliott is planning to enlarge his space by taking in more room on the first floor for storing goods.

Watt & Squire are now fairly well settled in their new store in the Temple building, Dalhousie street. The ground floor is now practically completed and the goods in shape but the basement is not yet used as a showroom. A showroom is also to be opened on the first floor.

D. Sinclair, Paris, is using both windows this week for paint displays. Splendid sales have resulted.

ST. JOHN HARDWARE FIRMS PROSPERING.

St. John, N.B.—No better evidence is needed to indicate the prosperity of hardware firms in St. John than the constant enlarging of their premises. W. H. Thorne & Co., and Emerson & Fisher, have both made extensive alterations and improvements in their stores lately and now the firm of T. McAvity & Sons have found it necessary to add another story to their combined buildings in King street in order to keep pace with the demands made upon them. Work was commenced last week putting an additional story on the buildings with the object of providing a large workroom, 60 by 100 feet. The new room will be used for the purpose of assembling parts of various fixtures, tanks, etc., where they will be set up and completed. The contract for the mason work has been awarded to A. R. C. Clark and the carpenter work to Edward Bates. It is not improbable that in the near future Messrs. McAvity will acquire additional property adjoining as even with the addition now under construction, which will give them six stories, they will be cramped for room.

A RECORD SCREEN SALE.

Mention was made in last week's issue of a recent advertisement of Stanley Mills & Co., Hamilton, relating to spring goods with screen doors, as a "head-liner." It has been learned that this ad. brought direct and very liberal results.

The ad. appeared in the Saturday editions of the local newspapers. After the store closed that evening—early closing rule applies to Saturdays as well as other days in the Stanley Mills establishment—the clerks were summoned to the board room, where Mr. Flinteroft gave them a little talk about the ad. He first read the ad. and explained it thoroughly. He then proceeded to give them some ideas as to how they could follow it up during the ensuing week. His explanation covered many of the wiles peculiar to the retail salesman and fairly bristled with good suggestions. Each member of the staff left for home determined to break the record for screen door sales.

They certainly succeeded in doing so. Up to the time that the ad. appeared, the number of screen doors sold had been very small. On Monday alone, no fewer than 200 doors were sold. Succeeding days brought large sales to swell the total. A great many sales were made as the direct result of the ad.; people came in and asked for screen doors. But a great many were made, as well, by the adroit way in which the clerks followed instructions and pushed that particular article to the front.

This incindent is a striking illustration of the direct results which can be obtained from effective advertising. The ad. in question was strikingly written, well timed and aggressively followed up. It brought to people's minds the near approach of summer and the necessity for screens. Readers were shown the good value to be obtained by buying at once. The doubting Thomas, who scoffs at the possibility of securing direct results from advertising, would have been stripped of his skepticism had he seen the people pouring into the store of Stanley Mills & Co. to buy screen doors.

But there is a second moral to be found in this incident. It pays to take the clerk into your confidence and give him the benefit of your experience. Doubtless the ad. in question would have created a demand for screen doors unassisted, but it required the active "follow-up" methods of the staff to bring the sales up to such record-breaking proportions.

GOOD DISPLAY OF BUILDERS' HARDWARE.

St. Catharines.—One of the best hardware window displays in the district, just now, is the exhibit of builders' hardware, in one of A. W. Moore's windows. The goods are tastefully arranged and, although the display includes a very extensive range of builders' hardware of every description, the window does not appear to be at all crowded. It should bring good results.

LIBRARY CONTEST CREATES STIR IN KINGSTON.

Quite a stir has been caused here as a result of the voting contest which has been conducted by some Toronto gentlemen, for a library, it being held that the contest is an illegal one, and members of the Retail Merchants' Association have threatened to take the case to court if it is not stopped.

The contest is operated in this way. For every purchase, amounting to 10 cents, one vote is given, and the highest number of votes secures the prize. At present, the Kingston firemen are on a fair road to win the prize. A number of organizations are in the running.

Only one merchant in each line of business handles the votes, those in charge only making arrangements to have one merchant in each line of business represented. It is claimed that an amendment carried in the House of Commons in 1905 makes it a criminal offence to carry on such a contest. The amendment had reference to trading stamps, and it is claimed that this contest comes under the same heading. The Retail Merchants' Association had an advertisement in the local papers calling attention to the fact that it was against the law to carry on such a contest, but it is still being carried on. Just what the outcome will be, it is diffiult to say.

Kingston has one merchant who gives trading stamps, and it is stated that he has secured a lawyer, and is ready to fight his case, should any action be taken, in an attempt to stop him giving the discount stamps.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 58

Toronto.

Tin.—Now quoted 44 to 45 cents.
Copper.—Declined to 13 cents.

MONTREAL.

Montreal, May 6.—The metal markets have not changed materially since last week. Domestic lead is quoted at a reduction of ten cents, owing to the opening of navigation and the consequent decrease in freight rates where water and rails enter into competition. The opening of navigation has, therefore, already shown its influence, but shipping has not yet begun to reach its usual activity. There is nothing of a special nature to report regarding the other metals. Galvanized iron has been among the shipments recently received from Europe at this port.

Pig Iron—During the past week shipments of iron totaling about 5,000 tons were reported at the local docks or coming up the river. This is practically all for distribution in the Montreal district. Prices in the English and Scottish markets remain unchanged and the markets are reported quiet. The United States markets are weak and it is reported that some of the furnaces, especially in the Buffalo district, have been making price concessions. This competition is, of course, hitting Canadian blast furnaces and is also an obstacle to English and Scottish iron reaching the western markets. The general Canadian demand for steel and iron products is reported highly satisfactory. The construction work of all kinds throughout the country and the fact that manufacturing concerns are generally working to their limit are evident reasons for the demand that is now being felt. The output of iron in the United States during April was heavy, thanks to ideal weather. Now, the blast furnaces are producing at the rate of 65 per cent. of their full capacity. Prices on dock Montreal are: No. 1 Summerlee, $20; select Summerlee, $19.50; soft Summerlee, $19; No. 3 Cleveland and Clarence, $16.50 to $17.

Tin—There is not a great deal of interest displayed in tin recently. From the United States centres conditions have been reported dull, and consumer demand listless. It is generally admitted that the future of the market seems to be in the hands of the party abroad that controls tin.

Copper—This market is practically the same as a week ago, especially from a local standpoint. There is a fair demand, as at this season business begins to take on a new lease of life. Across the border the market is quiet, with prices quite steady.

Other Metals—Domestic or Trail lead is down in price, with water freight rates now in operation. The market is reported steady, but the element of weakness that has existed for some time has not entirely disappeared. Spelter is quiet, with trading of the piecemeal variety. Antimony is rather irregular and inclined to dullness at its former quotation.

Scrap Materials—There is a fair enquiry for scrap materials, with present offerings coming forward more freely. Local quotations are: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plates, $12.50.

TORONTO.

Toronto, May 5th, 1911.—The quietness which has characterized the metal markets in general, for some weeks past, is still apparent, and buying continues in relatively small volume. Construction is going on without abatement in every part of the country, and especially in the larger trade centres, but, although the consumption of metal consequent upon building operations is very large, this fact does not seem to lend a great deal of encouragement to buyers, who are specifying for immediate needs only.

Pig iron is in somewhat better demand this week, but the prevailing caution is shown in the small specifications which are being inquired for, or ordered forward. The largest inquiry reported locally is for one thousand tons, and, in the inactive state of the market, there is some strong bidding for this order.

Prices have declined, on both tin and copper, but otherwise the market shows no change. As a matter of fact, prices on metals are all considered very low, and allow but little margin of profit. As soon as the demand awakens, there is bound to be a series of advances.

Tin.—The world's visible supply is very small but the world's largest consumer, the United States, presents a discouragingly small demand, so that this week's prices are a little lower than quoted in our last issue. Holders in the Old Country would be in a good position to force quotations upward should American conditions improve, but in the meantime Toronto jobbers are selling at from 44 to 45 cents, depending on the quantity required.

Antimony.—The market is absolutely dead, with price unchanged.

Copper.—The situation shows signs of weakening, in spite of a normal demand. The price now being quoted is 13 cents, which is a decline of ¼ cent over last week's figures.

Aluminum.—A fair quantity of this metal is moving, and the price remains stationary at 20 cents per pound.

Plates and Sheets.—The leading consumers display caution in placing their specifications. Orders for future requirements are few and far between. Quotations are unchanged.

Pig Iron.—An inquiry for a thousand tons looms large among the many small specifications on which prices are asked. Foundrymen are simply buying from hand to mouth, and, while a fair volume of business is passing, jobbers are selling on such a small margin of profit, that business must be considered as in an unsatisfactory condition. Prices are the lowest practicable level on the basis of present producing costs. Quotations remain as follows: Canadian Foundry No. 1 is $19.50 and No. 2, 50 cents a ton less. Old country iron is quoted at $19.50 for Middlesboro' No. 3; and $20.25 for Clarence No. 3; Summerlee No. 2 is $22.00, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20.00 and $22.00 respectively.

Lead.—Stocks in local hands are light, and a fair demand is in evidence. There is no change in price here.

Spelter.—A rather better demand is reported this week, and prices are quoted the same as in our last issue.

Old Materials.—Business is without feature and prices are unchanged, as follows: Heavy copper and wire, 10½ to 11c.; heavy red brass, 7½; heavy lead, $2.90; light copper and bottoms, 9¾c.; tea lead, $2.40; machinery cast iron, No. 1, $14.00; No. 1 wrought, $10; malleable No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $12.50.

U. S. STEEL MILLS HUNGRY FOR BUSINESS.

Cleveland, O., May 4.—The Iron Trade Review to-day says: There was a noticeable falling off in new business and specifications against contracts in practically all branches of the iron and steel trade in April, as compared with the preceding month. Steel mills are hungry for business and billets and sheet bars are being offered under the openly quoted prices. While no particularly large awards for the lighter steel products are noted, most mills report that there is a moderate run of miscellaneous business, which in the aggregate makes up fairly heavy tonnage. Consumers are buying cautiously, and are covering only for urgent needs. There has been a further slowing down in the markets on tin plate and wire products as far as new business is concerned. The sheet market continues irregular with large tonnage being offered. Demand for steel bars is light and further weakness has developed in the bar iron market.

While prices generally have been well maintained, evidence of shading has appeared during the past week in markets which heretofore have been free from cutting.

Messrs S. B. McClung & Company, the hardware merchants of Trenton, Ont., have issued a very neat and effective booklet for distribution amongst their customers. It is compiled by Miss McClung, and the pamphlet has a smart and creditable appearance.

HARDWARE MARKETS

MONTREAL.

Montreal, May 5.—There has been a noticeable decline in the orders for spring lines this week. The hardware trade follows the barometer so faithfully that it is barometrical in itself. A sudden break in the fine weather that reached its zenith last week put a damper on the demand for spring lines, and although it will only be temporary still it is not an agreeabe feature to the trade, retail and whosesale, who are depending upon the season for the sale of seasonable goods. Household utensils and the various departments of the building trade are contributing a large share of business and wholesalers are welcoming the first orders for silverware, ostensibly to be sold as votive offerings to Hymen during the month of June.

Contractors' and Builders' Supplies.—In this department there is a brisk business reported since the warm weather has been felt. Escutcheons, locks, lock sets, construction supplies, heavy and light, bricklayers' and carpenters' requirements, in all these lines the demand is good. Enquiries are not confined to any particular section, but seem to be coming from all parts. Here and there there is a word heard as to a condition tending to quietness, but it is not expected that this will long continue.

For the best quality of shovels and spades, the discount off is 60 and 2½ per cent.; for second quality the same discount is allowed, and for third quality the discount is 50 and 2½ per cent.; picks are quoted at from $3.85 to $5 a doz.; crowbars are listed at $3.25 a cwt.; wheelbarrows, navvy common, $21 and up; navvy full-bolted, $22.50; drag scrapers, $5,75 and upwards. Trade in these lines at present is promising.

Spring Lines.—Business has received a temporary setback this week by unseasonable weather. Whereas up to the present spring goods have always been included in the general orders, they were noticeable by their absence this week. There was, of course, a little trade, but it was much below that which was experienced last week.

Discounts in garden hose range from 50 per cent. off to 70 and 10 and 10, according to quality. We quote hose clamp, ½ to ¾-in., 25c a doz.; hose couplings, ½ to ¾-in., $1 a dozen; hose sprinklers, ring patterns, $5.75 a doz.; revolving pattern, 12-in., $13 a doz.; 24-in., $34 a doz.; and 36-in., at $39 a doz.; hose nozzles, Gem, $3.50 a doz.: reels, 75c each and upwards; garden wheelbarrows, $27 a doz. The discount offered is 50 and 50 p.c.

Household Utensils.—Orders for household utensils have been coming in quite satisfactorily. This department has not failed the trade. New kitchen goods must be in demand, judging by the orders for kitchen utensils. The local trade during the past week has been good in this department.

Some of the prices quoted are:—Food choppers, from $9 to $15 a doz.; ice cream freezers, 1-qt., $1.50, 2-qt., $1.65; 3-qt., $2.05; 4-qt., $2.50, 6-qt., $3.15; 8-qt., $4; coffee percolators, $1.75 to $3.50; washing machines from $3.50 up; wringers, Royal Canadian, $47.75 per doz.; Universal, $37.75 per doz.; Safety, $56.25 less 20 per cent. per doz.; Mrs. Potts' irons, plain, 82½c per set; nickel-plated, 87½c. per set; common sad irons, 4 to 7 lbs., $5 per cwt.

Heavy Hardware.—The construction work in progress now is creating a steady demand for different lines of heavy hardware. It is helping the usual demand a great deal.

Some discounts are: on carriage bolts, ⅜ and less, 70 per cent.; coach screws, 75 per cent.; stove bolts, 80 and 7½ per cent.

Wire.—The demand for wire continues brisk and there is also a fair enquiry for the articles required in fence building. Some prices are: Barbed wire, $2.35; plain twist, $2.55; galvanized wire base, $2.27½; coil fencing (9) $2.30; (12) $2.45; staples, bright, $2.60; galvanized, $2.85.

Sporting Goods—The managers of sporting goods departments are well satisfied with the business that has passed through their hands of late. Baseball has contributed a large share and now lacrosse, tennis and angling are coming to the fore. The fishing season is practically here and already numerous windows are to be found among the retail trade. Croquet is a sport that is played principally in small towns and dealers from these centres send in many enquiries.

TORONTO.

Toronto, May 4.—The unusually cold weather at the first of the week rather placed a damper on the trade for a day or two but conditions have since righted themselves and business is now proceeding as briskly as ever. At the present time, the jobbers are getting as much business as they can conveniently handle and no complaints have been heard, even on the score of the unfavorable weather at the first of the week.

Credit men declare that collections are better now than for the same period last year and that merchants are not likely to find it necessary to renew much paper. This is indeed a satisfactory condition of affairs.

No price changes are noted this week. "Too busy handling orders to think of anything else," explain the manufacturers and jobbers.

Seasonable Lines.—The biggest demand centres around what might be termed seasonable goods. Sorting orders are being received for hose, nozzles, sprinklers, rakes, lawn mowers, shears, watering cans, spades, shovels, axes, picks, pails and all the other goods especially salable at this season of the year. Demand is commencing to show itself for goods to be used later, such as mosquito netting, children's pails and spades, ice cream freezers, etc. There is a very satisfactory demand for refrigerators. One local jobbing house reports receiving an order for ten refrigerators from a Western Ontario dealer who wrote that he had already booked orders for half a dozen.

Household Goods. — Housecleaning goods are still moving and there is considerable call for such goods as ladders, mops, pails, brushes, carpet stretchers and beaters. A feature this year has been the sale of vacuum cleaners. For all tinware goods there is a heavy demand. Frying pans, pots, kettles, cookers, etc., are all selling in large bulk. There is a distinctly improved demand for specialties and new goods, such as electric sad irons and toasters.

Builders' Hardware.—In city, town and country, the building boom has begun. Outside work is now well under way and in consequence there is a steadily increasing call for builders' hardware. Manufacturers and jobbers are thoroughly satisfied and not a little surprised at the splendid bulk of business done so far. Previous records have been quite put in the shade, in the opinion of the wholesale men. There is a correspondingly good demand for contractors' tools and general mechanics' supplies.

Heavy Hardware.—There is a good steady demand in practically all lines of heavy goods. No price changes are noted. Present quotations are: Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Stoves and Heating Goods.—The trade in gas stoves continues steady and evidence is piling up that the field for this class of stove is ever widening. A feature of the demand has been the large number of combination gas and coal ranges sold. There has been some call for coal ranges.

Sporting Goods.—The sporting goods trade is now at its highest point. Rifles and ammunition, as well as trap-shooters' supplies, are moving briskly. The bulk of the demand is for baseball and lacrosse supplies, the two most popular sports. Large orders are received, however, for anglers' supplies, tennis and golf goods and acquatic sporting goods.

CROQUET SETS SHOULD HAVE WIDE SALE.

Said the manager of a wholesale sporting goods department of a Montreal firm, "I have only recently discovered that the retail hardware men in towns, villages and the smaller cities where the average householder has something of a lawn to his credit, are overlooking an old game that is popular with the average family—croquet. It is easy to learn, and every person in the house from the lad of eight up to the grandfather can play it. It is an ideal summer game, and the hardwareman should try to sell a croquet set to everyone with anything like a decent lawn. Playing the game will not injure the lawn, in fact, I believe it is a benefit to it, especially if it receives other attention at the same time. The reason I mention this is because I find that the bulk of the orders for croquet come from places outside the large cities, where the people are flat-dwellers and don't even own a square inch of ground, let alone a lawn. I mean, of course, the average householder. If a hardwareman has nothing else in his sporting department, he ought to have guns, fishing tackle and croquet."

NEW COMPANIES INCORPORATED.

United Brass and Lead Co.; capital, $500,000; head office: Toronto.

Imperial Foundry Co.; capital, $40,000; head office: Milton, Ont.

The Western Hardware Market Situation

Enormous Demand for Builders' Hardware—Shortage in Important Lines May Result—Temporary Curtailment in General Hardware Due to Cold Spell—Some Price Changes Noted.

Winnipeg, May 4.—The leading feature of the trade this week is the enormous demand for builders' hardware. Stocks are being rapidly depleted and before the summer is far spent there may be a dearth in many important lines. The demand, however, is not limited to these lines, as the general trade was never more brisk than at present. A brief spell of cold weather last week curtailed retailing slightly, but it was only temporary and the activity is on again. The general farm work which began during the past three weeks everywhere in the west has stimulated buying in a wide range of farmer's supplies.

We quote changes in iron and galvanized pipe and wire, these are occasioned by rail and water transportation rates.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.00; 2, $1.60; p.g. oak, $2.75.

Auger Bits—"Irwin" bits, 47½; other lines 75 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts 77½.

Bar Iron—Bar Iron, $2.50; Swedish iron, $4.75; sleight shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs. $8.50; Jessop, $15

Blocks—Steel, 45; wood 60 per cent.

Cut Nails.—$3.15 per keg base.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron.—Apollo, 16 gauge, $3.70; 18, $3.75; 20, $3.80; 22 and 24, $4; 26, $4.10; 28, $4.50; 30 gauge or 10¾ oz., $4.75; Queens Head, 20, $3.85; 24, $4.05; 26, $4.45; 28, $4.65.

Galvanized Iron Pipe.—⅜ in., $3.60; ½ in., $4.15; ¾ in., $5.30; 1 in., $7.60; 1¼ in., $10.40; 1½ in., $12.45; 2 in., $16.60.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2, and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel, No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30; 4, $3.80; 5, $2.75; 6 $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $7.75; grass, $1.70.

Iron Washers — Full box, 40 p.c.; smaller lots, 35 p.c.

Iron Pipe, Black—¼ in., $2.36; ⅜ in., $2.68; ½ in., $3.25; ¾ in., $4.10; 1 in., $5.88; 1¼ in., $8.05; 1½ in., $9.60; 2 in., $12.80; 2½ in., $20.50; 3 in., $26.95; 3½ in., $33.50; 4 in., $38.35; 4½ in., $44.10.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.75.

Poultry netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.55.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8½c; pure manila, 10¾c; British manila, 8½c; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.75; broken lots, $9.50.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $25 per cwt.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 65 per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate—1. C., $9.75; I. X., $11.75.

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25; ½ box, $5.50; I. X., full box, $12.25; ½ box, $6.50; I. X. X., full box, $14.25; ½ box, $7.50; 20 x 39, I. C., full box, $15.50; ½ box, $8.25; I. X., full box, $17.50; ½ box, $9.25.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wire.—Barbed wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3; annealed wire, base, $3; oiled, 10c extra; bright iron $3.20 base; brass spring wire, base 29c; plain galvanized wire, Nos. 6, 7 and 8, $3.40; No. 9, $2.90; 10, $3.50; No. 11, $3.55; No. 12, $3.10; No. 13, $3.25; No. 14, $3.95.

Wire Nails—$2.90 Winnipeg, and $2.45 Fort William.

Wringers — Royal Canadian, $39.25; New Easy, $42.50.

Paints and Oils.

Paints and oils and all kindred lines are moving very freely, and prices are the same as quoted last week, throughout.

Petroleum and Gasolene.—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 22½c.; Searchlight, 20½c; Red Rose, 23½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c.; White Rose, in bulk, 22½c; National Light, in bulk, 21c.; Engine Gasolene, 24c.; White Lily, 26c.; Royal, 24c.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

COPPER AND BRASS GOODS.

James A. Henderson, Board of Trade Building, Montreal, is sending to the trade a twenty-page catalogue, illustrating, in colors, a fine line of copper and brass goods, for which he is Canadian agent. The goods shown include copper jardinieres, Waterloo scoops, screens, antique curb suites, cake stands, umbrella stands and other similar articles.

PUMPS AND HAY TOOLS.

A four hundred page catalogue of pumps and hay tools, manufactured by F. E. Myers & Bro., Ashland, Ohio, is just off the press. It is a very complete book and contains much interesting data for dealers who are interested in these

On Thursday night before the Business Science Club, at a meeting held in the Confederation Building, Toronto, a demonstration of paint selling methods was put on. Frank Brown acted as salesman and Geo. Pearsall, hardwareman, and A. W. Poole, Toronto, manager of Brandram-Henderson, acted as buyers. The second demonstration was of the sale of electrical fixtures.

How a St. John Dealer Pushes Paints

Full-page Newspaper Advertisement Reproduced as Circular—Booklet of Color Combinations and Color Card Included in Plan—Prospective Paint Consumers to be Won by Combination of Newspaper Ads. and Circulars.

Mention has previously been made in these columns, of "McAvity's Messenger," the title under which T. McAvity & Sons, of St. John, N.B., publish their newspaper advertising. About the best example of their advertising that has yet appeared was the copy which launched the firm's spring paint campaign.

The advertisement occupied a whole page in one of the St. John dailies, and, as an introduction to the detailed description of the numerous kinds of paints, varnishes, enamels and brushes, the following excellent paragraph was used:—

Arguing the Necessity of Paint.

"In the spring when the trees start to bud and Nature begins to display her most radiant colors, the necessity of paint is shown on every hand by force of contrast, and man feels he must do his part in making everything bright, clean, fresh, and in harmony with Nature, by the liberal use of paint. But there is another and far more important reason for the use of paint, particularly to those of a practical nature, and that is, the fact that paint not only beautifies but preserves and protects the surface it covers, thus prolonging its life. In fact, painting is as essential as fire insurance. A house, barn, or fence that is left to suffer the will of the elements, will rapidly decay and deprecate in value, to say nothing of the loss of appearance. Decay is slow burning—and to keep your buildings well painted, insures them against decay. Taking for granted, then, that painting is an absolute necessity, it then becomes a question of the right paint to use, and we take pride in offering to the public, paint which, if properly applied when used, is guaranteed to give satisfaction."

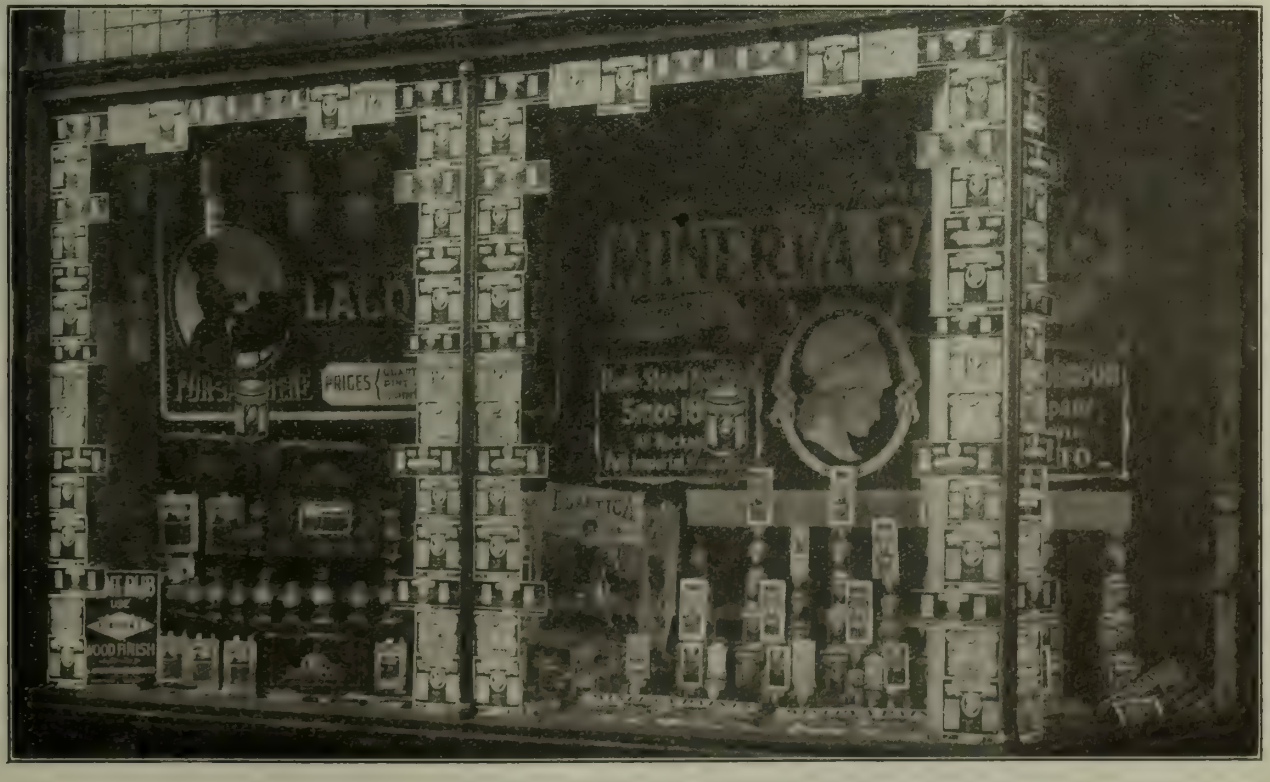
Appealing to Pride and Public Spirit.

This talk is calculated to appeal, first of all, to the pride and public spirit of the reader. Next, he is led to see the necessity of using paint as a means of protecting his property and prolonging its life.

The paragraph is run right across the top of the page, and the balance of the ad., down to the signature, is divided into five columns. These five columns are well filled with descriptive matter and illustrations, the type being of a very readable size.

Advertisement Used as Circular.

This page advertisement made a very attractive appearance, and the firm took advantage of this fact to have a quantity of the ads. printed as circulars, by the job department of the newspaper in which it appeared.



In addition to these circulars, McAvity & Sons have had prepared a supply of booklets in which a few designs of houses are shown, with color combinations selected from the firm's own brand of prepared paints. The circulars and booklets are enclosed in an envelope together with a color card, showing all the shades of these paints carried in stock, and this literature is sent to prospects for paint.

This combination of advertising matter will undoubtedly stimulate the firm's paint trade considerably. The same scheme has been tried with marked success in other lines which are handled by McAvity & Sons.

A ST. THOMAS PAINT WINDOW.

In a recent issue of Hardware and Metal, the successful Spring Opening conducted by Ingram & Davey, of St. Thomas, was described. This opening took place Saturday, April 1st, and, in addition to the demonstrations which were held inside the store, the spacious windows of the firm were given up to exhibiting some of the lines in which Ingram & Davey specialize.

A fine paint and varnish window which is reproduced on this page was a feature of the opening. Attractive colored stickers were applied around the edges of the window, forming a kind of frame for the exhibit. The background was formed by large hangers advertising Minerva Paints, and "Lacqueret," one side of the window being devoted to the prepared paints, and the other to varnishes—the products, respectively of Pinchin-Johnson & Co., and the International Varnish Co.

Paint Window Shown by Ingram & Davey, St. Thomas, Ont., During Their Spring Opening.

Aggressive Methods Adopted by Paint Retailers

Brantford Dealer Starts Paint Department and Finds That it Pays Him Well—Demonstration of Varnish Proved Successful—Tillsonburg Dealer Uses Billboards.

Some dealers who have been in the paint business for years will tell you that they have not done very well at it; that they do not pay much attention to it, in fact. It is very refreshing, by way of contrast, to meet a man who is new to the business but who is, nevertheless, "making it move" and who expresses himself enthusiastically on the score of trade possibilities. Such a one is George Elliott, of Brantford, one of the most aggressive young hardwaremen in the province. When Mr. Elliott started in business some years ago he specialized largely on stoves, but he has gradually been adding hardware lines until to-day he carries a complete stock. A paint department is his latest venture and, from the results obtained to date, it promises to be one of the most successful. The stock was put in late last fall but little was done until a couple of months ago.

Mr. Elliott began right. He gave "preferred position" to his paint stock —right up near the front of the store. He keeps it well sorted up. The stock always looks neat and fresh, with no faded labels and damaged tins showing. Furthermore, he advertises the stock and does not neglect any opportunity to talk paint to likely customers.

"I have found the results satisfactory in every way," declares Mr. Elliott., "Sales have been brisk and regular, despite the fact that I am comparatively new to this branch of the business. I do not entertain the slightest doubt but that paint can be made one of the most profitable departments of the hardware store. It is well worth featuring."

"My methods of advertising differ from the plan usually adopted," he continued. "Instead of using a small space each day, I run an ad. the full length of the paper each Friday. People have found it to their advantage to watch for my advertisement and I get splendid results. Since the spring season opened, paint has always had a prominent place and a good share of the advertising space.

"I believe in using as many cuts as I can in newspaper advertising. It is the illustrated ad. which people read every time. It costs a lot of money but it is well worth it, in my opinion."

Chas. W. Conn, Tillsonburg, is another dealer who believes in featuring his paint department. Demonstrations of a varnish specialty were held three days last week and considerable attention was attracted in that way. An expert demonstrator was on hand to show how the varnish was applied and to give an exhibition of graining work. Suitable window displays had been arranged.. Large numbers attended each day and many were supplied with small sample tins of the varnish. The sales made were large enough to cover the cost of the demonstration.

Mr. Conn has strong opposition in the paint line. In the next block of the main street of Tillsonburg is the Torrens Hardware Store and Mr. Torrens is an enthusiastic paint salesman. He adopts progressive measures to boost sales in that department and is meeting with splendid success.

In the first place, he keeps his stock prominently to the front of the store and makes a point of keeping it complete. He is never "just out" of a certain sized tin or the particular color of paint that a customer may call for. In fact, he prefers to keep a good sized stock on hand rather than run the risk of being unable to satisfy any demand.

Uses Sign Boards.

To advertise his stock, Mr. Torrens makes use of the billboards around the town and on the roads leading from surrounding points. The fact that So-and-So's paints are the best on earth is proclaimed every day from many points of vantage to the good townspeople of Tillsonburg. In addition, there is a large sign out over the entrance to the store, relating to the stock of paint carried within.

"The secret of selling paint, however," confided Mr. Torrens, to the writer, "is in continually talking your goods. I can do more good right here behind the counter than any number of billboards out there in broad daylight on the main street. I never forget to talk paint to my customers. I believe thoroughly in the line that I carry and feel that I can honestly recommend it; therefore, they see that I am thoroughly in earnest about it and begin to feel quite as much confidence. To make a success of the paint department, no dealer can afford to lose sight of it for a day. You must talk and think paint all the time."

That sums it up in a nut shell. The dealer who believes in the line that he sells can easily make others believe. Enthusiasm counts more in paint selling, perhaps, than in any other branch of the business.

Improved Methods.

It is becoming more apparent every day that hardwaremen are rapidly improving their methods of selling paint. In every city and town, at the present time, the windows of hardware stores will be found with paint displays. Go inside and in a majority of cases it will be found that the paint stock occupies a prominent place in the store, that it is neatly arranged and well kept up. In fact, you will be impressed with the fact that paint has become an important feature of the hardware store and that the members of the trade are showing due recognition of this.

HINT FOR DEALERS IN FRUIT DISTRICTS.

With the spraying season in full swing, it will be interesting for dealers to learn of a method which is being adopted successfully for the treatment of San Jose Scale.

This method, which is being sponsored by one of the fruit inspectors for Eastern Ontario, consists in using a wire brush for cleaning the scale off trees, before spraying. He claims that, if this is properly and carefully done, the spray fills the pores on the trees, and the pest will be removed, thereby insuring more perfect fruit.

By impressing this fact upon fruit growers, dealers should be able to nicely supplement their brush trade. The brush described, can readily be secured from the leading brush manufacturers.

BIG INCREASE PROMISED.

The Paint and Varnish Record has the following to say with reference to flaxseed crop prospects:

It is too early to discuss the linseed acreage question in its relation to the three prairie provinces of the Dominion. On account of the large influx of settlers it will be a difficult problem even at time of seeding to tell with any degree of accuracy what the acreage will be. The acreage in Manitoba will not be largely augmented, but indications point to an immense increase in the provinces of Alberta and Saskatchewan. New settlers going into the Western provinces of Canada are well equipped with money, in which respect they differ from the new settlers in Eastern Montana. The banking situation in Canada is different from that in the North-Western states and this is a feature that cannot be overlooked in discussing the probable acreages of any crop in the two countries.

The banks in Eastern Montana, for instance, are as new as the settlements. The banks in the Western provinces of Canada are branches of the old established institutions that have been doing business in Canada for many years. They are strongly financed, well-equipped and are able to take care of their customers without feeling seriously the demands imposed by the necessities of the thousands of new settlers taking up land in the Western provinces. A system of American country banks, individually owned, would be placed under heavy handicaps by such conditions.

That the new breaking will be greater than ever before is not denied. But this immense increase will not be in the United States. It will be in Canada.

There may be some people inclined to ask why the American and Canadian crops are now of such importance. The reason is found in the rapidity of the marketing of the Indian crop and the fact that the next available crops of importance will be the North American yield.

Our selling plan will interest you if you want to do a bigger and more profitable paint business.

PAINT AND OIL MARKETS

MARKETS IN BRIEF.

Montreal.

Turpentine—Reduced 5c.
Linseed Oil—Down 2c.
Domestic Lead—Down 10c.

MONTREAL.

Montreal, May 5.—The general conditions in the paint and oil trade show a material improvement. The jump from winter to summer has naturally had a beneficial effect on trade generally. All branches in the varnish, color and paint departments are feeling the good effects of the changed weather conditions, and while price variations are few, with the exception of linseed oil and turpentine, there is a good deal of life being shown in the largely increased shipments during the past two weeks.

The fact cannot be discountenanced that the hardware trade has been slow to order this spring on account of the high prices, but as the demand for enamels, colors and other specialties grew the retailers have been forced to send in hurry-up orders to fill vacancies in depleted stocks.

Linseed Oil—The linseed oil quotations have dropped two cents a gallon during the past week, commensurate with the lower cables from London, but the local market has been so bare that no great attempt has been made to push the sales of this article. There is no degree of confidence that lower prices will prevail for any length of time. Prices have gone lower of late, but dealers still maintain that there is a pronounced element of strength to the market. Prices quoted are for raw per gal., $1.08, and for boiled, $1.13.

Turpentine—Large supplies of turpentine are coming forward by water, and although the demand is fairly healthy, prices are receding regularly. The local price is again lower this week. Warm weather has induced a steady flow of sap in the turpentine belt and the spring crop was not at all delayed in reaching the market. There was a noticeable rush of supplies to take advantage of the existing high prices. Turpentine is now quoted at $1.05 per gal.

Paris Green.—Prices are being well maintained. Heavy shipments have been made, and small orders are now going out in a somewhat desultory manner.

Prices are unchanged as follows: In barrels, about 600 lbs., 17c per lb.; arsenic kegs, 250 lbs., 17¼c; 50 lb. and 100 lb. drums, 18¼c; 25 lb. and 100 lb. drums, 18⅜c; 1 lb. packets, 100 lbs., in case, 20¼c per lb.; 1 lb. packets, 50 lbs. in case, 20¾c per lb.; ½ lb. packets, 100 lbs. in case, 22¼c per lb.; 1 lb. tins, 100 lbs. in case, 21¼c per lb.

Arsenate of lead.—Small orders are being received from the hardware trade for this article.

Prices are: In bbls., about 800 lbs., 9c; in half bbls., about 400 lbs., 9½c.; in 25 lb. wooden kegs, 10c; 5 lb. bottles, 12c; in 2 lb. bottles, 13c; in one lb. bottles, 14c.

White Lead.—White lead is receiving a fair amount of attention, chiefly for boat shipments, navigation now being open to all principal points.

Quotations are as follows: Lots of one ton, $5.85; contracts of five tons and over, $5.70; shipments less than one ton $6 f.o.b. Montreal.

Putty—The demand for putty is of a steady nature, and is quite satisfactory.

Prices f.o.b. Montreal are: Bulk, bbls., $2.20; bulk, cwts., $2.45; bladder bbls., $2.70; bladder, cwts., $2.80; 25's, loose, $2.55; 25's, cased, $2.70; 12½'s, cased, $2.90.

Prepared Paints.—Business is brisk in all prepared paints, as indicated by the new orders and repeats that are coming in. The latter are not as numerous as the manufacturers would like, but they are nevertheless fairly good.

TORONTO.

Toronto, May 4.—There has been a heavy demand for paint and oil supplies during the past week, despite the handicap of bad weather. The unexpected cold snap at the first of the week checked painting operations to a certain extent, but the slump was only temporary and now things are going more briskly than ever. It is fully expected that the present month will see very active conditions, and all local paint manufacturers and jobbers are looking forward to a record month's sale.

There have been decreases in the price of linseed oil and turpentine, but latest dvelopments are to the effect that the market in linseed oil is firming up. It is regarded as possible that turpentine will go still lower.

Linseed Oil.—Early in the week decreases in price were noted, some houses making a more marked cut than others. At time of writing quotations vary from $1.10 for raw and $1.13 for boiled to $1.12 and $1.15 respectively, although one quotation as low as $1.09 and $1.12 was heard. The prevailing price is $1.12 and $1.15, and those who ask this figure say that it is lower than the market warrants. Just what the immediate future of linseed oil will be is at present very problematical. Advices from England this morning were to the effect that oil was stronger there, being quoted at an advance of 3 cents. Little English oil is sold here, comparatively speaking, but the English market helps to set prices here, and, in view of the conditions prevailing there now, it is not deemed likely that linseed will see any further reductions in the immediate future. Unexpected developments may upset present calculations, however.

Turpentine.—Turpentine is still "going down." New supplies are now coming on the market at Savannah, and the inevitable result has been the rapid return of the price to a more normal level Prices given to-day range from $1.00 to $1.05, but the latter figure seems to be the prevailing price. It is understood that there is now a good supply at Savannah, and it is not regarded as at all probable that the price will go up again At the same time, it is not at all certain that further reductions will be seen for a time. The outlook points to a lower price, according to some authorities.

Rosin.—No decrease is noted in rosin, despite the slump in turpentine. As a usual thing, rosin kept pace with turpentine in regard to price and easier quotations are not therefore unexpected.

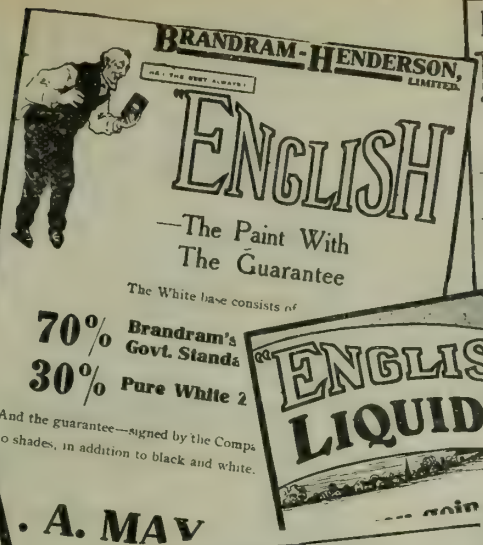
Putty.—The demand continues fair for this season of the year. Prices are standing at the same figures: Standard putty is quoted at: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels, $3.

White Lead.—There is a good firm tone to the market. White lead is reported to be selling freely and prices are remaining the same. Manufacturers are anticipating a record demand during May, as outside work is now well under way.

Varnishes and Japans.—Specialties of all kinds are now in more brisk demand than ever. The advance of the season has hurried along housecleaning work, and the dealers are selling interior varnishes in big bulk. As a result, the supply houses are being rushed with sorting-up orders.

Prepared Paints.—The trade in paints is now at high water mark. Orders are both numerous and large and it is quite apparent that the demand on the retailer has been heavy.

Petroleum.—A decrease of one-half cent is noted in coal oil and prices quoted here now are: Canadian prime white, 12c.; United States water white, 13½c.; Pratt's Astral, 15½. There is a fairly good demand for this season of the year.

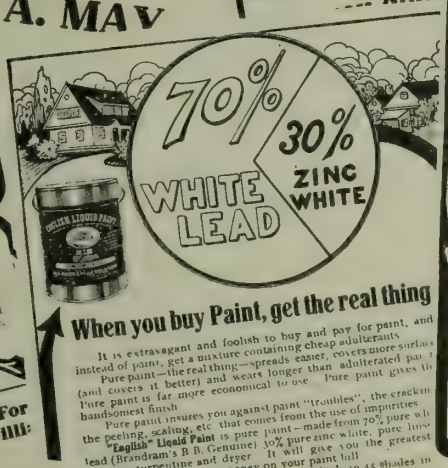


Glass.—The demand for glass is growing as the season advances. A splendid year's trade is anticipated.

WEYBURN FIRM CONCENTRATING BUSINESS.

Weyburn, Sask.—Zabel & Worden, of this town, who have been occupying two store buildings, are now moving all their stock into one store, where they will concentrate their business. Formerly, this firm occupied a store on Third St., which was used for hardware business exclusively, and another one in the Monaghan Building, which has been a grocery and hardware store combined. They are now combining the two stocks in the Monaghan Building, and they expect that in consequence they will be in a position to render better service to their customers.

Hoshal, Carmichael & Co., are anannouncing through the local newspapers, that they have opened a new hardware store in the building formerly occupied by C. Worden & Co.



Brockville.

LET US WORK WITH YOU IN SELLING
Ru-ber-oid Roofing

TRADE MARK REGISTERED

APPEARS ON WRAPPER

We have spent a good round sum of money, not to mention time, in preparing Booklets on RU-BER-OID Roofing. Our new "RU-BER-OID—WHY?" and the revised edition of "ALL ABOUT ROOFING", just off the press, are two of the most attractive and convincing Booklets ever put out on this subject.

But they are not worth a cent till we get them into the hands of those Canadians who want roofing.

YOU KNOW the people in your territory who are building or renewing roofs. No doubt you are making the most of the chances you get to talk RU-BER-OID to them. Let us help you.

Give us their names and we'll gladly send them Booklets, with your compliments. Tell them to write our Engineering Department for plans, specifications, estimates and information on how best to apply RU-BER-OID. This service is free. If you've a big contract in sight let us send a salesman to help you land it.

Your interests are ours.

CONGO NEVER LEAK ROOFING

Guaranteed Until 1921

Every roll of Congo two and three ply roofing carries with it a genuine Insurance Bond from the National Surety Company guaranteeing that it will last *ten years.*

That guarantee Bond means that every Congo roof laid this year must give absolute protection *until 1921.*

We are the *only* manufacturer who has confidence enough in his goods to back up his guarantee with a *real* Surety Bond.

Write to-day for samples of Congo, copy of the Bond and further information.

We want you to know just what we are offering, and when you once know, you will see it is the best on the market.

UNITED ROOFING AND MFG. CO., Philadelphia, Pa.

HOLD IT UP!

That is what we want you to do if you are handling

RAMSAY'S PAINTS

Hold it up! Every house in town that is painted with

RAMSAY'S PAINTS

is an advertisement to you and you should hold it up and show it to your neighbors. The profits you make out of

RAMSAY'S PAINTS

come easily if you hold it up, and make one sale help the other along.

RAMSAY'S PAINTS

are well advertised and are known all over Canada. Get all the publicity you can out of this.

RAMSAY'S PAINTS

are a help to every paint store. They are sold at the right price for profit and good business. Everyone should find out about

RAMSAY'S PAINTS

Have you our 1910 Catalogue? You should have.

New Era Paint

IS AN EXCELLENT STOCK PAINT

It stays in condition and when sold gives greater satisfaction than others.

Its surface-covering qualities are above the average and it wears splendidly.

The result is a steady and increasing demand for New Era Paints, which it will pay you to supply.

THE CANADA PAINT Co'S OIL CLOTH VARNISH

Our OIL CLOTH VARNISH is specially suitable for inside blinds, bath rooms, OIL CLOTH and Linoleum. A floor varnished with this Varnish is sweet and wholesome. It is equally reliable for Pine or Hard Wood Floors. To prevent disappointment insist upon the C.P. Co.'s Oil Cloth Varnish.

Full instructions will be found upon each sealed tin of the C.P. Co.'s Oil Cloth Varnish.

Special Varnishes for special purposes are made by The Canada Paint Company.

WE LEAD THE WORLD

The ever-increasing demand for

BEAR BRAND LAMP BLACKS

has necessitated this increase in our manufacturing facilities, as shown in the figures below:

	CAPACITY
1902 - - -	3,000,000 pounds
1905 - - -	6,000,000 "
1911 - - -	10,000,000 "

Our growth is entirely due to the consistent high quality and absolute uniformity and purity of our products, together with the courteous treatment always extended to our customers.

If you are not using OUR BLACKS, write us and we will submit samples and prices which will save you money and secure your orders.

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

NEU-TONE

A PAYING PROPOSITION

It pays, brother, when you can make a friend of everybody that comes into your store. And it is not so hard to do, either.

Take for instance, the paint proposition. If a man comes into your store, and you make a lot of promises that the paint doesn't fulfill — that man will not remain your friend many days.

When you lose him — well — you will lose many more. But on the contrary, if the paint "*makes good*" you make a fast friend and gain a lot of more customers.

NEU-TONE COLORS

(Washable — Sanitary)

Please Everybody — Dealer, Decorator and House-Owner

It pleases the dealer because it is a paying proposition — carrying with each sale the twang of a come-back order. It pleases the decorator because it enables him to give his work a "*style*" that triumphantly asserts itself.

It pleases the house-owner because with it, the house can be finished in the soft, restful, "flat" tints and rich colors of kalsomine. Dust, grease and smoke stains easily removed with a damp cloth. Think of it. It pays to sell this kind of paint, Mr. Dealer. Drop us a postal and we will tell you a few more things you will be glad to hear about this *paying proposition.*

THE MARTIN-SENOUR CO., Limited

Montreal Chicago Halifax Toronto Winnipeg

DOUGALL VARNISHES COST THE LEAST

On the basis of how much it will take for the job compared with any varnish of any other make. You will find that a gallon of Dougall Varnish will cover far more surface than any other, owing to the perfectly even flow — and every drop of the varnish is good. You will find that much *time* is saved in the varnishing because Dougall's works so easily under the brush.

And Dougall Varnishes *last.* Your varnished surface will have a fine, clear, smooth finish which will stay to the limit of varnish ability.

If you want *expensive* varnish get the "complete-in-price" stuff on the market — cheap in price — make-up — nature — and value — varnishes which pull and drag and streak, and never look good. These are an utter abomination.

Let us send you 60 pages of Varnish facts and information — a card will do.

THE DOUGALL VARNISH CO., Limited

J. S. N. DOUGALL, President

MONTREAL, - CANADA

Associated with Murphy Varnish Co., U.S.A.

"THE VARNISH THAT LASTS LONGEST"

CHANCE'S Figured Rolled Glass

has a smooth and bright surface for cutting, and a deep, sharply-defined pattern which gives it a peculiar brilliancy. It cuts easier and looks better than other makes.

Made in white, blue, green, wine and amber, and in a great variety of patterns.

To Architects, Builders and Contractors and Hardware Dealers, we will be glad to send on request, samples, in a variety of tints, of Figured, Rolled, Double Rolled Cathedral, Muffled, and the new Flemish Glass, Manufactured by Chance Bros. & Co., Limited, at their famous glass works near Birmingham, England.

Write for them now.

Build up a trade on **the repeat order** basis by recommending

"International" Varnish Products

A majority of Hardware Dealers *are* doing that.

Don't take it on our say-so, but *investigate* for yourself—

And you will find out that a *big percentage* of Canadian Hardware Merchants *feature* "International" Products.

There are *more than a few reasons* why they should. Take

ELASTICA

for instance—the floor finish that's practically imperishable The only truly elastic finish on the market—the finish that wears like nickel steel.

Elastica does not mar, scratch, white or spot. It dries dust free in four to six hours and hardens over night.

Elastica Nos. 1 and 2 are used for Exterior and Interior work respectively.

Let us know your varnish and finish requirements and we'll give you solid reasons why you should always specify International Products.

All International Products are sold in full Imperial Measure Cans.

INTERNATIONAL VARNISH CO. LIMITED

TORONTO **WINNIPEG**

A 24

Ford Auger Bits

create steady customers

Discerning dealers everywhere have learned the judiciousness of recommending the FORD to the man who steps in and asks for an Auger Bit.

Not simply because of the generous profit from the immediate sale but because of the cumulative value of that sale. One Ford sale means sure future sales—for the man who buys a Ford gets the speediest, smoothest and strongest bit made—hence obtains maximum satisfaction.

His confidence in your judgment not only clinches his regular bit trade but benefits you in every department of your business.

We help you make sales

in every possible way. Thru circular letters, catalog and magazine advertising we reach practically every Auger Bit user---thus stimulating a demand for the FORD. We refer every inquiry to the nearest dealer.

The FORD is unquestionably the finest Bit on the market to-day. Aside from doing better work faster and with less trouble, it has---figuratively speaking---the strength of Gibraltar, and we unhesitatingly back it with a solid guarantee.

There's money in selling it, Mr. Dealer, May we send you our catalogue and circulars?

GIVES PERFECT LIGHT

FOR SALE BY DEALERS EVERYWHERE

INCREASE YOUR ALABASTINE SALES

Alabastine is always an active stock. The Demand has been fostered by a world-wide campaign of advertising and an intelligent follow-up of circulars. Alabastine is its own best advertisement, for even with home labor it is easily successful and the finish is clean and beautiful.

HERE'S OUR NEWEST IDEA

We will suggest up-to-date, artistic, color treatment for the homes of your prospective customers, sending them colored sketches showing what the tinted walls will look like, thus aiding you to make the sale. After they have purchased the Alabastine we supply them with stencils free, making artistic effects and pleased customers certain. If you have not our Information Blanks and Free Stencil Circulars, write to-day for a supply.

PUT US IN TOUCH WITH YOUR CUSTOMERS

This plan makes new business

The Alabastine Co., Limited

PARIS, ONTARIO

Why the demand for the

BISSELL SWEEPER

has increased tremendously since the introduction of other cleaning devices.

1910 the Largest Year's Business in Our History

The merit of Bissell's "Cyco" BALL BEARING sweeper has been vastly better understood since the introduction of other cleaning devices, as the people now better appreciate the value they get for their money, when they buy a Bissell Sweeper. No cleaning device, no matter how powerful the suction, can gather up miscellaneous litter that the Bissell sweeper picks up with ease and dispatch.

The Bissell weighs but 5½ pounds, hence a child can transfer it from room to room. Contrast this with the labor of changing from room to room, and up and down stairs, a cleaning apparatus that weighs from 25 to 65 pounds.

The public now understand that no matter what other cleaning device may be installed, the use of the Bissell sweeper cannot be dispensed with, as it is the daily, if not hourly, necessity in every home.

Cleans quickly and thoroughly without noise, dust or effort.

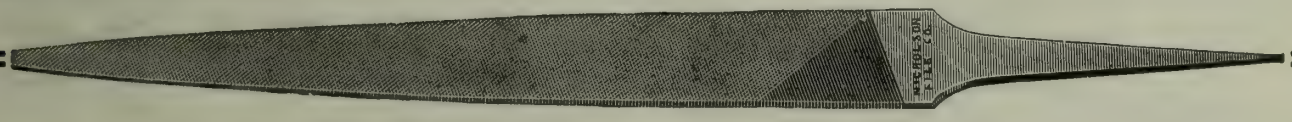
GREENING'S
Galvanized Netting

It finds dozens of uses for Poultry Runs, Chicken Coops, Lawn Tennis Back Nets, Rose Trellises and a multitude of commercial uses.

It is put up in rolls of 50 yards and widths of from 12 to 96 inches.



There is a wide variety of styles and sizes of mesh and wire weight, all fully shown in our catalogue, which we will be pleased to send you on request.

WIRE PRODUCTS OF MANY KINDS AND GRADES.

The B. GREENING WIRE COMPANY

HAMILTON LIMITED MONTREAL

Nicholson-Made Files are the Standard of File Quality

The entire output of the Nicholson File Company in 1864 was 100 dozen per day. At the present time 16,000 dozen Nicholson-made Files are sold every day and shipped to all parts of the civilized world. Unvarying good quality, coupled with progressive methods and strict specialization, is the cause.

In Canada these are the well-known factory brands made by the Nicholson File Company :—

"AMERICAN" "ARCADE" "GREAT WESTERN" "GLOBE"
"EAGLE" "McCLELLAN" "KEARNEY & FOOTE" "J. B. SMITH"

Nearly every file user in Canada has a preference for one or more of these lines above all others. You can stake your reputation upon their absolutely uniform and satisfactory quality.

YOUR JOBBER KNOWS!

By using FLUXTE.

THE PRACTICAL MAN USES

FLUXITE

The Paste Flux That

SIMPLIFIES SOLDERING
AND SUPERSEDES LEAD BURNING

It solders even dirty metals without cleaning and without corrosion. It joints lead without solder, merely by the use of a blow-lamp or blow-pipe. Anyone can do soldering work with Fluxite. It is a necessity in the tool kit of every motor car, workshop and home. Easy to use, easy to sell.

REMEMBER IT IN YOUR INDENTS.

Packed in small and large tins. Made by

THE AUTO CONTROLLER CO., 212 Vienna Road, Bermondsey LONDON, S.E., ENG.

Sell a Good Lawn-Mower

to a man and you've gone a long way toward winning his confidence and trade. Sell him one not quite so good and he'll resent it every time he mows the lawn. Sell him a

MAXWELL LAWN-MOWER

and be sure you are on the right side. The Maxwell cuts so smooth, clean and easy, and holds its edge so well, that every man who appreciates a good machine is sure to be pleased with it.

8 to 22 inch widths—wheels 8 to 11½ inches high—3 to 6 knives. Grass catcher attachment if desired.

David Maxwell & Sons, St. Mary's, Ont.

Moore's Mooramel

A perfect flowing, easy working enamel, with great covering capacity. MOORAMEL is a favorite where only one or, at the most, two coats are required, as it gives a very even surface, free from streaks.

MOORAMEL retains its whiteness for all time. It will not turn yellow with age.

MOORAMEL dries quickly. In a few hours it is dust-proof, in twenty-four hours it is hard and can be rubbed in three or four days.

The finish is perfect. It will not chip or scratch.

Write us for Details.

Winnipeg

It Interests Every Fruit Grower by its Clean, Positive Action.

"Kansas" Pruning Knife

(Improved)

You do a kindness in recommending this knife to your customers as it does its work more cleanly and conveniently than other pruning tools and is a greater labor saver.

Any limb up to 1¼ inches in diameter can be cut by simply placing the hook over it and pulling the handle; for twigs the string is sufficient. Will last twice as long as its best predecessor and will do five times the work.

"Safelock" Stays *cannot* Slip

This is a mighty strong selling point. It means that the fence will stand up to the hardest usage from animals or the elements and still keep its height and shape unimpaired. And the fact that the strand wires do not have to be kinked, owing to the positive permanent grip of the lock, means that every wire will stand its full strain. The "Safelock" is absolutely the strongest wire fence made—you can sell it as such and the test of time will bear you out to the letter. There's good money in handling "SAFELOCK." Write us about the exclusive agency for your locality. Don't put it off—Write to-day.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

QUALITY—There is a finish on the "BUCO" which makes it look like a good tool, but there is a better quality in it than any surface could reveal.

The "BUCO" Garden Cultivator.

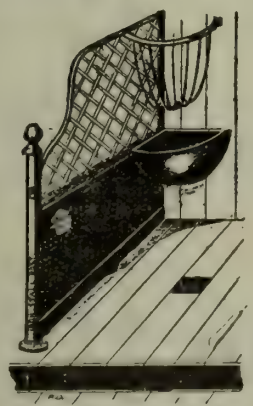
Handle 4½ft. Long

If you could see INTO the Teeth—the vital parts—you would see a highly refined steel, tempered to perfection in oil by experts, resulting in a spring tooth of a quality such as is quite unusual in garden tools. This degree of perfection is not superfluous, but means greater snap in work and longer life at it. The extra price does not count where extra quality is known.

The "CUMA" CULTIVATOR

Total Length, 18in.

A most effective little tool made for flower beds and fine work. Same quality as the "Buco." Sells at sight and "does the work" afterwards.



The Bailey - Underwood Company, Limited

NEW GLASGOW, N.S.

ONE of the most successful retailers of late years says: "When a firm advertises in trade papers it is getting into good company. As I pick up one of a dozen of these periodicals here in my office, and glance through it, I find that the best people, the successful firms, are represented in such a way as to reflect their importance in the trade."

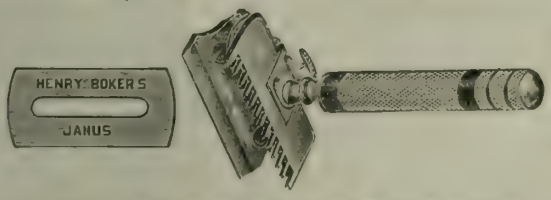
Maple Leaf 1900 Saw

MADE IN HAND, RIP AND PANEL—HOLLOW OR STRAIGHT BACK.

Are you handling the **"Maple Leaf" HAND SAWS?** the line with quality as the first consideration and that shows you the margin of profit you should get.

If not, we can offer you a proposition second to none—one that will appeal to you as a good business man. We have prepared special advertising features for the spring trade that every hardware man in Canada may have the advantage of. This advertising is done direct to the carpenter on our **1900, 100** and **"Narrow Point" Hand Saws.** We are packing the 1900 and 100 in separate canvas bags and have adopted a retail price which is stencilled on each bag.



We will be glad to supply you with full particulars.

The Newest and Best Safety Razor
Henry Boker's "Janus"

Triple Silver-Plated Holder and Twelve Double-Edged Blades

These Blades Can Be Stropped, Which Makes Them Last Indefinitely.

The "Janus" is the most wonderful little instrument ever devised for taking the beard off the face. A single movement releases or inserts the blade. The holder is in one piece. There are no parts to adjust—nothing to learn. It is simplest in construction, easiest to clean. Once the blade is inserted in the holder it is absolutely rigid. There is no vibration. No shaving instrument ever devised approaches it in any particular. The steel nsed in "Janus" blades is made by Boker's process, which is known the world over as the very best. We guarantee this Safety Razor to shave to perfection.

IT IS PERHAPS NOT GENERALLY KNOWN

That we have an Information Department, consisting of trained and practical men, whose time is employed solely in answering enquiries from people interested in cement.

NOW IT WILL BE READILY UNDERSTOOD

that out of the mass of enquiries that come to us, there are a number that include questions as to what might be termed Allied Industries. These we now answer to the best of our ability, but we could answer them still more satisfactorily if manufacturers of materials used in conjunction with cement would co-operate to the extent of sending copies of their catalogues and other literature, to be placed on file in our office for reference.

WE SHOULD LIKE TO OBTAIN

the names and addresses, together with catalogues, and any other obtainable information, of manufacturers of and dealers in:—

(1) CONCRETE MACHINERY. (2) BUILDING BLOCKS. (3) CEMENT BRICKS. (4) TILE MOLDS. (5) FENCE POSTS. (6) REINFORCING MATERIAL. (7) WATER-PROOFING COMPOUNDS.

It is not alone for our own convenience that we make this suggestion—firms who manufacture or deal in such articles will find it to their own advantage to have this information in the hands of our Information Department, thereby enabling us to hand on to them, from time to time, enquiries for such materials as they severally make.

In sending catalogues, literature or information, please address same to "Sales Department."

FENN'S
Adjustable Post Hole Auger

holds undisputed pride of place as the fastest digging tool on the market, and for this reason alone is a splendid line to handle and recommend.

Moreover, it is simple in construction, stands abuse well, and has no castings to break or rivets to work loose. Blades are of highest grade steel bolted directly to standards, and the "Fenn" can be adjusted to dig different sized holes. Digs a full size hole clean to the bottom, and works equally well in any soil. Better send along for prices and fuller description of this splendid tool.

It is a line that sells readily and profitably. Write us to-day. Descriptive booklet forwarded free to enquirers.

TRADE Gillette MARK

KNOWN THE WORLD OVER

Show the Man Who Would Like a GILLETTE That It's Cheap at $5.00

When the customer whom you have brought to the point of buying a GILLETTE, passes it up with, "I'd like mighty well to have one, but it's too expensive," what do you say? Do you let him get away from you?

You need not lose sales on that score, for the GILLETTE is **not** too expensive. It is not an extravagance, but an economy, and you can prove it to him.

Give him a comparison something like this:

An open-blade razor of fairly good quality would cost him $2.00 to buy, and probably 50c. a year or more to keep honed and stropped. That's $3.00 for the first two years.

The GILLETTE, with its 12 double-edged blades, would cost him $5.00, and extra blades for the first two years might possibly run into $3.00 more. That's $8.00 for the first two years—a difference of $5.00, or $2.50 a year.

BUT—the three-minute GILLETTE will save him 5 to 10 minutes every time he shaves. Putting it conservatively at 5, this saving amounts to over three working days a year. Would he work three days for $2.50?

When he has barely time to catch a train or keep some important engagement, the five minutes saved might easily be worth the whole cost of the GILLETTE.

Then there is the ease and comfort of the clean, cool, easy GILLETTE shave, worth in itself several times the difference in cost.

It's worth your while to be prepared for this price objection, and to meet it squarely. The GILLETTE gives you far more profit at the time, and a regular annuity on blade sales. Moreover, it brings back to your store, regularly, a pleased customer to whom you can sell other lines as well.

TRADE H&R ARMS CO. MARK

Specifications, 12 to 28 gauge—26 to 32 inch barrel—ejecting or non-ejecting—fine black walnut stock—hard rubber butt plate—weight 5¾ to 6½ lbs., according to gauge and barrel. For black or smokeless powder.

¶ These guns are quick sellers. They are made and sold under the broad H. & R. guarantee of quality, reliability and satisfaction. With a few of these H. & R. guns in stock, the hardware dealer is equipped for a profitable and increasing trade.

Our 40-page catalogue is yours for the asking. It contains valuable selling points for every hardware dealer and shows the complete H. & R. line. Ask for it now while you think of it.

Harrington & Richardson Arms Co., 715 Park Avenue, Worcester, Mass.

REMOVING THE APPENDIX

Would you have this operation performed by some doctor who offered to do it cheap or by an experienced successful specialist ? We know the answer.

The same principle applies in many other directions. There has been a wonderful change in the intellectual broadening of operative Engineers and Mechanics. They are no longer satisfied with merely keeping the machinery in good running order. They start in at the coal pile and study the califoric power of fuels in thermal units, the firemen are put through a school of instructions, and they study economies and scientific problems in many other directions,

BUT How many Engineers and Mechanics figure on the loss from frictional resistance in transferring the power from the boiler to the points where it is needed ?

More than half of the power is often absorbed in that way and yet many up-to-date men use or permit to be used the most ordinary grades of babbitts because of the slight initial saving in the cost price.

It Is Plain as an Open Book

that the value of a genuinely good and economical bearing metal is summed up in and expressed by a low co-efficient of friction.

A low co-efficient of friction means less frictional resistance, less wear, less heating, less oil, less fuel, less liability of shut downs, less rebabbitting, less consumption of metal, less squashing, less worry, less work. You can secure all of these economies and other advantages by the use of

Magnolia Metal

and we recommend its uses on shafting as well as all other bearings. We represent the specialist who does one thing and does it well.

Special Offer

PRACTICAL ENGINEER POCKET BOOK, 680 pages, over 2,000 subjects. We do not aim to make a profit on this book and therefore offer it at the very low price of 40c., postpaid. Many Engineers write to us that they find it invaluable Address Montreal office.

The COCHRAN PIPE WRENCH

And here is one of the secrets of its success, that users can see without your telling them—the rocker bearing that takes the strain which in ordinary wrenches is thrust upon the helpless frame pin. Any wonder it wins out? You can give a side twist or a sudden jerk and you make no impression on this rocker feature.

and it speaks for itself—good, strong selling points, too. Look at the bend in the hook jaw—see how strongly it is re-inforced? Powerful grip, with a quick get-away. It never locks nor crushes a pipe—guarantees not to.

FRAME AND HANDLE ONE SOLID PIECE

No small parts to keep together. Nut longer than on other pipe wrenches, reduces strain on threads. Cannot bind and gravity alone brings instant release.

Now don't calculate or guess what this wrench will do—you are enough of a mechanic to recognize the logical facts we set before you—the Cochran Wrench will do what we claim for it. Send us a trial order—our guarantee protects you—the progressive workman wants up-to-date tools—you can't afford to let your competitors get them before you do

A busy scene in part of Trinidad Lake digging asphalt for Genasco Roofing

Building for the Future

You who expect your business to go on next year and every year, and increase in volume and profit, are just the man to sell Genasco —the Trindad Lake Asphalt Roofing. Your customers build for the future, and they want Genasco because it is the roofing that lasts. It is the roofing that doesn't cause trouble or discontent; it gives continued satisfaction.

Genasco

the Trinidad-Lake-Asphalt Roofing

is permanently waterproofed with *natural* asphalt. The natural oils keep it full of life and vigor, and make it strong to resist rain, snow, sun, wind, heat, and cold. It is vastly different from ordinary roofings made of artificial asphalts, coal tar, or mysterious "compositions", which soon crack, break and leak. The reason is clear---ordinary roofings lack the life of natural asphalt, and their end is speedy and certain. Genasco dealers not only have the backing of "real quality", but the continuous and forceful advertising campaign for Genasco makes selling easy.

The Kant-leak Kleet is a leak preventative

It is a great feature that goes with Genasco. Makes seams absolutely water-tight without smeary cement, prevents nail-leaks, and doubles the satisfaction to your customer. Genasco is made in mineral and smooth surface---several weights. Fully guaranteed.

GENASCO · THE STANDARD OF EXCELLENCE · TRADE MARK REG. U.S. PAT. OFF.

Those Cheques That You Will Have to Send Stove Concerns

WHAT WILL YOU HAVE GOT FOR YOUR MONEY?—JUST STOVES—OR REAL CLASSY STOVES—
OR SOMETHING MORE

A hardwareman has a lot to look after in the day's routine—Stock-keeping—Sales of about one hundred different classes of merchandise—Books—Window display—Collections—Pricing—With the variety of wares that a live hardwareman must handle, it's a difficult, almost impossible thing to study and use effectively every last modern wrinkle for the retail sale and advertising of a range—a real specialty.

Now we do that work for Gurney Oxford dealers. We have men who know the subject of stove retailing—know what a dealer needs to really help him corral the business in his neighborhood. We have prepared a book on this subject, showing exactly what we can do for you, Mr. Stove Dealer. Just exactly what aids are yours for the asking—What gratis assistance we will give you to pull business to your store.

SPEND THE TIME IT TAKES TO WRITE A POST CARD—AND GET THIS PROPOSITION—READ IT OVER. THINK OF IT APPLIED TO YOUR STORE.

Better be the Gurney-Oxford Dealer this year than the man against him.

Motor Supplies Offer Opportunity to Sure Profit

Hardwaremen Should Cater to the Needs of the Motorist—A Steady Demand is Assured—Splendid Opportunities is Sale of Dry Batteries—Display is a Potent Factor in Sale of Sporting Goods.

A splendid opportunity has been neglected by a large proportion of hardwaremen. The handling of automobile sundries offers a wide scope for profitable trade; but how many hardware dealers are carrying motor car supplies? The proportion is not nearly as large as it might be in view of the circumstances.

In the first place, motor supplies are a legitimate hardware line. Tools, batteries, gasoline, are all in the province of the hardware dealer. In the second place, the hardware store is the only place in many sections where the motorist can go for supplies. The garage is found only in cities and large towns, and electrical stores are not found everywhere. The result is that in many sections the motorist has nowhere to turn. If he runs short on gasoline, he goes to the nearest hardware store and gets a supply, but if he needs anything else, he is in a fair way to be stranded. The hardware store may perhaps be handling dry batteries, tools and motor repairs; but it is two chances to one that it won't, and the owner of the car will have to lay up until he can get the necessary goods shipped out to him.

The hardware store is the place to which the motorist naturally turns, if there is not a garage in sight. The dealer does not, therefore, find it necessary to fight for recognition as a handler of automobile supplies. His trade is already made for him. Furthermore, the demand is not of doubtful extent. It is continuous and growing larger every day. It is highly satisfactory, for the average motorist is willing to pay the price and pay it down. He is almost invariably a man with sufficient of the "root of all evil" and is much more interested in getting what he requires and starting again on his trip than in haggling over charges.

It is a wise plan for the hardware store to carry a fairly complete line of motor necessities. The stock is not bulky, it is easily handled, and carries a good margin of profit. In many sections there would be absolutely no opposition and a fairly continuous demand. Is there anything to be said on the negative side of the question?

Went After the Trade.

If a thing is worth doing, it is always worth doing well. Therefore, if motor supplies are taken up, it pays the dealer to handle the department on an up-to-date basis. A sign of some kind should be put up at the front of the store, to show that such goods are carried. Other measures of attracting business have been resorted to with a considerable degree of success.

For instance, a hardwareman in a western Ontario town, placed neatly-framed signs in all the hotels in the place, calling attention to the fact that he was in a position to supply motorists with everything they might need. By this means he secured more business than would otherwise have came his way. Motorists who stopped at any of the hotels invariably came on to his store, if they happened to be needing anything.

Handling of Dry Batteries.

There is always a good demand from the drivers of automobiles for dry batteries, but the trade in this line is not in any sense confined to motorists. Every householder who boasts a door bell will need batteries at some time or other, every farmer who operates an engine will be a steady customer. The possibilities of trade are unlimited.

Last fall, in the middle of the harvesting season, a manufacturer interested in the production of electrical supplies happened to be touring through a section of the west in an automobile. He was almost amazed at the difficulty experienced in getting dry batteries and other supplies. Gasoline could be obtained at practically every hardware store, but the accommodation stopped there. They had to carry supplies with them in large bulk or count on being stalled regularly.

In the neighborhood of Souris, Manitoba, they stopped at a farm house and found the proprietor reduced to a state of almost distraction. He had run short of dry batteries and could not operate his engine. Consequently, work had been stopped, and as it was the busiest season of the year, the farmer saw dollars melting away with each hour that work was held up. Enquiry elicited the information that there was not a store within a radius of many miles which handled dry batteries. The farmer had to wire to Winnipeg and pay the express rates on a package of batteries. The expense, not counting the time lost, was in excess of what the goods would have cost him at a local store. The loss was not entirely the farmer's in this case; the merchants who would have got the trade, had they carried batteries, lost something as well.

Trade is Growing.

Electrical lines and motor supplies are gradually being taken up now. Many dealers have embarked in this new enterprise during the past year or so and have found it highly profitable. The St. Mary's Hardware Co. started in the dry battery business last fall and have been getting a good share of business. Most Toronto hardwaremen are now in the same line and are finding it highly profitable.

Sporting Goods Department.

The handling of automobile supplies is quite in line with the carrying of sporting goods—and practically every hardwareman is now doing a lively trade in that respect.

The sporting goods department is well worth attention. The demand is not confined to any one season. During the winter the curlers, hockeyists, skaters, etc., hold the boards; in the spring the fishermen and trap shooters are busy; in the summer and fall, the baseball, lacrosse, cricket, football and tennis enthusiasts are active; the golfer is pretty much an all-season man. There is, consequently, an almost continuous demand, with only brief periods of inactivity.

Display sporting goods well and sales will follow quicker perhaps than is found to be the case in any other department. The desire for possession is awakened in the sport lover by the sight of a particularly desirable article. A fisherman has not the power to go past a display of tackle, rods, etc., without stopping, any more than he has the will power to resist the temptation to buy if he has the price handy.

Last week Warren & Ellis, Yonge St., Toronto, exposed half a dozen canoes for sale on a narrow strip of vacant land adjoining their store. In three days, only two of them were left, and a number of parties were negotiating for the remaining pair. If it were found possible to clear out a stock of high-priced articles in such expeditious fashion, merely by displaying them to advantage, it should be possible to work wonders in the same way with smaller and cheaper articles.

The Ideal Buyer

Will be Truthful and Courteous to Travelers—Will Not Play One Traveler Against Another— The "What-is-There-in-it-for-Me" Type of Buyer Despised—It Pays to Win Respect of Traveling Salesmen.

By A. Fraser Little.

Manager and Buyer, Regina Trading Co., Regina, Sask.

The ideal buyer is first of all a man of character—a man who can be trusted; whose word is as good as his bond, and who never betrays confidences.

He is a man of few words, who thinks before he speaks, who knows what he wants; who sees all that is to be seen; hears all that is to be said and then honestly exercises his own best judgment in the selection of his goods. No honorable ideal buyer, in order to obtain lower quotations, will stoop to the method of telling Jno. Smith, the traveler, that Tom Jones, his competitor, offers a line at 10 p.c. less, whether this fact be truthful or otherwise. He will first thoroughly inform himself on the market price, quality, style, etc., and then buy his goods where he finds the best assortment and values. He will do these things without quibbing, bartering or bantering.

The commercial travelers will thus soon learn that to win his business they must at once offer him their best, at their lowest figures. Furthermore, they will not hesitate to do this because they have learned that he is honorable, that he will not divulge secrets, that any special advantage offered him will not be "advertised."

Because it is Right.

The ideal buyer will be as thoroughly courteous to those who are seeking favors as he is to those of whom he may be seeking favors. He will do this because it is right to do this and because he knows that to-morrow he may have occasion to ask favors from the seller who to-day is asking him for favors. He will treat the commercial man as a gentleman; he will, in justice to himself, in justice to the firm he represents, never decline to inspect desirable goods that are already displayed in the traveler's sample room; he will keep all appointments which he makes.

Account Worth Cultivating.

Then, too, knowing the power that comes from concentration, he will not scatter his orders and make numerous small purchases from numerous houses; instead, after informing himself on the market, he will buy from the fewest posible houses so as to make his account worth cultivating. He can reasonably expect better treatment in the way of special prices, terms, discounts, etc., from any one house from whom he buys say $10,000 worth a year than from any ten houses from whom he buys only $1,000 worth each year.

Free From Undue Influences.

The ideal buyer must be thoroughly independent; this is very important, nay, imperative. He must be free from all undue influences on the part of the commercial travelers. He must accept no gifts, no inducements whatever from him. He must be clean-handed, for what is more to be despised than a buyer of the what-is-there-in-it-for-me stamp?

Will Win Their Respect.

He must be able to judge between the competing articles or lines of goods purely on merit. The commercial man must be made to understand that the buyer can be appealed to in but one way only —the best goods and service at the lowest prices. By strictly adhering to this policy, the buyer may not win the title among the commercial travelers of being "a good fellow," but he will win something of far higher commercial value. He will win their respect, their esteem and their confidence.

The Man Who Knows.

The ideal buyer will never go to a sample room with his mind at a loss to know how much or what he means to buy. In his own office he will carefully have prepared a memoranda of the limit of quantity, etc., he plans to buy of every particular line, and he will confine himself as strictly to such limit as his memoranda calls for, as the market or the changes in style will permit. He is thus likely to be saved the mistake of over or under buying—faults that often seriously cripple the department or house for which he buys.

His Purchases Will Have Merit.

The ideal buyer, as a rule, follows the policy of buying lightly and replenishing frequently, as this policy will demand the least capital, give him the freshest assortment, lessen his losses on over-stocks, and place him in a position to profit by the mistakes of others who over-buy or overload in thus being open to handle in consequence their clearing surpluses.

Individuality of Value.

Then, to avoid needless price-cutting, the ideal buyer will strive as far as possible to secure exclusive styles and brands. These styles and brands and designs he will offer will have merit and will not readily be found among his neighbors or competitors. This will give to him an individuality that will have an important commercial value.

Some Hints on Buying Rope

The Term "Pure Manila" Not an Infallible Guide—Breaking Tests Impracticable for Most Purchasers—How to Detect the More Common Adulterations — Reputation of Makers a Good Guide.

At a time when the purchase of all sorts of materials on specifications is coming near to being the rule with the most prudent purchasers, it is a matter of some practical importance that one of the most commonly used materials—namely rope—does not readily lend itself to specification. It is, of course, easy to say that any proposed rope supply shall be "pure Manila," shall weigh a certain number of pounds for a specified length, and shall have not less than a certain specified breaking-strength. Breaking-strength tests, however, are not practicable for the ordinary purchaser of rope, as, for instance, the contractor who needs a new rope for a hoist, and propbably needs it in a hurry. Such tests, though difficult to make accurately enough for comparison of different brands, have a high value in their proper place. But it is not true, to take one example, that ropes of the same breaking strength are equally good for the purchaser. Of two equally "strong" ropes, one may be of greater diameter, and so may cost more, being sold by the pound, than the same strength in a smaller and really better rope. Breaking tests, moreover, prove nothing as to the comparative durability of two ropes under the conditions of actual use, exposed to the weather.

"Pure Manila" Used in Different Qualities.

Insistence on "pure Manila" might seem to be enough for the comparatively small purchaser, and this test, if it can be enforced, certainly has a certain amount of merit, provided the inspector knows Manila from Sisal, for instance. So-called "pure Manila rope" has been found on the market which was made, not of Manila, but of sisal from discarded binder twine. Some of the grosser adulterations, like loading or lubricating of the core of rope "in order to reduce friction and prevent breaking of the fibres" — and incidentally to add weight to the rope—can be discovered by the inexpert.

But even "pure Manila fibre" does not tell the whole story of the final quality of the rope. Give two cooks the same amount of pure apples, pure flour, sugar, lard and salt, set each cook to making a pie, and the two pies will inevitably, or almost so, turn out to be of quite different quality when they come

from the oven. Everybody knows that this question of skill in manufacture is of the utmost importance in relation to pies. Yet people spend many thousands of dollars on rope, even on "pure Manila rope," without seeming to recognize that it is more difficult to make a good rope than a good pie; and that with rope, skill in manufacture is almost if not quite as important as the character of the fibres of which the rope is composed.

Great Deal Depends on Manufacturing Skill.

Workmanship in rope making is of the greatest importance to the purchaser. Give two rope-makers each a thousand pounds of the best Manila fibre, long and well dressed, and those two rope-makers will turn out ropes almost certainly of unequal strength. The strength of a rope depends upon the friction between the fibres of which it is composed. The amount of this friction, and so the strength of the rope, depends on the way the fibres are put together. The rope-maker with the greater knowledge and skill in putting his fibres together will get the most friction pull between the fibres, and will make the strongest rope.

This is true not only of the longest Manila fibre ropes, but is equally, or perhaps even more, true in ropes which have to sell for a price that will not allow of making the rope wholly of the longest fibres. Ordinarily Manila fibre ranges in price from 4½ to 8 cents a pound, and because of the demands of purchasers, much rope has to be made of a mixture of various grades of Manila, all of it "pure Manila" so far as its being real Manila is concerned. But in rope of this grade the question of skill in manufacture is even more important than in rope made of long fibres. To go back to the illustration of the two cooks, it is a question of making a good dish out of odds and ends of meat. As every man knows, many a cook who can make a delectable angel cake, or turn out a good roast of beef, can't put odds and ends together with a crust and flavor the whole thing so that it makes a "bully" dinner dish; and other cooks can do this.

It is the same with rope of several lengths of fibre. Here the skill of the manufacturer counts for everything in combining the fibres so as to get from them the utmost possible strength. It is a fact that a very skillful maker can get a better rope out of mixed lengths of fibre than an unskillful maker can get from all long fibre.

Durability the Main Requisite.

Besides the question of strength, the purchaser has to consider another question—that of durability under the actual conditions of service. A cheap rope may serve well for a time, and finally go to pieces, not because of too much actual pull on it, but because it is so unskillfuly made that it rapidly falls apart under small twists and kinkings, wetting and drying, and other more or less accidental tests due to practical use. Durability is the result of good workmanship.

Therefore, we come down, finally, to the choice of a first class brand of rope as the most practical way in which the ordinary buyer can protect himself. Reputation for good rope means even more than good workmanship in making rope; it also means knowledge gained only by experrience of the most efficient scientific bending of fibres. When such a reputation has endured for a long time, the buyer may be assured of the best value, and the best rope. There are few manufactured products in which knowledge and skill in making are so important to the quality of the product as in rope, and few products in which unskillful making is so little evident to non-expert inspection.

A System for Guiding the Buyer

Keeping Record of the Store's Selling Capacity — Value of Knowing Sales of Previous Years — A System Successfully Carried Out by Watts & Bate, St. Catharines.

To prevent haphazard buying and contract making, Watts & Bate, of St. Catharines, Ont., have a very effectual though simple system, of recording sales of their principal lines, month by month.

The object of this system was to keep the management more closely in touch with the business, but more especially, to place before the buyer, a summary of business done, which would guide him in making contracts for a season's supply, or in specifying deliveries on contracts, or even in placing regular orders.

How it Works Out.

To illustrate the point more clearly, Suppose a traveler selling screen doors, offers a very attractive price proposition on an order of thirty dozen doors. This might look like a very large quantity, to the dealer, and he would hesitate about taking advantage of the low price, through fear of having a considerable portion of his stock left on hand. If he had a record book handy which could tell him, in a minute's time, that he had actually sold twenty-five dozen screen doors the previous season, he would have little hesitation in contracting for thirty dozen, considering the increasing public interest in the anti-fly crusade.

Helps in Making Specification.

There is another point in which this record is of great assistance. It would not be of much assistance in making up a specification, to know the total number of doors sold in a season. Probably four, or at any rate three lines will be carried in stock—to sell, say, at $1.50, $2 and $2.50. The dealer who has not a grip upon his business, would be at a loss to know what quantities of each kind to specify, and it might prove a serious detriment should he stock too many of the first grade, and too few of the cheaper lines.

The record of the past year's sales, which would tell him how many of each line he sold, would be invaluable to him, for he would naturally be safe in specifying in the same proportion, for the coming season. Moreover, he would know to a nicety what deliveries to specify, because his record would show the sales of the previous season, month by month.

No Red Tape.

As carried out by Watts & Bate, this system entails no red tape, and it is so simple that Mr. Watts finds himself able to keep it up without assistance, by spending a short time on it, once a month.

An ordinary account book is used for this purpose. A certain number of pages are allotted for each of several lines such as cement, wire fencing, rope, screen doors and windows, nails, and other goods which are ordered in considerable quantities. At the end of each month, Mr. Watts runs over the invoices which have been received during the month, and enters under each head the quantities which have been taken into stock. For instance, in the case of cement, the book might look something like this, at the end of the year:

CEMENT—1910.

	Usher's	Portland.
January	90	
February		
March	50	226
April	226	226
May	450	900
June	226	900
July		226
August	50	50
September		90
October		
November		
December		
Total		

Watching Yearly Progress.

Watts & Bate have kept this record ever since they have been in business, and any time that they desire to know how trade in any particular line has been progressing, it takes only a few minutes' time to secure the information. If it is learned that business has fallen off in any line, an explanation of the fact is immediately sought, and greater energy applied to that branch of trade.

This is the kind of system that makes business a pleasure, instead of a continual worry. The dealer who can keep close tab on his business by having it properly organized, without working himself day and night, will be a better business man and will keep his health longer than the one who is satisfied to plod along with only an approximate idea of where he stands.

SECURING THE NEW FAMILY'S TRADE.

At this time of year, every neighborhood witnesses somewhat of a change in population. The moving microbe is in the air, and people are migrating from one town to another, or from one section of a town to another. New families are setting up their households within an easy radius of nearly every hardware store in the country. And they will all need hardware.

Moreover, the months of May and June are notorious for the numbers of absolutely new families who "take up house." This is the season of weddings, and every wedding means a prospective annuity for the hardwareman, if he will but take the proper steps for making himself solid with the new families.

In the larger cities, retail merchants of all kinds carefully watch for newcomers in their district, and lose no time in making themselves acquainted. Young couples, upon returning from their honeymoon, are likely to find their letter box choked with letters, circulars and cards, telling them where to buy this, that and the other, and these cards are soon followed up by personal calls.

It is surprising how small a circumstance will sometimes start trade going through certain channels. A personal solicitation of a new family's orders may result only in the immediate sale of a package of carpet tacks, but a continuance of their patronage is almost certain, if their initial order is courteously received.

A RECORD YEAR OF SCREEN SALES.

Every condition is favorable to the largest business in screen doors and windows, that has ever been done in a single season. The sudden warm spell which ushered in the late spring, is likely to cause an equally sudden attack on the part of the "typhoid fly," which will be swarming into the unprotected houses, in a very short time.

It is safe to say that every one who reads, is in a mood to buy screens. The newspapers, as well as the weekly and monthly magazines, have devoted an extraordinary amount of space to this subject, and strong articles by famous medical men and experts on sanitation, have aroused the public to the great danger of admitting the typhoid fly into their dwellings.

The extermination of this pest, is a big problem which will take years of unremitting effort, to solve. An easy method, however, is available for shutting the fly out of homes, stores and hotels, and thereby rendering it comparatively harmless. This method consists in screening every entrance, whether it be door or window, and it is being advocated so forcibly, that there are few who do not recognize, in it a ready means of protection against the disease germs which are disseminated by the house fly.

Let every hardwareman become an active crusader in the so-called "swat the fly" campaign. With the co-operation of the local newspaper, public sentiment may be worked up to the buying point, and judicious salesmanship will do the rest.

A large Hamilton hardware store sold over two hundred screen doors in one day, last week, as the result of a well designed advertisement, followed up by tactful solicitation of customers, on the part of every clerk in the establishment. This one instance shows what possibilities there are in the screen door business, and it should encourage every dealer to unwonted exertions during the next few weeks. Advertise screens, push them hard from behind the counter, and make up your mind that, if you sold ten dozen screen doors last year, you will make it fifteen dozen this season.

SIGN PROVES BAD ADVERTISEMENT.

The writer has had occasion to pass a certain hardware store several times during the past two weeks. The first time there was a sign in the window, "Special Sale To-day Only." The second time, although several days had elapsed, the sign was still there. It has remained in the window ever since and bids fair to become a permanent fixture.

As a means of drawing trade, that sign lost all value long ago. It has now become nothing but a public evidence of the indifference of the dealer and the carelessness of his methods. Furthermore, it bids fair to deprive the dealer of the oportunity of ever holding a bona fide sale. If he happened to announce one, people would not know whether the announcement referred to something real or an event which occurred at some remote stage of the store's history.

The public are quick to note such things. They judge a store pretty much by outside appearance and that sign is one of the poorest advertisements a store could have. Every dealer may well look his premises over and see if he has unwittingly been allowing anything of the kind to give his store a bad appearance.

CONSIDERATION DUE THE TRAVELER.

The attitude of the merchant toward the traveling salesman should be based on business principles. The merchant should accord to the representative of the manufacturer and jobber the same consideration and attention that he in turn expects from his customers.

This is not always found to be the case. A contemporary, the Ironmonger, cites the following incident to show what the traveleing man has sometimes to contend with. The senior partner of a big importing house, being not altogether satisfied with the returns of a junior traveling representative, called the young man into his room and asked him to give a demonstration of how he tried to sell merchandise. The traveler did so in a manner, respectful, dignified and convincing, but the proprietor thought that he could improve upon it, so he told the salesman to set at his roll-top desk and play the part of a retailer, while he went outside to act the drummer. The chief, outside the room, knocked at the office door. No answer. He knocked again and louder. Still no answer. So he opened the door and walked in, to find his erstwhile salesman with his feet on the roll-top desk and a pipe in his mouth. "Get out o' here!" he shouted to

the supposed salesman. "But you don't know what I ——" "I don't want to know ! I don't care what you've got, or who you are !" blared the man at the desk. "You're the sixteenth salesman who's called here to-day, and that's enough for me. Git !"

This anecdote may be tinctured with a certain degree of exaggeration but it is nevertheless true that the traveling man frequently has to face indifference and even discourtesy. It is in the interests of the retailer to at least give the traveler a hearing. He may have something worth while to sell and, in any case, is a fellow salesman and as such deserving of friendly consideration.

An unfair burden placed

The situation created by the passage of the new "Offensive Weapons Act," is in many respects unfortunate. It threatents to seriously cripple a legitimate branch of trade, it imposes very trying restrictions and duties on both wholesaler and retailer, and creates a total loss on all unnumbered revolvers carried in stock.

It is quite plain that those who drafted the measure did so without considering the question from every standpoint. The result was the drafting up of clauses which, now that they are law, hamper trade in a manner that was surely never intended. Had the lawmakers paused to consider the position of the wholesaler and his relation to the retailer, they would doubtless have planned out the measure differently from the way in which it stands at present. It is, therefore, quite apparent that a wise move would have been to have heard from the interests most affected, before putting the measure through the Legislature. Even now that it is through, the matter should not be allowed to drop until some provision has been made to remove the unfair burden placed upon the hardware trade.

The intention behind the Act is good. The prevention of crime is a first necessity. But to enact a measure so sweeping in its nature that it is bound to hamper trade and cause heavy losses, when there is no necessity, is unfair to the interests affected.

COURAGE NEEDED IN BUSINESS.

To be successful in the retail business, a man requires to be gifted with a considerable degree of courage. In the course of every business, problems will arise which the proprietor cannot evade, but which involve a certain amount of risk. For instance, many a merchant is anxious to put his store on a cash basis but stands, as it were, trembling on the brink, fearing to take the plunge for fear of unforeseen consequences. Others keep their stores open every evening although they feel convinced that it would pay them to close at an early hour. They are held back again by that lack of courage to go ahead and do the thing, which they know to be right and sensible.

The wise merchant takes the plunge and comes out on the right side—the side of larger profits and better business. The timid trader remains on the other side and looks longingly across, but is continually kept back by his fears and scruples.

Recently the management of one of the largest retail hardware stores in the country decided that it would be wise to close at an early hour on Saturday evenings. Investigation showed that the amount of business done on Saturday evenings was so large that to close early would seem like deliberately lopping off a large percentage of the business. The management felt that the trade would come back some way or another, but the risk looked big. Finally, however, they took the step and set an early hour for closing on Saturdays. The results more than rewarded them for their courageous attitude ; not even at the start did the volume af business, calculated by the week, show any diminution. It was soon found that Monday's sales had been doubled and that the other days of the week had each received a share of the business which the staff had formerly devoted Saturday evenings to securing.

POINTED EDITORIALS.

Canada is the chief market for the tin plate exported from the United States. It is said that nine-tenths of the total shipped out comes to this country.

* * *

The aggressive retail salesman never has something "just as good." Instead, he always has something much better and, what is more, he is able to prove it.

* * *

We notice that quite a number of hardware merchants are adopting the "Store News" style of advertising. It is very effective, as a change, when the idea is properly carried out.

* * *

The opening of the Eastern League baseball season, in the Canadian cities, this week, will inflame the "fans" all over the country, and provide an impetus to business in the sporting goods department.

* * *

The sudden change of weather, this week, has started off spring business with a rush, and retailers in every line, are benefiting. Hardwaremen are getting a big share of the money which has been loosened by favorable weather conditions.

* * *

A correspondent of the London Graphic relates that he witnessed in Fez the hanging of a merchant by the wrists until he was dead for giving false measure. The pursuit of business in Fez seems to be attended with a greater degree of risk than most men would care to incur.

* * *

The high price of linseed oil is boosting the sales of prepared paints, this season. Those who formerly bought their lead and oil separately find it much more economical to use mixed paints, which have not advanced proportionately with linseed oil.

* * *

Several hardware dealers are reported to be engaged in stock taking at the present time. The adage "better late than never," probably holds true in such cases but the loss to trade experienced by leaving off the making of an inventory to this busy time, will be very serious.

* * *

Advertising is a salesman that is always at work, but never wearies a customer; that calls on the same man until he is convinced, but never annoys him with his insistence; that wastes no time, wastes no words, and that can always gain an audience and a hearing. Alone among salesmen, advertising has free access to the libraries of President Taft and Mr. Morgan; it marches unchecked past the secretary of the big merchant and enters without hindrance the store of the retailer. When it cannot tell its story to a man in his office it can always gain his attention in his home. No country is so remote, no village is so dead, that it does not go there for orders and get them.—Saturday Evening Post.

Strong Objections to Fire Arms Act.

Conference With Heads of Attorney-General's Department Not Arranged—Dealers Complain That Their Trade Has Been Stopped Entirely—Wholesalers Have Refused Oredrs—Some Opinions are Expressed.

The situation with reference to the sale of goods which come under the restrictions in the new "Offensive Weapons Act," is becoming more acute each day. With the power thus placed in the hands of the police, it is possible that in some sections the sale of revolvers will be stopped almost entirely. The restriction bids fair to become a practical prohibition.

It is working out that way in Toronto, according to the retail dealers. A representative of Hardware and Metal visited a number of dealers in the Queen City this week and found that business in revolvers with them was at a standstill. "We haven't sold a revolver since the Act was passed," said Mr. Warren, of Warren & Ellis. "It looks as though we would not be able to sell any."

Mr. Warren stated that he had had a number of customers call and had directed them in each case to the police authorities. Some had decided to let the matter drop rather than bother getting a permit. Others had applied and had met with a polite but firm refusal. One who failed to get a permit was a young fellow who was going north prospecting. He wanted a revolver for purposes of self-defence; but the police did not see fit to grant his request.

Other dealers had the same report to make. Absolutely nothing had been done in the way of business and not a single case was found where a revolver had been sold. It is understood, however, that the provincial police have granted some permits.

Who Will Bear Loss?

This raises the question, who is going to bear the loss? If the same rigid policy is maintained, retail dealers will find it well-nigh impossible to dispose of their stock.

There will be some loss also for the dealer who has cheap revolvers in stock. It is not now possible to sell goods of this kind. The wholesaler, who has a stock of unnumbered revolvers on his hands, will possibly be able to ship it out to other parts but what will the retailer do? That resource will not be open to him.

A Protest Lodged.

A protest has been lodged by the Ontario Retail Hardware and Stove Dealers' Association. A circular and a copy of the act were sent out to each member.

Position of Wholesalers.

The position of the wholesaler is still undefined. Must a permit be received from the dealer before goods can be shipped?

Until such time as this much mooted question has been solved, the position of the wholesaler will be hedged with much uncertainty. Local jobbing houses are refusing orders for revolvers in the meantime.

It has been suggested that the difficulty could be solved by issuing traders' licenses to the dealers. It would still be necessary, under such a provision, for the public to secure police permits before purchasing but the dealer would be permitted to buy from the wholesaler without taking any other steps. Such a provision would relieve the trade of much troublesome detail and red tape but would still leave it in the power of the authorities to trace all sales right through the various stages of exchange from the manufacturer to the public.

Audience Not Arranged.

An effort was made to arrange a conference between the Attorney-General and a deputation from the wholesalers but so far nothing definite has resulted. The reply received from the department was to the effect that no good could be done at the present time.

There is a strong feeling among the wholesalers that a conference would result in much good. It would serve to untangle a few of the knots and straighten out the doubtful points. It would further serve to show the adverse effect the present measure is certain to exert on trade and to open the eyes of the authorities to the hardships, which will be entailed on wholesaler and retailer alike.

"It would have been better if we had been given a chance to state our position first," said one wholesaler, emphatically. "It is a case of the lawyers drafting laws for business men, without an eye to the best interests of all."

Will It Have Desired Effect?

There is a tendency on all hands to question the power of the new enactment to accomplish the object desired. It will be possible to secure revolvers from the other provinces. Unless this practice can be stopped, the Act will not prevent the sale of weapons to undesirables—for it would, of course, be the undesirable element who would resort to such a practice—until the other provinces adopt similar legislation.

Prohibit Sale of Cheap Goods.

Mr. Kennedy, of the Kennedy Hardware Co., when seen by a representative of Hardware and Metal, expressed the opinion that the measure as it stands now was bound to prove very detrimental to trade. In his opinion, the best way for the authorities to have grappled with the problem would have been to have prohibited the sale of cheap goods. This would have kept weapons out of the hands of undesirable persons.

Mr. Gilverson, of Rice Lewis & Co., stated that he trusted the matter would be adjusted properly soon. In his opinion such legislation would work better if made operative in all provinces, thus preventing the sale of revolvers in one province for use in another province where restrictions had been placed.

Measure Too Sweeping.

"While there is some reason for an enactment of this kind," declared another jobber, "it does seem that they are going out of their way to place restrictions of this nature. At least 99 per cent. of the revolvers are sold for perfectly legitimate purposes. People buy them to keep in the home or office, or for pleasure. Cannot some way be found to prevent the 1 per cent. from purchasing revolvers without cutting off the 99 per cent. of people who either need a weapon or desire one for pleasure?"

"The act is so drawn up that the wholesaler is seriously hampered," he continued. "In fact, we don't know where we stand and have been refusing to fill orders on that account."

Dominion Permits Needed.

It should be understood that the new measure does not provide for the carrying of weapons but refers only to the sale. In order to carry a weapon, it is necessary to have a Dominion permit just the same. This does not affect the dealer, however. He can sell to any person holding a provincial permit to buy, whether they hold a permit to carry a revolver or not.

How About Blanks?

Under the new measure, each dealer is supposed to keep records of every sale made and turn them in to the provincial department periodically. Blanks for this purpose are not provided, however, and apparently it devolves on each dealer to provide his own. So far, the writer has not discovered any dealer who has taken steps to get out regular sheets for that purpose. "I don't need blanks," said one man. "I am getting blanks every day in the way of sales."

The Granting of Permits.

It is explained by a government official that all persons who are going to some other part and are desirous of securing a revolver to take along, should apply to the provincial police department. This would apply to sportsmen, miners, prospectors, etc. In a case where a man is not leaving his home, his application should be made to the civic police

Methods of Securing Spring Factory Trade

How Pow & Wilcox of Tillsonburg Got Good Order for Files —Plans Adopted by Other Firms to Secure Business From the Manufacturers—A Good Demand for Glass, Paint and General Hardware.

To the merchant who concerns himself with plans to improve his trade connection, the present must appeal as a good time to get in touch with the factories. After the comparative slackness which prevails throughout the winter, the spring brings renewed activity in industrial circles. More hands are employed, longer hours are worked. It follows as a natural result, that more tools and supplies will be needed. Leather belting, grindstones, files, all the hundred and one articles which the hardware store supplies to the factory will be in greater demand than ever.

Now the manufacturer is proverbially busy. His time is so much occupied with the big things occupying his attention that he does not bother himself very much with the purchase of supplies in small bulk. As the necessity arises, he sends out and has whatever is needed bought at the nearest store. This, at least, is the method employed in many establishments. It follows that the hardwareman who manages to keep in touch with the needs of a factory will get the trade for that factory. At the same time, it will not do to merely send a circular or booklet around to the manufacturer. A notice that Brown & Co. have received a new consignment of saws and that they can thoroughly recommend them for factory use, would either reach the waste basket or be filed away and forgotten.
